Matthew Arnold - Stefan Collini 2008

Matthew Arnold (1822-88), the leading man-of-letters of the Victorian age, has been the decisive influence on modern thinking about literature and criticism and his work has become an inescapable cultural reference point today. In this stylish and entertaining book Stefan Collini examines the whole range of Arnold's literary, social, and religious criticism as well as his poetry, placing them in the context of the major intellectual controversies of the nineteenth century. By attending to the distinctive power of Arnold's writing to charm, tease, persuade, and irritate, the book provides a brilliant characterization of the tone and temper of his mind. This edition includes a substantial Afterword which reflects on Arnold's continuing polemical significance and his role in contemporary cultural debate.

**Foundations of New Socialism** - Robert Corfe 2001

How can sincere support be given wholly to a political party unless it has clear principles underpinning its base? Such a question is of particular relevance when asked of the Labour party in view of the events which have shattered the foundations of socialism worldwide over the past decade. The author, who has considerable practical experience as a Labour party activist, sets out to re-establish the concept of socialism as a vision for the future. But the forward-looking views of New Socialism need to be very different from the old. The transformation of society over the past 60 years means that old doctrines have to be replaced by new if socialism is to be made attractive to the modern man or woman.

**Sweetness and Light** - Matthew Arnold 1889

The Social Mission of English Criticism, 1848-1932 - Chris Baldick 1983

**Overcoming Matthew Arnold** - Dr James Walter Caufield 2013-05-28

Opening the way for a reexamination of Matthew Arnold's unique contributions to ethical criticism, James Walter Caufield emphasizes the central role of philosophical pessimism in Arnold's master tropes of "culture" and "conduct." Caufield uses Arnold's ethics as a lens through which to view key literary and cultural movements of the past 150 years, demonstrating that Arnoldian conduct is grounded in a Victorian ethic of "renouncement," a form of altruism that wholly informs both Arnold's poetry and prose and sets him apart from the many nineteenth-century public moralists. Arnold's thought is situated within a cultural and philosophical context that shows the continuing relevance of "renouncement" to much contemporary ethical reflection, from the political kenosis of Giorgio Agamben and the pensiero debole of Gianni Vattimo, to the ethical criticism of Wayne C. Booth and Martha Nussbaum. In refocusing attention on Arnold's place within the broad history of critical and social thought, Caufield returns the poet and critic to his proper place as a founding father of modern cultural criticism.

British Cultural Studies - Graeme Turner 2005-08-18

is a comprehensive introduction to the British tradition of cultural studies. Turner offers an accessible overview of the central themes that have informed British cultural studies: language, semiotics, Marxism and ideology, individualism, subjectivity and discourse. Beginning with a history of cultural studies, Turner discusses the work of such pioneers as Raymond Williams, Richard Hoggart, E. P. Thompson, Stuart Hall and the Birmingham Centre for Contemporary Cultural Studies. He then explores the central theorists and

categories of British cultural studies: texts and contexts; audience; everyday life; ideology; politics, gender and race. The third edition of this successful text has been fully revised and updated to include: \* How to apply the principles of cultural studies and how to read a text \* An overview of recent ethnographic studies \* Discussion of anthropological theories of consumption \* Questions of identity and new ethnicities \* How to do cultural studies, and an evaluation of recent research methodologies \* A fully updated and comprehensive bibliography

**Conservatism** - Jerry Z. Muller 2020-05-26

At a time when the label "conservative" is indiscriminately applied to fundamentalists, populists, libertarians, fascists, and the advocates of one or another orthodoxy, this volume offers a nuanced and historically informed presentation of what is distinctive about conservative social and political thought. It is an anthology with an argument, locating the origins of modern conservatism within the Enlightenment and distinguishing between conservatism and orthodoxy. Bringing together important specimens of European and American conservative social and political analysis from the mid-eighteenth century through our own day, Conservatism demonstrates that while the particular institutions that conservatives have sought to conserve have varied, there are characteristic features of conservative argument that recur over time and across national borders. The book proceeds chronologically through the following sections: Enlightenment Conservatism (David Hume, Edmund Burke, and Justus Möser), The Critique of Revolution (Burke, Louis de Bonald, Joseph de Maistre, James Madison, and Rufus Choate), Authority (Matthew Arnold, James Fitzjames Stephen), Inequality (W. H. Mallock, Joseph A. Schumpeter), The Critique of Good Intentions (William Graham Sumner), War (T. E. Hulme), Democracy (Carl Schmitt, Schumpeter), The Limits of Rationalism (Winston Churchill, Michael Oakeshott, Friedrich Hayek, Edward Banfield), The Critique of Social and Cultural Emancipation (Irving Kristol, Peter Berger and Richard John Neuhaus, Hermann Lübbe), and Between Social Science and Cultural Criticism (Arnold Gehlen, Philip Rieff). The book contains an afterword on recurrent tensions and dilemmas of conservative thought.

**Cultural Policy** - Toby Miller 2002-12-17

Offering the first comprehensive and international work on cultural policy, Toby Miller and George Yudice have produced a landmark work in the emerging field of cultural policy. Rigorous in its field of survey and astute in its critical commentary it enables students to gain a global grounding in cultural policy.

Alien Chic - Neil Badmington 2004

From The War of the Worlds, Mars Attacks!, Mission to Mars and Independence Day; Neil Badmington explores our relationship with aliens and how thinkers such as Descartes, Barthes, Freud, Lyotard and Derrida have conceptualised what it means to be human (and post-human).

Common Writing - Stefan Collini 2016-03-17

In a series of penetrating and attractively readable essays, Stefan Collini explores aspects of the literary and intellectual culture of Britain from the early twentieth century to the present. Common Writing focuses chiefly on writers, critics, historians, and journalists who occupied wider public roles as cultural commentators or intellectuals, as well as on the periodicals and other genres through which they attempted to reach such audiences. Among the figures discussed are T.S. Eliot, Graham Greene, J.B. Priestley, C.S. Lewis, Kingsley Amis, Nikolaus Pevsner, Hugh Trevor-Roper, Christopher Hitchens, and Michael Ignatieff.

The essays explore the variety of such figures' writings - something that can get overlooked or forgotten when they are treated exclusively in terms of their contribution to one established or professional category such as 'novelist' or 'historian' - while capturing their distinctive writing voices and those indirect or implicit ways in which they position or reveal themselves in relation to specific readerships, disputes, and traditions. These essays engage with recent biographies, collections of letters, and new editions of classic works, thereby making some of the fruits of recent scholarly research available to a wider audience. Collini has been acclaimed as one of the most brilliant essayists of our time, and this collection shows him at his subtle, perceptive, and trenchant best. *Common Writing* will appeal to (and delight) readers interested in literature, history, and contemporary cultural debate.

**Culture, 1922** - Marc Manganaro 2009-01-10

*Culture, 1922* traces the intellectual and institutional deployment of the culture concept in England and America in the first half of the twentieth century. With primary attention to how models of culture are created, elaborated upon, transformed, resisted, and ignored, Marc Manganaro works across disciplinary lines to embrace literary, literary critical, and anthropological writing. Tracing two traditions of thinking about culture, as elite products and pursuits and as common and shared systems of values, Manganaro argues that these modernist formulations are not mutually exclusive and have indeed intermingled in complex and interesting ways throughout the development of literary studies and anthropology. Beginning with the important Victorian architects of culture--Matthew Arnold and Edward Tylor--the book follows a number of main figures, schools, and movements up to 1950 such as anthropologist Franz Boas, his disciples Edward Sapir, Ruth Benedict, and Zora Neale Hurston, literary modernists T. S. Eliot and James Joyce, functional anthropologist Bronislaw Malinowski, modernist literary critic I. A. Richards, the *New Critics*, and Kenneth Burke. The main focus here, however, is upon three works published in 1922, the watershed year of Modernism--Eliot's *The Waste Land*, Malinowski's *Argonauts of the Western Pacific*, and Joyce's *Ulysses*. Manganaro reads these masterworks and the history of their reception as efforts toward defining culture. This is a wide-ranging and ambitious study about an ambiguous and complex concept as it moves within and between disciplines.

**Reading Reconsidered** - Doug Lemov 2016-02-29

TEACH YOUR STUDENTS TO READ WITH PRECISION AND INSIGHT The world we are preparing our students to succeed in is one bound together by words and phrases. Our students learn their literature, history, math, science, or art via a firm foundation of strong reading skills. When we teach students to read with precision, rigor, and insight, we are truly handing over the key to the kingdom. Of all the subjects we teach reading is first among equals. Grounded in advice from effective classrooms nationwide, enhanced with more than 40 video clips, *Reading Reconsidered* takes you into the trenches with actionable guidance from real-life educators and instructional champions. The authors address the anxiety-inducing world of Common Core State Standards, distilling from those standards four key ideas that help hone teaching practices both generally and in preparation for assessments. This 'Core of the Core' comprises the first half of the book and instructs educators on how to teach students to: read harder texts, 'closely read' texts rigorously and intentionally, read nonfiction more effectively, and write more effectively in direct response to texts. The second half of *Reading Reconsidered* reinforces these principles, coupling them with the 'fundamentals' of reading instruction—a host of techniques and subject specific tools to reconsider how teachers approach such essential topics as vocabulary, interactive reading, and student autonomy. *Reading*

*Reconsidered* breaks an overly broad issue into clear, easy-to-implement approaches. Filled with practical tools, including: 44 video clips of exemplar teachers demonstrating the techniques and principles in their classrooms (note: for online access of this content, please visit [my.teachlikeachampion.com](http://my.teachlikeachampion.com)) Recommended book lists Downloadable tips and templates on key topics like reading nonfiction, vocabulary instruction, and literary terms and definitions. *Reading Reconsidered* provides the framework necessary for teachers to ensure that students forge futures as lifelong readers.

*Egalitarianism* - Robert Corfe 2008-02-04

In view of the recent transformation of society in the industrialised world, a new sociological significance is given to the meaning of high culture, property in its different forms, and freedom through democracy.

**The Idea of Culture** - Terry Eagleton 2013-05-29

Terry Eagleton's book, in this vital new series from Blackwell, focuses on discriminating different meanings of culture, as a way of introducing to the general reader the contemporary debates around it.

**Culture and Anarchy** - Matthew Arnold 1875

**Endemic** - Kari Nixon 2016-09-01

This book develops a new multimodal theoretical model of contagion for interdisciplinary scholars, featuring contributions from influential scholars spanning the fields of medical humanities, philosophy, political science, media studies, technoculture, literature, and bioethics. Exploring the nexus of contagion's metaphorical and material aspects, this volume contends that contagiousness in its digital, metaphorical, and biological forms is a pervasively endemic condition in our contemporary moment. The chapters explore both endemicity itself and how epidemic discourse has become endemic to processes of social construction. Designed to simultaneously prime those new to the discourse of humanistic perspectives of contagion, complicate issues of interest to seasoned scholars of science and technology studies, and add new topics for debate and inquiry in the field of bioethics, *Endemic* will be of wide interest for researchers and educators.

**Essays in Criticism** - Matthew Arnold 1883

**Culture and Anarchy in Ireland, 1890-1939** - Francis Stewart Leland Lyons 1979

Surveying the clash of cultures in Ireland between the Gaelic, English, Anglo-Irish, and Ulster-Protestant, Lyons argues that such cultural diversity hinders the evolution of a homogenous society and thus functions as an agent of anarchy

**The Value of the Humanities** - Helen Small 2013-10-04

*The Value of the Humanities* provides a critical account of the principal arguments used to defend the value of the Humanities. The claims considered are: that the Humanities study the meaning-making practices of culture, and bring to their work a distinctive understanding of what constitutes knowledge and understanding; that, though useful to society in many ways, they remain laudably at odds with, or at a remove from, instrumental use value; that they contribute to human happiness; that they are a force for democracy; and that they are a good in themselves, to be valued 'for their own sake'. Engaging closely with contemporary literary and philosophical work in the field from the UK and US, Helen Small distinguishes between arguments that retain strong Victorian roots (Mill on happiness; Arnold on use value) and those that have developed or been substantially altered since. Unlike many works in this field, *The Value of the Humanities* is not a polemic or a manifesto. Its purpose is to explore the grounds for each argument, and to test its validity for the present day. Tough-minded, alert to changing historical conditions for argument and changing styles of rhetoric, it promises to sharpen the terms of the public debate.

*The World, the Text, and the Critic* - Edward W. Said 1983

Argues that contemporary critics force works of literature to fit their theories and examines the impact of Marxism, linguistics, psychoanalysis, and structuralism on literary criticism

**Mass Civilisation and Minority Culture** - F. R. Leavis 1969

**Literary Criticism of Matthew Arnold** - Matthew Arnold 2004

**To Relish the Sublime?** - Kate Soper 2002-12-17

More than 130 years from Matthew Arnold's pronouncement that human beings 'must be compelled to relish the sublime', education in the humanities still relies on the ideal of culture as the means of intellectual development. In this distinctive and original work, Martin Ryle and Kate Soper explore the growing tensions and contradictions between this and the contemporary world of work, pleasure, and consumption. While critical of the hypocrisies and elitism that can attach to notions of cultural self-realization, the authors nonetheless defend its overall educational and social value. Their wide-ranging discussion takes in critiques of philosophers from Kant and Schiller to Nietzsche and Marx, and includes historically contextualized readings of novels by Wollstonecraft, Hardy, Gissing, London, and Woolf. In their sustained defense of a conception of personal worth and self-fulfillment for its own sake, Ryle and Soper not only offer a powerful critique of the continuing dominance of work in contemporary society, but also provide a compelling alternative to the standard postmodern skepticism about the relevance of high culture.

**The Function of Criticism at the Present Time** - Matthew Arnold 1895

**Napoleon** - Robert Matteson Johnston 1910

*Egalitarianism of the Free Society* - Robert Corfe 2008

This volume presents the new realities in the spheres of social life, as an introduction to the author's forthcoming three-volume work on Social Capitalism, which concentrates on the shattering economic and political changes in the contemporary world.

**Friendship's Garland** - Matthew Arnold 1871

*Culture & Anarchy* - Matthew Arnold 1924

*Culture & Anarchy* - Matthew Arnold 1899

**Paul Diederich and the Progressive American High School** - Robert L. Hampel 2014-04-01

Paul Diederich worked in five new organizations dedicated to transforming American schools: the Ohio State University lab school, the Eight Year Study, a Harvard institute to revamp English language instruction, the University of Chicago's Board of Examiners, and the Educational Testing Service.

Throughout his career he wrote critiques of American high schools and set forth many proposals to make them more flexible without sacrificing academic excellence. This anthology resurrects 14 Diederich essays, eight of them never before published. The scope ranges from visions of social justice to the details of the daily schedule. Like his heroes Benjamin Franklin and Thomas Jefferson, he combined a passion for utopian speculation with a fascination for practical problems, a combination that is rare in the world of school reform today.

**Introducing Cultural Studies** - David Walton 2007-11-29

"An outstanding entry level text aimed at those with little or no cultural studies knowledge... Innovative, creative and clever." - Times Higher Education "The ideal textbook for FE and first year HE cultural studies students. Its quality and character allow the reader to 'feel' the enthusiasm of its author which in turn becomes infectious, instilling in the reader a genuine sense of ebullient perturbation." - Art/Design/Media, The Higher Education Authority An introduction to the practice of cultural studies, this book is ideal for undergraduate courses. Full of practical exercises that will get students thinking and writing about the issues they encounter, this book offers its readers the conceptual tools to practice cultural analysis for themselves. There are heuristics to help students prepare and write projects, and the book provides plenty of examples to help students develop their own ideas. Written in a creative, playful and witty style, this book: Links key concepts to the key theorists of cultural studies. Includes a wide range of references of popular cultural forms. Emphasizes the multidisciplinary nature of cultural studies. Includes pedagogical features, such as dialogues, graphs, images and recommended readings. The book's skills-based approach enables students to develop their creative skills, and shows students how to improve their powers of analysis generally. To listen to David Walton's musical response to Adorno's famous essay on jazz, please

*A Syllabus of the Course of Study in the History of Education* - Paul Monroe 1916

*Commodity Activism* - Roopali Mukherjee 2012-02

Buying (RED) products—from Gap T-shirts to Apple—to fight AIDS. Drinking a “Caring Cup” of coffee at the Coffee Bean & Tea Leaf to support fair trade. Driving a Toyota Prius to fight global warming. All these commonplace activities point to a central feature of contemporary culture: the most common way we participate in social activism is by buying something. Roopali Mukherjee and Sarah Banet-Weiser have gathered an exemplary group of scholars to explore this new landscape through a series of case studies of “commodity activism.” Drawing from television, film, consumer activist campaigns, and cultures of celebrity and corporate patronage, the essays take up examples such as the Dove “Real Beauty” campaign, sex positive retail activism, ABC’s Extreme Home Makeover, and Angelina Jolie as multinational celebrity missionary. Exploring the complexities embedded in contemporary political activism, Commodity Activism reveals the workings of power and resistance as well as citizenship and subjectivity in the neoliberal era. Refusing to simply position politics in opposition to consumerism, this collection teases out the relationships between material cultures and political subjectivities, arguing that activism may itself be transforming into a branded commodity.

**Colonial Desire** - Robert J. C. Young 2005-08-05

The language of contemporary cultural theory shows remarkable similarities with the patterns of thought which characterised Victorian racial theory. Far from being marked by a separation from the racialised thinking of the past, Colonial Desire shows we are operating in complicity with historical ways of viewing 'the other', both sexually and racially. Colonial Desire is a controversial and bracing study of the history of Englishness and 'culture'. Robert Young argues that the theories advanced today about post-colonialism and ethnicity are disturbingly close to the colonial discourse of the nineteenth century. 'Englishness', Young argues, has been less fixed and stable than uncertain, fissured with difference and a desire for otherness. *Modernity At Large* - Arjun Appadurai 1996

**Culture and Imperialism** - Edward W. Said 2012-10-24

A landmark work from the author of Orientalism that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from Mansfield Park to Heart of Darkness and Aida. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, Culture and Imperialism reopens the dialogue between literature and the life of its time.

*Literature & dogma* - Matthew Arnold 1883

**Syllabus of a Course of Study on the History and Principles of Education** - Paul Monroe 1911

**Cultural Code** - Phillip Penix-Tadsen 2016-02-19

How culture uses games and how games use culture: an examination of Latin America's gaming practices and the representation of the region's cultures in games. Video games are becoming an ever more ubiquitous element of daily life, played by millions on devices that range from smart phones to desktop computers. An examination of this phenomenon reveals that video games are increasingly being converted into cultural currency. For video game designers, culture is a resource that can be incorporated into games; for players, local gaming practices and specific social contexts can affect their playing experiences. In Cultural Code, Phillip Penix-Tadsen shows how culture uses games and how games use culture, looking at examples related to Latin America. Both static code and subjective play have been shown to contribute to

the meaning of games; Penix-Tadsen introduces culture as a third level of creating meaning. Penix-Tadsen focuses first on how culture uses games, looking at the diverse practices of play in Latin America, the ideological and intellectual uses of games, and the creative and economic possibilities opened up by video games in Latin America—the evolution of regional game design and development. Examining how games use culture, Penix-Tadsen discusses in-game cultural representations of Latin America in a range of popular

titles (pointing out, for example, appearances of Rio de Janeiro's Christ the Redeemer statue in games from Call of Duty to the tourism-promoting Brasil Quest). He analyzes this through semiotics, the signifying systems of video games and the specific signifiers of Latin American culture; space, how culture is incorporated into different types of game environments; and simulation, the ways that cultural meaning is conveyed procedurally and algorithmically through gameplay mechanics.
