*How Do Judges Decide?* - Cassia Spohn 2002-01-28
The appropriate amount of punishment for a given crime is an issue that has been debated by scholars, philosophers and legal professionals since the beginning of civilizations. This book seeks to address this issue in all of its complexity by providing a comprehensive overview of the sentencing process in the United States. The book begins by discussing the overall concept of punishment and then proceeds to dissect individual aspects of punishment. Topics include: the sentencing process; responsibility of the judge; disparity and discrimination in sentencing; and sentencing reform. This book is an ideal text for introductory courses on the judicial system, criminal law, law and society. It can be an essential resource to help students understand patterns in the wide discretion and latitude given to judges when determining punishments within the framework of the United States judicial system.

**Cognitive Interviewing Practice** - Debbie Collins 2014-11-10
The use of the cognitive interviewing method for survey question testing has proliferated and evolved over the past 30 years. In more recent years the method has been applied to the evaluation of information letters and leaflets and to research consent forms. This book provides a practical handbook for implementing cognitive interviewing methods in the context of applied social policy research, based on the approach used by the authors at the NatCen Social Research (NatCen) where cognitive interviewing methods have been used for well over a decade. The book provides a justification for the importance of question testing and evaluation and discusses the position of cognitive interviewing in relation to other questionnaire development and evaluation techniques. Throughout the book, the focus is on providing practical and hands-on guidance around elements such as sampling and recruitment, designing probes, interviewing skills, data management and analysis and how to interpret the findings and use them to improve survey questions and other documents. The book also covers cognitive interviewing in different survey modes, in cross national, cross cultural and multilingual settings and discusses some other potential uses of the method.

**Identity in Organizations** - Paul C. Godfrey 1998-07-21
How do people identify with organizations? What role does organizational identity play in organizational strategy? Identity in Organizations investigates the fundamental character of organizational identity and individual identification with an organization. Through the use of an unconventional, conversational format the reader is drawn into a provocative discussion among key organizational scholars that focuses on three different paradigmatic views of identity: a functionalist perspective, an interpretive perspective, and a postmodern perspective. Similarities and distinctions among these ways of understanding are explored and numerous theoretical and practical insights are gained. This groundbreaking book concludes with a discussion of the relevance of identity as a construct in organizational study and observations on conversation and theory building. Many well-known scholars participate in the conversation, including Jay Barney, Denny Gioia, Mary Jo Hatch, Stuart Albert, Anne Huff, Judi McLean Parks, and Rod Kramer. Identity in Organizations will be of interest to professionals and students of organizational studies, human resource management, industrial psychology, sociology of work, psychology, and organizational communication.

**Public Health Communication Interventions** - Nurit Guttman 2000-04-15
The ethical dimensions of health communicators' interventions and campaigns are brought into question in this thought-provoking book. Examining the efforts to effect behavior change, the author questions how far health communication can and should go in changing people's values. The author broadens the current analysis of interventions and presents conceptual frameworks that help identify values and justifications that are embedded in health communication goals, strategies, and evaluation criteria. This critical approach helps explain how and why choices are made in design and implementation, and provides constructs and frameworks to examine them. It also widens the criteria for program evaluation and policymaking, and provides practitioners, planners, policy-makers, researchers, and students with practice-oriented questions.

**Writing a Research Paper in Political Science** - Lisa A. Baglione 2015-03-17
In Writing a Research Paper in Political Science, author Lisa Baglione breaks down the research paper into its constituent parts and shows students precisely how to complete each component. The author provides encouragement at each stage and faces pitfalls head on, giving advice and examples so that students move through each task successfully. Students are shown how to craft the right research question, find good sources and properly summarize them, operationalize concepts, design good tests for their hypotheses, and present and analyze quantitative and qualitative data. Even writing an introduction, coming up with effective headings and titles, presenting a conclusion, and the important steps of editing and revising are covered. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. In this Third Edition, updated sample research topics come from American government, gender studies, comparative politics, and international relations. And now, more extensive materials are available on the web, including checklists and worksheets that help students tackle each step, calendar ideas to help them complete their paper on time, and a glossary.
