*A Blueprint for Promoting Academic and Social Competence in After-School Programs* - Thomas P. Gullotta 2010-06-25

School activities alone are not always sufficient to ensure children's academic progress or socio-emotional development and well-being. And the time when many children typically have the least adult supervision - immediately after school - is also the time that they are at the highest risk to act as perpetrators or become victims of antisocial behavior. Throughout *A Blueprint for Promoting Academic and Social Competence in After-School Programs*, which focuses on children in grades 1 through 6, noted experts identify the best practices of effective programs and pinpoint methods for enhancing school-based skills and making them portable to home and neighborhood settings. This volume: (1) Analyzes the concepts central to effective after-school programs. (2) Offers developmental, cognitive, and social ecology perspectives on how children learn. (3) Features more than 100 exercises that develop young people's capabilities for academic, social, moral, and emotional learning - These exercises are ready to use or can be adapted to students' unique needs. (4) Emphasizes young people's development as students and as productive members of society during middle to late childhood and early adolescence. (5) Presents explicit theory and evidence that can be used to explain the value of after-school programs for budget proposals. This important book will find an appreciative, ready audience among the program directors who design after-school curricula, the educators who implement them, the mental health and social work professionals who help staff them, and the current crop of graduate students who will create the next generation of programs.

[Social Competence of Deaf and Hard-of-Hearing Children](#) - Shirin D. Antia 2015-06-01

Social Competence of Deaf and Hard-of-Hearing Children addresses the development, assessment, and promotion of social competence in children who are deaf or hard-of-hearing (DHH). Most children readily develop social competence through the mutually dependent development of social skills and social relationships. Why then write a book on the social competence of DHH children? Hearing loss, with its resulting communication challenges, has the potential to impede the development of social skills and restrict social relationships. In this volume, Shirin D. Antia and Kathryn H. Kreimeyer highlight multiple strategies that teachers, families, and community members can utilize to promote the social competence of DHH children. The authors approach this topic by first describing the development and expression of social

competence in infants, as well as in preschool- and school-age hearing and DHH children. Socially competent children display a flexible repertoire of social behaviors that are appropriately utilized in varying social situations and which further children's social goals. Since social competence develops initially through interactions between infants and their caretakers, a primary consideration for children with hearing loss is that the infant and caretaker share a common communication approach to facilitate early interaction. As infants become preschool age, opportunities for interactions with other children increase and social interactions revolve around play. The development of interactive and of pretend play requires children to communicate with one another to assume roles, share fantasies, and solve social conflicts. DHH children must develop communication skills to participate in interactive play, and hearing children may need guidance to successfully engage with DHH peers. For school-age children, the importance of peer acceptance increases; DHH children need supportive situations both within and outside of school to interact with peers, develop friendships, and refine the social behaviors that promote peer acceptance. The authors present a variety of practical ways to assess the social competence of DHH children. They emphasize the role of assessment in identifying social strengths and needs to establish a basis for any necessary intervention. They then present ways to promote social competence, with a separate focus on strategies appropriate for young DHH children and for school-age DHH children. For both age groups, the authors address the role of families, professionals, schools, and communities in helping children develop the skills needed to become socially competent individuals. This book will be a valuable resource for the parents and families of DHH children, for the general and special educators who teach these children, and for the researchers who describe development and evaluate the effectiveness of strategies to promote the social competence of DHH children.

Since its original publication in 2001, we have reorganized some of the Stop & Think social skills at the preschool level, and recognized the need for some additional classroom and building routines—along with the teaching steps that make them developmentally sensitive. Thus, this E-book focuses on three things: \*\* First the book provides an overview of Project ACHIEVE's Positive Behavioral Self-Management System (PBSS), creating a context for teaching social skills, as well as classroom and building routines. \*\* The book then describes the reorganization of the Stop & Think preschool to Grade 1 social skills into ten clusters of social skills that actually involve 14 specific skills (starting with Listening, passing through two "Taking Your Turn" skills, including two "Class

Participation” skills, teaching “Accepting Consequences,” and ending with two “Sharing” skills). These skills are the preschool to Grade 1 Stop & Think skills used in all Core Knowledge classrooms, and that are reflected in the Stop & Think Music CD and Core Knowledge Preschool Posters. \*\* Finally, the book addresses the scripts needed to teach over 25 Classroom and Building Routines (How to Enter a Classroom, Participating in a Classroom Discussion, How to Transition from One Activity to Another, Walking in the Hallway, etc.)—each at the prekindergarten to Grade 1, Grades 2 and 3, Grades 4 and 5, and Middle School levels. This E-book, then, provides an overview and discussion of the Stop & Think Social Skills process, how these social skills can be taught at the preschool and early elementary school levels, and how different classroom and building routines can be taught using the Stop & Think process and how they can be organized. It then describes the specific skill steps for a variety of different classroom and building skills at each of four grade levels—from preschool through high school. var \_\_chd\_\_ =

**Stress, Risk, and Resilience in Children and Adolescents** - Robert J. Haggerty 1996-09-28

Stress, Risk, and Resilience in Children and Adolescents recognizes the complexity of the developmental processes that impact on coping and resilience and the importance of sociocultural factors. In this respect, the relation between a stressor and an outcome depends on many factors, including the individual's previous experience, perception of the event, coping skills and social supports. In turn, each of these factors displays meaningful variation by developmental status, social background, and cultural context. The examination of individual differences in vulnerability to stress and risk factors has grown substantially over

the past decade as it has become clearer that some children do, in fact, 'beat the odds.' In order to understand why some children succumb to even modest stress while others remain resilient in the face of what appear to be overwhelming stressors, research has increasingly examined the processes and mechanisms by which children of different ages deal with adverse life experiences, rather than merely studying the stressors themselves. Many problem behaviors have multiple causes, and most children with one problem behavior also have others. The co-occurrence and/or interrelatedness of risk factors and problem behaviors is, therefore, an important area of research.

**Social and Emotional Aspects of Learning** - Sanna Jarvela 2011-01-07

Social and emotional aspects of schooling and the learning environment can dramatically affect one's attention, understanding, and memory for learning. This topic has been of increasing interest in both psychology and education, leading to an entire section being devoted to it in the third edition of the International Encyclopedia of Education. Thirty-three articles from the Encyclopedia form this concise reference which focuses on such topics as social and emotional development, anxiety in schools, effects of mood on motivation, peer learning, and friendship and social networks. Saves researchers time in summarizing in one place what is otherwise an interdisciplinary field in cognitive psychology, personality, sociology, and education Level of presentation focuses on critical research, leaving out the extraneous and focusing on need-to-know information Contains contributions from top international researchers in the field Makes MRW content affordable to individual researchers

Teamwork and Literacy - Sylvia Hart-Landsberg 1993

This report analyzes the roles of literacy and teamwork in an automotive parts manufacturing company that was restructuring to implement a "high performance" model of team organization, worker responsibility for quality control, and a pay-for-knowledge compensation system. Within the teams, manufacturing and assembly workers engaged in both formal and informal educational practices from which they learned and taught literacy skills. The focus of the study was the literacy learning environment of workers with lower literacy levels or fewer educational credentials than most of the plant's employees. These "skills - poor" workers, a term used by the company and retained in this report, brought a distinctive set of needs and motivations to the workplace. Moreover, the workplace presented them with limits and opportunities that were different, often in subtle and unplanned ways, from those available to workers with more skills or schooling. Relative to other workers, the skills - poor workers faced more educational demands and more limited opportunities for learning. While the high performance model stimulated innovative teaching approaches, some of which were developed specifically for or by the skills - poor, these approaches often were inadequate to enable the less literate and credentialed workers to overcome their poor position in order to improve their literacy skills.

**Working with Aggressive Youth** - Daniel L. Daly, Ph.D. 2011-07-01

Angry, aggressive, or violent youth threaten the well-being of themselves, other children, and caregivers in any setting. They may need medication and therapy to treat their problems, but they also must learn how to control negative thoughts and emotions without turning to aggressive behaviour. Professionals will learn how to build good relationships with youth and teach them pro-social behaviour. Also offered are sample treatment plans to address both proactive and reactive aggression in youth and guidelines on how to promote a safe environment for the children in your care. Included is a social skills chart that can be used

as an easy reference guide by caregivers as they teach new skills to replace old aggressive behaviours. The chart shows which skills work best with specific types of behaviours.

**Social Skills, Emotional Growth and Drama Therapy** - Lee R. Chasen 2011-08-15

Drama therapy provides valuable opportunities for children on the autism spectrum to interact and connect with others in a fun, supportive environment. The innovative model of drama therapy described in this book is rooted in neuroscience, and designed specifically to develop social, emotional and expressive language skills in children with autism spectrum disorders (ASD). Lee R. Chasen provides an accessible explanation of the theoretical foundations, concepts and techniques that make up the approach, and describes in detail a thirty-session drama therapy program which uses creative and playful tools such as guided play, sociometry, puppetry, role-play, video modeling and improvisation. Scenarios drawn from his own practice provide useful insights into the practicalities of setting up and running such a program, as well as into how children's social, emotional and expressive language skills deepen through their immersion in this unique approach. This book will be of interest to drama and creative arts therapists, as well as teachers, school psychologists, counsellors and other professionals who work with children with autism spectrum disorders. Research and Practice in Social Skills Training - A.S. Bellack 1979-11-01

It is perhaps trite to refer to human beings as social animals, but never theless it is true. A substantial portion of our lives is spent in interactions with other people. Moreover, the nature, quality, and quantity of those interactions have a tremendous impact on behavior, mood, and the adequacy of adjustment. Faulty interpersonal relationship patterns have reliably been associated with a wide variety of behavioral-psychological dysfunctions ranging from simple loneliness to schizophrenia. Most "traditional" analyses of interpersonal failures have viewed them as consequences or by-products of other difficulties, such as anxiety, depression, intrapsychic conflict, or thought disorder. Consequently, remedial efforts have rarely been directed to interpersonal behavior per se. Rather, it has been expected that interpersonal relationships would improve when the source disorder was eliminated. While this model does account for some interpersonal dysfunctions (e.g., social anxiety can inhibit interpersonal behavior), it is not adequate to account for the vast majority of interpersonal difficulties. In fact, in many cases those difficulties either are independent of or underlie other dysfunctions (e.g., repeated social failure may produce depression or social anxiety).

**Peer Rejection in Childhood** - Steven R. Asher 1990-04-27

This important collection brings together current research on children who encounter difficulty in gaining acceptance and having friendships among their peers. The volume's contributors, development and clinical psychologists who have been involved in research in this area for over a decade, seek to advance the study of peer rejection by giving careful attention to the psychological processes that create and maintain peer rejection in childhood. Topics addressed include how certain children come to be disliked by their peers; the factors that maintain their rejection; the consequences of poor peer relations; and the results of intervention with various subgroups of rejected children. The volume describes the many advances that have been made in the study of peer rejection, and provides organizing models that point to avenues for future inquiry.

*A Blueprint for the Promotion of Pro-Social Behavior in Early Childhood* - Elda Chesebrough 2004-06-24

It is clear that violence by youth is not to be found only on city streets, in city schools and among city youth but anywhere and everywhere wrathful, disenfranchised young people reside. In this volume, the editors share their insights on the latest research for how families can promote optimal development in children from birth to age six, so they can grow into healthy, happy and competent young adults. Topics include social-emotional learning; neighborhood and community influences; the role of teachers and other caregivers; and more. The volume includes the actual Bingham Childhood Prosocial Curriculum, so that it can be implemented at any center. A Blueprint for the Promotion of Pro-Social Behavior in Early Childhood will be a helpful resource for clinical child psychologists, school psychologists, early childhood educators, as well as for upper-level students of these areas.

**A Blueprint for Promoting Academic and Social Competence in After-School Programs** - Thomas P. Gullotta 2008-11-27

School activities alone are not always sufficient to ensure children's academic progress or socio-emotional

development and well-being. And the time when many children typically have the least adult supervision - immediately after school - is also the time that they are at the highest risk to act as perpetrators or become victims of antisocial behavior. Throughout *A Blueprint for Promoting Academic and Social Competence in After-School Programs*, which focuses on children in grades 1 through 6, noted experts identify the best practices of effective programs and pinpoint methods for enhancing school-based skills and making them portable to home and neighborhood settings. This volume: (1) Analyzes the concepts central to effective after-school programs. (2) Offers developmental, cognitive, and social ecology perspectives on how children learn. (3) Features more than 100 exercises that develop young people's capabilities for academic, social, moral, and emotional learning - These exercises are ready to use or can be adapted to students' unique needs. (4) Emphasizes young people's development as students and as productive members of society during middle to late childhood and early adolescence. (5) Presents explicit theory and evidence that can be used to explain the value of after-school programs for budget proposals. This important book will find an appreciative, ready audience among the program directors who design after-school curricula, the educators who implement them, the mental health and social work professionals who help staff them, and the current crop of graduate students who will create the next generation of programs.

**Adults on the Autism Spectrum Leave the Nest** - Nancy Perry 2008-11-15

Children on the Autism Spectrum often grow up to find they are unable to cope effectively with the challenges of adult life. This book shows that, with the appropriate lifelong care from parents and carers, it is possible for those with neurodevelopmental disabilities to achieve supported independence and live fulfilling adult lives. *Adults on the Autism Spectrum Leave the Nest* provides a guide for parents on how to prepare their children for adulthood, and describes in detail the kinds of services people with Autism Spectrum Disorders (ASDs) need in order to live independently, away from the parental home. The author explains the importance of the cognitive abilities that enable us to regulate behaviour and adapt to changing situations, known as Executive Functions, and how an individual's deficits in this area can be especially problematic in the adult world. The book provides approaches to managing Executive Function Deficits and describes an innovative therapeutic program that successfully allows adults with ASDs to live with their peers and develop meaningful adult relationships. This book provides practical and accessible guidance for parents, therapists, people with ASDs, and anyone with an interest in helping people on the Autism Spectrum lead their lives with a sense of dignity and independence.
