**PCB Design for Real-World EMI Control** - Bruce R. Archambeault 2013-06-29

Proper design of printed circuit boards can make the difference between a product passing emissions requirements during the first cycle or not. Traditional EMC design practices have been simply rule-based, that is, a list of rules-of-thumb are presented to the board designers to implement. When a particular rule-of-thumb is difficult to implement, it is often ignored. After the product is built, it will often fail emission requirements and various time consuming and costly add-ons are then required. Proper EMC design does not require advanced degrees from universities, nor does it require strenuous mathematics. It does require a basic understanding of the underlying principles of the potential causes of EMC emissions. With this basic understanding, circuit board designers can make trade-off decisions during the design phase to ensure optimum EMC design. Consideration of these potential sources will allow the design to pass the emissions requirements the first time in the test laboratory. A number of other books have been published on EMC. Most are general books on EMC and do not focus on printed circuit board design. This book is intended to help EMC engineers and design design. This book engineers understand the potential sources of emissions and how to reduce, control, or eliminate these sources. This book is intended to be a 'hands-on' book, that is, designers should be able to apply the concepts in this book directly to their designs in the real-world.

**Brand New: The Shape of Brands to Come** - Wally Olins 2014-04-22

The world's leading practitioner of branding predicts the future of companies' identities in an ever-changing marketing landscape What is the future for brands and branding? Does globalization mean that variety and individuality will be crushed out of existence by massive multinationals? Will everywhere and everything become similar, like the world of airports today? Or will there still be room for brands that thrive on being different? What about the impact of digital technology and increasing customer feedback through the internet and social media? What, in fact, do customers want? Today's businesses, in addition to thinking about price and authenticity, have to deal with corporate social responsibility. How does this affect the products and services we consume? How does it influence the way we feel about organizations? Are corporations here to maximize profits and grow, or to help society, or both? With the rapid rise of new markets in India, China, Brazil, and elsewhere, will new global brands emerge based around local cultural strengths and heritage? If so, what will this mean for the traditional dominance of brands based on Western cultural norms? Wally Olins's fascinating book looks at every aspect of the world of branding. With his customary flair and no-nonsense prose, he analyzes the problems facing today's organizations, criticizes corporate missteps, praises those companies who seem to be building and sustaining brands efficiently in our brave new world, and predicts the future of branding. No one interested in marketing, business, or contemporary culture will want to be without this book.

**Dark Back of Time** - Javier Marías 2013-01-31

Dark Back of Time is a compelling story of the way in which reality blurs into fiction by Javier Marías, whose highly-anticipated new novel The Infatuations is published in 2013. It is translated by Esther Allen in Penguin Modern Classics. 'We lose everything because everything remains except us', says the mysterious narrator of this extraordinary novel, which meditates on the transience, chance and fragility of life. As a man called Javier Marías recalls the strange events and people that shaped his past, including ghostly literary figures, a pilot, an adventurer, a brother who died as a child and the king of an island in the Caribbean,

we begin to question the nature of time, memory and reality itself. Here the writer is both a keeper of memories and a purveyor of illusions, destined to be lost in the dark back of time. Javier Marías was born in Madrid in 1951. He has published ten novels, two collections of short stories and several volumes of essays. His work has been translated into thirty-two languages and won a dazzling array of international literary awards, including the prestigious Dublin IMPAC award for *A Heart So White*. He is also a highly practised translator into Spanish of English authors, including Joseph Conrad, Robert Louis Stevenson, Sir Thomas Browne and Laurence Sterne. 'I was enthralled by his strange mix of made-up memories, lost experiences and real-life fantasies' Marina Warner, Guardian 'He uses language like an anatomist uses a scalpel to lay bare the innermost secrets of that strangest of species, the human being' W.
