**Critical Mentoring** - Torie Weiston-Serdan 2017-02-28

This book introduces the concept of critical mentoring, presenting its theoretical and empirical foundations, and providing telling examples of what it looks like in practice, and what it can achieve. At this juncture when the demographics of our schools and colleges are rapidly changing, critical mentoring provides mentors with a new and essential transformational practice that challenges deficit-based notions of protégés, questions their forced adaptation to dominant ideology, counters the marginalization and minoritization of young people of color, and endows them with voice, power and choice to achieve in society while validating their culture and values. Critical mentoring places youth at the center of the process, challenging norms of adult and institutional authority and notions of saviorism to create collaborative partnerships with youth and communities that recognize there are multiple sources of expertise and knowledge. Torie Weiston-Serdan outlines the underlying foundations of critical race theory, cultural competence and intersectionality, describes how collaborative mentoring works in practice in terms of dispositions and structures, and addresses the implications of rethinking about the purposes and delivery of mentoring services, both for mentors themselves and the organizations for which they work. Each chapter ends with a set of salient questions to ask and key actions to take. These are meant to move the reader from thought to action and provide a basis for discussion. This book offers strategies that are immediately applicable and will create a process that is participatory, emancipatory and transformative.

**Strengthening Forensic Science in the United States** - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and

promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The 48 Laws Of Power - Robert Greene 2010-09-03

THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power.

(From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In The 48 Laws of Power, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

[The Madness of Crowds](#) - Louise Penny 2021-08-24

Instant #1 New York Times Bestseller AARP The Magazine – Recommended Summer Reading CNN – A Most Anticipated Book of August Bustle – A Most Anticipated Book of August Chief Inspector Armand Gamache returns to Three Pines in #1 New York Times bestseller Louise Penny's latest spellbinding novel You're a coward. Time and again, as the New Year approaches, that charge is leveled against Armand Gamache. It starts innocently enough. While the residents of the Québec village of Three Pines take

advantage of the deep snow to ski and toboggan, to drink hot chocolate in the bistro and share meals together, the Chief Inspector finds his holiday with his family interrupted by a simple request. He's asked to provide security for what promises to be a non-event. A visiting Professor of Statistics will be giving a lecture at the nearby university. While he is perplexed as to why the head of homicide for the Sûreté du Québec would be assigned this task, it sounds easy enough. That is until Gamache starts looking into Professor Abigail Robinson and discovers an agenda so repulsive he begs the university to cancel the lecture. They refuse, citing academic freedom, and accuse Gamache of censorship and intellectual cowardice. Before long, Professor Robinson's views start seeping into conversations. Spreading and infecting. So that truth and fact, reality and delusion are so confused it's near impossible to tell them apart. Discussions become debates, debates become arguments, which turn into fights. As sides are declared, a madness takes hold. Abigail Robinson promises that, if they follow her, ça va bien aller. All will be well. But not, Gamache and his team know, for everyone. When a murder is committed it falls to Armand Gamache, his second-in-command Jean-Guy Beauvoir, and their team to investigate the crime as well as this extraordinary popular delusion. And the madness of crowds.
