*Inequality Reexamined* - Amartya Sen  
1995-03-15

The noted economist and philosopher Amartya Sen argues that the dictum “all people are created equal” serves largely to deflect attention from the fact that we differ in age, gender, talents, and physical abilities as well as in material advantages and social background. He argues for concentrating on higher and more basic values: individual capabilities and freedom to achieve objectives. By concentrating on the equity and efficiency of social arrangements in promoting freedoms and capabilities of individuals, Sen adds an important new angle to arguments about such vital issues as gender inequalities, welfare policies, affirmative action, and public provision of health care and education.

Educational Psychology - Anita Woolfolk

2013-03-01

In lucid and jargon-free prose, the text explains and illustrates educational psychology's practical relevance for teachers and learners. The new edition continues to emphasize the applications of research on child development, on learning and cognition, on motivation, and on instruction and assessment. At the same time the text has long been counted on for its state of the art presentation of the field of educational psychology, and this edition continues that tradition with new and expanded coverage of important topics like the brain and neuroscience, the impact of technology on the lives and learning of students, and student diversity. From reviews of the book: "I polled my students . . . and the vast majority actually liked the textbook (which is rare). They find it easy to read, interesting and engaging. . . . This textbook's major strengths are its cognitive perspective, its readability, and the fact that it puts into practice some of the information-processing strategies that it teaches as effective ways to process information. . . ." -Elizabeth Pemberton, University of Delaware "[T]he text is written in a . . . conversational style that invites students to actively explore complex questions about teaching and learning. It is well-organized, supported with visual aids, and various learning tools, such as guidelines, reflection activities, and cases presenting opposing viewpoints. Most importantly, the text is informed and well supported by contemporary scholarship in the field of educational psychology." -Alina Reznitskaya, Montclair State University Video-Enhanced Pearson eText. **A Balcony in Nepal** - Sally Wendkos Olds

2002-09-10

After trekking in Nepal, Sally Wendkos Olds and Margaret Roche both fell in love with this mountainous Himalayan country and her people. They returned four times between 1993 and 1998 and spent time in Bedel, a remote hill

village without electricity, telephone or roads. They helped establish a library there, and on each visit Olds, a writer, and Roche, an artist, were welcomed enthusiastically as "our relatives." Each time they came to Badel, they returned home with questions about their own lives. Here, in words and pictures, is their story of the Badel villagers and their fast disappearing ancient way of life.

**Childhood and Sexuality** - Allison Moore  
2017-10-25

This book explores how children engage with sex and sexuality. Building on a conceptual and legal grounding in sexuality studies and the new sociology of childhood, the authors debate the age of consent, teenage pregnancy, sexual diversity, sexualisation, sex education and sexual literacy, paedophilia, and sex in the digital age. Whilst Moore and Reynolds recognise the necessity of child protection and safeguarding in the context of risk, danger and harm, they also argue that where these stifle children's sexual knowledge, understanding, expression and experience, they contribute to a climate of fear, ignorance and bad experiences or harms. What is necessary is to balance safeguarding with enabling, and encourage judicious understandings that advance from a rigid developmental model to one that recognises pleasure and excitement in children's nascent sexual lives. Exploring that balance through their chosen issues, they seek to encourage changed thinking in professional, personal and academic contexts, and speculate that children might teach adults something about the way they think about sex. *Childhood and Sexuality* will be of interest to students, scholars and professionals across a range of subjects and disciplines including sociology, social work, criminology, and youth studies.

**Development as Freedom** - Amartya Sen  
2011-05-25

By the winner of the 1988 Nobel Prize in Economics, an essential and paradigm-altering framework for understanding economic development--for both rich and poor--in the twenty-first century. Freedom, Sen argues, is both the end and most efficient means of sustaining economic life and the key to securing the general welfare of the world's entire population. Releasing the idea of individual freedom from association with any particular historical, intellectual, political, or religious tradition, Sen clearly demonstrates its current applicability and possibilities. In the new global economy, where, despite unprecedented increases in overall opulence, the contemporary world denies elementary freedoms to vast numbers--perhaps even the majority of people--he concludes, it is still possible to practically and optimistically restrain a sense of social accountability. *Development as Freedom* is essential reading.

**Childhood and Society** - Erik H. Erikson  
1993-09-17

The landmark work on the social significance of childhood. The original and vastly influential ideas of Erik H. Erikson underlie much of our understanding of human development. His insights into the interdependence of the individuals' growth and historical change, his now-famous concepts of identity, growth, and the life cycle, have changed the way we perceive ourselves and society. Widely read and cited, his works have won numerous awards including the Pulitzer Prize and the National Book Award. Combining the insights of clinical psychoanalysis with a new approach to cultural anthropology, *Childhood and Society* deals with the

relationships between childhood training and cultural accomplishment, analyzing the infantile and the mature, the modern and the archaic elements in human motivation. It was hailed upon its first publication as "a rare and living combination of European and American thought in the human sciences" (Margaret Mead, *The American Scholar*). Translated into numerous foreign languages, it has gone on to become a classic in the study of the social significance of childhood.

*Creative Bible Teaching* - Lawrence O. Richards  
2020-08-04

Bring the Bible to Your Students like Never Before Communicating the Scriptures is much like building a bridge. However, instead of ravines or rivers, the teacher must span both cultural boundaries and great gulfs of time between the present and the pasts of Moses, David, Jesus, and Paul. Though God's Word is always relevant, the teacher must help students see Scripture's vast treasures. The effective, engaging Bible teacher must, therefore, become creative. Together, Lawrence Richards and Gary Bredfeldt have created the ultimate guide to building bridges for those seeking to learn about God's Word. *Creative Bible Teaching* offers a five-step process by which Christian educators can construct a bridge across time, geography, and culture to help students of all ages connect with God's Word. This newly revised edition makes learning about God's Word more accessible for both teachers and students today. Simple, clear, and memorable, the method laid out in *Creative Bible Teaching* provides a sure-fire way of communicating God's Word in a way that sticks.

*FRANKIE and BOBBY: the Rest of Our Story* - Bob Zappa 2017-06-23

In *Frankie & Bobby: Growing Up Zappa*, Frank's younger brother, Charles R. Zappa - known as Bobby - offered an engaging and entertaining vision of the childhood and development of one of the world's most influential musicians. Picking up where his first book left off, Charles recounts the years following his decision not to pursue a career in the music industry. As his brother dedicates himself to music and social commentary, Charles pursues what many would consider an ordinary life. The two brothers remain in intermittent touch, despite often successful attempts by Frank's wife, Gail, to distance her famous husband from his family. When Frank is diagnosed with prostate cancer, the story takes a dark turn, one complicated by Gail's sometimes inexplicable actions. Charles's recollections shed light on questions about Frank's death that have haunted Zappa fans for years, while raising new ones that may never be fully answered. As he writes of his relationship with Frank, Charles also recreates pivotal aspects of American life, from the Vietnam era to the present day. And while Frank's death is a painful memory, the book ends with a positive reunion with Frank's children, Moon and Dweezil.

*Beating the Devil Out of Them* - Valerie Bentz

2017-07-28

Based on his studies of over 9,000 families, Murray A. Straus, the foremost researcher on family violence in the world, discusses the extent to which parents in the United States use corporal punishment (such as spanking and slapping) and its effects on their children. The question of whether corporal punishment is an effective method of discipline is hotly debated. Straus contends that this believed-to-be-"minor" form of physical violence is precursor to much violence that plagues our world. Children who are spanked quickly learn that love and violence can go hand in hand. Since spanking is generally done by loving, caring parents for the child's own good a child can learn that hitting is "morally right." Straus describes what he has learned through two decades of research: children who are spanked are from two to six times more likely to be physically aggressive, to become juvenile delinquents, and later, as adults, to use physical violence against their spouses, to have sadomasochistic tendencies, and to suffer from depression. Straus alerts parents to these risks, and argues that spanking adversely affects not only the children who are subjected to it but society as a whole. This groundbreaking book, now available in paperback with a substantive new introduction and new concluding chapter, is essential reading for parents as well as teachers, lawyers, and judges. Professionals in fields such as social work, child protection, delinquency and criminology, psychology, and politics will find it of critical importance.

**Child** - Gabriela Martorell 2019-03-29

**The Married Widow** - Diane Papalia 2021-06

**Models Of Cognitive Development** - Ken Richardson 2019-07-26

In spite of its obvious importance and popularity, the field of cognitive development remains highly fragmented due to the vast diversity of models of what knowledge and reasoning are, and how they develop. This new Classic Edition of *Models of Cognitive Development* aims to overcome this barrier through its careful introduction, illustrated examples, and approach to helping students think more critically about the subject. In this significant work, Richardson provides students, researchers, and comparative theoreticians with a cohesive understanding of the area by organizing diverse schools, frameworks, and approaches according to a much smaller set of underlying assumptions or preconceptions, which themselves can be historically interrelated. By understanding these, it's possible to find pathways around the area more confidently as a whole, to see the "wood" as well as the theoretical trees, and be able to react to individual models more critically and constructively. The Classic Edition of this core text will be essential reading for undergraduate and graduate students of cognitive development.

*Solution Focused Narrative Therapy* - Linda

Metcalf, PhD, LPC-S, LMFT-S 2017-03-01

**Introduces a Powerful New Brief Therapy Approach** This groundbreaking book is the first to provide a comprehensive model for effectively blending the two main postmodern brief therapy approaches: solution-focused and narrative therapies. It harnesses the power of both models—the strengths-based, problem-solving approach of SFT and the value-honoring and re-descriptive approach of Narrative Therapy--to offer brief, effective help to clients that builds on their strengths and abilities to envision and craft preferred outcomes. Authored by a leading trainer, teacher, and practitioner in the field, the book provides an overview of the history of both models and outlines their differences, similarities, limitations and strengths. It then demonstrates how to blend these two approaches in working with such issues as trauma, addictions, grief, relationship issues, family therapy and mood issues. Each concern is illustrated with a case study from practice with individual adults, adolescents, children, and families. Useful client dialogue and forms are included to help the clinician guide clients in practice. Each chapter concludes with a summary describing and reinforcing the principles of the topic and a personal exercise so the reader can experience the approach first hand. Key Features: Describes how two popular postmodern therapy models are combined to create a powerful new therapeutic approach—the first book to do so Includes case studies reflecting the model's use with individual adults, children, adolescents, and families Provides supporting dialogue and forms for practitioners Authored by a leading figure in SFT and its application in a variety of setting Presents an overview of the history of both models

**Parenting** - Susan Golombok 2014-02-25

Parenting: What Really Counts? examines the scientific evidence on what really matters for children's healthy psychological development. The first section considers whether it is necessary to have two parents, a father present, parents who have a genetic link with their child,

or parents who are heterosexual. Section two explores the psychological processes that underlie optimal development for children, particularly the quality of the child's relationship with parents, other family members and the wider social world. Contrary to common assumptions, Susan Golombok concludes that family structure makes little difference to children's day-to-day experiences of life. As well as for students, researchers and teachers, Parenting: What really counts? will be of great interest to parents and those thinking of embarking on a non-traditional route to parenthood. It will also be welcomed by professionals working with families and those involved in the development of family policy.
