Management Control Theory - A.J. Berry 2019-05-23

First published in 1998, this volume of readings provides an overview of the development of the study of Management Control theory over the past 35 years. The period encompasses the publication of a major and seminal text by Anthony and Dearden in 1965, which acted as a touchstone in defining the range and scope of management control systems. This laid management control's foundations in accounting-based mechanisms of control, an element which has been seen as both a strength and a constraint. A good deal of work has followed, providing both a development of the tradition as well as a critique. In this volume we attempt to provide a range of readings which will illustrate the variety of possibilities that are available to researchers, scholars and practitioners in the area. The readings illustrate the view that sees control as goal directed and integrative. They go on to explore the idea of control as adaption, consider its relationship with social structure and survey the effects of the interplay between the organisation and the environment. The essays included are not intended to lead the reader through a well-ordered argument which concludes with a well reasoned view of how management control should be. Instead it seeks to illustrate the many questions which have been posed but not answered and to open up agendas for future research.

CIMA E3 - BPP Learning Media 2012-08-01

CIMA offers a business qualification with a finance focus, aiming to produce members with accounting prowess who are skilled in strategic decision-making. 98% of its members work in business, the highest proportion of any worldwide accountancy body. Paper E3 'Enterprise Strategy' is a wide-ranging exam that includes aspects of strategic analysis, choice and implementation. To pass, candidates need both technical knowledge and the ability to apply their knowledge to specific scenarios. The syllabus is split into four areas: * Interacting with the Competitive Environment (20%) * Change Management (20%) * Evaluation of Strategic Options (30%) * Implementation of Strategic Plans (30%) The first section explores the impact and influence of an organisation's environment on its strategy. An organisation needs to take account of its environmental context as well as its own internal capabilities when assessing the strategic options available to it. Having identified these options, it then has to evaluate them to decide which is the most appropriate to pursue. The E3 syllabus recognises that implementing strategic plans involves managing change, and 20% of the syllabus is now devoted to issues involved in managing the change process. Change Management has not previously been examined at Strategic Level in the CIMA exams. The final section of the syllabus looks at the ways organisations control and measure the performance of the strategies they have implemented. The E3 Study Text provides you with comprehensive coverage of the principles of business strategy and how they can be applied to design and implement enterprise strategies. The Text also offers a range of short case studies which illustrate how business strategy ideas are applied in the real world. In the E3 exam, your ability to apply knowledge to a scenario is as important as pure knowledge, but it is still crucial to have a sound understanding of the key terms and ideas. The 'key terms' feature in the text will help you identify these key terms, while the 'section summaries' provide a convenient overview of each section of the text.

Principles of Accounting Volume 2 - Managerial Accounting - Mitchell Franklin 2019-02-14

Management and Cost Accounting - Colin Drury 1997

The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of today's student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

Transfer Prices and Management Accounting - Peter Schuster 2015-02-13

Transfer prices are of dominant importance in company practice and a decentralised organisation, e.g. a profit centre-organisation, is most-widely used. This textbook takes an innovative controversial approach by looking at functions of transfer prices and how different types of transfer prices can fulfil them.

Suggestions common in other textbooks will be picked up and it will be shown why they do not contribute to solve the problems companies face. With support of numerous examples and exercises a conceptual understanding of this most relevant management topic will be developed. Transfer prices are an issue in most advanced courses on Management Accounting and/or Management Control and their analysis receives increasing attention. They are covered in one chapter in almost all management accounting textbooks. This often leads to serious oversimplifications and reductions of contents. This book aims at filling this gap and to provide a concise and controversial view on the topic.

ACCA Paper P2 - Corporate Reporting (GBR) Study Text - BPP Learning Media 2009-07-01

The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants.

With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA. BPP Learning Media is an ACCA Official Publisher. P2 is a very challenging paper which builds on the knowledge and skills acquired at earlier levels in the preparation and analysis of financial reports for single entities and groups. It takes these areas to a higher level, putting into context the role of the accountant as a professional steward and adviser, who is responsible to the stakeholders of an organisation. It has five main sections: 1. Regulatory and ethical framework and current issues 2. Reporting the financial performance of entities 3. Group financial statements 4. Specialised entities 5. Analysis of the financial performance of entities. The main new topics introduced at this level relate to group accounts, but other topics are tested with a different emphasis and in more depth than at the Fundamentals Level. We provide material for both International and UK streams. The study text has been reviewed by the examiner and takes account of his advice on approaching the paper. Ethics, which have an impact on all aspects of financial reporting, are introduced at an early stage in the text, as is corporate social responsibility, so that students do not neglect these topics when covering the numerical areas. Accounting standards come next, combining revision with extension into more advanced areas. After a brief revision of basic groups, the more advanced consolidation topics are covered. Current issues are covered throughout the text within the appropriate topics, and also summarised towards the end of the book. The question bank contains practice at the case study-style question you will encounter in the real exam. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams.

Behavioral Management Accounting - Ahmed Riahi-Belkaoui 2002

Producers and users of management accounting information are confronted with crucial behavioral phenomena--factors that can affect the communication of this information and its use. Riahi-Belkaoui shows how producers and users together can improve the efficiency of management accounting itself. He explains the judgment process in management accounting, identifies and explains the major behavioral phenomena, and then provides ways to use them for the firm's benefit.

Management Accounting - Carlos Correia 2008-01

This new Southern African edition of Kim Langfield-Smith and Helen Thorne's best-selling Australian Management Accounting text explains the contemporary role of management accounting in organisations - supporting a company's quest for enhancing shareholder and customer value. The effective management of resources, both financial and non-financial, is essential to creating value. Retaining the strategic approach and comprehensive coverage but thoroughly adapted for Southern Africa, Management Accounting Southern African edition is suitable for the one- or two-semester undergraduate course, and is ideal for use over two years of study.

Accounting in a Nutshell - Janet Walker 2011-04-08

Designed primarily for middle and junior management who deal with financial information without really understanding the content; students who are studying accounting as a non-specialist subject, for example on a business studies or engineering course. The book serves as a basic reference to be used throughout the course. It will also be particularly helpful in providing the basic grounding that is required before moving on to the more technical and in-depth study of the subject that may be required on some courses. Students who are embarking on a course of study to become a professional accountant will also find this book of major benefit. In addition to revisions through out, a new new chapter 'Making long-term investment decisions' covering capital investment decisions, extends and rounds out the final part of the book: using Financial Information to Manage a Business. The chapter deals with the investment appraisal process and covers the main investment appraisal techniques from the point of view of a non-specialist: payback periods, accounting rate of return and discounted cash flow methods are just some of the new topics covered. The focus will be on the level of understanding that a non-specialist requires in the work place as such, in keeping with the rest of the book, the chapter includes practical examples and exercises to enhance the reader's understanding. * Jargon free and easy to understand - no prior knowledge of the subject necessary * Focuses on the principles and use of accounting information * Review questions to assess progress at each stage and many fully worked exercises and examples
