The dictionary and the language learner -
Anthony P. Cowie 2015-11-13

Lexicographica. Series Maior features monographs and edited volumes on the topics of lexicography and meta-lexicography. Works from the broader domain of lexicology are also included, provided they strengthen the theoretical, methodological and empirical basis of lexicography and meta-lexicography. The almost 150 books published in the series since its founding in 1984 clearly reflect the main

themes and developments of the field. The publications focus on aspects of lexicography such as micro- and macrostructure, typology, history of the discipline, and application-oriented lexicographical documentation.

The Oxford Handbook of Clinical Geropsychology - Nancy A. Pachana

2014-11-06

Throughout the world, the population of older adults continues to grow. The rise in geriatric populations has seen an increase in research on clinical diagnostic, assessment, and treatment issues aimed at this population. Clinical geropsychologists have increased their interest both in providing mental health services as well as developing approaches to improve quality of life for all older adults. The Oxford Handbook of Clinical Geropsychology is a landmark publication in this field, providing broad and authoritative coverage of the research and practice issues in clinical geropsychology today, as well as innovations expanding the field's horizons. Comprising chapters from the foremost scholars in clinical geropsychology from around the world, the handbook captures the global proliferation of activity in this field. In addition to core sections on topics such as sources of psychological distress, assessment, diagnosis, and intervention, the handbook includes valuable chapters devoted to methodological issues such as longitudinal studies and meta-analyses in the field, as well as new and emerging issues such as technological innovations and social media use in older populations. Each chapter offers a review of the most pertinent international literature, outlining current issues as well as important cultural implications and key practice issues where relevant, and identifying possibilities for future research and policy applications. The book is essential to all psychology researchers, practitioners, educators, and students with an interest in the mental health of older adults. In addition, health professionals - including psychiatrists, social workers, mental health nurses, and trainee geriatric mental health workers - will find this an invaluable resource. Older adults comprise a growing percentage of

the population worldwide. Clinical psychologists with an interest in older populations have increased the amount of research and applied knowledge about effectively improving mental health later in life, and this book captures that information on an international level. The book addresses how to diagnose, assess and treat mental illness in older persons, as well as ways to improve quality of life in all older persons. It has a great breadth of coverage of the area, including chapters spanning how research is conducted to how new technologies such as virtual reality and social media are used with older people to improve mental health. The book would appeal to all psychology researchers, practitioners, educators and students with an interest in the mental health of older adults. It would also appeal to other health professionals, including psychiatrists, social workers, and mental health nurses who work with older people. It is a valuable resource for trainee geriatric mental health workers because it highlights key readings and important practice implications in the field.

The Law of Pre-Trial Criminal Procedure in Namibia - Mapaure, Clever 2016-01-29

The Namibian Constitution entrenches fundamental rights and freedoms, and provides for their vertical and horizontal application in any criminal process. However, since Independence in 1990, Namibia has developed its own criminal jurisprudence. Criminal procedure and law are taking new shape. Namibian courts have pronounced on criminal issues, and legislation has been passed to keep up with the demands, aspirations, spirit, and vision of the Namibian Constitution and its people. CLEVER MAPAURE, NDJODI NDEUNYEMA, PILISANO MASAKE, FESTUS WEYULU and LOIDE SHAPARARA have written an invaluable book that deals with these developments. It explains the rights of individuals, the duties of law enforcement officers, and the procedures of the courts in

criminal cases. The Law of Pre-Trial Criminal Procedure in Namibia introduces readers to the fundamental principles and values underlying Namibian criminal law, through a systematic examination of the provisions of the Criminal Procedure Act, 1977 (Act No. 51 of 1977) as amended, which was originally passed by the legislature of South Africa, and still regulates criminal procedure in Namibia, the amendments to it since 1990, and relevant Namibian Case Law. The book captures and discusses the law relating to the pre-trial criminal process in Namibia in detail, from the roles of the prosecutor and the police, search, seizure and forfeiture, interrogation, notices and summons, arrest, court appearance, bail, criminal charges, disclosure, diminished capacity, right to assistance, to pleas and plea-bargaining.

Bioethics of Nonexistence - Leonard Tumaini Chuwa 2020-08-03

The greatest violence and violation of human life is legalization of its disposability and annihilation based on its condition. Such killing, whether of self or another, depicts absolute contradiction and betrayal of the very hypothesis of humanity. It manifests absolute failure to provide due care, and that is inhuman. Human life is who we are. It is the basis of any argument for human rights. There cannot be a right to terminate the existence of the rights bearer. Such a right contradicts the possibility of its own existence. There cannot be dignity in terminating the one in whom dignity resides. There can only be indignity in killing a person. The paradox of legalization of euthanasia and assisted suicide represents humanity turned on itself. It is endorsement of existential nihilism and objectification of human life. It is the beginning of the end of humanhood. This book is a critical ethical exploration of mind-sets around euthanasia and assisted suicide to provide clarity, sobriety, and objectivity. The book is really about ontology of human life. Dr. Leonard Tumaini Chuwa is a Catholic priest and scholar working for Ascension as director of spiritual care for the state of Florida. Dr. Chuwa is certified by the National Association of Catholic Chaplains (NACC). Chuwa has bachelor of arts degrees in philosophy and theology; master of arts degree in theology and religious studies from John Carroll Jesuit University in Cleveland, Ohio; and a doctor of philosophy degree in bioethics and health-care ethics from Duquesne University in Pittsburgh, Pennsylvania. Chuwa is a distinguished public speaker on different bioethical issues. His first book, titled African

Indigenous Ethics in Global Bioethics: Interpretation of Ubuntu, was published by Springer Academic Publishing as the first book in a new global bioethics series. Father Chuwa also authored Bioethical False Truths: Egotistic and Relativistic Autonomy vs. Christian and Ubuntu Relational Autonomy.

Understanding Morphology - Martin Haspelmath 2013-10-28

This new edition of Understanding Morphology has been fully revised in line with the latest research. It now includes 'big picture' questions to highlight central themes in morphology, as well as research exercises for each chapter.

Understanding Morphology presents an introduction to the study of word structure that starts at the very beginning. Assuming no knowledge of the field of morphology on the part of the reader, the book presents a broad range of morphological phenomena from a wide variety of languages. Starting with the core areas of inflection and derivation, the book presents the interfaces between morphology and syntax and between morphology and phonology. The synchronic study of word structure is covered, as are the phenomena of diachronic change, such as analogy and grammaticalization. Theories are presented clearly in accessible language with the main purpose of shedding light on the data, rather than as a goal in themselves. The authors consistently draw on the best research available, thus utilizing and discussing both functionalist and generative theoretical approaches. Each chapter includes a summary, suggestions for further reading, and exercises. As such this is the ideal book for both beginning students of linguistics, or anyone in a related discipline looking for a first introduction to morphology.

English Prepositions Explained - Seth Lindstromberg 2010-08-11

This completely revised and expanded edition of English Prepositions Explained (EPE), originally published in 1998, covers approximately 100 simple, compound, and phrasal English prepositions of space and time - with the focus being on short prepositions such as at, by, in, and on. Its target readership includes teachers of ESOL, pre-service translators and interpreters, undergraduates in English linguistics programs, studious advanced learners

and users of English, and anyone who is inquisitive about the English language. The overall aim is to explain how and why meaning changes when one preposition is swapped for another in the same context. While retaining most of the structure of the original, this edition says more about more prepositions. It includes many more figures - virtually all new. The exposition draws on recent research, and is substantially founded on evidence from digitalized corpora, including frequency data. EPE gives information and insights that will not be found in dictionaries and grammar handbooks.

Language Education - Nishevita Jayendran
2021-07-29

This book situates the teaching and learning of language in general, and English in particular, within the sociocultural context of India. It engages with current scholarship in literacy studies and the pedagogies of language acquisition and learning. The volume discusses the cultural, discursive and sociopolitical functions of language education and the teaching of English in Indian schools. It examines the importance of adopting flexible pedagogical and multimodal strategies in teaching vocabulary; grammar; literary genres like fiction, poetry and drama; rhetorical discourses; and communicative English to learners for whom English is not one of their home language(s). It also discusses pragmatic approaches to curriculum design for communicative competence and critical literacy rooted in theoretical principles of language education. The authors analyse issues relevant to secondlanguage acquisition; English language teaching (ELT); emergent, adult and critical literacies; and critical pedagogies in language and literature. Written in an accessible style, the book comes with case studies, exercises and additional references to support an independent exploration of the fields. This book will be of interest to students and teachers of language, literature and education, as well as teachers and

educators in schools and universities. It is also of relevance to policymakers, non-governmental organisations and public and private sector bodies that work in the fields of language and literacy.
