### **In Mortal Combat** - John Toland 2016-05-31

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun and Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

### **Phantom Buddha** - Alvaro Cardona-Hine 2013-05-07

Phantom Buddha is a portrait of the experiences of a man not quite made for this conventional world, beginning with his dead-end job in an insurance company for nine long years, which the author describes with a wicked humor. Married, with four children, he meets and falls in love with another woman and leaves his family to be with her, finding the freedom to be himself he so yearns for. But, when he introduces his new love to the zen practice that has long interested him, she becomes totally involved, both in the practice and with the Japanese zen master who uses his position to seduce many of his female students. Forced out of the zen center when he expresses his unhappiness with this situation, he sinks into despair and a hopeless pursuit of his beloved. Written in some parts with broad humor, Cardona-Hine also captures the ephemeral beauty of a new love and the depths of despair at its loss. Based on real events, the author intertwines dreams that he had during these years, dreams which reveal to an even greater extent the emotional intensity of his situation as well as the states of mind that sweep through him. Intensely written and felt, the novel shimmers with an authenticity and passion seldom seen in writing today.

### **Fundamentals of Physics** - Alessio Mangoni 2020

This book aims to provide solid bases for the study of physics for the university and it is divided into four parts, each dedicated to a fundamental branch of physics: quantum mechanics, theoretical physics, particle physics and condensed matter physics. In the first part we start with the concept of wave function, until the Heisenberg uncertainty principle. In the second part, after recalling the basic concepts of relativity, we treat the elementary particles and the hadrons, arriving to the notions of scattering and cross section. The third part is dedicated to the theoretical physics, where we analyze the field theory and the concepts of Lagrangian and Hamiltonian, introducing the quantum electrodynamics (QED), passing through the Klein-Gordon, Dirac and Maxwell fields. In the last part of the book we expose the basics of the condensed matter physics, including diffusion and Brownian motion, Drude and Sommerfeld models, the calculation of specific heat and the principal mechanical properties of solids, with references to lattice defects and semiconductors.

### Wheat Landraces - Nusret Zencirci 2021-09-15

Landraces possess a very large genetic base in population structure and are dynamic populations of cultivated plants with historical origin, distinct identity, and without any formal crop improvement. They are often genetically diverse, locally adapted, and associated with traditional farming systems. Resistance genes to biotic and abiotic stress factors, which are especially diversified in landraces, are of great interest to plant breeders, faced with global climate challenge. In addition, gene pools made of different landraces grown in different ecological conditions can be used for wheat breeding to enhance quality; yield and other desirable agricultural parameters. An estimated 75% of the genetic diversity of crop plants was lost in the last century due to the

replacement of high yielding modern varieties. There is, thus, an urgent need to preserve existing species, not only for posterity but also as a means to secure food supply for a rising world population. In this book, we provide an overview of wheat landraces with special attention to genetic diversities, conservation, and utilization.

**Applications techniques de la théorie de l'élasticité** - Ernest Gysen 1927

*Strategic Vision* - Zbigniew Brzezinski 2012-01-24

By 1991, following the disintegration first of the Soviet bloc and then of the Soviet Union itself, the United States was left standing tall as the only global super-power. Not only the 20th but even the 21st century seemed destined to be the American centuries. But that super-optimism did not last long. During the last decade of the 20th century and the first decade of the 21st century, the stock market bubble and the costly foreign unilateralism of the younger Bush presidency, as well as the financial catastrophe of 2008 jolted America - and much of the West - into a sudden recognition of its systemic vulnerability to unregulated greed. Moreover, the East was demonstrating a surprising capacity for economic growth and technological innovation. That prompted new anxiety about the future, including even about America's status as the leading world power. This book is a response to a challenge. It argues that without an America that is economically vital, socially appealing, responsibly powerful, and capable of sustaining an intelligent foreign engagement, the geopolitical prospects for the West could become increasingly grave. The ongoing changes in the distribution of global power and mounting global strife make it all the more essential that America does not retreat into an ignorant garrison-state mentality or wallow in cultural hedonism but rather becomes more strategically deliberate and historically enlightened in its global engagement with the new East. This book seeks to answer four major questions: 1. What are the implications of the changing distribution of global power from West to East, and how is it being affected by the new reality of a politically awakened humanity? 2. Why is America's global appeal waning, how ominous are the symptoms of America's domestic and international decline, and how did America waste the unique global opportunity offered by the peaceful end of the Cold War? 3. What would be the likely geopolitical consequences if America did decline by 2025, and could China then assume America's central role in world affairs? 4. What ought to be a resurgent America's major long-term geopolitical goals in order to shape a more vital and larger West and to engage cooperatively the emerging and dynamic new East? America, Brzezinski argues, must define and pursue a comprehensive and long-term a geopolitical vision, a vision that is responsive to the challenges of the changing historical context. This book seeks to provide the strategic blueprint for that vision. Leadership, Innovation and Entrepreneurship as Driving Forces of the Global Economy - Rachid Benlamri 2016-12-01

This volume aims to outline the fundamental principles behind leadership, innovation and entrepreneurship and show how the interrelations between them promote business and trade practices in the global economy. Derived from the 2016 International Conference on Leadership, Innovation, and Entrepreneurship (ICLIE), this volume showcases original papers presenting current research, discoveries and innovations across disciplines such as business, social sciences, engineering, health sciences and medicine. The pace of globalization is increasing at a rapid rate and is primarily driven by increasing volume of trade, accelerating pace of competition among nations, freer flows of

capital and increased level of cooperation among trading partners. Leadership, innovation, and entrepreneurship are key driving forces in enhancing this phenomenon and are among the major catalysts for contemporary businesses trading in the global economy. This conference and the enclosed papers provides a platform in which to disseminate and exchange ideas to promote a better understanding of current issues and solutions to challenges in the globalized economy in relation to the fields of entrepreneurship, business and economics, technology management, and Islamic finance and management. Thus, the theories, research, innovations, methods and practices presented in this book will be of use to researchers, practitioners, student and policy makers across the globe.

Joan Didion: The Last Interview - MELVILLE HOUSE 2022-06-28

The iconic writer whose prose was as influential and as it is unmistakably hers is joined in conversation with Sheila Heti, Hilton Als, Dave Eggers, Hari Kunzru and many more. Some writers define a generation. Some a genre. Joan Didion did both, and much more. Didion rose to prominence with her nonfiction collection, *Slouching Towards Bethlehem*, and she quickly became the writer who captured the zeitgeist of the washed-out, acid hangover of the 60s. But as a bicoastal writer of fiction and nonfiction whose writing ranged from personal essays and raw, intimate memoirs to reportage on international affairs and social justice, Didion is much harder to pin down than her reputation might suggest. This collection encompasses it all, in conversations that delve into her underappreciated mid-career works, her influences, the loss of her husband and daughter, and her most infamous essays. Far from the evasive, terse minimalist that has come to dominate the image of Joan Didion, what this collection reveals is a warm, thoughtful woman whose well earned legacy promises to live on for readers and writers for many generations to come.

Medicinal, Aromatic and Stimulant Plants - Johannes Novak 2021-10-11

The agricultural sector of medicinal (including plant stimulants) and aromatic plants is characterized by an enormous number and diversity of species. Only a few of them can be considered cultivated crops in which significant breeding efforts are made. For most species, however, breeding is performed in short-term projects only. Therefore, basic knowledge about these species is still fragmentary. Our intention is to compile and organize the available information on the most commonly utilized plant species into one publication, thereby providing a standardized resource for the researchers and the grower community. This book therefore provides reference source materials for a wide variety of plant species used for human consumption due to their flavor, medicinal or recreational properties. It is divided into a section of general topics on genetic resources, breeding adaptation of analytic methods and a compilation of basic data for DNA content, chromosome number and mating system followed by a section of 20 monographs on a species or species groups.

**In Battle for Peace** - William Edward Burghardt Du Bois 2014-02-20

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, *In Battle for Peace* frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial—he was later acquitted—and faced political persecution for over a decade. Part autobiography and part political statement, *In Battle for Peace* remains today a powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.
