**How to Think Like an Anthropologist** - Matthew Engelke 2019-06-18  
"What is anthropology? What can it tell us about the world? Why, in short, does it matter? For well over a century, cultural anthropologists have circled the globe, from Papua New Guinea to suburban England and from China to California, uncovering surprising facts and insights about how humans organize their lives and articulate their values. In the process, anthropology has done more than any other discipline to reveal what culture means--and why it matters. By weaving together examples and theories from around the world, Matthew Engelke provides a lively,

accessible, and at times irreverent introduction to anthropology, covering a wide range of classic and contemporary approaches, subjects, and practitioners. Presenting a set of memorable cases, he encourages readers to think deeply about some of the key concepts with which anthropology tries to make sense of the world--from culture and nature to authority and blood. Along the way, he shows why anthropology matters: not only because it helps us understand other cultures and points of view but also because, in the process, it reveals something about ourselves and our own cultures, too." --Cover.

When Scotland Was Jewish - Elizabeth Caldwell Hirschman 2015-05-07

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

Fasting is, of course, an ancient spiritual and health practice, but it's also a way to sidestep many of the ills of the modern world—including diabetes, heart disease, and cognitive impairment. Zinczenko and Moore demonstrate how simply observing this timed-eating strategy, even just three days a week, will reset your metabolism so that you can enter fat-burning mode first thing in the morning—and stay there all day long. And by focusing on eight critical, nutrient-rich Powerfoods, you can build in a second layer of protection against Alzheimer's, heart disease, and even the common cold. *Alevi Identity* - Tord Olsson 2005-09-30

In the rising momentum for new and reformulated cultural identities, the Turkish Alevi have also emerged on the scene, demanding due recognition. In this process a number of dramatic events have served as important milestones: the clashes between Sunni and Alevi in Kahramanmaraş in 1979 and Corum in 1980, the incendiaryism in Sivas in 1992, and the riots in Istanbul (Gaziosmanpaşa) in 1995. Less evocative, but in the long run more significant, has been the rising interest in Alevi folklore and religious practices. Questions have also arisen as to what this branch of Islamic heterodoxy represents in terms of old and new identities. In this book, these questions are addressed by some of the most prominent scholars in the field.

**Jobs for the Boys** - Merilee S. Grindle 2012-06-11

Patronage systems in the public service are universally reviled as undemocratic and corrupt. Yet patronage was the prevailing method of staffing government for centuries, and in some countries it still is. In *Jobs for the Boys*, Merilee Grindle considers why patronage has been so ubiquitous in history and explores the political processes through which it is replaced by merit-based civil service systems. Such reforms are consistently resisted, she finds, because patronage systems, though capricious, offer political executives flexibility to achieve a wide variety of objectives. Grindle looks at the histories of public sector reform in six developed countries and compares them with contemporary struggles for

reform in four Latin American countries. A historical, case-based approach allows her to take into account contextual differences between countries as well as to identify cycles that govern reform across the board. As a rule, she finds, transition to merit-based systems involves years and sometimes decades of conflict and compromise with supporters of patronage, as new systems of public service are politically constructed. Becoming aware of the limitations of public sector reform, Grindle hopes, will temper expectations for institutional change now being undertaken.
