Color Theory for the Makeup Artist - Katie Middleton 2018-06-12
Color Theory for the Make-up Artist: Understanding Color and Light for Beauty and Special Effects analyzes and explains traditional color theory for fine artists and applies it to the make-up artist. This book is suitable for both professionals and beginners who wish to train their eye further to understand and recognize distinctions in color. It explains why we see color, how to categorize and identify color, relationships between colors, and it relates these concepts to beauty and special effects make-up. The book teaches the reader how to mix flesh tones by using only primary colors, and explains how these colors in paints and make-up are sourced and created. It also discusses the reason for variations in skin colors and undertones, and how to identify and match these using make-up, while choosing flattering colors for the eyes, lips, and cheeks. Colors found inside the body are explained for special effects make-up, like why we bruise, bleed, or appear sick. Ideas and techniques are also described for painting prosthetics, in addition to using color as inspiration in make-up designs. The book also discusses how lighting affects color on film, television, theater, and photography sets, and how to properly light a workspace for successful applications.

Printing Colors in Graphic Design - SendPoints 2016
Nothing gives life to a design like color. It has the ability to instantly transform the look and feel of a graphic by appealing to our preferences and emotions. In printing, there are two main color systems that are used in producing color in print, CMYK and PMS. CMYK, or four color process, is a subtractive color model which works by masking colors on a light background. PMS, or Pantone Matching System, is used for producing spot colors accurately. Together they are able to achieve almost any desired effect through complementary systems. This book demystifies their use while providing a breathtaking display of color in print by some of the worlds most talented designers.

It also assists art teachers and art schools in the instruction of their students and serves well as a college text book of art.◊◊◊Frank J. Reilly was an American painter, illustrator, muralist and teacher. Reilly served as the Commissioner of Art for New York City. Ralph Garafola studied at the Art Students League of New York for seven years with Reilly. Reilly was married with no children and considered his students family. He became both mentor and father-figure for Garafola."To succeed in the realm of graphic arts, like dancing and music, one must acquire knowledge. By practicing and applying that knowledge, one becomes skillful. It was Reilly's logical application which was the basis for developing my craft. After 65 successful years I have never found reason to change the drawing or painting methodology Reilly taught to me. Now through this book I share it with you."Ralph Garafola, author

For the Love of Letterpress - Cathie Ruggie Saunders 2019-08-08
Winner - American Graphic Design Award, Graphic Design USA
Conveying the authors' love of the letterpress process and product, this book presents the technical, historical, aesthetic and practical information necessary for both students and instructors. The 2nd edition of For the Love of Letterpress includes an updated gallery of contemporary images of letterpress printing, as well as a new chapter of letterpress assignments from the United States, United Kingdom and Europe. Both additions attest to the dynamic and continued relevance of the media. The authors show how contemporary digital processes have expanded the boundaries of traditional letterpress. By writing with passion and experience, they indicate why a 15th century printing technology based upon crafting with one's hands, still has appeal and value to 21st century artists and designers. Whether incorporated into an academic curriculum or used for self-study, For the Love of Letterpress is a must for students who wish to learn letterpress and instructors seeking inspiration and reference.

Traces of Vermeer - Jane Jelley 2017-07-14
Johannes Vermeer's luminous paintings are loved and admired around the world, yet we do not understand how they were made. We see sunlit spaces; the glimmer of satin, silver, and linen; we see the softness of a hand on a lute string or letter. We recognise the distilled impression of a

moment of time; and we feel it to be real. We might hope for some answers from the experts, but they are confounded too. Even with the modern technology available, they do not know why there is an absence of any preliminary drawing; why there are shifts in focus; and why his pictures are unusually blurred. Some wonder if he might possibly have used a camera obscura to capture what he saw before him. The few traces Vermeer has left behind tell us little: there are no letters or diaries; and no reports of him at work. Jane Jelley has taken a new path in this detective story. A painter herself, she has worked with the materials of his time: the cochineal insect and lapis lazuli; the sheep bones, soot, earth and rust. She shows us how painters made their pictures layer by layer; she investigates old secrets; and hears travellers' tales. She explores how Vermeer could have used a lens in the creation of his masterpieces. The clues were there all along. After all this time, now we can unlock the studio door, and catch a glimpse of Vermeer inside, painting light.

The Colors We Share - Angélica Dass 2021

Made for young readers, five to eight years old, this book features portraits that celebrate the diverse beauty of human skin. By depicting people from all over the world against a background that matches their skin tone, Angélica Dass challenges the racially charged colors we use to describe race. What does it mean to be seen as "white," "black," "yellow," "red," or "brown"? The pictures show how people and humanity are much richer and more complex than these categories, rendering the labels we use absurd. This book also reveals how every conceivable skin color in the world can be recreated from a mix of only three colors, which we all share. Through Dass's words and pictures, the book celebrates diversity as humankind's most powerful resource and inspires readers to rethink how we see each other.
