## **Rethinking Language and Gender Research**

- Victoria Bergvall 2014-06-11

Rethinking Language and Gender Research is the first book focusing on language and gender

to explicitly challenge the dichotomy of female and male use of language. It represents a turning point in language and gender studies, addressing the political and social consequences of popular beliefs about women's language and men's language and proposing new ways of looking at language and gender. The essays take

a fresh approach to the study of subjects such as language and sex and the use of language to produce and maintain power and prestige.

Topics explored in this text include sex and the brain; the language of a rape hearing; teenage language; radio talk show exchanges; discourse strategies of African American women; political implications for language and gender studies; the relationship between sex and gender and the construction of identity through language. A useful introductory chapter sets the articles in context, explaining the relationships that exist between them, and full cross-referencing between articles and an extensive index allow for easy access to information. The interdisciplinary approach of the text, the wide-range of methodologies presented, and the comprehensive review of the current literature will make this book invaluable reading for all upper-level undergraduate students, postgraduate students and researchers in the fields of linguistics, sociolinguistics, gender and

cultural studies.

Weimar in Exile - Jean-Michel Palmier  
2017-01-31

A magisterial history of the artists and writers who left Weimar when the Nazis came to power. In 1933 thousands of intellectuals, artists, writers, militants and other opponents of the Nazi regime fled Germany. They were, in the words of Heinrich Mann, "the best of Germany," refusing to remain citizens in this new state that legalized terror and brutality. Exiled across the world, they continued the fight against Nazism in prose, poetry, painting, architecture, film and theater. *Weimar in Exile* follows these lives, from the rise of national socialism to their return to a ruined homeland, retracing their stories, struggles, setbacks and rare victories. The dignity in exile of Walter Benjamin, Ernst Bloch, Bertolt Brecht, Alfred Döblin, Hanns Eisler, Heinrich Mann, Thomas Mann, Anna Seghers,

Ernst Toller, Stefan Zweig and many others provides a counterpoint to the story of Germany under the Nazis.

Murder in the Cathedral - T. S. Eliot 2014-02-25  
The verse dramatization of the medieval murder of Thomas Becket at Canterbury by the winner of the Nobel Prize for Literature. The Archbishop Thomas Becket speaks fatal words before he is martyred in T. S. Eliot's best-known drama, based on the murder of the Archbishop of Canterbury in 1170. Praised for its poetically masterful handling of issues of faith, politics, and the common good, T. S. Eliot's play bolstered his reputation as the most significant poet of his time. It has been performed on stage, film, and television since 1935 and was the basis for the opera *Assassinio nella Cattedrale* by the Italian composer Ildebrando Pizzetti.

Mismatch - Ronald Giphart 2018-02-15

Our brains evolved to solve the survival problems of our Stone Age ancestors, so when faced with modern day situations that are less extreme, they often encounter a mismatch. Our

primitive brains put us on the wrong foot by responding to stimuli that - in prehistoric times - would have prompted behaviour that was beneficial. If you've ever felt an anxious fight or flight response to a presenting at a board meeting, equivalent to facing imminent death by sabre-toothed tiger, then you have experienced a mismatch. Mismatch is about the clash between our biology and our culture. It is about the dramatic contrast between the first few million years of human history - when humans lived as hunters and gatherers in small-scale societies - and the past twelve thousand years following the agricultural revolution which have led us to comfortable lives in a very different social structure. Has this rapid transition been good for us? How do we, using our primitive minds, try to survive in a modern information society that radically changes every ten years or so? Ronald Giphart and Mark van Vugt show that humans have changed their environment so drastically that the chances for mismatch have

significantly increased, and these conflicts can have profound consequences. Reviewed through mismatch glasses, social, societal, and technological trends can be better understood, ranging from the popularity of Facebook and internet porn, to the desire for cosmetic surgery, to our attitudes towards refugees. Mismatches can also affect our physical and psychological well-being, in terms of our attitudes to happiness, physical exercise, choosing good leaders, or finding ways to feel better at home or work. Finally, Mismatch gives us an insight into politics and policy which could enable governments, institutions and businesses to create an environment better suited to human nature, its potential and its constraints. This book is about converting mismatches into matches. The better your life is matched to how your mind operates, the greater your chances of leading a happy, healthy and productive life.

Big Data in Organizations and the Role of Human Resource Management - Tobias M. Scholz 2017

Big data are changing the way we work. This book conveys a theoretical understanding of big data and the related interactions on a socio-

technological level as well as on the organizational level. Big data challenge the human resource department to take a new role. An organization's new competitive advantage is its employees augmented by big data.

Revelation and Divination in Ndembu Ritual - Victor Turner 2018-05-31

Drawing on two and a half years of field work, Victor Turner offers two thorough ethnographic studies of Ndembu revelatory ritual and divinatory techniques, with running commentaries on symbolism by a variety of Ndembu informants. Although previously published, these essays have not been readily available since their appearance more than a dozen years ago. Striking a personal note in a new introductory chapter, Professor Turner acknowledges his indebtedness to Ndembu ritualists for alerting him to the theoretical relevance of symbolic action in understanding human societies. He believes that ritual symbols, like botanists' stains, enable us to detect and

trace the movement of social processes and relationships that often lie below the level of direct observation.

**Mordin on Time** - Nick Mordin 2003-02

In Mordin On Time, Nick Mordin sets out his

method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). *Mordin On Time* enables the reader to construct their own speed ratings wherever they live.

*Gorbachev: His Life and Times* - William Taubman 2017-09-05

A National Book Critics Circle Award Finalist  
“Essential reading for the twenty-first [century].” —Radhika Jones, The New York Times Book Review  
In the first comprehensive biography of Mikhail Gorbachev, William Taubman shows how a peasant boy clambered to

the top of a system designed to keep people like him down, found common ground with America’s arch-conservative president Ronald Reagan, and permitted the USSR and its East European empire to break apart without using force to preserve them. Drawing on interviews with Gorbachev himself, transcripts and documents from the Russian archives, and interviews with Kremlin aides and adversaries, Taubman’s intensely personal portrait extends to Gorbachev’s remarkable marriage to a woman he deeply loved. Nuanced and poignant, yet unsparing and honest, this sweeping account has all the amplitude of a great Russian novel.  
*The Power of Scrum* - Jeffrey Sutherland 2011  
The Power of Scrum tells the inspiring story of Mark Resting, CTO of a software company struggling with a major client and a project with more problems than solutions and a marriage in crisis. But, when he meets Jerry, a West-coast expert in Scrum, light at the end of the tunnel begins to appear, Mark begins to reluctantly

hope things will work out. The road is bumpy, but Jerry skillfully brings Mark's developers from a world of project crisis into a revolutionary approach that can save the day. Authors Jeff Sutherland, Rini van Solinger, and Eelco Rustenburg have written a fictional narrative that masterfully weaves a compelling human story around the teaching moments of a software, project management how-to, and in the process tell an engaging story of personal growth and triumph, while demonstrating the power of a revolutionary and mission-critical approach to project management. The Power of Scrum is a must read for project managers, software developers, and product developers, as well as for anyone who loves a great story well told.

### **Three Act Tragedy** - Agatha Christie

2011-06-14

Sir Charles Cartwright should have known better than to allow thirteen guests to sit down for dinner. For at the end of the evening one of

them is dead—choked by a cocktail that contained no trace of poison. Predictable, says Hercule Poirot, the great detective. But entirely unpredictable is that he can find absolutely no motive for murder....

Mass Effect: Annihilation - Catherynne M. Valente 2018-11-06

An official tie-in to the hit video game Mass Effect: Andromeda, written by award-winning and New York Times bestselling author Catherynne M. Valente An official tie-in to the hit video game Mass Effect: Andromeda by James Tiptree Jr. and Locus Award-winner Catherynne M. Valente. The Quarian ark Keelah Si'yah sails toward the Andromeda galaxy, carrying 20,000 colonists from sundry races including the drell, the elcor, and the batarians. Thirty years from their destination, a routine check reveals drell lying dead in their pods, and a deadly pathogen on board. Soon, the disease is jumping species, and it quickly becomes clear that this is no accident. It's murder, and the perpetrator is still on board. The ship's systems rapidly degrade, and panic spreads among the colonists, for the virus yields a terrible swelling

of the brain that causes madness, hallucinations, and dreadful violence. If the ship's crew can't restore their technology and find a cure, the Keelah Si'yah will never make it to the Nexus. *Registries for Evaluating Patient Outcomes* - Agency for Healthcare Research and Quality/AHRQ 2014-04-01

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For

the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common

procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

**The Winning Look** - Nick Mordin 1994

**The Wonder Weeks** - Frans X. Plooij  
2017-09-05

The Wonder Weeks reveals what's going on

inside baby's mind. Including a bonus chapter with everything about the relationship between sleep and leaps, as well as unique insight into your baby's sleeping behavior. The book includes: \* Week-by-week guide to baby's behavior\* When to expect the fussy behavior, what this implies (cranky, clingy, crying (the three C's) behavior) and how to deal with these regression periods (leaps)\* A description from your baby's perspective of the world around him and how you can understand the changes he's going through\* Fun games and gentle activities you can do with your child\* Unique insight into your baby's sleeping behaviour The book is based on the scientific- and parental-world-changing discovery of a phenomenon: all normal, healthy babies appear to be more fussy at very nearly the same ages, regression periods, and sleep less in these phases. These age-related fluctuations in need for body contact and attention (regression periods) are related to major and quite dramatic changes in the brains

of the children. These changes enable a baby to enter a whole new perceptual world and, as a consequence, to learn many new skills. This should be a reason for celebration, but as far as the baby is concerned these changes are bewildering. He's taken aback--everything has changed overnight. It is as if he has woken up on a strange planet. He needs you to guide him and understand what he is going through! Get ready to rediscover the world all over again with your baby... Bonus: Sleep, and the lack of sleep... that's something we all have to deal with when we have a baby. The bonus chapter includes everything about the relationship between sleep and leaps, as well as unique insight into your baby's sleeping behavior. Hint: did you know your baby learns (and there's a lot of brain activity) during those little, 'light' sleeps? Pioneers of Zionism: Hess, Pinsker, Rülff - Julius H. Schoeps 2013-08-28  
The emerging Jewish national consciousness in Europe toward the end of the 19th century

claims many spiritual fathers, some of which have been seriously underestimated so far. Zionist intellectuals such as Moses Hess, Leon Pinsker and Isaac Rülff were already committed to the self-liberation of the Jewish people long before Theodor Herzl. Their experiences and observations brought them to believe that the emancipation and integration of Jews were not realistically possible in Europe. Instead, they began to think in national and territorial terms. The author explores the question as to what extent religious messianism influenced the ideas of these men and how this reflects in today's collective Israeli consciousness. In a comprehensive epilogue, Julius H. Schoeps critically correlates ideas of messianic salvation, Zionist pioneer ideals, the settler's movement before and after 1967, and the unsolved conflict between Israelis and Palestinians which has been lasting for over 100 years.

*To Build as Well as Destroy* - Andrew J. Gawthorpe 2018-12-15

For years, the so-called better-war school of thought has argued that the United States built a legitimate and viable non-Communist state in South Vietnam in the latter years of the Vietnam War and that it was only the military abandonment of this state that brought down the Republic of Vietnam. But Andrew J. Gawthorpe, through a detailed and incisive analysis, shows that, in fact, the United States failed in its efforts at nation building and had not established a durable state in South Vietnam. Drawing on newly opened archival collections and previously unexamined oral histories with dozens of U.S. military officers and government officials, *To Build as Well as Destroy* demonstrates that the United States never came close to achieving victory in the late 1960s and early 1970s. Gawthorpe tells a story of policy aspirations and practical failures that stretches from Washington, D.C., to the Vietnamese villages in which the United States implemented its nationbuilding strategy through the Office of

Civil Operations and Revolutionary Development Support known as CORDS. Structural factors that could not have been overcome by the further application of military power thwarted U.S. efforts to build a viable set of non-Communist political, economic, and social institutions in South Vietnam. *To Build as Well as Destroy* provides the most comprehensive account yet of the largest and best-resourced nation-building program in U.S. history. Gawthorpe's analysis helps contemporary policy makers, diplomats, and military officers understand the reasons for this failure. At a moment in time when American strategists are grappling with military and political challenges in Afghanistan, Iraq, and Syria, revisiting the historical lessons of Vietnam is a worthy endeavor.

*Latin Alive* - Joseph B. Solodow 2010-01-21  
In *Latin Alive*, Joseph Solodow tells the story of how Latin developed into modern French, Spanish, and Italian, and deeply affected English as well. Offering a gripping narrative of language change, Solodow charts Latin's course

from classical times to the modern era, with focus on the first millennium of the Common Era. Though the Romance languages evolved directly from Latin, Solodow shows how every important feature of Latin's evolution is also reflected in English. His story includes scores of intriguing etymologies, along with many concrete examples of texts, studies, scholars, anecdotes, and historical events; observations on language; and more. Written with crystalline clarity, this book tells the story of the Romance languages for the general reader and to illustrate so amply Latin's many-sided survival in English as well.

The Palace Job - Patrick Weekes 2013

"If Donald Westlake had given Dortmund a sword, if Douglas Adams had hitchhiked with a unicorn, Weekes has crafted that rare fantasy novel that both embraces and challenges the genre . . . this is, simply, a terrific damn novel." - Greg Rucka, New York Times bestselling author of Alpha, The Punisher, and BatmanLoch is

seeking revenge. It would help if she wasn't in jail. The plan: to steal a priceless elven manuscript that once belonged to her family, but now is in the hands of the most powerful man in the Republic. To do so Loch — former soldier, former prisoner, current fugitive — must assemble a crack team of magical misfits that includes a cynical illusionist, a shapeshifting unicorn, a repentant death priestess, a talking magical warhammer, and a lad with seemingly no skills to help her break into the floating fortress of Heaven's Spire and the vault that holds her family's treasure — all while eluding the unrelenting pursuit of Justicar Pyvic, whose only mission is to see the law upheld. Criminal Liability for Serious Traffic Offences -  
Alwin van Dijk 2017-12-17

The criminal law on serious traffic offenses presents legislators with numerous controversial issues. One such issue is when severe consequences are matched with low moral culpability. How should the law deal with a driver who kills someone because she failed to see the person when looking? Another controversial issue concerns highly culpable behavior that remains without serious consequences. How should the law cope with a driver who nearly kills someone when overtaking recklessly? The traffic context generates many hard cases that call the outermost boundaries of general doctrinal concepts like intent, negligence, or causation into question. This book contains an international collection of essays on criminal liability for serious traffic offenses. With a focus on England/Wales, the Netherlands, France, Germany, and Spain, the book reveals that there are enormous differences in both

drafting and interpretation of serious traffic offenses. Additionally, it elaborates on the role of culpability and harm in sentencing, traffic-psychological insights relevant to accident causation, and the concept of conditional intent in relation to extremely dangerous traffic behavior. "tour de force of investigative reporting" (Ron Chernow): a "searching, atmospheric and ultimately entrancing" (Patrick Radden Keefe) true crime narrative of an unsolved 1969 murder at Harvard and an "exhilarating and seductive" (Ariel Levy) narrative of obsession and love for a girl who dreamt of rising among men. You have to remember, he reminded me, that Harvard is older than the U.S. government. You have to remember because Harvard doesn't let you forget. 1969: the height of counterculture and the year universities would seek to curb the unruly spectacle of student protest; the winter that Harvard University would begin the tumultuous process of merging with Radcliffe, its all-female sister school; and the year that Jane Britton, an ambitious twenty-three-year-old graduate student in Harvard's Anthropology Department and daughter of Radcliffe Vice President J. Boyd Britton, would be found bludgeoned to death in her Cambridge, Massachusetts apartment. Forty years later,

Becky Cooper a curious undergrad, will hear the first whispers of the story. In the first telling the body was nameless. The story was this: a Harvard student had had an affair with her professor, and the professor had murdered her in the Peabody Museum of Archaeology and Ethnology because she'd threatened to talk about the affair. Though the rumor proves false, the story that unfolds, one that Cooper will follow for ten years, is even more complex: a tale of gender inequality in academia, a 'cowboy culture' among empowered male elites, the silencing effect of institutions, and our compulsion to rewrite the stories of female victims. *We Keep the Dead Close* is a memoir of mirrors, misogyny, and murder. It is at once a rumination on the violence and oppression that rules our revered institutions, a ghost story reflecting one young woman's past onto another's present, and a love story for a girl who was lost to history.
