Conservation of Tropical Plant Species -

M.N. Normah 2012-08-04

The book is designed to provide a review on the methods and current status of conservation of the tropical plant species. It will also provide the

information on the richness of the tropical plant diversity, the need to conserve, and the potential utilization of the genetic resources. Future perspectives of conservation of tropical species will be discussed. Besides being useful to

researchers and graduate students in the field, we hope to create a reference for a much wider audience who are interested in conservation of tropical plant diversity.

Hypogene Karst Regions and Caves of the World - Alexander Klimchouk 2017-08-17

This book illustrates the diversity of hypogene speleogenetic processes and void-conduit patterns depending on variations of the geological environments by presenting regional and cave-specific case studies. The cases include both well-known and newly recognized hypogene karst regions and caves of the world. They all focus on geological, hydrogeological, geodynamical and evolutionary contexts of hypogene speleogenesis. The last decade has witnessed the boost in recognition of the possibility, global occurrence, and practical importance of hypogene karstification

(speleogenesis), i.e. the development of solutional porosity and permeability by upwelling flow, independent of recharge from the overlying or immediately adjacent surface. Hypogene karst has been identified and documented in many regions where it was previously overlooked or misinterpreted. The book enriches the basis for generalization and categorization of hypogene karst and thus improves our ability to adequately model hypogene karstification and predict related porosity and permeability. It is a book which benefits every researcher, student, and practitioner dealing with karst.

Irrigation in Southern and Eastern Asia in

Figures - Karen Frenken 2012

The AQUASTAT Programme was initiated with a view to presenting a comprehensive picture of water resources and irrigation in the countries of Africa, Asia, Latin America and the Caribbean and providing systematic, up-to-date and reliable information on water for agriculture and rural development. This report presents the results of the most recent survey carried out in the 22 countries of the Southern and Eastern Asia region, and it analyzes the changes that have occurred in the ten years since the first survey. Following the AQUASTAT methodology, the survey relied as much as possible on country-based statistics and information.

Architecture, Astronomy and Sacred Landscape in Ancient Egypt - Giulio Magli 2013-07-22

This book examines the interplay between astronomy and dynastic power in the course of ancient Egyptian history, focusing on the fundamental role of astronomy in the creation of

the pyramids and the monumental temple and burial complexes. Bringing to bear the analytical tools of archaeoastronomy, a set of techniques and methods that enable modern scholars to better understand the thought, religion and science of early civilizations, Giulio Magli provides in-depth analyses of the pyramid complexes at Giza, Abusir, Saqqara and Dahshur, as well as of the Early Dynastic necropolis at Abydos and the magnificent new Kingdom Theban temples. Using a variety of data retrieved from study of the sky and measurements of the buildings, he reconstructs the visual, symbolic and spiritual world of the ancient Egyptians and thereby establishes an intimate relationship among celestial cycles, topography and architecture. He also shows how they were deployed in the ideology of the pharaoh's power in the course of Egyptian history.

Biogeodynamics of Pollutants in Soils and Sediments - Wim Salomons 2012-12-06

In the USA, Western and Central Europe, there are many large-scale polluted sites that are too large to be cleaned up economically with available technologies. The pollution is caused by heavy industries to soils and sediments in waterways and reservoirs. Since these areas are

expected to remain polluted for many years, it is necessary to take a long-term view to insure that the capacity to retain the contaminants is not diminished and to understand the potential for large-scale contaminant mobilization at these sites triggered by changing environmental conditions. This book provides information for predicting long-term changes and making risk assessments and describes the approach of geochemical engineering to handling large-scale polluted sites.

Buddhist approach to responsible consumption and sustainable development - Thich Duc Thien
2019-04-16

EDITORS' INTRODUCTION BACKGROUND This is a great academic solace to see the Volume on Buddhist Approach to Responsible Consumption and Sustainable Development which covers Sub-Theme Five of UNDV 2019 Academic Conference. REVIEW OF CONTENTS The World of Today is suffering from the crisis of consumerism. The first paper on a Buddhist

Perspective on Overconsumption and Its Negative Effects towards Society and Environment deals with it specifically in the reference of consumption beyond requirements which is generally termed as overconsumption. Such human tendency leads to negative impact on the entire force of nature and the environment. How the Buddhist principles guide us to live a better life where there is least effect on the environment and society is well explained in this paper. The second paper in this volume, entitled Attaining a Sustainable Society through the Teachings of the Khandhaka of the Theravāda Vinaya Piṭaka is a vivid example of the benefits which one can derive from our ancient Pali literature. While studying the Theravada Vinaya Pitaka, the author explores the specific words of the Buddha in the Khandhaka which hint at the possibility of sustainability and development going together without harming other societal components. Though the Vinaya being a Pitaka for monastics,

it still is highly useful for the laity as well. The paper, Buddhist Ethics in the Establishments of Green Tourism is a unique academic contribution. Here, the writer states that the Buddha's life and principles make us learn a lot as how green methods must be applied in our day-to-day life. The damage being caused by the genre called DEVELOPMENT needs to be controlled and for this, the words of Master exhibits his proximity to protect nature, humanity and the world order.

Tomorrow's Tourist: Scenarios & Trends - Ian Yeoman 2009-06-04

By 2030, China will be the world's largest tourism destination, holidays in Outer Space will be the ultimate luxury experience, extreme Swedish ironing will be an Olympic Sport, embedded technologies will be the norm in future tourists and skiing in the Alps will be no more. These are some of the changes that will occur between now and 2030 that will change world tourism. *Tomorrows Tourist: Scenarios & Trends* enables readers to imagine what a future tourist might be, where they will go and what they will do. This is the most comprehensive analysis of how world tourism is changing and what it means for destinations. Each chapter consists of a scenario about a future tourist, which is then backed up with evidence and trends plus a number of assumptions about the future. The book is accompanied by its own website at <http://www.tomorrowstourist.com> which is owned and regularly updated by the author.

Tropical Fruit Tree Diversity - Bhuwon Sthapit 2016-05-12

Farmers have developed a range of agricultural practices to sustainably use and maintain a wide

diversity of crop species in many parts of the world. This book documents good practices innovated by farmers and collects key reviews on good practices from global experts, not only from the case study countries but also from Brazil, China and other parts of Asia and Latin America. A good practice for diversity is defined as a system, organization or process that, over time and space, maintains, enhances and creates crop genetic diversity, and ensures its availability to and from farmers and other users. Drawing on experiences from a UNEP-GEF project on "Conservation and Sustainable Use of Wild and Cultivated Tropical Fruit Tree Diversity

for Promoting Livelihoods, Food Security and Ecosystem Services", with case studies from India, Indonesia, Malaysia and Thailand, the authors show how methods for identifying good practices are still evolving and challenges in scaling-up remain. They identify key principles effective as a strategy for mainstreaming good practice into development efforts. Few books draw principles and lessons learned from good practices. This book fills this gap by combining good practices from the research project on tropical fruit trees with chapters from external experts to broaden its scope and relevance.
