Planning an Applied Research Project in Hospitality, Tourism, and Sports - Frederic B. Mayo 2013-10-28

Planning an Applied Research Project in Hospitality, Tourism and Sports provides a comprehensive and carefully structured treatment of all the aspects involved in planning a research project. Instead of being a statistically oriented book, this text provides a conceptual and process-oriented approach to planning and conducting research. Written for both students and professionals, it is easy to read, short, and to the point, i.e., practical. The book provides basic, yet comprehensive information about doing research, and can be used not only in a "research methods" course where students will have to plan and conduct a research project, but also in earlier course work to help students learn to write research papers. Planning an Applied Research Project in Hospitality, Tourism and Sports covers a range of subjects including: selecting a topic, conducting a literature review, developing a coherent design, and using various research techniques such as interviews, questionnaires, and observations. It also contains information on analyzing data once it has been collected and developing a proposal to obtain support before undertaking a research project. Unique coverage includes: 2 chapters on conducting and writing a literature review, 1 chapter on analyzing data (from both a qualitative and quantitative perspective), 1 chapter on writing a research proposal, and 3 detailed chapters on techniques.

A Manual for Writers of Research Papers, Theses, and Dissertations, Seventh Edition - Kate L. Turabian 2009-08-14

Dewey. Bellow. Strauss. Friedman. The University of Chicago has been the home of some of the most important thinkers of the modern age. But perhaps no name has been spoken with more respect than Turabian. The dissertation secretary at Chicago for decades, Kate Turabian literally wrote the book on the successful completion and submission of the student paper. Her Manual for Writers of Research Papers, Theses, and Dissertations, created from her years of experience with research projects across all fields, has sold more than seven million copies since it was first published in 1937. Now, with this seventh edition, Turabian's Manual has undergone its most extensive revision, ensuring that it will remain the most valuable handbook for writers at every level—from first-year undergraduates, to dissertation writers apprehensively submitting final manuscripts, to senior scholars who may be old hands at research and writing but less familiar with new media citation styles. Gregory G. Colomb, Joseph M. Williams, and the late Wayne C. Booth—the gifted team behind The Craft of Research—and the University of Chicago Press Editorial Staff combined their wide-ranging expertise to remake this classic resource. They preserve Turabian's clear and practical advice while fully embracing the new modes of research, writing, and source citation brought about by the age of the Internet. Booth, Colomb, and Williams significantly expand the scope of previous editions by creating a guide, generous in length and tone, to the art of research and writing. Growing out of the authors' best-selling Craft of Research, this new section provides students with an overview of every step of the research and writing process, from formulating the right questions to reading critically to building arguments and revising drafts. This leads naturally

to the second part of the Manual for Writers, which offers an authoritative overview of citation practices in scholarly writing, as well as detailed information on the two main citation styles ("notes-bibliography" and "author-date"). This section has been fully revised to reflect the recommendations of the fifteenth edition of The Chicago Manual of Style and to present an expanded array of source types and updated examples, including guidance on citing electronic sources. The final section of the book treats issues of style—the details that go into making a strong paper. Here writers will find advice on a wide range of topics, including punctuation, table formatting, and use of quotations. The appendix draws together everything writers need to know about formatting research papers, theses, and dissertations and preparing them for submission. This material has been thoroughly vetted by dissertation officials at colleges and universities across the country. This seventh edition of Turabian's Manual for Writers of Research Papers, Theses, and Dissertations is a classic reference revised for a new age. It is tailored to a new generation of writers using tools its original author could not have imagined—while retaining the clarity and authority that generations of scholars have come to associate with the name Turabian.

TASER® Conducted Electrical Weapons: Physiology, Pathology, and Law - Mark W. Kroll 2009-02-27

TASER® Conducted Electrical Weapons are rapidly replacing the club for law-enforcement control of violent subjects within many countries around the globe. A TASER CEW is a hand-held device that delivers a 400-volt pulse with a duration tuned to control the skeletal muscles without affecting the heart at a distance of up to 6.5 meters over tiny wires. If necessary, it begins with an arcing voltage of 50,000 V to penetrate thick clothing; the 50,000 V is never delivered to the body itself. Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation, this book will have significant utility. This volume is written for cardiologists, emergency physicians, pathologists, law enforcement management, corrections personnel, and attorneys.

A Manual for Writers of Research Papers, Theses, and Dissertations, Ninth Edition - Kate L. Turabian 2018-04-27

When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. *A Manual for Writers of Research Papers, Theses, and Dissertations*—also known as “Turabian”—remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released *Chicago Manual of Style*, 17th edition, as well as with the latest edition of *The Craft of Research*. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago's two methods of source citation: notes-bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. *A Manual for Writers* also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, *A Manual for Writers* has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines.
