The Judicial House of Lords -
Louis Blom-Cooper QC
2009-08-13

The House of Lords served as the highest court in the UK for over 130 years. In 2009 the new UK Supreme Court took over its judicial functions, closing the doors on one of the most influential legal institutions in the world, and a major chapter in the history of the UK legal system. This volume gathers over 40 leading scholars and practitioners from the UK and beyond to provide a comprehensive history of the House of Lords as a judicial institution, charting its role, working practices, reputation and impact on the law and UK legal system. The book examines the origins of the House's judicial work; the different phases in the court's history; the international reputation and influence of the House in the legal profession; the domestic perception of the House outside the law; and the impact of the House on the UK legal tradition and substantive law. The book offers an invaluable overview of the

Judicial House of Lords and a major historical record for the UK legal system now that it has passed into the next chapter in its history.

Cyber Law in the Netherlands - Arno R. Lodder
2016-12-22
Derived from the renowned

multi-volume International Encyclopaedia of Laws, this practical guide to cyber law - the law affecting information and communication technology (ICT) - in the Netherlands covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with

regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the Netherlands will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

European Seaports Law - E. van Hooydonk 2003

In 2001, the European Commission published its so-called Ports Package, a first attempt at developing a European policy for seaports. The Ports Package includes a Directive on Market Access to Port Services, which will influence the port industry thoroughly and lead to fundamental changes in daily port operations. In this volume, academics as well as practising lawyers from France, Ireland, Italy and Belgium describe the

legal framework for the several branches of the port sector, recalling the far-reaching practical implications of existing general EU law and discussing the latest versions of the Port Services Directive proposal. Completed by authoritative views from the head of the Commission's ports unit, a specialist MEP, and representatives from both the public and the private port sector, this book offers a fairly complete overview of existing port law as well as the main points of concern in the policy debate. Its purpose is to serve both as a policy background document and as a working tool for public and private port players, as well as for academics and lawyers.
