Oxford Textbook of Public Health Palliative Care  
- Julian Abel 2022

Death, dying, loss, and care giving are not just medical issues, but societal ones. Palliative care has become increasingly professionalised, focused around symptom science. With this emphasis on minimizing the harms of physical, psychological, and spiritual stress, there has been a loss of how cultures and communities look after their dying, with the wider social experience of death often sidelined in the professionalisation and medicalisation of care. However, the people we know and love in the places we know and love make up what matters most for those undergoing the experiences of death, loss, and care giving. Over the last 25 years the theory, practice, research evidence base, and clinical applications have developed, generating widespread adoption of the principles of public health approaches to palliative care. The essential principles of prevention, harm reduction, early intervention, and health and wellbeing promotion can be applied to the universal experience of end of life, irrespective of disease or diagnosis.

Compassionate communities have become a routine part of the strategy and service development in palliative care, both within the UK and internationally. The Oxford Textbook of Public Health Palliative Care provides a reframing of palliative care, bringing together the full scope of theory, practice, and evidence into one volume. Written by international leaders in the field, it provides the first truly comprehensive and authoritative textbook on the subject that will help to further inform developments in this growing specialty.

**Superconnected: The Internet, Digital Media, and Techno-Social Life** - Mary Chayko  
2020-10-27

What does it mean to live in a superconnected society? In this new revised, updated edition of *Superconnected: The Internet, Digital Media, and Techno-Social Life*, Mary Chayko continues to explore how social life is impacted when communication and information technology enters the picture. She provides timely analysis of such critical issues as privacy and surveillance, online harassment and abuse, and dependency and addiction, while examining new trends in social media use, global inequalities and divides, online relating and dating, and the internet of things. The new edition highlights such issues as technology and mental health, digital public policy and law, and the author's own research on bias and stereotyping in digital environments. Throughout, she considers how individuals, families, communities, organizations, and whole societies are affected. The author's clear, nontechnical discussions and interdisciplinary synthesis make the third edition of *Superconnected* an essential text for any course that explores how contemporary life is impacted by the internet, social media, mobile devices, and smart technologies. The text is accompanied by the author's *Superconnected Blog* ([superconnectedblog.com](http://superconnectedblog.com)) which includes lecture slides, discussion questions and assignments, and short podcasts for each chapter that summarize key ideas.

*Dying, Death, and Grief in an Online Universe* - Carla Sofka, PhD 2012-02-09

" This text provides current information about thanatechnology, the communication technology used in providing death education, grief counseling, and thanatology research. It offers a broad overview of how the communication technology revolution affects individuals coping with end-of-life issues, death-related and non-death loss and grief, and implications of the digital divide between those who have access to modern technology and those who do not. It describes the proliferation of online support groups and social network sites to cope with loss, and mechanisms for its commemoration. It also highlights blogging as a means of storytelling and SKYPE as a communication tool during times of loss and grief. The issue of disenfranchised grief experienced by online community members is also explored along with ethical issues. "

### **The Creation and Inheritance of Digital Afterlives** - Debra J. Bassett 2021

This book explores how social networking platforms such as Facebook, Twitter, and WhatsApp accidentally enable and nurture the creation of digital afterlives, and, importantly, the effect this digital inheritance has on the bereaved. Debra J. Bassett offers a holistic exploration of this phenomenon and presents qualitative data from three groups of

participants: service providers, digital creators, and digital inheritors. This interdisciplinary book will be of interest to sociologists, cyber psychologists, philosophers, death scholars, and grief counsellors. But Bassett's book can also be seen as a canary in the coal mine for the intentional Digital Afterlife Industry (DAI) and their race to monetise the dead. This book provides an understanding of the profound effects uncontrollable timed posthumous messages and the creation of thanabots could have on the bereaved, and Bassett's conception of a Digital Do Not Reanimate (DDNR) order and a voluntary code of conduct could provide a useful addition to the DAI.

### *Postvention in Action* - Karl Andriessen 2019-12-09

A unique and comprehensive handbook presenting the state of the art in suicide bereavement support. Suicide is not merely the act of an individual; it always has an effect on others and can even increase the risk of suicide in the bereaved. The International Association for Suicide Prevention, the World Health Organisation, and others have recognized postvention as an important strategy for suicide prevention. This unique and comprehensive handbook, authored by nearly 100 international experts, including researchers, clinicians, support group facilitators, and survivors, presents the state of the art in suicide bereavement support. The first part examines the key concepts and the processes that the bereaved experience and illustrates them with illuminating clinical vignettes. The second and third parts look in detail at suicide bereavement support in all the relevant settings (including general practices, the workplace, online and many others) as well as in specific groups (such as health care workers). In the concluding section, the support provided for those bereaved by suicide in no less than 23 countries is explored in detail, showing that postvention is becoming a worldwide strategy for suicide prevention. These chapters provide useful

lessons and inspiration for extending and improving postvention in new and existing areas. This unique handbook is thus essential reading for anyone involved in suicide prevention or postvention research and practice.

This book examines the way in which early modern women writers conceived of grief and the relationship between the dead and the living.

*The Heart of Grief* - Thomas Attig 2002-07-15

In *The Heart of Grief*, Attig gives us an inspiring and profoundly insightful meditation on the meaning of grief, showing how it can be the path toward a lasting love of those who have died.

Recounting dozens of stories of people who have struggled with deaths in their lives, he describes grieving as a transition from loving in presence to loving in separation. Attig argues that we can, in fact, build an enduring, even reciprocal, love, a love that tempers our pain. He tells stories, for instance, of a young girl taking some of her dead sister's practical advice as she enters high school, a widower realizing how much intimate life with his wife has colored his character, and an athlete drawing inspiration from his dead brother and achieving what they had dreamed of together. Far from forgetting our loved ones, Attig urges us to explore ways in which our memories of the departed can be sustained, our understanding of them enhanced, and their legacies embraced, so they continue to play active roles in our everyday and inner lives. Groundbreaking and original, inspiring and compassionate, *The Heart of Grief* offers guidance, comfort, and a new understanding of how we grieve.

Dealing with Dying, Death, and Grief during Adolescence - David E. Balk 2014-02-18

For some, life's introduction to death and grief comes early, and when it does it can take many forms. Not only does *Dealing with Dying, Death, and Grief during Adolescence* tackle them all, it does so with David Balk's remarkable sensitivity to and deep knowledge of the pressures and opportunities adolescents face in their transition from childhood to adulthood. In seamless, jargon-free language, Balk brings readers up to date with what we know about adolescent development, because over time such changes form the backstory we need to comprehend the impact of death and bereavement in an adolescent's life. The book's later chapters break down the recent findings in the study of life-threatening illness and bereavement during adolescence. And, crucially, these chapters also examine interventions that assist adolescents coping with these difficulties. Clinicians will come away from this book with both a grounded understanding of adolescent development and the adolescent experience of death, and they'll also gain specific tools for helping adolescents cope with death and grief on their own terms. For any clinician committed to supporting adolescents facing some of life's most difficult experiences, this integrated, up-to-date, and deeply insightful text is simply the book to have. David E. Balk is professor in the department of health and nutrition sciences at Brooklyn College (CUNY), where he directs the graduate program in thanatology. He is the author of *Adolescent Development: Early Through Late Adolescence*, *Helping the Bereaved College Student*, and several other books on death and bereavement. He is also co-editor of the 2nd

edition of the Handbook of Thanatology (Routledge, 2013).

Death and Mourning Processes in the Times of the Coronavirus Pandemic (COVID-19) - Lydia Gimenez-Llort 2022-05-05

Handbook of Social Justice in Loss and Grief - Darcy L. Harris 2016-02-05

The Handbook of Social Justice in Loss and Grief is a scholarly work of social criticism, richly grounded in personal experience, evocative case studies, and current multicultural and sociocultural theories and research. It is also consistently practical and reflective, challenging readers to think through responses to ethically complex scenarios in which social justice is undermined by radically uneven opportunity structures, hierarchies of voice and privilege, personal and professional power, and unconscious assumptions, at the very junctures when people are most vulnerable—at points of serious illness, confrontation with end-of-life decision making, and in the throes of grief and bereavement. Harris and Bordere give the reader an active and engaged take on the field, enticing readers to interrogate their own assumptions and practices while increasing, chapter after chapter, their cultural literacy regarding important groups and contexts. The Handbook of Social Justice in Loss and Grief deeply and uniquely addresses a hot topic in the helping professions and social sciences and does so with uncommon readability.

**Handbook of Research on Children's Consumption of Digital Media** - Sar?, Gül?ah 2018-07-06

One of the consequences of the digital revolution is the availability and pervasiveness of media and technology. They became an integral part of many people's lives, including children, who are often exposed to media and technology at an early age. The Handbook of Research on Children's Consumption of Digital Media is a scholarly research publication that examines how children have become consumers as well as how their consumption habits have changed in the age of digital and media technologies. Featuring current research on cyber bullying,

social media, and digital advertising, this book is geared toward marketing and advertising professionals, consumer researchers, international business strategists, academicians, and upper-level graduate students seeking current research on the transformation of child to consumer.

*Grief Observed* - C. S. Lewis 2001-02-06

Written after his wife's tragic death as a way of surviving the "mad midnight moment," *A Grief Observed* is C.S. Lewis's honest reflection on the fundamental issues of life, death, and faith in the midst of loss. This work contains his concise, genuine reflections on that period: "Nothing will shake a man -- or at any rate a man like me -- out of his merely verbal thinking and his merely notional beliefs. He has to be knocked silly before he comes to his senses. Only torture will bring out the truth. Only under torture does he discover it himself." This is a beautiful and unflinchingly honest record of how even a stalwart believer can lose all sense of meaning in the universe, and how he can gradually regain his bearings.

**The Celebration of Death in Contemporary Culture** - Dina Khapaeva 2017-03-06

The Celebration of Death in Contemporary Culture investigates the emergence and meaning of the cult of death. Over the last three decades, Halloween has grown to rival Christmas in its popularity. Dark tourism has emerged as a rapidly expanding industry. "Corpse chic" and "skull style" have entered mainstream fashion, while elements of gothic, horror, torture porn, and slasher movies have streamed into more conventional genres. Monsters have become pop culture heroes: vampires, zombies, and serial killers now appeal broadly to audiences of all ages. This book breaks new ground by viewing these phenomena as aspects of a single movement and documenting its development in contemporary Western culture. This book links the mounting demand for images of violent death with dramatic changes in death-related social rituals. It offers a conceptual framework that connects observations of fictional worlds—including The Twilight Saga, The Vampire Diaries, and the Harry Potter series—with real-world sociocultural practices, analyzing the aesthetic, intellectual, and historical underpinnings of the cult of death. It also places the celebration of death in the context of a longstanding critique of humanism and investigates the role played by 20th-century French theory, posthumanism, transhumanism, and the animal rights movement in shaping the current antihumanist atmosphere. This timely, thought-provoking book will appeal to scholars of culture, film, literature, anthropology, and American and Russian studies, as well as general readers seeking to understand a defining phenomenon of our age.

**Postmortal Society** - Michael Hviid Jacobsen 2017-03-31

Throughout history mankind has struggled to reconcile itself with the inescapability of its own mortality. This book explores the themes of immortality and survivalism in contemporary culture, shedding light on the varied and ingenious ways in which humans and human societies aspire to confront and deal with death, or even seek to outlive it, as it were. Bringing together theoretical and empirical work from internationally acclaimed scholars across a range of disciplines, Postmortal Society offers studies of the strategies adopted and means available in modern society for trying to 'cheat' death or prolong life, the status of the dead in the modern Western world, the effects of beliefs that address the terror of death in other areas of life, the 'immortalisation' of celebrities, the veneration of the dead in virtual worlds, symbolic immortality through work, the implications of understanding 'immortality' in chemical-neuronal terms, and the apparent paradox of our greater reverence for the dead in increasingly secular, capitalist societies. A fascinating collection of studies that explore

humanity's attempts to deal with its own mortality in the modern age, this book will appeal to sociologists, anthropologists, philosophers and scholars of cultural studies with interests in death and dying.

*Digital Afterlife* - Maggi Savin-Baden 2020-04-02

Despite the range of studies into grief and mourning in relation to the digital, research to date largely focuses on the cultural practices and meanings that are played out in and through digital environments. *Digital Afterlife* brings together experts from diverse fields who share an interest in *Digital Afterlife* and the wide-ranging issues that relate to this. The book covers a variety of matters that have been neglected in other research texts, for example: The legal, ethical, and philosophical conundrums of *Digital Afterlife* The ways digital media are currently being used to expand the possibilities of commemorating the dead and managing the grief of those left behind Our lives are shaped by and shape the creation of our *Digital Afterlife* as the digital has become a taken for granted aspect of human experience. This book will be of interest to undergraduates from computing, theology, business studies, philosophy, psychology, sociology, and education from all types of institutions. Secondary audiences include researchers and postgraduate researchers with an interest in the digital. At a practical level, the cost of data storage and changing data storage systems mitigate the likelihood of our digital presence existing in perpetuity. Whether we create accidental or intentional digital memories, this has psychological consequences for ourselves and for society. Essentially, the foreverness of forever is in question. Maggi Savin-Baden is Professor of Higher Education Research at the University of Worcester. She has a strong publication record of over 50 research publications and 17 books. Victoria Mason-

Robbie is a Chartered Psychologist and an experienced lecturer having worked in the Higher Education sector for over 15 years. Her current research focuses on evaluating web-based avatars, pedagogical agents, and virtual humans.

Online Afterlives - Davide Sisto 2020-09-01

How digital technology—from Facebook tributes to QR codes on headstones—is changing our relationship to death. Facebook is the biggest cemetery in the world, with countless acres of cyberspace occupied by snapshots, videos, thoughts, and memories of people who have shared their last status updates. Modern society usually hides death from sight, as if it were a character flaw and not an ineluctable fact. But on Facebook and elsewhere on the internet, we can't avoid death; digital ghosts—electronic traces of the dead—appear at our click or touch. On the Internet at least, death has once again become a topic for public discourse. In *Online Afterlives*, Davide Sisto considers how digital technology is changing our relationship to death. Sisto describes the various modes of digital survival after biological death—including Facebook tributes, chatbots programmed to speak in the voice of a dead person, and QR codes on headstones—and discusses their philosophical ramifications. Sisto reports on such phenomena as the Tweet Hereafter, a website that collects people's last tweets; the intimacy of sending a WhatsApp message to

someone who has died; and digital cremation, the deactivation of a dead person's account. Because we can mingle with the dead online almost as we mingle with the living, he warns, we may find it difficult to distinguish communication at a distance from communication with the dead. The digital afterlife has restored the communal dimension of death, rescuing both mourners and the mourned from social isolation. A society willing to engage with death and mortality, Sisto argues, is a more balanced and mature society.

*Notes on Grief* - Chimamanda Ngozi Adichie 2021-05-11

From the globally acclaimed, best-selling novelist and author of *We Should All Be Feminists*, a timely and deeply personal account of the loss of her father. "Essential." —Booklist *Notes on Grief* is an exquisite work of meditation, remembrance, and hope, written in the wake of Chimamanda Ngozi Adichie's beloved father's death in the summer of 2020. As the COVID-19 pandemic raged around the world, and kept Adichie and her family members separated from one another, her father

succumbed unexpectedly to complications of kidney failure. Expanding on her original *New Yorker* piece, Adichie shares how this loss shook her to her core. She writes about being one of the millions of people grieving this year; about the familial and cultural dimensions of grief and also about the loneliness and anger that are unavoidable in it. With signature precision of language, and glittering, devastating detail on the page—and never without touches of rich, honest humor—Adichie weaves together her own experience of her father's death with threads of his life story, from his remarkable survival during the Biafran war, through a long career as a statistics professor, into the days of the pandemic in which he'd stay connected with his children and grandchildren over video chat from the family home in Abba, Nigeria. In the compact format of *We Should All Be Feminists* and *Dear Ijeawele*, Adichie delivers a gem of a book—a book that fundamentally connects us to one another as it probes one of the most universal human experiences. *Notes on Grief* is a book for this moment—a work readers will treasure and share now more than ever—and yet will prove durable and timeless, an indispensable addition to Adichie's canon.

*Companionship the Grieving Child* - Alan D. Wolfelt 2012-06-01

Renowned author and educator Alan Wolfelt redefines the role of the grief counselor in this guide for caregivers to grieving children. Providing a viable alternative to the limitations of the medical establishment's model for companionship the bereaved, Wolfelt encourages counselors and other caregivers to aspire to a more compassionate philosophy in which the child is the expert of his or her grief—not the counselor or caregiver. The approach outlined in the book argues against treating grief as an illness to be diagnosed and treated but rather for acknowledging it as an event that forever changes a child's worldview. By promoting careful listening and observation, this guide shows caregivers, family members, teachers, and others how to support grieving children and help them grow into healthy adults.

**Finding Meaning** - David Kessler 2019-11-05

In this groundbreaking new work, David Kessler—an expert on grief and the coauthor with Elisabeth Kübler-Ross of the iconic *On Grief and Grieving*—journeys beyond the classic five stages to discover a sixth stage: meaning. In 1969, Elisabeth Kübler-Ross first identified the stages of dying in her transformative book *On Death and Dying*. Decades later, she and David Kessler wrote the classic *On Grief and Grieving*, introducing the stages of grief with the same transformative pragmatism and compassion. Now, based on hard-earned personal experiences, as well as knowledge and wisdom earned through decades of work with the grieving, Kessler introduces a critical sixth stage. Many people look for “closure” after a loss. Kessler argues that it’s finding meaning beyond the stages of grief most of us are familiar with—denial, anger, bargaining, depression, and acceptance—that can transform grief into a more peaceful and hopeful experience. In this book, Kessler gives readers a roadmap to remembering those who have died with more love than pain; he shows us how to move forward in a way that honors our loved ones. Kessler’s insight is both professional and

intensely personal. His journey with grief began when, as a child, he witnessed a mass shooting at the same time his mother was dying. For most of his life, Kessler taught physicians, nurses, counselors, police, and first responders about end of life, trauma, and grief, as well as leading talks and retreats for those experiencing grief. Despite his knowledge, his life was upended by the sudden death of his twenty-one-year-old son. How does the grief expert handle such a tragic loss? He knew he had to find a way through this unexpected, devastating loss, a way that would honor his son. That, ultimately, was the sixth state of grief—meaning. In *Finding Meaning*, Kessler shares the insights, collective wisdom, and powerful tools that will help those experiencing loss. *Finding Meaning* is a necessary addition to grief literature and a vital guide to healing from tremendous loss. This is an inspiring, deeply intelligent must-read for anyone looking to journey away from suffering, through loss, and towards meaning.

**The Age of Spectacular Death** - Michael Hviid Jacobsen 2020-09-08

This book explores death in contemporary society – or more precisely, in the ‘spectacular age’ – by moving beyond classic studies of death that emphasised the importance of the death taboo and death denial to examine how we now ‘do’ death. Unfolding the notion of ‘spectacular death’ as characteristic of our modern approach to death and dying, it considers the new mediation or mediatisation of death and dying; the commercialisation of death as a ‘marketable commodity’ used to sell products, advance artistic expression or provoke curiosity; the re-ritualisation of death and the growth of new ways of finding meaning through commemorating the dead; the revolution of palliative care; and the specialisation surrounding death, particularly in relation to scholarship. Presenting a range of case studies that shed light on this new understanding of death in contemporary culture, *The Age of Spectacular Death* will appeal to scholars of sociology, cultural and media studies, psychology and anthropology with interests in death and dying.

**Death, Grief and Loss in the Context of COVID-19** - Panagiotis Pentaris 2021-08-06

This book provides detailed analysis of the

manifold ways in which COVID-19 has influenced death, dying and bereavement. Through three parts: *Reconsidering Death and Grief in Covid-19*; *Institutional Care and Covid-19*; and *the Impact of COVID-19 in Context*, the book explores COVID-19 as a reminder of our own and our communities' fragile existence, but also the driving force for discovering new ways of meaning-making, performing rites and rituals, and conceptualising death, grief and life. Contributors include scholars, researchers, policymakers and practitioners, accumulating in a multi-disciplinary, diverse and international set of ideas and perspectives that will help the reader examine closely how Covid-19 has invaded social life and (re)shaped trauma and loss. It will be of interest to all scholars and students of death studies, biomedicine, and end of life care as well as those working in sociology, social work, medicine, social policy, cultural studies, anthropology, psychology, counselling and nursing more broadly.

*The 2018 Yearbook of the Digital Ethics Lab* - Carl Öhman 2019-10-10

This book explores a wide range of topics in digital ethics. It features 11 chapters that analyze the opportunities and the ethical challenges posed by digital innovation, delineate

new approaches to solve them, and offer concrete guidance to harness the potential for good of digital technologies. The contributors are all members of the Digital Ethics Lab (the DELab), a research environment that draws on a wide range of academic traditions. The chapters highlight the inherently multidisciplinary nature of the subject, which cannot be separated from the epistemological foundations of the technologies themselves or the political implications of the requisite reforms. Coverage illustrates the importance of expert knowledge in the project of designing new reforms and political systems for the digital age. The contributions also show how this task requires a deep self-understanding of who we are as individuals and as a species. The questions raised here have ancient -- perhaps even timeless -- roots. The phenomena they address may be new. But, the contributors examine the fundamental concepts that undergird them: good and evil, justice and truth. Indeed, every epoch has its great challenges. The role of philosophy must be to redefine the meaning of these concepts in light of the particular challenges it faces. This is true also for the digital age. This book takes an important step towards redefining and re-implementing fundamental ethical concepts to this new era.
