*Horizons of Anthropology* - Sol Tax  
The scientific study of human evolution and culture is about a hundred years old. This volume surveys its achievements and methods. Originally published more than forty years ago, the volume's contributors include people who have shaped anthropology's future. As Gluckman says in his Preface, the contributions "point to the horizons of increasing understanding of man, his evolution and his social setting, as seen by a rising generation of scholars." The book includes chapters on how man gradually became different from other primates--on the origin and nature of language and its contribution to our peculiarities as human beings. It surveys the long history of human culture and societies and the theories about their similarities and differences; it discusses human equality and inequality, and it considers, from the anthropologist's point of view, economics, politics, law, religion, medicine, and the arts. In recent decades the various branches of anthropology--physical,

cultural, psychological, and social--have become more specialized, and each branch is increasingly linking itself to its appropriate cognate, biological, psychological, or social sciences. Yet there remains a central common field to anthropology, as the science of man, for practitioners in all its branches. This book develops that common interest and deals with the specific problems of various parts of the field. The book brings out the basic nature of anthropology and the extraordinary fascination that lies in the systematic study of the exuberant variety of human societies and customs. Sol Tax (1907-1995) was Professor Emeritus of Anthropology at the University of Chicago. He was widely known as the founder of the journal *Current Anthropology* and for his work with Native Americans, particularly the Fox and Sauk Indians. Max Gluckman (1911-1975) was head of the department of social anthropology and sociology at the University of Manchester. He is well known for his many books and articles on the peoples of South and Central Africa and on social anthropology in general.

**Living on the Edge in Leonardo's Florence** - Gene Brucker 2005-03-14  
In *Living on the Edge in Leonardo's Florence*, an internationally renowned master of the historian's craft provides a splendid overview of Italian history from the Black Death to the rise of the Medici in 1434 and beyond into the early modern period. Gene Brucker explores those pivotal years in Florence and ranges over

northern Italy, with forays into the histories of Genoa, Milan, and Venice. The ten essays, three of which have never before been published, exhibit Brucker's graceful intelligence, his command of the archival sources, and his ability to make history accessible to anyone interested in this place and period. Whether he is writing about a case in the criminal archives, about a citation from Machiavelli, or the concept of modernity, the result is the same: Brucker brings the pulse of the period alive. Five of these essays explore themes in the premodern period and delve into Italy's political, social, economic, religious, and cultural development. Among these pieces is a lucid, synoptic view of the Italian Renaissance. The last five essays focus more narrowly on Florentine topics, including a fascinating look at the dangers and anxieties that threatened Florence in the fifteenth century during Leonardo's time and a mini-biography of Alessandra Strozzi, whose letters to her exiled sons contain the evidence for her eventful life.

**Treasures Old and New** - Joseph Blenkinsopp  
2004

The Pentateuch is one anchor of the Western religious heritage, a rich source of theological and spiritual instruction capable of being plumbed again and again. In "Treasures Old and New" accomplished biblical scholar Joseph Blenkinsopp engages twelve topics of great interest to thoughtful people today, and does so in dialogue with texts from the Pentateuch. In keeping with the view that the Pentateuch is far too multiplex to be encapsulated in a single theological system, Blenkinsopp has written "Treasures Old and New" as a sketchbook of theology in the Pentateuch. This fruitful approach allows him to consider themes that easily fall through the cracks of more systematic works of biblical theology. Among the many interesting subjects Blenkinsopp explores are the role of memory in the construction of the past, the dependence of Christianity on Judaism, the close connection between sacrifice and community in Old Testament Israel, the proper meaning of human stewardship of the world, and belief (or lack of belief) in a meaningful post-mortem existence. Blenkinsopp believes that scripture is infinitely interpretable, and that we are free to read the Bible in more flexible, fascinating, and exciting ways. In keeping with

the great variety of discourses in the Pentateuch, the standard historical-critical method must coexist with other, and in some cases, much older interpretive approaches to texts. Blenkinsopp here ably demonstrates this perspectival approach to scripture by reading well-known texts from less well-known angles. The Garden of Eden story, for example, gains in resonance when read together with "Gilgamesh," and the laws governing diet and cleanliness come clearer in the light of current ecological concerns. Blenkinsopp's approach also throws new light on such important yet enigmatic stories as the Creation, Cain and Abel, the Flood, the Tower of Babel, the Call of Abram, Sodom and Gomorrah, and others. Blessed with an extraordinary ability to transmit complex issues in concise and lucid fashion, Blenkinsopp has put forth great effort to make this sketchbook accessible. Footnotes have been kept to a minimum, and Blenkinsopp has transliterated the few Hebrew references and used his own, more idiomatic translations of biblical texts wherever they seemed clearer than the standard translations. As a result, this volume can be pursued profitably by scholars, students, and readers alike. Above all, "Treasures Old and New" shows that serious engagement with biblical texts, while sometimes demanding, can be intellectually and religiously rewarding.

The Disordered Police State - Andre Wakefield  
2009-08-01

Probing the relationship between German political economy and everyday fiscal administration, *The Disordered Police State* focuses on the cameral sciences—a peculiarly German body of knowledge designed to train state officials—and in so doing offers a new vision of science and practice during the seventeenth and eighteenth-centuries. Andre Wakefield shows that the cameral sciences were at once natural, technological, and economic disciplines, but, more important, they also were strategic sciences, designed to procure patronage for their authors and good publicity for the German principalities in which they lived and worked. Cameralism, then, was the public face of the prince's most secret affairs; as such, it was an essentially dishonest enterprise. In an entertaining series of case studies on mining, textiles, forestry, and universities, Wakefield

portrays camerallists in their own gritty terms. The result is a revolutionary new understanding about how the sciences created and maintained an image of the well-ordered police state in early modern Germany. In raising doubts about the status of these German sciences of the state, Wakefield ultimately questions many of our accepted narratives about science, culture, and society in early modern Europe.

*The Enlightenment in National Context* - Roy S. Porter 1981-09-03

The Enlightenment has often been written about as a sequence of disembodied 'great ideas'. The aim of this book is to put the beliefs of the Enlightenment firmly into their social context, by revealing the national soils in which they were rooted and the specific purposes for which they were used. It brings out the regional divergences of the Enlightenment experience, shaped by different local intellectual and economic priorities. At the same time it also shows how central concerns (with virtue, patriotism, liberty and modernisation) were shared everywhere, and how the writings of certain key areas (such as France and England) came to be influential elsewhere. The thirteen essays, each written by a historian specialising in the particular country, examine national contexts from Sweden to Italy, from Russia to North America. As well as focusing attention on the interplay of thought and action, ideology and society, the book offers important insights into the place of the intelligentsia in the modern world.

**The Vikings and the Victorians** - Andrew Wawn 2002

The first book-length treatment of C19 fascination with Norse heroes.

Genesis - Laurence A. Turner 2009

Working from the conviction that Genesis can be read as a coherent whole, this commentary foregrounds the sophistication of Hebrew narrative art, in particular its depiction of plot and character, and the interpretative possibilities raised by its intertextuality. Apparently simple and independent episodes emerge as complex and interconnected,

constantly challenging readers to readjust their assessments of characters and expectations of plot development. Approaching the text predominantly from a 'first-time' reader's perspective, the narrative's surprises, ironies and innovations are underscored.

**Evidence-Based Practice: Toward**

**Optimizing Clinical Outcomes** - Xenia Maria Caldeira Brant 2010-06-17

Health care is witnessing an explosion of fundamental, clinical and translational research evidence. The emerging paradigm of evidence-based health care rests on the judicious integration of the patient needs/wants, the provider's expertise, and the best available research evidence in the treatment plan. The purpose of this book is to discuss the promise and the limitations of incorporating the best available evidence in clinical practice. It seeks to characterize and define how best available research evidence can be used in clinical practice and to what respect it applies to current public health issues.

**Poetry in Stitches** - Solveig Hisdal 2010-02

"Solveig Hisdal is not only aware of the knowledge housed in Norway's museums, she has also learned how to use it. She has visited museums throughout the country, searching eagerly for the treasures that her ancestors left behind. She has found textiles, chests, cabinets

and old folk costumes that have later become her greatest source of inspiration. This book is a result of her quest, and it shows how the creativity of the past has inspired her to make beautiful knitted designs. It contains wonderful knitting ideas for almost all occasions, from a child's christening outfit to an exquisite, knitted bridal cardigan with beads and silk. Whether you wish to be inspired by the beautiful pictures, or knit some of the outfits -- enjoy the book!"--P. [4] of cover.

**The Book of Genesis** - Ronald Hendel  
2019-09-10

During its 2,500-year life, the book of Genesis has been the keystone to important claims about God and humanity in Judaism and Christianity, and it plays a central role in contemporary debates about science, politics, and human rights. The authors provide a panoramic history of this iconic book, exploring its impact on Western religion, philosophy, literature, art, and more.

**Hitler Youth** - Michael H. Kater 2009-06-30

In modern times, the recruitment of children into a political organization and ideology reached its boldest embodiment in the Hitler Youth, founded in 1933 soon after the Nazi Party assumed power in Germany. Determining that by age ten children's minds could be turned from play to politics, the regime inducted nearly all German juveniles between the ages of ten and eighteen into its state-run organization. The result was a potent tool for bending young minds and hearts to the will of Adolf Hitler. Baldur von Schirach headed a strict chain of command whose goal was to shift the adolescents' sense of obedience from home and school to the racially defined Volk and the Third Reich. Luring boys and girls into Hitler Youth ranks by offering them status, uniforms, and weekend hikes, the Nazis turned campgrounds into premilitary training sites, air guns into machine guns, sing-alongs into marching drills, instruction into indoctrination, and children into Nazis. A few resisted for personal or political reasons, but the overwhelming majority enlisted. Drawing on original reports, letters, diaries, and memoirs,

Michael H. Kater traces the history of the Hitler Youth, examining the means, degree, and impact of conversion, and the subsequent fate of young recruits. Millions of Hitler Youth joined the armed forces; thousands gleefully participated in the subjugation of foreign peoples and the obliteration of "racial aliens." Although young, they committed crimes against humanity for which they cannot escape judgment. Their story stands as a harsh reminder of the moral bankruptcy of regimes that make children complicit in crimes of the state.

*Hearing Impairment and Disability* - Ariel Tenenbaum 2020

"Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers"--

**The Art of Social Relations** - Marianne Gullestad 1992

Social life in Norway, as in other Scandinavian welfare states, may in very broad terms be

characterized by 'individualism'. The author interprets the significance of this in relationship to the terms of some of the implicit understandings that people in Norway bring to social encounters. In particular, she focuses on the social practices and cultural categories that people use in order to build personal relationships of various kinds, like marital love, family life, friendship and neighbourhood relations.

**Project Based Teaching** - Suzie Boss 2018-09-20

It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in Setting the Standard for Project Based Learning and explore the seven practices integral to

Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. Ailsa Paige: A Novel - Robert William Chambers 1927

The butler made an instinctive movement to detain him, but he flung him aside and entered the drawing-room, the servant recovering his equilibrium and following on a run. Light from great crystal chandeliers dazzled him for a moment; the butler again confronted him but hesitated under the wicked glare from his eyes. Then through the brilliant vista, the young fellow caught a glimpse of a dining-room, a table where silver and crystal glimmered, and a great gray man just lowering a glass of wine from his lips to gaze at him with quiet curiosity. The next moment he traversed the carpeted interval between them and halted at the table's damask edge, gazing intently across at the solitary diner, who sat leaning back in an arm-chair, heavy right hand still resting on the stem of a claret glass, a cigar suspended between the fingers of his left hand.

**The Making of a Land** - Ivar B. Ramberg 2008  
"The Making of a Land - Geology of Norway" takes the reader on a journey in geological time, from primordial times to the present day. A fantastic journey from the summits of Norway's spectacular rugged and weather-beaten mountains to the riches concealed in the sedimentary rocks on the continental shelf. This book displays the treasures of Norwegian

geology for everyone to see. Norway's geological resources represent the foundation of its welfare state. During several centuries first the mining, and then the oil industries have been economic mainstays, and this will continue in the future. The book presents a description both of Norway and the planet we inhabit and depend on for our survival. It is lavishly illustrated with photographs and maps from all over the country.

Aspect and Modality in Kwa Languages - Felix K. Ameka 2008

This book explores the thesis that in the Kwa languages of West Africa, aspect and modality are more central to the grammar of the verb than tense. Where tense marking has emerged it is invariably in the expression of the future, and therefore concerned with the impending actualization or potentiality of an event, hence with modality, rather than the purely temporal sequencing associated with tense. The primary grammatical contrasts are perfective versus imperfective. The main languages discussed are Akan, Dangme, Ewe, Ga and Tuwuli while Nzema-Ahanta, Likpe and Eastern Gbe are also mentioned. Knowledge about these languages has deepened considerably during the past decade or so and ideas about their structure have changed. The volume therefore presents novel analyses of grammatical forms like the so-called S-Aux-O-V-Other or [future] constructions, and provides empirical data for theorizing about aspect and modality. It should be of considerable interest to Africanist linguists, typologists, and creolists interested in substrate issues.

The Adventures of Coach and Little Dell - Tanae Denean Eskridge 2019-02

My First Tie is a wonderful story of a young boy sharing his experience learning how to tie his very first tie. The authors give us an inside scoop into the mind of a young boy seeking to mature

and learn new things. Who knew learning to tie a tie would teach us the importance of honesty and telling the truth. We are also introducing a positive black male character to children's literature. Coach is a fixer, a teacher, a motivator, a mentor, and all-around great guy. My First Tie is the second book in a wonderful children's book series, The Adventures Of Coach And Little Dell.

Scandinavia in the Age of Revolution - Pasi Ihalainen 2011

The 'Age of Revolution' is a term seldom used in Scandinavian historiography, despite the fact that Scandinavia was far from untouched by the late eighteenth-century revolutions in Europe and America. Presenting the latest research on political culture in Scandinavia, this volume with twenty-seven contributions focuses on four key aspects: the crisis of monarchy; the transformation in political debate; the emerging influence of commercial interest in politics; and the shifting boundaries of political participation. Generously illustrated throughout, this book will introduce non-Scandinavian readers to developments in the Nordic countries during the late-eighteenth and early nineteenth-centuries and both complement and challenge research into the political cultures of Europe and America.

A Commentary on Genesis - Martin Kessler 2004

Genesis for everyday readers Why another book on Genesis? It is a text that is inexhaustible, yielding something new at each reading. Authors Martin Kessler and Karel Deurloo contribute to its understanding with this concise, text-oriented, literary commentary on this fundamental book of the Bible. The authors maintain a clear focus on Genesis and what its words mean in themselves, in their narrative context, and in the context of the Bible. The unifying theme is the birth of Israel among the peoples of the world, beginning with the universal story of God's creation of earth, sky, and seas, moving toward the call of Abram, the first of the patriarchs, through Jacob, his grandson, and Jacob's sons, the progenitors of the twelve tribes of Israel. Clearly written and easy to follow, this book will encourage readers to reach beyond their usual assumptions to find not only information, but much illumination, about this richly layered text. Audience: --Bible

study groups --introductory college courses -- everyday readers who want to read the Bible with deeper meaning and understanding +

**The World Café** - Juanita Brown 2005-06-05  
The World Cafe is a flexible, easy-to-use process for fostering collaborative dialogue, sharing mutual knowledge, and discovering new opportunities for action. Based on living systems thinking, this innovative approach creates dynamic networks of conversation that can catalyze an organization or community's own collective intelligence around its most important questions. Filled with stories of actual Cafe dialogues in business, education, government, and community organizations across the globe, this uniquely crafted book demonstrates how the World Cafe can be adapted to any setting or

culture. Examples from such varied organizations as Hewlett-Packard, American Society for Quality, the nation of Singapore, the University of Texas, and many others, demonstrate the process in action. Along with its seven core design principles, The World Cafe offers practical tips for hosting "conversations that matter" in groups of any size- strengthening both personal relationships and people's capacity to shape the future together.

*Genesis 1-11* - John W. Rogerson 2004-11-24  
John Rogerson traces the interpretation of Genesis 1-11 through to its present engagement with contemporary issues, before going on to examine the hermeneutical debate currently centred on the text, and to discuss it from the more familiar perspective of the historical-critical method, with particular attention to translation, source-critical and inter-literary questions.
