International Perspectives on Spinal Cord Injury

- World Health Organization 2013

"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: ---assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

Beta Motorcycles - Massimo Fiorentino
2018-06-19

This book covers the long history, from its origins through to the present day, of the

historic Italian manufacturer Beta Motorcycles, active in the two-wheeled world for over 100 years, presenting previously unpublished material. A particularly versatile firm, Beta Motorcycles has proved capable of diversifying its products--building all kinds of motorcycles--and satisfying the mutating demands of its clientele. The Florentine marque built its own two- and four-stroke engines in-house, but has always been open to joint ventures with other European or Japanese firms. Founded as a bicycle manufacturer, Beta Motorcycles moved into the moped market in the 1960s, off-road motorcycles in the late 1970s, enduro models in the following decade and then scooters, for over 20 years, not to mention the Trial sector in which it conquered eight World Championship titles. In more recent years the company has returned to the "classic" Motocross and Enduro categories and in 2016 collected a further two world titles, including the Constructors' Championship. The book features a comprehensive catalog of every model and every engine produced by Beta Motorcycles over more than a century.

The Hanoverian Dimension in British History, 1714-1837 - Brendan Simms

2007-02-08

For more than 120 years (1714-1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

Internal Combustion Engines - Giancarlo Ferrari 2014-09-01

This book presents an energetic approach to the performance analysis of internal combustion engines, seen as attractive applications of the principles of thermodynamics, fluid mechanics and energy transfer. Paying particular attention

to the presentation of theory and practice in a balanced ratio, the book is an important aid both for students and for technicians, who want to widen their knowledge of basic principles required for design and development of internal combustion engines. New engine technologies are covered, together with recent developments in terms of: intake and exhaust flow optimization, design and development of supercharging systems, fuel metering and spray characteristic control, fluid turbulence motions, traditional and advanced combustion process analysis, formation and control of pollutant emissions and noise, heat transfer and cooling, fossil and renewable fuels, mono- and multi-dimensional models of termo-fluid-dynamic processes.

Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition - Dina Di Giacomo 2019-03-01

Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive

technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

Pininfarina - Giorgio Nada Editore Srl
2020-10-13

On the occasion of the 90th anniversary of Pininfarina, a marque synonymous with style and elegance applied to car design, Pininfarina is a book that surveys, for the first time, the entire output of the Turin coachbuilder, model by model. Produced in close collaboration with the company, it draws on invaluable photographic material accompanying brief contextualising texts. Tracing the history of Pininfarina from its origins to the present day entails reviewing some of the most iconic models in automotive history: from the numerous Ferraris bodied by the historic partner of the Maranello firm to cars such as the Cisitalia 202, the Lancia Aurelia, the Alfa Romeo Duetto and 164, the Maserati GranTurismo through to the current models born under the aegis of the Indian firm

Mahindra. The book also covers the numerous Pininfarina concept cars that have written glorious pages in the history of design, raising the bar every time in terms of the excellence of the car product.

Engineering Geology for Society and Territory - Volume 5 - Giorgio Lollino
2014-08-25

This book is one out of 8 IAEG XII Congress volumes, and deals with the theme of urban geology. Along with a rapidly growing world population, the wave of urban growth continues, causing cities to swell and new metropolitan centers to emerge. These global trends also open new ventures for underground city development. Engineering geology plays a major role in facing the increasing issues of the urban environment, such as: finding aggregates for construction works; providing adequate water supply and waste management; solving building problems associated to geological and geomorphological conditions; evaluating host rock conditions for underground constructions; preventing or mitigating geological and seismic hazards. Furthermore, this book illustrates recent advancements in sustainable land use planning, which includes conservation, protection, reclamation and landscape impact of open pit mining and alternative power generation. The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: 1. Climate Change and Engineering Geology 2. Landslide Processes River Basins 3. Reservoir Sedimentation and Water Resources 4. Marine and Coastal Processes Urban Geology 5. Sustainable Planning and Landscape Exploitation 6. Applied Geology for Major Engineering Projects 7. Beach Nourishment and Protection - Division on
Engineering and Physical Sciences 1996-01-12
Many coastal communities have built structures
at their beaches and added quantities of sand in
contoured designs to combat erosion. Are such
beach nourishment projects technically and
economically sound? Or are they nothing more
than building sand castles, as critics claim?
Beach Nourishment and Protection provides a
sound technical basis for decision-making, with
recommendations regarding the utility of beach
nourishment, the appropriate role of federal
agencies, responsibility for cost, design
methodology, and other issues. This volume:
Examines the economic and social role of
beaches, the history of beach nourishment
projects, and management strategies for shore
protection. Discusses the role of the U.S. Army
Corps of Engineers and other federal agencies,
with a close-up look at the federal flood
insurance program. Explores the state of the art
in project design and prediction of outcomes,
including the controversy over the use of
traditional and nontraditional shore protection
devices. Addresses what is known about the
environmental impacts of beach nourishment.
Identifies what outcomes should be targeted for
continued monitoring by project officials. Beach
Nourishment and Protection provides insight
into the technical, economic, environmental, and
policy implications of beach nourishment and
protection, with examples and suggested
research directions.

High Performance Two-Stroke Engines -
Massimo Clarke 2020-07-14
High Performance Two-Stroke Engines analyses

the technology of spark ignition two-stroke
engines. The presentation is simple and
comprehensive. The description of the operating
cycle, the fluid dynamics, the lubrication and the
cooling systems is followed by painstaking
analysis of the mechanical organs, with the
materials and the manufacturing processes
employed to produce them. The book is
completed by an overview of the history and
evolution of these engines and by an
examination of the principal types and the
diverse fields in which they are employed. A
section of the work is dedicated to an in-depth
analysis of the ignition and combustion phases
and the formation of the air-fuel mixture, with
particular attention paid to the most recent
injection systems.

**Cognitive Therapy of Eating Disorders on
Control and Worry** - Sandra Sassaroli 2011
The aim of this book is to illustrate a variant of
the standard cognitive treatment for eating
disorders. This therapy is based on the principle
that assessing and treating the patient's process
of worry and sense of control fosters greater
understanding of the psychopathology of the
eating disorder and increases the efficacy of
cognitive treatment. The book is an edited
collection of chapters that discuss the
psychopathological roles played by control and
worry in eating disorders, and provide a detailed
description of the therapeutic protocol, which
primarily focuses on the treatment of the
cognitive factors of control and worry as core
factor of a psychotherapy of eating disorders. In
addition, the book shows contributions from
other theorists in the field who have investigated
the role of worry, preoccupation, and control, or
who explore the connections between worry,
control, and other emotional factors underlying
eating disorders, such as perfectionism, self-
esteem, and impulsivity.

Futurist Women - Paola Sica 2016-01-26

Futurist Women broadens current debates on Futurism and literary studies by demonstrating the expanding global impact of women Futurist artists and writers in the period succeeding the First World War. This study initially focuses on the local: the making of the self in the work by the women who were affiliated with the journal *L'Italia futurista* during World War I in Florence. But then it broadens its field of inquiry to the global. It compares the achievements of these women with those of key precursors and followers. It also conceives these women's work as an ongoing dialogue with contemporary political and scientific trends in Europe and North America, especially first wave feminism, eugenics, naturism and esotericism. Finally, it examines the vital importance and repercussions of these women's ideas in current debates on gender and the posthuman condition. This ground-breaking study will prove invaluable for all scholars and upper-level students of modern European literature, Futurism, and gender studies.

Studies in Freemasonry and the Compagnonnage - René Guénon 2004

René Guénon (1886-1951) was one of the great luminaries of the twentieth century, whose critique of the modern world has stood fast against the shifting sands of intellectual fashion. His extensive writings, now finally available in

English, are a providential treasure-trove for the modern seeker: while pointing ceaselessly to the perennial wisdom found in past cultures ranging from the Shamanistic to the Indian and Chinese, the Hellenic and Judaic, the Christian and Islamic, and including also Alchemy, Hermeticism, and other esoteric currents, they direct the reader also to the deepest level of religious praxis, emphasizing the need for affiliation with a revealed tradition even while acknowledging the final identity of all spiritual paths as they approach the summit of spiritual realization. *Studies in Freemasonry and the Compagnonnage* is both an attempt to rediscover the lost roots of Masonry and a fascinating look into the many controversies swirling around the subject of Masonry in serious intellectual circles during the first half of the twentieth century. It must also be classed, along with *Symbols of Sacred Science*, *Spiritual Authority and Temporal Power*, *Traditional Forms and Cosmic Cycles*, *The Esoterism of Dante*, *Insights into Christian Esoterism and Insights into Islamic Esoterism and Taoism*-not to mention related sections in many of his other books-as one of René Guénon's masterful excursions into esoteric myth, symbolism, and secret history. Freemasonry may indeed be, as Guénon ultimately concluded, a largely degenerated and thus no longer strictly 'operative' offshoot of a true initiatory lineage; yet its symbolism, like that of the original Rosicrucians, remains profound, traditional, and therefore ultimately legitimate. And given that the 'Spirit bloweth where it listeth', it is always possible that symbolism of this order may awaken in a receptive soul intimations of the Truth and the Way, which can be of inestimable of value in 'the path to the Path', the quest for a living initiatory spirituality.

Consulting Pupils - Julia Flutter 2004-03-04
Consulting Pupils considers the potential benefits and implications of talking to students about teaching and learning in school, exploring its impact at different levels. Key issues included are: * the importance of engaging young learners in a focused dialogue about learning * the role of pupil consultation in helping schools to develop new directions for improvement * the wider implications of pupil consultation and participation in teaching the principles of

citizenship and democracy. Through examples of pupil consultation initiatives in primary and secondary schools, the authors demonstrate how an agenda for change based on pupils' perspectives on teaching and learning can be used to improve classroom practice. Part of the What's In It For Schools series aimed at making educational policy issues relevant to practitioners, this book will be a valuable resource for practitioners, students and researchers interested in exploring pupils' perspectives on teaching and learning.

Mini Motocross and Pit Bike Performance Handbook - Eric Gorr 2008-02-15

Whether it's geared up for racing, tricked out as a pit bike, used to teach kids how to ride, or simply to take a spin, the small motorcycle takes as much care as its full-size counterpart. This book, by one of the world's foremost off-road motorcycle builders, tells you everything you need to know to keep your mini-motocross or playbike running smoothly, safely, and, of course, in style. This comprehensive handbook, the first of its kind, covers a variety of models--mini motocross racers from 50cc to 100cc, and small playbikes from 50cc to 250cc. A complete buying guide helps readers determine which of the small motorcycles best suit their needs. The book provides clearly detailed information on maintenance schedules, procedures, and the tools, materials, and space you'll need. Going that extra mile, Forward Motion's Eric Gorr offers model-specific suggestions for modifying the bikes to improve performance on and off the racetrack. He also includes sample builds of some of the most popular race and playbikes on the market.

INNOCENTI LAMBRETTA - Vittorio Tessera 2008-02

The Lambretta was one of the most popular forms of transportation of the 50s and 60s and, together with the Vespa, it monopolized the Italian scooter market, and knew how to sell itself in the international market with its own original technical characteristics and exceptionally modern frame. This long awaited new edition provides new detailed appendices and specifications for all the models covered,

helping collectors in the identification and restoration of their Lambretta.

Motori a due tempi di alte prestazioni - Massimo Clarke 2018

Asylums - Erving Goffman 2017-09-08

A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example, providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to develop a sociological version of the structure of the self. Each of the essays in this book were intended to focus on the same issue--the inmate's situation in an institutional context. Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source in sociology and having little direct relation to the other chapters. This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book. If sociological concepts are to be treated with affection, each must be traced back to where it best applies, followed from there wherever it seems to lead, and pressed to disclose the rest of its family.

Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The Car Hacker's Handbook - Craig Smith 2016-03-01

Modern cars are more computerized than ever.

Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory

settings with performance-tuning techniques

- Build physical and virtual test benches to try out exploits safely

If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

No Prison - Massimo Pavarini 2018-08-15

This book is different from most of the academic and non-academic literature on prisons. It does not advocate prison reform. Instead, it makes the case for the prisons' abolition. According to the authors, prison amelioration is an illusion, but abolition is an option - a real possibility, and certainly an issue worth of public discussion and political action - urgently.
