American History Connecting with the Past - Alan Brinkley 2012

Poverty, Politics, and Race - Dorothy Inman-Johnson 2012-12-11

Poverty, Politics , and Race gives a true face to poverty, while knocking down

stereotypes on race and the poor ; and sheds light on how the politics of the past and present have magnified issues of race in America.The book also gives a personal look back at an important period in civil rights in America's history and sounds an alarm at the renewed and very open racial

hatred that resurfaced with the election of the first African-American U.S. President. It takes a critical look at current events affecting the lives of average Americans through the prism of a Black woman who has experienced firsthand the effects of poverty, race, and the politics surrounding both issues. The book hopefully will help remove the blinders and lead to a more honest discussion on the divisions in our country and ways we can begin to heal them.

Inhuman Traffick - Rafe Blaufarb 2014-09-01

Inhuman Traffick tells for the first time a story of enslavement and freedom that spans the entire Atlantic world. Beginning in 1829 off the west coast of Africa with the recapture of the slave ship Neirsée--previously seized by the British Navy in its efforts to suppress the "inhuman traffick"--and ending with the liberation of the African passengers who had been sold into slavery in the French Caribbean, Rafe Blaufarb puts a human face on the history of

the transatlantic slave trade and the efforts to suppress it. He addresses a neglected aspect of this tragic history in the wide geographical and thematic contexts in which it took place--Africa, the Caribbean, Europe, and the Atlantic Ocean--and situates the story in familial, social, economic, diplomatic, and military spheres. Inhuman Traffick shows how history is done by explaining how the documents on which it is based moved through time and space from the ships, African outposts, colonial buildings, and ministerial offices to the archives of present-day Britain and France. Blaufarb follows the ship, its crew, and its captives from the slave port of Old Calabar to the Caribbean and into the courts of Britain and France, where the history of the illegal slave trade, slavery in the Caribbean, and diplomatic history all come into focus. Students will be taken in by the vivid drawings and the rich narrative, but in Blaufarb's skilled hands, they will also find themselves immersed in a

unique learning experience. Blaufarb not only presents the history of the ship and its captives, he takes the reader inside the project itself. He explains how he came upon the story, how he and his editor envisioned the project, and how he worked with illustrator Liz Clarke to craft more than 300 "cells" that comprise Part II of the book. He and Clarke even take the reader inside archives in France and Britain. This powerful combination of historical essay, graphics, primary-source documents, and discussion questions gives students insight into the Atlantic World plantation complex, the transatlantic slave trade, and the process of historical storytelling itself.

Fandom Unbound - Mizuko Ito 2012-02-28

In recent years, otaku culture has emerged as one of Japan's major cultural exports and as a genuinely transnational phenomenon. This timely volume investigates how this once marginalized popular culture has come to play a major role in Japan's identity at

home and abroad. In the American context, the word otaku is best translated as "geek"—an ardent fan with highly specialized knowledge and interests. But it is associated especially with fans of specific Japan-based cultural genres, including anime, manga, and video games. Most important of all, as this collection shows, is the way otaku culture represents a newly participatory fan culture in which fans not only organize around niche interests but produce and distribute their own media content. In this collection of essays, Japanese and American scholars offer richly detailed descriptions of how this once stigmatized Japanese youth culture created its own alternative markets and cultural products such as fan fiction, comics, costumes, and remixes, becoming a major international force that can challenge the dominance of commercial media. By exploring the rich variety of otaku culture from multiple perspectives, this groundbreaking collection

provides fascinating insights into the present and future of cultural production and distribution in the digital age.

The American Yawp - Joseph L. Locke 2019-01-22

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass*

The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, *The American Yawp*

incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of *The American Yawp* will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The *American Yawp* traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative

of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Forging the Modern World - James Carter 2022-05

"A higher education textbook on World History from 1400 to the present"--

Machine Habitus - Massimo Airoidi 2021-12-13

We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely - on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The 'machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital

social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.

The Wilsonian Moment -

Erez Manela 2007-07-23

During the Paris Peace Conference of 1919, while key decisions were debated by the victorious Allied powers, a multitude of smaller nations and colonies held their breath, waiting to see how their fates would be decided. President Woodrow Wilson, in his Fourteen Points, had called for "a free, open-minded, and absolutely impartial adjustment of all colonial claims," giving equal weight would be given to the opinions of the colonized peoples and the colonial powers. Among those nations now paying close attention to Wilson's words and actions were the budding nationalist leaders of four disparate non-

Western societies--Egypt, India, China, and Korea. That spring, Wilson's words would help ignite political upheavals in all four of these countries. This book is the first to place the 1919 Revolution in Egypt, the Rowlatt Satyagraha in India, the May Fourth movement in China, and the March First uprising in Korea in the context of a broader "Wilsonian moment" that challenged the existing international order. Using primary source material from America, Europe, and Asia, historian Erez Manela tells the story of how emerging nationalist movements appropriated Wilsonian language and adapted it to their own local culture and politics as they launched into action on the international stage. The rapid disintegration of the Wilsonian promise left a legacy of disillusionment and facilitated the spread of revisionist ideologies and movements in these societies; future leaders of Third World liberation movements--Mao Zedong, Ho Chi Minh, and Jawaharlal Nehru, among

others--were profoundly shaped by their experiences at the time. The importance of the Paris Peace Conference and Wilson's influence on international affairs far from the battlefields of Europe cannot be underestimated. Now, for the first time, we can clearly see just how the events played out at Versailles sparked a wave of nationalism that is still resonating globally today.

Accessible American History: Connecting the Past to the Present - Paul Swendson 2020-12-30

In a comprehensive series of essays - addressing topics from the time of Columbus to the covid-19 pandemic - Paul Swendson does in written form what he has spent more than twenty years doing as a community college history instructor: making American history "manageable, meaningful, and relevant" for everyday people. In addition to breaking down the fundamental topics of American history in a concise, easy to read fashion, this is a work of political and social commentary, relating the experiences, struggles, and decisions of past Americans to life in the United States today. As stated in the book's introductory essay, "For if history teachers - and historians for that matter -

make no effort to draw lessons from the data and to bring the facts to life, then we are merely engaged in a trivia exercise.” In the end, the goal of this book, like all good history teaching and writing, is to help its readers become a little wiser, and raising the essential questions is often more important than providing the “right” answers. This book is ideal for anyone who is looking to get an overview of the basics of American history. It can also be a very effective supplemental reader in an American history survey course, stimulating classroom discussions that go beyond just learning the “facts.” The author himself is currently using this book in his history courses, and many of the essays have evolved through his personal experiences working with junior high, high school, and college students. And since many of these students have not been history enthusiasts, the author has worked as hard at making the material engaging as he has ensuring its accuracy.

The Unfinished Nation - Alan Brinkley 1997

"In *The Unfinished Nation*, Alan Brinkley provides a clear and intelligent account of the American past that strikes a balance between the new diversity in scholarship and the

narrative unity that any general history must have. He makes clear that one can incorporate the rich and varied experiences of America's many cultures into a coherent and compelling story and at the same time retain a sense of what ties Americans together as members of a perpetually troubled but remarkably successful nation"--Description from amazon.com.

The Landscape of History - John Lewis Gaddis 2004

What is history and why should we study it? Is there such a thing as historical truth? Is history a science? One of the most accomplished historians at work today, John Lewis Gaddis, answers these and other questions in this short, witty, and humane book. *The Landscape of History* provides a searching look at the historian's craft, as well as a strong argument for why a historical consciousness should matter to us today. Gaddis

points out that while the historical method is more sophisticated than most historians realize, it doesn't require unintelligible prose to explain. Like cartographers mapping landscapes, historians represent what they can never replicate. In doing so, they combine the techniques of artists, geologists, paleontologists, and evolutionary biologists. Their approaches parallel, in intriguing ways, the new sciences of chaos, complexity, and criticality. They don't much resemble what happens in the social sciences, where the pursuit of independent variables functioning with static systems seems increasingly divorced from the world as we know it. So who's really being scientific and who isn't? This question too is one Gaddis explores, in ways that are certain to spark interdisciplinary controversy. Written in the tradition of Marc Bloch and E.H. Carr, *The Landscape of History* is at once an engaging introduction to the historical method for

beginners, a powerful reaffirmation of it for practitioners, a startling challenge to social scientists, and an effective skewering of post-modernist claims that we can't know anything at all about the past. It will be essential reading for anyone who reads, writes, teaches, or cares about history.

Primary History Kingdom of Benin -

Fidelia Nimmons
2013-08-27

Primary History Kingdom of Benin (Not to be confused with former Dahomey) has been written to support teachers to meet the requirements of the new National Curriculum Framework for history at Key Stage 2: a non-European society that provides contrasts with British history. It covers all historical aspects of the great kingdom which was at its height between the 14th and

16 centuries. This book is divided into three sections. The first section covers study of palace life; the second section covers growing up experiences of the kingdom's children and of ordinary people. The third section provides numerous and varied historical enquiries activities to improve pupils' knowledge and understanding of historical facts of the great kingdom and help to develop their enquiries skills. This section includes comparison of medieval British and Benin kings. This book incorporates historical sources including African oral traditions of storytelling, wood and terracotta sculptures and reading and analysis of the Benin bronze plaques through which the kings and elders of the kingdom chose to record their history. To keep up with technological advancement and opportunities, a dedicated website has been set up to provide further activities and up to date knowledge and information on the kingdom. A virtual classroom has also been created through which the

author can clarify and provide additional support to teachers and pupils as necessary. Details of these websites are below. There are many more resources on the website including videos and photographs with cross curricular activities including ideas for developing writing and word work through drama and role play. This method of learning makes this unit an exciting topic for pupils to study. The kingdom, founded around 40Bc was at its height between the 14th and 16th century when it conquered neighbouring countries on the West African Coast and traded far afield with Europeans and traders from the East. It was sacked by the British in 1897 though the crown was restored in 1914, the king's authority and influence was highly diminished. However, the people's traditions and customs continue to this day. Fidelia Nimmons has a track record of achieving outstanding results with a variety of learners and has written many teaching and learning support books to this

The Influence of Sea Power Upon History, 1660-1783 -

Alfred Thayer Mahan 1918

Today, war is more complicated than it has ever been. When considering military strategy, a commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation

rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled "The Influence of Sea Power Upon History." The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th century. His arguments, along with technological advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the

most important work on naval strategy in history.

Why American History Is Not What They Say -

Malik Ambar - Omar H. Ali 2016-01-06
Part of *The World in a Life* series, this brief, inexpensive text provides insight into the life of slave soldier Malik Ambar. *Malik Ambar: Power and Slavery across the Indian Ocean* offers a rare look at an individual who began in obscurity in eastern Africa and reached the highest levels of South Asian political and military affairs in the late sixteenth and early seventeenth centuries. Ambar's

rise from slavery in East Africa to ruler in South Asia sheds light on the diverse mix of people, products, and practices that shaped the Indian Ocean world during the early modern period. Originally from Ethiopia--historically called Abyssinia--Ambar is best known for having defended the Deccan from being occupied by the Mughals during the first quarter of the seventeenth century. His ingenuity as a military leader, his diplomatic skills, and his land-reform policies contributed to his success in keeping the Deccan free of Mughal imperial rule. We live in a global age where big concepts like "globalization" often tempt us to forget the personal side of the past. The titles in The World in a Life series aim to revive these meaningful lives. Each one shows us what it was like to live on a world historical stage. Brief, inexpensive, and thematic, each book can be read in a week, fit within a wide range of curricula, and shed insight into a particular place or time. Four to six short

primary sources at the end of each volume sharpen the reader's view of an individual's impact on world history. Connecting Past and Present - Ira Richard Harkavy 2000-01 This volume, 16th in a series about service learning and the academic disciplines, focuses on the ways service learning adds immediacy and relevance to the study of history. The authors of this collection provide answers to why history and service learning should be connected, and they describe strategies to bring this about. The chapters are: (1) "Service-Learning as a Strategy for Advancing the Contemporary University and the Discipline of History" (Bill M. Donovan); (2) "Service-Learning, Academically Based Community Service, and the Historic Mission of the American Urban Research University" (Ira Harkavy); (3) "Emerson's Prophecy" (John Saltmarsh); (4) "Service-Learning and History: Training the Metaphorical Mind" (J. Matthew Gallman); (5) "The Turnerian Frontier: A New

Approach to the Study of the American Character" (Michael Zuckerman); (6) "Reflections of a Historian Teaching a Service-Learning Course about Poverty and Homelessness in America" (Albert Camarillo); (7) "History as Public Work" (Elisa von Joeden-Forgey and John Puckett); (8) "Reclaiming the Historical Tradition of Service in the African American Community" (Beverly W. Jones); (9) "Service-Learning as a Tool of Engagement: From Thomas Aquinas to Che Guevara" (Bill M. Donovan); (10) "Serving and Learning in the Chilean Desert" (Marshall C. Eakin); (11) "Classical

Studies and the Search for Community" (Ralph M. Rosen); and (12) "The Unspoken Purposes of Service-Learning: Teaching the Holocaust" (Steve Hochstadt). Each chapter contains references. An appendix contains an annotated bibliography of 44 items and a list of contributors to the volume. (SLD)
