Representing Yourself in Federal Court - United States District Court 2017-08-04

This Handbook is designed to help people dealing with civil lawsuits in federal court without legal representation. Proceeding without a lawyer is called proceeding "pro se1," a Latin phrase meaning "for oneself," or sometimes "in propria persona," meaning "in his or her own person." Representing yourself in a lawsuit can be complicated, time consuming, and costly. Failing to follow court procedures can mean losing your case. For these reasons, you are urged to work with a lawyer if possible. Chapter 2 gives suggestions on finding a lawyer. Do not rely entirely on this Handbook. This Handbook provides a summary of civil lawsuit procedures, but it may not cover all procedures that may apply in your case. It also does not teach you about the laws that will control your case. Make sure you read the applicable federal and local court rules and do your own research at a law library or online to understand your case. The United States District Court for the Northern District of California has Clerk's Offices in the San Francisco, San Jose and Oakland courthouses. Clerk's Office staff can answer general questions, but they cannot give you any legal advice. For example, they cannot help you decide what to do in your lawsuit, tell you what the law means, or even advise you when documents are due. There are Legal Help Centers in the San Francisco, Oakland and San Jose courthouses where you can get free help with your lawsuit from an attorney who can help you prepare documents and give limited legal advice. This attorney will not be your lawyer and you will still be representing yourself. See Chapter 2 for more details.

Corruption and Development in Nigeria - Ọláyínká Àkànlé 2021-12-27

Despite being Africa's largest economy and most populous country, with abundant natural resources, Nigeria still faces substantial development challenges. This book argues that corruption lies at the heart of many of the country's problems. Drawing on a range of different disciplinary perspectives, this volume explores the relationship between corruption and development, investigating the causes, contexts, and consequences of corruption, and the pathways for addressing it. As well as covering the wider background and theory surrounding corruption in the country, the book will investigate different sectors: the media, the judiciary, the health sector, industry, the criminal justice system, and of course politics and governance. The book concludes by considering attitudes and perceptions to corruption within Nigeria, current approaches to countering corruption, and future pathways to addressing the problem. This book's critical investigation of the links between corruption and development in Nigeria will be of interest to researchers of corruption, development and African Studies, as well as to policy makers, practitioners, and local stakeholders.

Analysis of Evidence - Terence Anderson 2005-07-11

This extensively revised second edition is a rigorous introduction to the construction and criticism of arguments about questions of fact, and to

the marshalling and evaluation of evidence at all stages of litigation. It covers the principles underlying the logic of proof; the uses and dangers of story-telling; standards for decision and the relationship between probabilities and proof; the chart method and other methods of analyzing and ordering evidence in fact-investigation, in preparing for trial, and in connection with other important decisions in legal processes and in criminal investigation and intelligence analysis. Most of the chapters in this new edition have been rewritten; the treatment of fact investigation, probabilities and narrative has been extended; and new examples and exercises have been added. Designed as a flexible tool for undergraduate and postgraduate courses on evidence and proof, students, practitioners and teachers alike will find this book challenging but rewarding.

Pain Management and the Opioid Epidemic - National Academies of Sciences, Engineering, and Medicine 2017-09-28

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Constitutional Law in Nigeria - Oyelowo Oyewo 2019-02-13

Derived from the renowned multi-volume International Encyclopaedia of Laws, this very useful analysis of constitutional law in Nigeria provides essential information on the country's sources of constitutional law, its form of government, and its administrative structure. Lawyers who handle transnational matters will appreciate the clarifications of particular terminology and its application. Throughout the book, the treatment emphasizes the specific points at which constitutional law affects the interpretation of legal rules and procedure. Thorough coverage by a local expert fully describes the political system, the historical background, the role of treaties, legislation, jurisprudence, and administrative regulations. The discussion of the form and structure of government outlines its legal status, the jurisdiction and workings of the central state organs, the subdivisions of the state, its decentralized authorities, and concepts of citizenship. Special issues include the legal position of aliens, foreign relations, taxing and spending powers, emergency laws, the power of the military, and the constitutional relationship between church and state. Details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for both practising and academic jurists. Lawyers representing parties with interests in Nigeria will welcome this guide, and academics and researchers will appreciate its value in the study of comparative constitutional law.

Family Law in Nigeria. - Nwogugu, E.I. 2014-05-08

This is the third edition of an established and leading book on family law in Nigeria. Since the last edition in 1990 significant judicial and statutory

enactments have taken place in the area of study. The new edition incorporates these changes and explains their implications. The chapters have been comprehensively re-written to reflect the changes in the law and to update all relevant information including the Same Sex Bill and the Nigerian Law Reform Commissions draft Marriage Act. New chapters have been included on domestic violence and widowhood respectively to reflect the continuing developments in Nigerian family law. The new Child's Right Act of 2003 and the similar state legislations have been analysed in the three new chapters. The non-customary law rules in the intestate succession have been extensively recast to reflect the provisions of the Marriage act as contained in the Law of the Federation of Nigeria 2004. This edition has devoted considerable attention to the applicable customary laws on the family and provides extensive treatment of Islamic Law Rules and their interpretations and application by the superior court. Family law in Nigeria presents a fresh view not only on the applicable rules on Nigerian family law but also suggest new directions and underlines the socio-economic implications.

Administrative Law of the European Union, Its Member States and the United States - Rene J. G. H. Seerden 2002

This book offers a comparative introduction, by editors and native authors, to the most important aspects of administrative law in various EU Member States (Belgium, France, Germany, the Netherlands, the United Kingdom), at the level of the EU and in the United States of America. It aspires to contribute to the 'transboundary' understanding of different regimes related to actions and decisions of the administration. For the purpose of the use of this book in education, research and legal practice, the contributions to the book are all based on one and the same format, thus making it more accessible for its readers. The main items of the format are: 1 What is administrative law? Definitions, general administrative law versus specific areas of administrative law, general administrative law in the context of constitutional law (trias politica, federal-unitary state aspects), basic principles and the practice/evolution of administrative law etc. 2 Who is administering? An outline of the administration (organs, agencies, individual persons etc. in specific administrative law areas) in the framework of the territorial and functional organisation of the State. 3 Which instruments are available to the administration? An overview of the available public law instruments and the possibility to use private law instruments. 4 Which (formal) rules/principles (written or unwritten) govern administrative actions? An elaboration on decision-making procedures (public participation etc.) under general administrative law and specific areas of administrative law as well as more substantive rules/principles for administrative actions/decisions: 'due process in

administrative matters'. 5 Access to (administrative) courts against administrative actions/decisions. Who can go to which courts (constitutional, administrative or ordinary) and are prior out-of-court proceedings necessary? How intensive or marginal is the test (of discretionary administrative powers) by the courts and what are the possible rulings of the court (based on a remedy- system for the plaintiff or on more general powers for the courts). 6 Recent and future developments and conclusions. The final chapter offers comparative remarks by the editors.

National Strategy for the COVID-19 Response and Pandemic

Preparedness - Joseph R. Biden, Jr. 2021-05-18

The ultimate guide for anyone wondering how President Joe Biden will respond to the COVID-19 pandemic—all his plans, goals, and executive orders in response to the coronavirus crisis. Shortly after being inaugurated as the 46th President of the United States, Joe Biden and his administration released this 200 page guide detailing his plans to respond to the coronavirus pandemic. The National Strategy for the COVID-19 Response and Pandemic Preparedness breaks down seven crucial goals of President Joe Biden's administration with regards to the coronavirus pandemic: 1. Restore trust with the American people. 2. Mount a safe, effective, and comprehensive vaccination campaign. 3. Mitigate spread through expanding masking, testing, data, treatments, health care workforce, and clear public health standards. 4. Immediately expand emergency relief and exercise the Defense Production Act. 5. Safely reopen schools, businesses, and travel while protecting workers. 6. Protect those most at risk and advance equity, including across racial, ethnic and rural/urban lines. 7. Restore U.S. leadership globally and build better preparedness for future threats. Each of these goals are explained and detailed in the book, with evidence about the current circumstances and how we got here, as well as plans and concrete steps to achieve each goal. Also included is the full text of the many Executive Orders that will be issued by President Biden to achieve each of these goals. The National Strategy for the COVID-19 Response and Pandemic Preparedness is required reading for anyone interested in or concerned about the COVID-19 pandemic and its effects on American society.

Evidence in Contemporary Civil Procedure - C. H. Van Rhee 2015-08-10

Since the start of the new millennium, many contemporary legal jurisdictions have been revisiting the fundamental principles of their civil procedures. Even the core areas of the civil process are not left

untouched, including the way in which evidence is introduced, collected, and presented in court. In the field of evidence taking, one generator of the reforms has been slow and inefficient litigation. Both in Europe and globally, reaching a balance between the demands of factual accuracy and the need to adjudicate disputes in a swift, cost-effective, and efficient way is still one of the key challenges. Another reason why many countries are reforming their law of evidence is related to cultural and technological changes in modern societies. Traditional human rights (such as the right to privacy and due process) is shifting. The modern need for security, efficiency, and quick access to justice, along with the perception of what is admissible or not in the context of evidence taking, is changing as well. In the same sense, the fast pace of modern life commands different practices of fact-finding, accompanied by new methods of selection of evidence that are appropriate for this purpose. Last but not least, the overwhelming penetration of new technologies into all spheres of public and private life has the capacity to dramatically change the methods of the collection and presentation of evidence. Exploring these issues, contributors to this book reflect on how these trends affect the situation in their countries and present their views on further developments, both nationally and in comparison with the developments in other countries and regions. A further goal is to inquire whether, in spite of national differences that are still dominant, the approaches to civil evidence are converging, and whether reforms affecting fact-finding have a chance of leading to some forms of harmonization. Global Trends 2040 - National Intelligence Council 2021-03

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

The Evaluation of Forensic DNA Evidence - National Research Council 1996-12-12

In 1992 the National Research Council issued *DNA Technology in Forensic Science*, a book that documented the state of the art in this emerging field. Recently, this volume was brought to worldwide attention in the murder trial of celebrity O. J. Simpson. *The Evaluation of Forensic DNA Evidence* reports on developments in population genetics and statistics since the original volume was published. The committee comments on statements in the original book that proved controversial or that have been misapplied in the courts. This volume offers recommendations for handling DNA samples, performing calculations, and other aspects of using DNA as a forensic tool—modifying some recommendations presented in the 1992 volume. The update addresses two major areas: Determination of DNA profiles. The committee considers how laboratory errors (particularly false matches) can arise, how errors might be reduced, and how to take into account the fact that the error rate can never be reduced to zero. Interpretation of a finding that the DNA profile of a suspect or victim matches the evidence DNA. The committee addresses controversies in population genetics, exploring the problems that arise from the mixture of groups and subgroups in the American population and how this substructure can be accounted for in calculating frequencies. This volume examines statistical issues in interpreting frequencies as probabilities, including adjustments when a suspect is found through a database search. The committee includes a detailed discussion of what its recommendations would mean in the courtroom, with numerous case citations. By resolving several remaining issues in the evaluation of this increasingly important area of forensic

evidence, this technical update will be important to forensic scientists and population geneticists—and helpful to attorneys, judges, and others who need to understand DNA and the law. Anyone working in laboratories and in the courts or anyone studying this issue should own this book.

Teaching across the Curriculum - Akpovire Oduaran 2021-11-16

The COVID-19 pandemic posed a serious challenge to teaching across the educational system. Many young people in Africa now perceive education as fraudulent and not useful in providing employment and sustaining their lives. Thus, it becomes sacrosanct for teachers to adjust their methods of teaching in line with the reality of our time. This book will serve to help teachers and lecturers to be dynamic, efficient and effective in their chosen profession. It was written by scholars with many years of teaching and researching on professional development in different specialties in Africa, and has been peer-reviewed by eminent and highly rated scholars from various universities throughout the continent.

Encyclopedia of Criminology - J. Mitchell Miller 2013-12-17

This three-volume work offers a comprehensive review of the pivotal concepts, measures, theories, and practices that comprise criminology and criminal justice. No longer just a subtopic of sociology, criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology, political science, behavioral science, law, economics, public health, family studies, social work, and many others. The three-volume *Encyclopedia of Criminology* presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single, authoritative reference work. More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive, international resource. The pivotal concepts, measures, theories, and practices of the field are addressed with an emphasis on comparative criminology and criminal justice. While the primary focus of the work is on American criminology and contemporary criminal justice in the United States, extensive global coverage of other nations' justice systems is included, and the increasing international nature of crime is explored thoroughly. Providing the most up-to-date scholarship in addition to the traditional theories on criminology, the *Encyclopedia of Criminology* is the essential one-stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field.

Drought characteristics and management in North Africa and the Near East - Food and Agriculture Organization of the United Nations 2018-06-19

The report assesses the occurrence and impacts of drought, the current policies underlying drought management as well as the mitigation measures and responses adopted in the Near East and North Africa region, with a focus on the Agriculture Sector. It is the third of a series of similar studies carried out in different regions and countries of the world, with the objective of shedding light on drought effects, sensitizing policy-makers for the much needed paradigm shift to pro-active drought management planning and providing guidance for the development of such policies. The studies are carried out by FAO, in collaboration with the Water for Food Institute, University of Nebraska-Lincoln, USA, as a direct contribution to FAO's Strategic Objective "increasing the resilience of livelihoods to disasters" and Strategic Objective "make agriculture, forestry and fisheries more productive and sustainable".
