Slave Stealers - Timothy Ballard 2018-09-04

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story

includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Routledge Handbook of Leisure Studies - Tony Blackshaw
2020-07-26

This landmark publication brings together some of the most perceptive commentators of the present moment to explore core ideas and cutting edge developments in the field of Leisure Studies. It offers important new insights into the dynamics of the transformation of leisure in contemporary societies, tracing the emergent issues at stake in the discipline and examining Leisure Studies' fundamental connections with cognate disciplines such as Sociology, Cultural Studies, History, Sport Studies and Tourism. This book contains original work from key scholars across the globe, including those working outside the Leisure Studies mainstream. It showcases the state of the art of contemporary Leisure

Studies, covering key topics and key thinkers from the psychology of leisure to leisure policy, from Bourdieu to Baudrillard, and suggests that leisure in the 21st century should be understood as centring on a new 'Big Seven' (holidays, drink, drugs, sex, gambling, TV and shopping). No other book has gone as far in redefining the identity of the discipline of Leisure Studies, or in suggesting how the substantive ideas of Leisure Studies need to be rethought. The Routledge Handbook of Leisure Studies should therefore be the intellectual guide of first choice for all scholars, academics, researchers and students working in this subject area.

Advanced Manufacturing and Materials Science - Kurian Antony
2018-05-31

This book presents selected papers from the international conference on advanced manufacturing and materials sciences (ICAMMS 2018). The papers reflect recent advances in manufacturing sector focusing on process optimization and give emphasis to testing and evaluation of new materials with potential use in industrial applications.

World Architecture - Richard Ingersoll 2018

World Architecture provides the most comprehensive and contemporary survey of the field. Each chapter is organized chronologically and focuses on three unique architectural cultures, simultaneously providing instructors with flexibility and offering students a comprehensive method for understanding and appreciating the history, cultural significance, beauty, and diversity of architecture from around the world.

Machine Tools for High Performance Machining - Norberto Lopez de Lacalle 2008-10-01

Machine tools are the main production factor for many industrial applications in many important sectors. Recent developments in new motion devices and numerical control have led to considerable technological improvements in machine tools. The use of five-axis machining centers has also spread, resulting in reductions in set-up and lead times. As a consequence, feed rates, cutting speed and chip section increased, whilst accuracy and precision have improved as well. Additionally, new cutting tools have been developed, combining tough

substrates, optimal geometries and wear resistant coatings. "Machine Tools for High Performance Machining" describes in depth several aspects of machine structures, machine elements and control, and application. The basics, models and functions of each aspect are explained by experts from both academia and industry. Postgraduates, researchers and end users will all find this book an essential reference.
A World of Imagination - Danielle Van Alst 2017-10-25

What would you do on a day off from school? Go on an adventure, of course! Meet Charlie, an eight-year-old boy with a flare for using his imagination. Join him as he turns his snow day into a day filled with fun, excitement, and fantasy. Travel with Charlie to the Wild West, the Amazon jungle, and into outer space. Ride along for the thrills as he becomes a race car driver, a pirate, a cowboy, and even a superhero! With a little creativity (and a basement full of junk), there is no limit to where your imagination can take you!

Fertility Preservation in Male Cancer Patients - John P. Mulhall
2013-02-21

Men with cancer rendered infertile by surgery, chemotherapy, radiation and hormone therapy that are needed to control or cure their disease are increasingly being offered the chance to preserve their reproductive potential through artificial reproductive technologies. Cryopreservation of sperm and testicular tissue have increasingly helped boys and men preserve their fertility. There is a growing subspecialty within reproductive medicine aimed at fertility preservation in this population. Furthermore, strategies are being developed that may in the future revolutionize the approach to such patients. Written by international authorities in the field of fertility preservation, this comprehensive book is aimed at clinicians dealing with male cancer patients, in particular, urologists, andrologists, oncologists, pediatricians and nursing staff as well as clinicians in reproductive endocrinology. The text reviews the impact of cancers and their treatment on male fertility, the available fertility preservation strategies and post-treatment management.

UWB Communication Systems - Maria-Gabriella Di Benedetto 2006

Ultrawideband (UWB) communication systems offer an unprecedented opportunity to impact the future communication world. The enormous available bandwidth, the wide scope of the data rate / range trade-off, as well as the potential for very low-cost operation leading to pervasive usage, all present a unique opportunity for UWB systems to impact the way people and intelligent machines communicate and interact with their environment. The aim of this book is to provide an overview of the state of the art of UWB systems from theory to applications. Due to the rapid progress of multidisciplinary UWB research, such an overview can only be achieved by combining the areas of expertise of several scientists in the field. More than 30 leading UWB researchers and practitioners have contributed to this book covering the major topics relevant to UWB. These topics include UWB signal processing, UWB channel measurement and modeling, higher-layer protocol issues, spatial aspects of UWB signaling, UWB regulation and standardization, implementation issues, and UWB applications as well as positioning. The book is targeted at advanced academic researchers, wireless designers, and graduate students wishing to greatly enhance their knowledge of all aspects of UWB systems

DonorPerfect Online User Manual - Inc. SoftWare 2010-07-13

The DonorPerfect Online User Manual is the complete reference for DonorPerfect Online users, and covers data entry, reports, mailings, selection filters, customization, tasks, utilities, configuration of all settings, and optional modules. Now updated to reflect the latest features!

Modern Sensing Technologies - Subhas Chandra Mukhopadhyay 2018-08-24

This book provides an overview of modern sensing technologies and reflects the remarkable advances that have been made in the field of intelligent and smart sensors, environmental monitoring, health monitoring, and many other sensing and monitoring contexts in today's world. It addresses a broad range of aspects, from human health monitoring to the monitoring of environmental conditions, from wireless

sensor networks and the Internet of Things to structural health monitoring. Given its breadth of scope, the book will benefit researchers, practitioners, technologists and graduate students involved in the monitoring of systems within the human body, functions and activities, healthcare technologies and services, the environment, etc.

Use of Recycled Plastics in Eco-efficient Concrete - Fernando Pacheco-Torgal 2018-11-21

Use of Recycled Plastics in Eco-efficient Concrete looks at the processing of plastic waste, including techniques for separation, the production of plastic aggregates, the production of concrete with recycled plastic as an aggregate or binder, the fresh properties of concrete with plastic aggregates, the shrinkage of concrete with plastic aggregates, the mechanical properties of concrete with plastic aggregates, toughness of concrete with plastic aggregates, modulus of elasticity of concrete with plastic aggregates, durability of concrete with plastic aggregates, concrete plastic waste powder with enhanced neutron radiation shielding, and more, thus making it a valuable reference for academics and industrial researchers. Describes the main types of recycled plastics that can be applied in concrete manufacturing. Presents, for the first time, state-of-the art knowledge on the properties of conventional concrete with recycled plastics. Discusses the technological challenges for concrete manufacturers for mass production of recycled concrete from plastic waste

Science Focus 3 - Greg Rickard 2009

The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components.

The Meaning of Contemplation for Social Qualitative Research - Krzysztof T. Konecki 2021-12-31

This book offers an account of contemplative reflection in qualitative social research. Focusing on the experiences of the researcher - including sensory and emotional experiences - and the work of the mind

in the investigative process, it considers the means by which the researcher's basic assumptions can be analysed and bracketed, so as to shed light on the process by which knowledge is produced. Through an exploration of the methods of meditation, auto-observation and self-reports, epoché, 'contemplative memo-ing', and the contemplative diary, the author explores the essential role of subjectivity in qualitative research, providing inspiration for more mindful research. As such, it will appeal to scholars of sociology, anthropology and geography with interests in phenomenology, research methods and the role of the mind in the research process.

Medical Anthropology - Andrea S. Wiley 2009

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Trees Up Close - Nancy Ross Hugo 2014-07-23

Trees Up Close offers an intimate, revealing look at the beauty of leaves, flowers, cones, fruits, seeds, buds, bark, and twigs of the most common trees. With more than 200 dazzling photos, you will be amazed by the otherworldly beauty of the acorns from a sawtooth oak, enchanted by the immature fruits of a red maple, and dazzled by the delicate emerging flowers of the American elm.

The Geology of Mars - Mary Chapman 2007-05-17

Research into the geological processes operating on Mars relies on

interpretation of images and other data returned by unmanned orbiters, probes and landers. Such interpretations are based on our knowledge of processes occurring on Earth. Terrestrial analog studies therefore play an important role in understanding the geological features observed on Mars. This 2007 book presents direct comparisons between locales on Earth and Mars, and contains contributions from leading planetary geologists to demonstrate the parallels and differences between these two neighboring planets. Mars is characterized by a wide range of geological phenomena that also occur on Earth, including tectonic, volcanic, impact cratering, eolian, fluvial, glacial and possibly lacustrine and marine processes. The book provides terrestrial analogs for data sets from Mars Global Surveyor, Mars Odyssey, Mars Exploration Rovers and Mars Express, and will therefore be a key reference for students and researchers of planetary science.

The History of Racism in United States and the World - David Anversa 2020-10-28

The racism. One of the worst social plague of all times. In this book we will go to discover in the History every corner of this plague. From ancient times up to the present day. After a long and accurate in-depth analysis and studies, the author decides to create this book with the object to spread an easy-to-read real and objective vision of this phenomenon. We are going to uncover and understand all aspects regarding the Racism in the History. How it influenced our society and lives from historical, social and economic point of view. The book will talk about: ✓ All the most important historical events concerning the origin and spread of the racism ✓ The story of the most important Iconic Characters That Influenced the story of the Racism ✓ Slavery in the United States, and Atlantic slave trade ✓ The Legislative Contributions against the Racism ✓ And much more Each of the topics listed in this book is treated professionally and every information is the result of accurate studies and analysis. If you read this book, you're going to learn

everything you need to know about the Racism in the history. You will increase your culture and learn very useful and updated information and notions that will allow you to better understand the history, your life and our society. Fundamentals of Polymer Science for Engineers - Stoyko Fakirov
2017-07-20

Filling a gap in the market, this textbook provides a concise, yet thorough introduction to polymer science for advanced engineering students and practitioners, focusing on the chemical, physical and materials science aspects that are most relevant for engineering applications. After covering polymer synthesis and properties, the major section of the book is devoted to polymeric materials, such as thermoplastics and polymer composites, polymer processing such as injection molding and extrusion, and methods for large-scale polymer characterization. The text concludes with an overview of engineering plastics. The emphasis throughout is on application-relevant topics, and the author focuses on real-life, industry-relevant polymeric materials.
Ramonst - A.F Knott 2016-11-18

Hidden in the mountains of East Tennessee, an eleven-year old goes about the business of being a boy during the summer of 1970. Within a balance of terror and innocence, he bears silent witness to ghosts of the dead and the cruelties of a teenage killer while local justice plays out in a community carved from legacies of coal mining and religion.
Мир измерений No 1 2014 - 2017-05-20

«Мир измерений» – ежемесячный научно-технический журнал метрологического профиля. Освещает широкий спектр вопросов фундаментально-научной и законодательной метрологии, измерительного приборостроения, общей теории измерений, а также отраслевую проблематику в сфере обеспечения единства измерений. Журнал ставит задачу пропаганды метрологической деятельности, популяризации гуманитарно-научных исследований, связанных с

историей метрологии и измерений. Материалы журнала будут полезны: руководителям и техническим специалистам предприятий всех отраслей экономики; руководителям и специалистам метрологических служб; производителям и поставщикам средств измерений; научным работникам; аспирантам и студентам высших технических учебных заведений; сотрудникам органов по сертификации, испытательных центров и лабораторий. Human Exploitation and Biodiversity Conservation - David L. Hawksworth 2008-01-03

This book presents a wide range of contributions addressing diverse aspects of biodiversity exploitation and conservation. These collectively provide a snapshot of ongoing action and state-of-the-art research, rather than a series of necessarily more superficial overviews. Examples presented here derive from studies in 17 countries including Africa, Asia, Europe, and North and South America. These reports will stimulate future work toward attaining a sustainable balance between the conservation and exploitation of biodiversity.

Althusser and Law - Laurent de Sutter 2013-03-05

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

The Groomer - Jon Athan 2020-03-13

Andrew McCarthy grows concerned for his family after he catches a young man, Zachary Denton, photographing his daughter, Grace McCarthy, and other children at a park. To his dismay, Zachary talks his way out of trouble when he's confronted by the police. He hopes that's the end of it. Then he finds Zachary at a diner and then at a grocery store. He knows their encounters aren't coincidences. And just as Andrew prepares to defend his family, Grace vanishes. As the police search stalls and the leads dry up, Andrew decides to take matters into his own hands. He starts by searching for sex offenders in the area and researching enhanced interrogation techniques... He convinces himself he'll do anything to rescue his daughter, unaware of the pure evil he'll face in his journey. He's willing to hurt-to torture-anyone to save his family. Jon Athan, the author of Into the Wolves' Den and The Abuse of Ashley Collins, delves into the underworld of internet predators in this disturbing horror novel. Are your children safe? Federal acquisition regulation supplement (NASA/FAR supplement). -
United States. National Aeronautics and Space Administration 1984

Natural Products - Lixin Zhang 2007-11-17

A fresh examination of the past successes of natural products as medicines and their new future from both conventional and new technologies. High-performance liquid chromatography profiling, combinatorial synthesis, genomics, proteomics, DNA shuffling, bioinformatics, and genetic manipulation all now make it possible to

rapidly evaluate the activities of extracts as well as purified components derived from microbes, plants, and marine organisms. The authors apply these methods to new natural product drug discoveries, to microbial diversity, to specific groups of products (Chinese herbal drugs, antitumor drugs from microbes and plants, terpenoids, and arsenic compounds), and to specific sources (the sea, rainforest, and endophytes). These new opportunities show how research and development trends in the pharmaceutical industry can advance to include both synthetic compounds and natural products, and how this paradigm shift can be more productive and efficacious.
