General Reports of the XIXth Congress of the International

Academy of Comparative Law Rapports Généraux du XIXème Congrès de l'Académie Internationale de Droit Comparé - Martin Schauer 2017-06-01

This book deals with convergences of legal doctrine despite jurisdictional, cultural, and political barriers, and of divergences due to such barriers, examining topics that are of vital importance to contemporary legal scholars. Written by leading scholars from more than twenty countries, its thirty-two chapters present a comparative analysis of cutting-edge legal topics of the 21st century. While each of the countries covered stands alone as a sovereign state, in a technologically advanced world their disparate systems nonetheless show comparable strategies in dealing with complex legal issues. The book is a critical addition to the library of any scholar hoping to keep abreast of the major trends in contemporary law. It covers a vast area of topics that are dealt with from a comparative point of view and represents the current state of law in each area.

Environmental Policy in the European Union - Andrew Jordan 2012

This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts, it includes in-depth case studies of contemporary policy issues such as climate

change, genetically modified organisms and trans-Atlantic relations, as well as an assessment of how well the EU is responding to new challenges such as enlargement, environmental policy integration and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the 'new' governance challenges posed by the perceived need to use 'new' policy instruments and processes to 'mainstream' environmental thinking in all EU policy sectors.

Financial Accounting and Reporting - John McKeith 2013-02-01

The second edition of Financial Accounting and Reporting by John McKeith and Bill Collins has been fully updated to reflect the latest International Accounting Standards as well as explaining the effects of exposure drafts in issue. The text takes an uncomplicated, practical approach to intermediate level financial accounting, offering a manageable way to master the subject one step at a time.

When Entrepreneurs Meet: The Collective Governance Of New Ideas - Darcy W E Allen 2020-10-21

When Entrepreneurs Meet: The Collective Governance of New Ideas challenges our understanding of how entrepreneurs crystallize opportunities surrounding new technologies. While innovation is the fundamental driver of growth and prosperity, how the earliest stages of entrepreneurship are governed remains elusive. This book creates a new, institutional approach to understanding entrepreneurship before emphasizing how entrepreneurs create governance structures to coordinate new knowledge resources. Rather than the conventional view that entrepreneurship happens inside firms, this unique transaction-cost economics analysis of entrepreneurship suggests it might begin earlier in hybrid, polycentric self-governance structures, including the innovation commons. Allen explores and analyses various examples of these structures, including hackerspaces and the institutions coalescing around the development of the blockchain economy, along with the dynamics of how those institutions might collapse into firms. This new understanding of the entrepreneurial governance problem is also connected to contemporary questions about the purpose, scope, and

application of innovation policy.

Natural Resource Economics: The Essentials - Tom Tietenberg

2019-08-01

Natural Resource Economics: The Essentials offers a policy-oriented approach to the increasingly influential field of natural resource economics that is based upon a solid foundation of economic theory and empirical research. Students will not only leave the course with a firm understanding of natural resource economics, but they will also be exposed to a number of case studies showing how underlying economic principles provide the basis for specific natural resource policies. Including current data and research studies, this key text also highlights what insights can be derived from the actual experience. Key features include: Extensive coverage of the major issues including energy, recyclable resources, water policy, land conservation and management, forests, fisheries, other ecosystems, and sustainable development; Introductions to the theory and method of natural resource economics including externalities, experimental and behavioral economics, benefit-cost analysis, and methods for valuing the services provided by the environment; Boxed 'Examples' and 'Debates' throughout the text which highlight global examples and major points for deeper discussions. The text is fully supported with end-of-chapter summaries, discussion questions, and self-test exercises in the book, as well as with multiple-choice questions, simulations, references, slides, and an instructor's manual on the Companion Website. This text is adapted from the best-selling Environmental and Natural Resource Economics, 11th edition, by

the same authors.

Actual Innocence - Jim Dwyer 2000

Ten true tales of people falsely accused detail the flaws in the criminal justice system that landed these people in prison

Corruption and Legislatures - Riccardo Pelizzo 2014-05-09

This book investigates parliaments' role in curbing corruption. In addition to discussing the definition, causes, and costs of corruption and the role that parliaments have in reducing corruption, the authors consider contemporary issues that parliamentarians - and others - need to be aware of. These include the importance of broad-based coalitions to fight corruption and networking at the country, regional and global level, the importance - and difficulties - of establishing parliamentary codes of ethics/conduct, legislative oversight tools and mechanisms, and regional/international conventions against corruption. Attention will also be given to parliaments and anti-money laundering. *Corruption and Legislatures* presents a non-technical review of contemporary issues and recent developments in curbing corruption, and concludes with practical advice as to what can be done to ensure more effective parliamentary involvement in curbing corruption.

Valuation of Ecosystem Services in the Kailash Sacred Landscapes - 2017

Nurturing Sustainable Prosperity in West Africa - Stephen Armah
2020-02-18

"Through the lens of personal experience, Dr. Armah walks us through the scholarly research on culture, corruption and economics as it applies to the Ghanaian experience. We are left with a partially disappointing picture of a country wealthy in people and resources, but poor in growth but cannot help but imagine that Ghana has turned a corner and that history may well turn out to be kind to the country Dr. Armah clearly loves." -Kenneth Leonard, Associate Professor, University of Maryland at College Park "Management consultants and corporate leadership experts

have often verified Peter Drucker's observation that 'culture eats strategy for breakfast.' This book represents a heartfelt effort to recognize and grapple with the power of culture over economic strategy and development policy. Stephen Armah's reflections on Ghanaian experiences reveal how a deeper appreciation of culture and mindset can help us understand the persistence of corruption and elements of a path forward." -Alex Winter-Nelson, Director of ACES Office of International Programs, University of Illinois at Urbana-Champaign "This book is an interesting introduction to the ways in which culture influences economic growth and productivity in Ghana. Using a combination of revealing anecdotes and citations from the literature Dr. Armah explores the ways that culture can positively, and negatively, impact the institutions that are necessary to allow a country to thrive. Aspects of culture that are a hindrance cannot be changed immediately, but can, over time, adapt to improve the country." -Erik Cheever, Professor, Department of Engineering, Swarthmore College "An easy and thought provoking read! It contains a bold message that I expect will facilitate an important conversation not only in Ghana but across Africa." -Saweda Liverpool-Tasie, Associate Professor of Agricultural, Food, and Resource Economics, Michigan State University "Armah's thesis is that corruption, economic inefficiency, and weak formal institutions are culturally rooted in Ghana, and that the real work of development involves changing the worldviews that give life events their meaning and determine how people respond to formal policies and institutions. This is a controversial argument that will provoke lively debate. Armah's book puts the literature on economic development and culture into dialogue with stories of life in post-independence Ghana." -Stephen A. O'Connell, Gil and Frank Mustin Professor of Economics, Swarthmore College Using Ghana as a case study, this book argues that local culture and tradition play a role in shaping economic institutions that operate in a country. This book focuses on how certain cultural practices lead to an environment more susceptible to cronyism and corruption. The book then discusses the relationship between culture and rampant corruption, and how these in sum have harmed Ghana's economic development. "I have

no doubt that culture, in terms of attitudes, values, norms and behavior, is the single most important explanatory factor in Ghana's underdevelopment. It explains the widespread corruption, poor work ethic and indiscipline. These are the issues Stephen Armah courageously takes on in this book as needing to be addressed in Ghana's development." -Stephen Adei, Professor Emeritus, Ashesi University "Stephen Armah's Nurturing Sustainable Prosperity in West Africa explores and interprets the economics, transnational organizations, socio-cultural politics as contexts and processes for understanding corruption in Ghana, in particular and Africa as a whole. Focusing on the continuous transactions among Ghanaians with reference to their social and personal obligations against the backdrop of the pervasive corruption exemplified in his case studies, Armah clearly explains the process of constructing socio-political mores and policies to remedy or root out chronic corruption. Armah examines the institutionalized and non-formal customary practices that engender nepotism, absenteeism, lawlessness and general malaise that hamper development. The book provides an important analysis and solutions to corruption. It will be of interest to not only to scholars of economics but also, to the general reader, policymakers and servant-leaders in contemporary Africa." - Pashington Obeng, Dean of the Faculty of Arts and Science, Ashesi University

Intemperate Spirits - Alice Louise Kassens 2019-08-02

Using the basic economic principle of making decisions using a cost-benefit framework—and how changes in one or the other can result in a different decision—this book uncovers how various groups responded to incentives provided by the Prohibition legislation. Using this calculus, it is clear that even criminals are rational characters, responding to incentives and opportunities provided by the 18th Amendment and the Volstead Act. The book begins with a broad look at the adaptations of the law's targets: the wine, beer, and liquor industries. It then turns to specific people (Violators, Line Tip-Toers, Enablers, and Hypocrites), sharing their stories of economic adaptation to bring economic lessons to life. Due to its structure, the book can be read in parts or as a whole and is suitable for short classroom reading assignments or individual pleasure reading.

Environmental Economics - Barry C. Field 1994

Being Dead - Vivian Vande Velde 2003-09-01

A sixteen-year-old will give anything to be with her true love—even though he died two hundred years ago. . . . A sopping-wet little dead girl stalks a teen who had nothing to do with her death—honest! . . . A heartless man dances with his wife—after she's passed away. From the hilarious to the horrific, master storyteller Vivian Vande Velde explores the world of the dead—and the undead—in this surprisingly moving collection of unnerving tales.

Detecting Price Links in the World Cotton Market - John Baffes

Intermediate Environmental Economics - Charles D. Kolstad 2011

Intermediate Environmental Economics has established itself as one of the field's most authoritative texts, as well as one of the more

challenging. It distinguishes itself from other books by presupposing that readers already have an understanding of intermediate microeconomics. Thus, this book concentrates only on environmental economics-problems of pollution of earth, air, and water-with an emphasis on regulation and private-sector anti-pollution incentives, and coverage of international examples.

Environmental Economics and Management - Scott Callan 2000
The text presents a broad study of environmental issues and explores economic theories to reinforce the lessons. Offering a long-lasting understanding of real-world environmental problems and policy solutions, this work provides a foundation for the environmental managers of tomorrow.

Studies in Austrian Macroeconomics - 2016-05-13
Several of the papers in *Advances in Austrian Economics Volume 21* focus on the differences between the US and Canadian experiences during the early 21st century, while other contributors offer critical extensions of Austrian monetary and business cycle theory.

Convicted but Innocent - C. Ronald Huff 1996-01-23
Addressing the specific issues surrounding wrongful convictions and their implications for society, *Convicted but Innocent* includes: survey data concerning the possible magnitude of the problem and its causes; fascinating actual case samples; detailed analyses of the major factors associated with wrongful conviction; discussion of public policy implications; and recommendations for reducing the occurrence of such convictions. The authors maintain that while no system of justice can be

perfect, a focus on preventable errors can substantially reduce the number of current conviction injustices.

Local Public, Fiscal and Financial Governance - Brian Dollery 2020-06-01
This book provides a comprehensive treatment of traditional as well as newer topics in local public, fiscal and financial management principles and practices. It covers traditional topics of local public management, local revenue administration with special emphasis on property tax administration, local budgeting and accounting, and methods of capital finance. Newer topics covered include political economy of local government, fiscal rules for local fiscal discipline, local government integrity and performance accountability, and municipal mergers and inter-municipal cooperation based upon relative importance and political, fiscal and administrative autonomy of local governments. The treatment is non-technical and suitable for a wide variety of audiences including scholars, instructors, students, policy advisors, and practitioners.

Multiplane Transesophageal Echocardiography - Jos Roelandt 1996
Explains the technology and clinical applications of an advanced diagnostic imaging technique for cardiography that has significantly facilitated the transesophageal examination and decreased the

discomfort of patients. Among the topics are the history and development of the technique, preparations and procedures, echo-anatomic correlations, prosthetic valves, surgical repair, miniature probes for infants and children, and dynamic three-dimensional echocardiography. Highly illustrated, mostly in color. Annotation copyright by Book News, Inc., Portland, OR

Investigative Interviewing - Tom Williamson 2013-09-05

The objective of this book is to review the position of investigative interviewing in a variety of different countries, with different types of criminal justice systems, and consists of chapters written by leading authorities in the field, both academics and practitioners. A wide range of often controversial questions are addressed, including issues raised by the treatment of detainees at Guantanamo Bay, The Reid model for interviewing and miscarriages of justice, the role of legislation in preventing bad practice, the effectiveness of ethical interviewing, investigative interviewing and human rights, responses to miscarriages of justice, and the likely future of investigative interviewing. The book also makes comparisons between British and American approaches to detention without trial, and the role of confession evidence within adversarial legal systems. It also develops a set of proposals to minimise the risks of miscarriages of justice, irrespective of jurisdiction.

Founding a Protectorate - Anthony Sillery 1965

The Impact of Corruption on International Commercial Contracts -

Michael Joachim Bonell 2015-08-29

This volume presents national reports describing the legal instruments that are available to prevent the payment of bribes for acquiring contracts. Anti-corruption is one of the preeminent issues in the modern global commercial order and is tackled with the help of criminal law and contract law in different ways in different countries. The reports included in this volume, from very diverse parts of the world, represent a unique and rich compilation of court decisions, doctrinal discussions and a pool of suggested solutions. The central theme is the enforceability of three problematic types of contracts: the bribe agreement, whereby a bribe

payer promises the agent of his business partner a personal benefit in exchange for favourable contract terms; the agreement between a bribe payer and an intermediary (a "bribe merchant"), where the latter offers his expertise to help funnel bribes to agents of the business partner; and finally, the contract between the bribe payer and his business partner which was obtained by means of bribery. The analysis is tailored toward commercial contracts, which can also include contracts with state-owned enterprises. The examination and comparison of international and national initiatives included in this volume advance the discussion on the most appropriate remedies in corruption cases, and show how to get past the boundaries of criminal, private and contract law.

Ungwana on the Tana - James S. Kirkman 1966

Rebuilding the Family Altar - Dr. Clint Ritchie 2016-04-04

Families are in crisis, and as a result, so is society. The number of children who are leaving the church and completely walking away from the faith is alarming. All of this is part of a deeper issue families have stopped worshipping together at home. Dr. Clint Ritchie examines the change in family worship in *Rebuilding the Family Altar* and challenges parents to accept their God-given role as the leader in the spiritual development of their children. Ritchie provides a biblical foundation for the family altar, examines key elements of family worship, and offers fifty-two family worship devotionals. *Rebuilding the Family Altar* stresses the need for parents to include more than church attendance in their children's spiritual journey. This resource strives to bring the church and parents together to revive family worship. With the precision of a surgeon's scalpel, Dr. Ritchie dissects the cause of today's family struggles. With clarity he goes step by step in diagnosing the issues and along with it, offers solid biblical examples of how to move forward to be the family that God desires and to aid parents, even includes a year's Bible study. This book, with God's guidance, will convict parents and create a new, sold-out generation for His glory. Rev. John Yates, John Yates Ministry, LLC

The Conservation of Cultural Landscapes - Mauro Agnoletti 2006

The conservation and management of cultural landscapes, interpreted as the result of the interrelationships among economic, social and environmental factors through time and space, emerges as essential components in the definition and application of a modern approach to sustainable development. Cultural landscapes are the result of management practices and knowledge accumulated in human history and contribute not only to the cultural heritage of the world, but also to biodiversity and aesthetic beauty, providing also multiple goods and services for the development of rural areas. However, landscapes are severely endangered not only by some effects of the socioeconomic development, but also by inappropriate policies in agriculture, forestry and nature conservation. This interdisciplinary book presents a range of different methods developed to analyse, restore and manage cultural landscapes, reporting a number of case studies from Europe and north America, but raising some questions about the need for a revision of some past orientations.

Matching, Human Capital, and the Covariance Structure of Earnings - Daniel Parent 1995

The Practice of Econometric Theory - Charles G. Renfro 2009-06-29
Econometric theory, as presented in textbooks and the econometric literature generally, is a somewhat disparate collection of findings. Its essential nature is to be a set of demonstrated results that increase over time, each logically based on a specific set of axioms or assumptions, yet at every moment, rather than a finished work, these inevitably form an incomplete body of knowledge. The practice of econometric theory

consists of selecting from, applying, and evaluating this literature, so as to test its applicability and range. The creation, development, and use of computer software has led applied economic research into a new age. This book describes the history of econometric computation from 1950 to the present day, based upon an interactive survey involving the collaboration of the many econometricians who have designed and developed this software. It identifies each of the econometric software packages that are made available to and used by economists and econometricians worldwide.

Newton and Polly - Jody Hedlund 2016-09-20

Uncover the true love story behind the famous hymn that stirs the hearts and ignites the faith of millions around the globe. Amazing grace! How sweet the sound that saved a wretch like me. I once was lost, but now am found... Now remembered as the author of the world's most famous hymn, in the mid-eighteenth century as England and France stand on the brink of war, John Newton is a young sailor wandering aimlessly through life. His only duty is to report to his ship and avoid disgracing his father—until the night he hears Polly Catlett's enchanting voice, caroling. He's immediately smitten and determined to win her affection. An intense connection quickly forms between the two, but John's reckless spirit and disregard for the Christian life are concerns for the responsible, devout Polly. When an ill-fated stop at a tavern leaves John imprisoned and bound, Polly must choose to either stand by his side or walk out of his life forever. Will she forfeit her future for the man she loves?
