Higher Education for and beyond the Sustainable Development Goals - Tristan McCowan 2019-08-29

This book analyses the role of the university in working towards the Sustainable Development Goals. In contrast to the previous Millennium Development Goals, higher education is seen to have a crucial role in this new agenda. Yet how can the university fulfil these weighty expectations, and are the dominant trends in higher education supporting or undermining this vision? This book draws on the idea of the 'developmental university', a model characterised by its porous boundaries with society and commitment to teaching, research and community engagement in the public interest. The author examines case studies from Latin America, Africa and other regions to analyse how this model can be revived, countering recent trends of marketisation, status competition and unbundling. The book also considers alternatives to the developmental model drawing on indigenous knowledge systems, looking beyond the SDG framework to the creation of a new form of society. This timely volume will be of interest and value to those working in the field of sustainable development, and to students and scholars of comparative education, international development and higher

education studies.

Parental Involvement in Children's Reading - Keith Topping 2017-11-28

Parental involvement in children's education is a subject of growing interest and recent legislation in both the UK and USA has given formal recognition of parents' rights. Learning to read is an obvious area where parents can do a great deal to help, and some schools have had programmes for parental involvement in reading for some time. However recent research has shown the considerable benefit in having carefully structured systems for parental involvement. This book presents a review of past and current good practice in this field. Details of a wide range of schemes developed in local areas are given in a series of short contributed papers, which are grouped into sub sections of Part 2 according to the type of project. Part 3 is essentially a manual of materials and methods. The emphasis throughout the book is on service delivery to all children although there is of course considerable discussion of remedial reading and children with special needs The book should appeal to a wide audience in education, educational administration and educational psychology.

Determinants of Aspirations - Leslie Morrison Gutman 2008

Public Examinations Examined - Thomas Kellaghan 2019-11-19

High-stakes public examinations exert a dominant influence in most education systems.

They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment.

Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations.

"This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset

both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation
Competency Based Education And Training - John Burke 2005-10-18

E-Learning in the 21st Century - D. Randy Garrison 2003-08-29

There is currently a technological revolution taking place in higher education. The growth of e-learning is being described as explosive, unprecedented, and above all, disruptive. This timely and comprehensive book provides a coherent framework for understanding e-learning in higher education. The authors draw on their extensive research in the area to explore the technological, pedagogical and organisational implications of e-learning, and more importantly, they provide practical models for educators to use to realise the full potential of e-learning. A unique feature of the book is that the authors focus less on the ever-evolving technologies and more on the search for an understanding of these technologies from an educational perspective. This book will be invaluable for researchers, practitioners and senior administrators looking for guidance on how to successfully adopt e-learning in their

institutions. It will also appeal to anyone with an interest in the impact of e-learning on higher education and society.

Betrayal in the City - F. D. Imbuga 1987

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."-- Page 4 of cover

Mathematics Education in East Africa - Anjum Halai 2016-03-08

THIS BOOK WILL SOON BE AVAILABLE AS OPEN ACCESS BOOK This book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place. It is also a valuable resource for courses in mathematics education in the teacher education colleges, and departments of education in the sub-Saharan Africa region. In the increasingly global and technological world mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility. Hence, countries and development agencies in the broader sub-Saharan Africa region are looking towards increasing access to relevant and high-quality secondary education as a lever towards economic development. Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform. In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education. This book provides an in-depth comparative analysis of the developments and issues in mathematics education in Kenya, Tanzania, Rwanda and Uganda, and advances our understanding of the state of secondary mathematics education in East Africa.

Vocationalisation of Secondary Education

Revisited - Jon Lauglo 2006-03-30

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

Blossoms of the Savannah - Henry R. ole Kulet 2008

Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

Vanishing Herds - H.R.Ole Kulet 2011

Norpisia's spiritual journey towards environmental environmental restoration, and her husband's physical journey in search of his

birthplace are intertwined in this novel. From a simple pastoralist, Norpisia relentlessly pursues her conservation ambitions and eventually becomes a renowned conservationist and succeeds in rehabilitating degraded forests and wetlands.

The Caucasian Chalk Circle - Bertolt Brecht
2015-03-16

This Student Edition of Brecht's classic dramatisation of the conflict over possession of a child features an extensive introduction and commentary that includes a plot summary, discussion of the context, themes, characters, style and language as well as questions for further study and notes on words and phrases in the text. It is the perfect edition for students of theatre and literature. Brecht projects an ancient Chinese story onto a realistic setting in Soviet Georgia. In a theme that echoes the Judgment of Solomon, two women argue over the possession of a child; thanks to the unruly judge, Azdak (one of Brecht's most vivid creations) natural justice is done and the peasant Grusha keeps the child she loves, even though she is not its mother. Written in exile in the United States during the Second World War, *The Caucasian Chalk Circle* is a politically-charged, much-revived and complex example of Brecht's epic theatre. This volume contains expert notes on the author's life and work, historical and political background to the play, photographs from stage productions and a glossary of difficult words and phrases. It features the acclaimed translation by James and Tania Stern with W. H. Auden.

Reading Peer Review - Martin Paul Eve
2020-12-31

This Element describes for the first time the database of peer review reports at PLOS ONE, the largest scientific journal in the world, to which the authors had unique access. Specifically, this Element presents the background contexts and histories of peer review, the data-handling sensitivities of this type of research, the typical properties of reports in the journal to which the authors had access, a taxonomy of the reports, and their sentiment arcs. This unique work thereby yields a compelling and unprecedented set of insights

into the evolving state of peer review in the twenty-first century, at a crucial political moment for the transformation of science. It also, though, presents a study in radicalism and the ways in which PLOS's vision for science can be said to have effected change in the ultra-conservative contemporary university. This title is also available as Open Access on Cambridge Core.

Raising the Impact of Education Research in Africa - Charl C. Wolhuter 2018-12-01

The low demonstrable effect of education research done in South Africa in particular – and Africa in general – continues to be a problem in scientific records in the educational sciences. This scholarly collected work addresses this obstacle and focuses on recommendations from scholars in different sectorial categories in the field of education. Scholars from a variety of sub-fields within the educational sciences reflect on this particular matter, revisiting the history of research and research outcomes and offering informed recommendations based on in-depth investigation and analysis of aspects of the various discourses within the relevant sub-fields. The scope of the content of this collected work centres on the issue of the lack of scientific records concerning the scientific raising of the impact of education research. The book aims at making a specific contribution to the educational sciences by stimulating scholarly discussion around how to increase the recording of the significance of educational research done in Africa, and in South Africa in particular, and to redirect the research agenda into the direction of making more impact. Impact is conceptualised to mean both scholarly impact (that is being cited and being used as foundation for theory building and for further research) and practical impact (that is improvement of practice, teaching and learning in education institutions at all levels).

Concrete in the Service of Mankind - Ravindra Dhir 2003-09-02

Concrete is ubiquitous and unique, found in every developed and developing country. Indeed, there are no alternatives to concrete as a volume construction material for infrastructure. This raises important questions of how concrete should be designed and constructed for cost effective use in the the short and long term, and

to encourage further radical development. Equally, it must be environmentally friendly during manufacture, in an aesthetic presentation in structures and in the containment of harmful materials.; The central theme of the Congress is Concrete in the Service of Mankind, under which five self-contained Conferences, each dealing with a particular aspect, are planned. The Congress offers opportunity to discuss how to improve and extend this service to mankind using responsible exploitation, underwritten by sound technical understanding and research base. It brings together the shared skills and experience of the various disciplines involved in the construction process world wide.; This major publication continues the tradition established by Dundee University of organizing major international conferences every three years dealing with some aspect of concrete and also the link between Spon and Dundee University for publication of the proceedings.; This book should be of interest to concrete technologists; contractors; civil engineers; consultants; government agencies; research organizations.

PID Control System Design and Automatic Tuning using MATLAB/Simulink - Liuping Wang
 2020-04-20

Covers PID control systems from the very basics to the advanced topics This book covers the design, implementation and automatic tuning of PID control systems with operational constraints. It provides students, researchers, and industrial practitioners with everything they need to know about PID control systems—from classical tuning rules and model-based design to constraints, automatic tuning, cascade control, and gain scheduled control. PID Control System Design and Automatic Tuning using MATLAB/Simulink introduces PID control system structures, sensitivity analysis, PID control design, implementation with constraints, disturbance observer-based PID control, gain scheduled PID control systems, cascade PID control systems, PID control design for complex systems, automatic tuning and applications of

PID control to unmanned aerial vehicles. It also presents resonant control systems relevant to many engineering applications. The implementation of PID control and resonant control highlights how to deal with operational constraints. Provides unique coverage of PID Control of unmanned aerial vehicles (UAVs), including mathematical models of multi-rotor UAVs, control strategies of UAVs, and automatic tuning of PID controllers for UAVs Provides detailed descriptions of automatic tuning of PID control systems, including relay feedback control systems, frequency response estimation, Monte-Carlo simulation studies, PID controller design using frequency domain information, and MATLAB/Simulink simulation and implementation programs for automatic tuning Includes 15 MATLAB/Simulink tutorials, in a step-by-step manner, to illustrate the design, simulation, implementation and automatic tuning of PID control systems Assists lecturers, teaching assistants, students, and other readers to learn PID control with constraints and apply the control theory to various areas.

Accompanying website includes lecture slides and MATLAB/ Simulink programs PID Control System Design and Automatic Tuning using MATLAB/Simulink is intended for undergraduate electrical, chemical, mechanical, and aerospace engineering students, and will greatly benefit postgraduate students, researchers, and industrial personnel who work with control systems and their applications.

Hood - Noire 2007-08-07

CHECK IT. Lamont be my government, but Hood be my name. I earned my stripes chilling up in Fat Daddy's joint, a Brownsville barbershop in the belly of Brooklyn. Some called me a street savior...others said I was just another Brownsville boy gone bad. Whatever. I brung it and I took it too. But when it was all said and

done, I walked away with a lesson learned in street loyalty: ain't no need in looking over your shoulder in this game. Because your real enemies ain't aiming at your back. They lunging straight for your heart. Ya dig? Lamont "Hood" Mason is a fearless nineteen-year-old gangsta who was born and raised in the projects of Brooklyn, New York. He was an abandoned child who roamed the cold city streets and fought hard for survival. The only thing constant in his young life was the safety of a Brownsville barbershop owned by a father figure called Fat Daddy. The barbershop is where Hood comes of age, but cutting hair isn't the only thing Fat Daddy has going on. His daughter, Egypt, is the love of Hood's young life, and the one person whose dreams of a stable future can lead him off the grimy urban corners and out of the hustling life. But when Fat Daddy gets caught slippin and crosses paths with Xanbar, a notoriously brutal drug kingpin, his vices threaten to bring death down on the family Hood loves. In an effort to protect his own, Hood and his best friend and hustling partner, Dreko, take to the streets on a bloody mission that doesn't go exactly as planned. Hood returns to find his world turned upside down by a wave of sex, violence, and betrayal. No longer the starving kid on the street, he's now a man seeking vengeance and retribution, and he might be forced to choose between bending or breaking as he picks up the shattered pieces of his life, one by one.

Mathematical Proficiency for All Students: Toward a Strategic Research and Development Program in Mathematics

Education - Deborah Loewenberg 2003-04-15

A clear need exists for substantial improvement in mathematics proficiency in U.S. schools. The RAND Mathematics Study Panel was convened to inform the U.S. Department of Education's Office of Educational Research and Improvement on ways to improve the quality and usability of education research and development (R&D). The panel identified three areas for focused R&D: development of teachers' mathematical knowledge used in teaching; teaching and learning of skills needed for mathematical thinking and problem-solving; and teaching and learning of algebra from kindergarten through the 12th grade.

Cheating in College - Donald L. McCabe
2012-09-11

Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. *Cheating in College* explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support

cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students. Orientation and training sessions, information on college and university websites, student handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiyear, multisite surveys, *Cheating in College* quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University
Love Smart - Phil McGraw 2012-12-04
In *Love Smart: Find the One You Want -- Fix the One You Got*, bestselling author Dr. Phil tells people who are dissatisfied with their love lives to stop making excuses and start taking action. You deserve a committed relationship, and it is within your control to have the one you want. First, though, you need to determine what you want in a partner, plot your course, and get out there and create velocity in your pursuit of a loving connection. In this book you'll learn to: Present the real you in the most flattering light. You have to stop being your own best kept

secret. Peek behind the male curtain. Dr. Phil tells you things about men that they don't necessarily want you to know. How good is your Guy-Q? Master the right moves. Don't fade into the wallpaper; get noticed and get involved. If you are already coupled up then learn how to grow and nurture what you have built. Bag 'em, tag 'em and take 'em home. Learn how to negotiate the relationship you desire and then close the deal. Get out of your relationship rut. The daily grind, money problems, work, etc., can take their toll on your relationship. Dr. Phil shows you how to assess the state of your union and take your relationship to a deeper level. There are no exceptions: There is somebody for everybody, and everybody deserves a relationship filled with love and excitement. *Love Smart: Find the One You Want -- Fix the One You Got* offers you the plan to find not just any relationship but the committed, loving, joy-filled relationship you've been waiting for.
