### A Life and Career in Chemistry

- Pierre Laszlo 2021-10-15

This book is an enthusiastic account of Pierre Laszlo's life and pioneering work on catalysis of organic reactions by modified clays, and his reflections on doing science from the 1960s to 1990s. In this autobiography, readers will discover a first-hand testimony of the chemical revolution in the second half of the 20th century, and the author's perspective on finding a calling in science and chemistry, as well as his own experience on doing science, teaching science and managing a scientific career. During this period, Pierre Laszlo led an academic laboratory and worked also in three different countries: the US, Belgium and France, where he had the opportunity to meet remarkable colleagues. In this book, he recalls his encounters and collaborations with

important scientists, who shaped the nature of chemistry at times of increased pace of change, and collates a portrait of the worldwide scientific community at that time. In addition, the author tells us about the turns and twists of his own life, and how he ended up focusing his research on clay based chemistry, where clay minerals were turned in his lab to catalysis of key chemical transformations. Given its breath, the book offers a genuine information on the life and career of a chemist, and it will appeal not only to scientists and students, but also to historians of science and to the general reader.

**Raging Gracefully** - Jennifer Sander 2006-08-28

In *Raging Gracefully*, women just like you give voice to the unique challenges and choices that color this glorious yet gut-wrenching time of life. This engaging, endearing collection of true-life stories reveals the guts and glory of women old enough to know who they are--and run with it: a grieving widow of forty-nine experiences the healing powers of friendship, laughter, and water while vacationing and skinny-dipping in Mexico with sister-friends; a committed bachelorette has a change of heart and ties the knot in her sixtieth year; and a once mild-mannered woman raves about her unexpected menopausal rage, whiskers, weight gain, crushing fatigue, and crashing

libido, and refuses to go without a fight into that dark crone's night. In mid-life the truth comes out whether we like it or not--about life, about death, about what really matters. We take on everything from children who won't grow up and parents who become children to about-face career changes and relationship rescues (or not). But through it all we can still have some fun, and this is the book that proves it! So treat yourself to a little graceful raging!

*First Time Up* - Brock Dethier 2008-09-30

"First time up?"—an insider's friendly question from 1960s counter-culture—perfectly captures the spirit of this book. A short, supportive, practical guide for the first-time college composition instructor, the book is upbeat, wise but friendly, casual but knowledgeable (like the voice that may have introduced you to certain other firsts). With an experiential focus rather than a theoretical one, *First Time Up* will be a strong addition to the newcomer's professional

library, and a great candidate for the TA practicum reading list. Dethier, author of *The Composition Instructor's Survival Guide* and *From Dylan to Donne*, directly addresses the common headaches, nightmares, and epiphanies of composition teaching—especially the ones that face the new teacher. And since legions of new college composition teachers are either graduate instructors (TAs) or adjuncts without a formal background in composition studies, he assumes these folks as his primary audience. Dethier's voice is casual, but it conveys concern, humor, experience, and reassurance to the first-timer. He addresses all major areas that graduate instructors or new adjuncts in a writing program are sure to face, from career anxiety to thoughts on grading and keeping good classroom records. Dethier's own eclecticism is well-represented here, but he reviews with considerable deftness the value of contemporary scholarship to first-time writing

instructors—many of whom will be impatient with high theory. Throughout the work, he affirms a humane, confident approach to teaching, along with a true affection for college students and for teachers just learning to deal with them.

**Final Exam** - Julio Cortázar  
2008-07-17

One of Julio Cortázar's great early novels. "Anyone who doesn't read Cortázar is doomed."—Pablo Neruda In its characters, themes, and preoccupations, *Final Exam* prefigures Cortázar's later fictions, including *Blow-Up* and his masterpiece, *Hopscotch*. Written in 1950 (just before the fall of Perón's government), it is Cortázar's allegorical, bitter, and melancholy farewell to an Argentina from which he was about to be permanently self-exiled. (Cortázar moved to Paris the following year.) The setting of *Final Exam* is a surreal Buenos Aires, dark and eerie, where a strange fog has enveloped the city to everyone's bewilderment. Juan and Clara, two students, meet up with their friends Andrés

and Stella, as well as a journalist friend they call "the chronicler." Juan and Clara are getting ready to take their final exams, but instead of preparing, they wander the city with their friends, encounter strange happenings in the squares and ponder life in cafés. All the while, they are trailed by the mysterious Abel. With its daring typography, its shifts in rhythm as well as in the wildly veering directions of its characters' thoughts and speech, *Final Exam* breaks new ground in the territory of stream-of-consciousness narrative techniques. It is considered one of Cortázar's best works.

Sensuous Seas - Eugene H. Kaplan 2006-07-03

Learning marine biology from a textbook is one thing. But take readers to the bottom of the sea in a submarine to discover living fossils or to coral reefs to observe a day in the life of an octopus, and the sea and its splendors come into focus, in brilliant colors and with immediacy. In Sensuous Seas, Eugene Kaplan offers readers an irresistibly irreverent voyage to the world of sea creatures, with a look at their habitats, their beauty and, yes, even their sex lives. A marine

biologist who has built fish farms in Africa and established a marine laboratory in Jamaica, Kaplan takes us to oceans across the world to experience the lives of their inhabitants, from the horribly grotesque to the exquisitely beautiful. In chapters with titles such as "Fiddler on the Root" (reproductive rituals of fiddler crabs) and "Size Does Count" (why barnacles have the largest penis, comparatively, in the animal kingdom), Kaplan ventures inside coral reefs to study mating parrotfish; dives 740 feet in a submarine to find living fossils; explains what results from swallowing a piece of living octopus tentacle; and describes a shark attack on a friend. The book is a sensuous blend of sparkling prose and 150 beautiful illustrations that clarify the science. Each chapter opens with an exciting personal anecdote that leads into the scientific exploration of a distinct inhabitant of the sea world--allowing the reader to experience firsthand the incredible complexity of sea life. A one-of-a-kind memoir

that unfolds in remarkable reaches of ocean few of us can ever visit for ourselves, Sensuous Seas brings the underwater world back to living room and classroom alike. Readers will be surprised at how much marine biology they have learned while being amused.

### **The Essential College**

**Professor** - Jeffrey L. Buller  
2009-12-21

The Essential College Professor is about the "how" and "why" of being a faculty member today. Based on the author's series of highly successful faculty development workshops, each chapter deals concisely with the most important information college professors need at their fingertips when confronted by

a particular challenge or faced with an exciting opportunity. Written both as a comprehensive guide to an academic career and as a ready reference to be consulted whenever needed, The Essential College Professor emphasizes proven solutions over untested theories and stresses what faculty members have to know now in order to be successful in their careers. Each chapter is concluded by a short exercise that faculty members can perform to help them, for instance, completely revise a course by restructuring the syllabus and course materials, bring new life to a research project by reframing it as a book proposal or grant application, and so on.
