Open Season - C. J. Box 2016-05-31

Don't miss the Spectrum Originals series JOE PICKETT! The first novel in the thrilling series featuring Wyoming game warden Joe Pickett from #1 New York Times bestselling author C. J. Box. Joe Pickett is the new game warden in Twelve Sleep, Wyoming, a town where nearly everyone hunts and the game warden—especially one like Joe who won't take bribes or look the other way—is far from popular. When he finds a local hunting outfitter dead, splayed out on the woodpile behind his state-owned home, he takes it personally. There had to be a reason that the outfitter, with whom he's had run-ins before, chose his backyard, his woodpile to die in. Even after the "outfitter murders," as they have been dubbed by the local press after the discovery of the two more bodies, are solved, Joe continues to investigate, uneasy with the easy explanation offered by the local police. As Joe digs deeper into the murders, he soon discovers that the outfitter brought more than death to his backdoor: he brought Joe an endangered species, thought to be extinct, which is now living in his woodpile. But if word of the existence of this endangered species gets out, it will destroy any chance of InterWest, a multi-national natural gas company, building an oil pipeline that would bring the company billions of dollars across Wyoming, through the mountains and forests of Twelve Sleep. The closer Joe comes to the truth behind the outfitter murders, the endangered species and InterWest, the closer he comes to losing everything he holds dear.

Socialising Tourism - Freya Higgins-Desbiolles 2021-07-29

Once touted as the world's largest industry and also a tool for fostering peace and global understanding, tourism has certainly been a major force shaping our world. The recent COVID-19 crisis has led to calls to transform tourism and reset it along more ethical and sustainable lines. It was in this context that calls to "socialise tourism" emerged (Higgins-Desbiolles, 2020). This edited volume builds on this work by employing the term *Socialising Tourism* as a broad conceptual focal point and guiding term for industry, activists and academics to rethink tourism for social and ecological justice. *Socialising Tourism* means reorienting

travel and tourism based on the rights, interests, and safeguarding of traditional ecological and cultural knowledges of local peoples, communities and living landscapes. This means making tourism work for the public good and taking seriously the idea of putting the social and ecological before profit and growth as the world re-emerges from the COVID-19 pandemic. This is an essential first step for tourism to be made accountable to the limits of the planet. Concepts discussed include Indigenous culture, toxic tourism, a "theory of care", dismantling whiteness, decolonial tourism and animal oppression, among others, all in the context of a post-COVID-19 world. This will be essential reading for all upper-level students, academics and policymakers in the field of tourism. This book offers a unique perspective on the challenges facing the world's largest service industry to protect and care for customers in a rapidly evolving environment where borders have closed, social distancing rules apply and personal hygiene has become a key focus in everyday life. Yet tourism is a very resilient industry and history shows there is always an immediate surge toward recovery after a crisis has passed. Humans want to travel and see the world. While we appreciate that the pandemic is far from over, already there are reports of pent-up demand for travel as restrictions ease at some destinations and borders begin to open. As we move hopefully toward the recovery phase and people begin to move around for business and pleasure, this book presents the reader with key information and insights in both traditional and emerging areas of tourist health, safety and wellbeing, recognising that the world is now shaped by this pandemic, bringing change, potentially enduring benefits and lasting legacies.

The Impact of Tourist Activities on Low-Density Territories - Rui Pedro Marques 2021-03-17

This book tackles the question of how tourism development and suitable policies can be used to promote sustainable development in Low-Density Territories (LDTs). The respective chapters, written by prominent experts, identify the problems associated with LDTs; highlight the comparative advantages of these territories with regard to tourism; propose methodologies for assessing the impact of tourism; and present case studies on the application of sustainable policies in tourism. Given its scope, it will be especially interesting for academics and researchers investigating LDTs and sustainable tourism, and for policymakers interested in developing these territories. LDTs represent an economic challenge, especially because most of them are home to an increasingly ageing population unable to pursue economic development. In these territories, tourism is emerging as an excellent opportunity to promote innovative dynamics, to lure investment, and to attract new people. However, it is important to promote sustainable tourism, which preserves the environment and communities' quality of life. The Chapter "Tourism, immigrants and lifestyle entrepreneurship: The (In)coming of people as a key factor for sustainability of low-density territories - A case study in Portugal" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Feasible Management of Archaeological Heritage Sites Open to Tourism - Douglas C. Comer 2018-08-07

Archaeological sites opened to the public, and especially those highly photogenic sites that have achieved iconic status, are often major tourist attractions. By opening an archaeological site to tourism, threats and opportunities will emerge. The threats are to the archaeological record, the pre-historic or historic materials in context at the site that can provide facts about human history and the human relationship to the

environment. The opportunities are to share what can be learned at archaeological sites and how it can be learned. The latter is important because doing so can build a public constituency for archaeology that appreciates and will support the potential of archaeology to contribute to conversations about contemporary issues, such as the root causes and possible solutions to conflict among humans and the social implications of environmental degradation. In this volume we will consider factors that render effective management of archaeological sites open to the public feasible, and therefore sustainable. We approach this in two ways: The first is by presenting some promising ways to assess and enhance the feasibility of establishing effective management. Assessing feasibility involves examining tourism potential, which must consider the demographic sectors from which visitors to the site are drawn or might be in the future, identifying preservation issues associated with hosting visitors from the various demographic sectors, and the possibility and means by which local communities might be engaged in identifying issues and generating long-term support for effective management. The second part of the book will provide brief case studies of places and ways in which the feasibility of sustainable management has been improved.

Case Based Research in Tourism, Travel, Hospitality and Events - Marianna Sigala 2022

This book consolidates international, contemporary and topical case study based research in tourism, travel, hospitality and events. Case studies can make learning more attractive and interesting as well as enable students to understand the theory better and develop their analytical and problem-solving skills. Using industry as an open living lab, case study based research infuses scholars into real-world industry challenges and inspires them to theorise and advance our knowledge frontiers. The book includes international case studies that can help tourism scholars build and advance (new) theories and enrich their educational practices. Case studies are accompanied with a teaching note guiding scholars to integrate case studies into instruction. Dr Kirsten Holmes, Chair, Council for Australasian Tourism and Hospitality Education (CAUTHE) There is a vital need for contemporary and well-

structured case studies for use in tourism teaching. By including case studies from Australasia and key destination regions in Asia, Europe, and the Caribbean, the book is helpful for tertiary teachers globally. Professor Xander Lub, President, EuroCHRIE The book inspires educators and students. The cases provide context to students learning and demonstrate the richness and variation of the industry. The book also clearly demonstrates how research can inform our teaching. Professor Brian King, Chair, THE-ICE Assessment Panel The book includes cases under five themes: experiences, operations, technologies, strategy and marketing, and destinations. The book provides subject lecturers with a structure to guide students of applying theory into practice. Dr Paul Whitelaw, Academic Director, Southern Cross University This book marks a significant contribution to hospitality, tourism and events pedagogy at undergraduate and postgraduate level. At a time when the industry is demanding that our graduates have a strong grasp of "real world issues", the case study approach provides an accessible, meaningful and relatable means by which students can engage in real world issues.

Magazines, Tourism, and Nation-Building in Mexico - Claire Lindsay 2018-11-20

This open access book discusses the relationship between periodicals, tourism, and nation-building in Mexico. It enquires into how magazines, a staple form of the promotional apparatus of tourism since its inception, articulated an imaginative geography of Mexico at a time when that industry became a critical means of economic recovery and political stability after the Revolution. Notwithstanding their vogue, popularity, reach, and close affiliations to commerce and state over several decades, magazines have not received any sustained critical attention in the scholarship on that period. This book aims to redress that oversight. It argues that illustrated magazines like Mexican Folkways (1925-1937) and Mexico This Month (1955-1971) offer rich and compelling materials in that regard, not only as unique tools for interrogating the ramifications of tourism on the country's reconstruction, but as autonomous objects of study that form a vital if complex part of Mexico's

visual culture.

The Impact of Tourism in East Africa - Anne Storch 2021-05-25

This book explores the relationship between imperial formations and individual encounters at African tourist sites – spaces of leisure, healing and work. It examines how encounters between tourists and hosts tend to be constructed along colonial thought lines and considers how players in the hospitality industry do not interact as coeval participants, but are racialised, scripted and positioned according to colonially-established order. The authors focus on the language of these encounters, not only speech, performance and response, but also silence, resonance, emptiness, noise – objectified, materialised, evasive and confusing. Through its exploration of language in these encounters, the volume shows that ruination is the one feature that is omnipresent in the multiple and diverse tourist settings of the postcolonial world. This book is open access under a CC BY ND licence.

New Frontiers in Marine Tourism - Brian Garrod 2008

Diving tourism has seen such growth in the past decade that the World Tourism Organization suggests it will soon become as important as ski tourism. According to a WTO estimate, there are now 5-7 million active certified divers in the world. Despite its development as a mass tourism activity, its dynamic growth and great economic importance, particularly for island destinations in the tropics, surprisingly few scientific publications address this form of special-interest tourism. In the light of this, “New Frontiers in Marine Tourism” is the first attempt to describe and analyse this tourism sector comprehensively. The first part of the book is devoted to an overview of the dive sector, addressing different types of diving locations and their particular characteristics, the geographical distribution of dive locations, the origins of dive tourists, as well as the growth and economic significance of diving tourism in destinations worldwide. In its second section, the book outlines different motivations and typologies of diving tourists, their learning behaviour, knowledge of marine environments, and their interaction with flora and fauna. The third section focuses on diver satisfaction, attitudes and preferences, diver education and interpretation, compliance with

regulations by divers and tour operators, environmental impacts, and aspects of risk and health, thus highlighting a variety of pressing topics related to the management of diving tourism. * First book of its kind to address the rapidly growing area of diving tourism * Contributions from academic experts in the field, it addresses hot issues such as environmental impacts, health and safety, education, and economic factors and impacts. * Brilliantly edited, it represents a coherent and cohesive collection of critically important issues in this area.

Degrowth in Tourism - Konstantinos Andriotis 2018-07-27

The modern-day world faces a hostile climate, depleted resources and the destruction of habitats. The dream that growth will lead to a materialistic utopia is left unfulfilled by a lack of ecological and economic capacity. The only choice is to find alternatives to increased growth, transform the structures and institutions currently shaping the world, change lifestyles and articulate a more credible vision for the future and

lasting prosperity. As a reaction to the problems accrued by capitalism, new development approaches such as the concept of degrowth have evolved. Degrowth in Tourism explores newly-emerging development and philosophical approaches that provide more equity for host communities and offer a low-carbon future by looking at alternatives to the classic models of development and applying the concept of degrowth in a tourism context. Proposing that we need to shift tourism research from models which prioritize commodified tourism experiences to those that offer alternative decommodified ones this book: Provides topical analysis and illustrates the key themes of degrowth; Discusses the relationship between tourism and degrowth from both a historic perspective and through contemporary patterns of activity; Includes international examples and case studies to translate theory into practical new approaches. A comprehensive review of the subject, this book will be of great interest to researchers and practitioners within tourism, development, environment and economics, as well as those specifically studying degrowth.

The Politics of Tourism in Asia - Linda K. Richter 2019-03-31

Tourism, the world's largest industry, has created a variety of complex political problems, particularly in those countries where the primary attraction of tourism is its potential for accelerating development. The political dimensions that have encouraged tourism in the People's Republic of China, the Philippines, Thailand, India, Pakistan, Bangladesh, Sri Lanka, the Maldives, Nepal, and Bhutan are examined in Linda K. Richter's study, which is based on more than 250 interviews with government officials, travel industry representatives, and media officials. Richter concentrates on the reasons for using tourism to advance government policy objectives and on the many ways political and economic problems can frustrate tourism's contribution to national development. All too often, after the expensive infrastructure is developed, luxury goods imported, and lavish promotional efforts expended, nations are left disillusioned with the economic promise of tourism. Disappointing results are often complicated by a preoccupation with the lure of tourism and an underestimation of the industry's needs

and of the political pressures of and on government officials. Encouraging an awareness of the political aspects of tourism, the author advocates greater involvement by social and political scientists in monitoring tourism policy, as well as a restructuring and redesigning of programs in this largest sector of international trade.
