*No Regrets in the Evening of Life* - Neville Buch 2018-03-14

The type of local and school history before the reader may be unfamiliar. It is a definitive and scholarly history in the style of many grammar school histories in Queensland. Although it is not unknown for Australian public and private schooling, it is unique for Queensland state schools. By saying it is a 'definitive and scholarly history', what is meant is not that the history is

complete; only that it reaches decisive conclusions in a substantive treatment. In this particular case, the historian is someone who has been trained at the level of a higher degree.

**Private Secondary Schools 2014-2015** - Peterson's 2014-01-09

Peterson's Private Secondary Schools 2014-15 is a valuable resource to help parents and students evaluate and choose from more than 1,100 schools in the United States, Canada,

Profiles offer detailed information on areas of specialization, location/setting, affiliation, accreditation, tuition and aid availability, student body, faculty, academic programs, athletics, computers and campus technology, and admission information. Dozens of in-depth descriptions and displays offer photos of students and school campuses, as well as essential information to help parents find the right private secondary school for their child. Extra Summer Programs section offers additional details on fascinating summer opportunities at private secondary schools.

*Whose History Counts* - June Bam 2018-11-29

Originally planned as a fact-based book on the pre-colonial history of the Eastern Cape in the true tradition of history,

this ground-breaking book focuses on epistemological and foundational questions about the writing of history and whose history counts. *Whose History Counts* challenges the very concept of 'pre-colonial' and explores methodologies on researching and writing history. The reason for this dramatic change of focus is attributed in the introduction of the book to the student-led rebellion that erupted following the #RhodesMustFall campaign which started at the University of Cape Town on 9 March 2015. Key to the rebellion was the students' opposition to what they dubbed 'colonial' education and a 'decolonised curriculum?'. This book is a direct response to this clarion call.

### **Development of Quality of Life Theory and Its**

**Instruments** - Alex C.

Michalos 2017-06-14

The focus of this volume is on the further development of the Quality of Life Theory and the means to measure the concept. The volume summarizes

Michalos' fundamental assumptions about the nature of quality of life or human well-being and explains in detail the two variable theory of the quality of life. It gives an update of the journal Social Indicators Research after forty years, an explanation of the role of community indicators in connecting communities, and a critical review of the much publicized Stiglitz, Sen and Fitoussi report. It deals with the multiple discrepancies theory (MDT), the empirical theory designed to provide the foundation of the pragmatic theory of value. Other concepts discussed in this volume are the stability, sensitivity, and other different features of measures of domain and life satisfaction and happiness, measures of arts-related activities and beliefs, measures of knowledge, attitudes and behaviour concerning sustainable development, and the role of quality of life in sustainable development research. The volume concludes with discussions on connections between social

indicators and communities, aspects of community quality of life in Prince George, British Columbia and Jasper, Alberta, and British Columbians' expectations and attitudes going into the third millennium.

### **European Studies in Asia -**

Georg Wiessala 2014-03-21

As countries across Asia continue to rise and become more assertive global powers, the role that Higher Education has played, and continues to play, in this process is an issue of growing pertinence. Furthermore, understanding the relationship between Europe and Asia fostered by historical and contemporary knowledge transfer, including Higher Education, is crucial to analysing and encouraging the progress of both regional integration and inter-regional cooperation. With a specific focus on international Higher Education, European Studies in Asia investigates knowledge transfer and channels of learning between Europe and Asia from historical, contemporary and teaching

perspectives. The book examines a selection of significant historical precedents of intellectual dialogue between the two regions and, in turn, explores contemporary cross-regional discourses both inside and outside of the official frameworks of the European Union (EU) and the Asia-Europe Meetings (ASEM). Drawing on extensive case studies based on many of his own teaching experiences, Georg Wiessala addresses key questions, such as the nature and construction of the European Studies in Asia curriculum; aspects of 'values', co-constructed learning and adult pedagogy in the discipline of European Studies in Asia; the politics of Asian host cultures, the 'internationalization' of Asian Higher Education and the experiences and expectations of tertiary sector students of this subject in Asia, Australia and New Zealand. In doing so, the author articulates a range of outcomes for the further development of Higher

Education cooperation agendas between Asia and Europe, in the discipline of European Studies, and in related fields such as International Relations. This case study-led book makes an original and novel contribution to our understanding of European Studies in Asia. As such, it will be of great interest to students and scholars of Asian Education, Comparative Education, European Studies and International Relations.

*Content and Language Integrated Learning in Spanish and Japanese Contexts* - Keiko Tsuchiya 2019-11-23

This edited book compiles pedagogical practices and studies of Content and Language Integrated Learning (CLIL) from two sites: Spain, where CLIL has been widely implemented for more than a decade, and Japan, where the CLIL approach is still in its relative infancy, and quickly gaining momentum. Focusing on three aspects of the CLIL implementations: policy, practice and pedagogy, the authors describe how CLIL has

evolved in distinctive socio-political, historical and cultural contexts. The chapters range across primary, secondary and tertiary education, and examine English language teaching and learning at both the macro level - through language education policy - and the micro level - with a focus on classroom interaction and pedagogy. This book fills a gap in the English as a Medium of Instruction (EMI) literature, and will be of particular interest to language teachers, teacher trainers, and students and scholars of applied linguistics more broadly.

Tour Guides at Memorial Sites and Holocaust Museums - Anja Ballis 2022

In this volume, contributors reflect on how to teach and mediate difficult history from the perspectives of guides. Too often, their activities are undervalued and taken for granted. Guides represent an important, often forgotten group of educators. This volume takes a global view on guiding at memorial sites and museums in Europe, North America, and South Africa. The contributors to this volume show from different research traditions that it is worth understanding more about the guides personal interests, their motivations, and their concept of guiding. Authors apply methodologies from the social sciences to describe the guides point of view. Complementing the various approaches in tour guide research, a detailed linguistic analysis sheds light on a survivors testimony echoed in the guides language. The studies gathered in this

volume open up an orientation for further approaches to tour guiding based on and centered around "authentic" materials from guides. The Editor Anja Ballis, PhD, professor and chair of German Language Education at the University of Munich. The focus of her research has been on Holocaust education, teaching with digital media, and textbook research. She is also known for her research on interactive 3D testimonies, tour guides at Holocaust museums and memorial sites and as an editor of Holocaust Education Historical Learning Human Rights Education since 2019, Springer Science).

Aspiring Adults Adrift - Richard Arum 2014-09

"Built on interviews and detailed surveys of almost a thousand recent college graduates from a diverse range of colleges and universities, Aspiring Adults Adrift reveals a generation facing a difficult transition to adulthood. Recent graduates report trouble in finding decent jobs and developing stable romantic

relationships, as well as in assuming civic and financial responsibility--yet at the same time, they remain surprisingly hopeful and upbeat about their prospects. ... Analyzing these findings in light of students' performance on standardized tests of general collegiate skills, the selectivity of institutions they attended, and their choice of major, Arum and Roksa not only map out the current state of a generation too often adrift, but enable us to examine the relationship between college experiences and tentative transitions to adulthood"--Back cover.

**The Qualified Student -**  
Harold S. Wechsler 2014-09-15  
In The Qualified Student  
Harold S. Wechsler focuses on  
methods of student selection  
used by institutions of higher  
education in the United States.  
More specifically, he discusses  
the way that college and  
university reformers employed  
those methods to introduce  
higher education into a broader  
cross-section of America, by  
extending access to an  
increased number of students  
from nontraditional  
backgrounds. Implicit in much  
of this book is an underlying  
social and ethical question:  
How legitimate was and is  
higher education's regulation  
of social mobility? Public  
concern over colleges' and  
universities' practices became  
inevitable once they became  
regulators between social  
classes. The challenging of

colleges' admissions policies in the courts augments similar concerns that have been present in legislatures for decades. The volume is divided into three main sections: Prerequisites, Columbia and the Selective Function, and Implications. It focuses mainly on four universities, The University of Michigan, Columbia University, the University of Chicago, and the City University of New York. Wechsler maintains that unlike other universities, these institutions were pacesetters; they did not adopt a new policy simply because some other college had already adopted it. A new introduction brings the book, originally published in 1977, up to date and demonstrates its continuing importance in today's academic world of selective admissions. An overview of William Butler Yeats' poetry (1865-1939) - Álvaro Pina Arrabal 2018-05-17 Research Paper (undergraduate) from the year 2013 in the subject English - Literature, Works, grade: 10, University of Jaén, language:

English, abstract: Yeats, as sentimental as persistent in his aims, a dreamer and realistic in equal proportion, inspired by the progression of his own life, fallen in love with his land and its offspring, somehow surrounded with magic, is often considered as the greatest author of his century and one of the best in the whole history of literature, corroborated by the Nobel Prize he won. This paper is entirely devoted to study both his life and literary production, paying special attention to poetry. In this way, two of his poems are going to be analyzed concerning form and, above all, meaning, as well as including conclusions about what could have motivated him to write each poem, possible interesting contextual data and extrapolations to which the poem might lead. Youth Literature for Peace Education - C. Carter 2014-10-16 Carter and Pickett explore how educators and families can teach peace education through youth literature and literacy

development. Showing how to assess, choose, and make use of literature that can be used to teach both literacy and peace education, they walk through individual methods:

recognizing and teaching different portrayals of conflict in youth literature, analyzing characterization, and examining the role of illustrations. Educators who want to incorporate peace education within a broader, literacy-focused curriculum, and peace educators looking for age-appropriate materials and methodologies will find *Youth Literature for Peace Education* a rich and interdisciplinary resource.

*FOCUS on College and Career Success* - Constance Staley  
2014-01-01

Steve Staley and Constance Staley's *FOCUS ON COLLEGE AND CAREER SUCCESS* is uniquely equipped to turn the tides regarding retention among first-year college students, particularly at career, technical, and proprietary schools. Visually appealing, research-based, and highly

motivational, this text thoroughly engages students with direct applications and immediate results. Steve Staley has been teaching at Colorado Technical University for 30 years and is intimately familiar with the specialized student needs of career and technical students. Constance Staley, one of the best-known names in the field of motivation and student engagement, provides a wealth of tools to help students of varied learning styles succeed in their first year of college and beyond. Thoroughly researched, the text covers the topics most important to student success and incorporates the underlying themes of professionalism, motivation, and self-discipline throughout. Rather than talking down to students or speaking over their heads, *FOCUS ON COLLEGE AND CAREER SUCCESS* initiates a personal and informal conversation with readers, directly connecting them with and drawing them into text discussions. *Decolonizing Educational Assessment* - Ardavan Eizadirad 2019-09-06

This book examines the history of standardized testing in Ontario leading to the current context and its impact on racialized identities, particularly on Grade 3 students, parents, and educators. Using a theoretical argument supplemented with statistical trends, the author illuminates how EQAO tests are culturally and racially biased and promote a Eurocentric curriculum and way of life privileging white students and those from higher socio-economic status. This book spurs readers to further question the use of EQAO standardized testing and challenges us to consider alternative models which serve the needs of all students.

[The Dirty College Game - Al Figne 2019-07-26](#)

Commercial aspects of college football and basketball during the mid- to late 20th century were dominated by a few "get rich quick" schools. Though the NCAA was responsible for controlling such facets of college sports, the organization was unwilling and unable to control the excesses of the few who opposed the majority opinion. The result was a period of corruption, rules violations, unnecessary injuries and overspending. These events led to the formation of larger conferences, richer bowl

games and rules intended to preserve the "money-making" value of college football and basketball. This book explores gambling, academic fraud, illegal booster activity and the single-minded pursuit of television contracts in college sports, as well as the NCAA's involvement--or lack thereof--in such cases.

The Education Invasion - Joy Pullmann 2017-03-14

Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of "informational text" instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping "reform" of American education come in mostly under the radar? Joy

Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as "an absolute game-changer in public education," yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation's schools? Who benefits? And how can citizens regain local self-governance in education, so their children's minds will be fed a more nourishing intellectual diet and be

protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.

Science and Technology Education Promoting Wellbeing for Individuals, Societies and Environments - Larry Bencze  
2017-06-21

This edited volume provides theoretical and practical resources relating to the 'STEPWISE' curricular and instructional framework. 'STEPWISE' is the acronym for Science & Technology Education Promoting Wellbeing for Individuals, Societies & Environments. It is a framework for organizing teaching and learning domains in ways that prioritize personal and social actions to address 'critical socioscientific issues' — that is, controversial decisions by powerful individuals/groups about science and technology (and related fields) that may adversely affect individuals, societies and/or environments. The book contains chapters written by and/or with teachers who have used STEPWISE to

guide their instructional practices, as well as chapters written by education scholars who have used a range of theoretical lenses to analyze and evaluate STEPWISE — and, in several cases, described ways in which it relates to (or could relate to) their practices and/or ways in which the framework might logically be amended. Overall, this book offers educators, policy makers and others with resources useful for arranging science and technology education in ways that may assist societies in addressing significant potential personal, social and/or environmental problems — such as dramatic climate change, preventable human diseases, species losses, and social injustices — associated with fields of science and technology.

*The Politics of Memory in Poland and Ukraine* - Tomasz Stryjek  
2021-09-30

Bringing together the work of sociologists, historians, and political scientists, this book explores the increasing importance of the politics of

memory in central and eastern European states since the end of communism, with a particular focus on relations between Ukraine and Poland. Through studies of the representation of the past and the creation of memory in education, mass media, and on a local level, it examines the responses of Polish and Ukrainian authorities and public institutions to questions surrounding historical issues between the two nations. At a time of growing renationalization in domestic politics in the region, brought about by challenges connected with migration and fear of Russian military activity, this volume asks whether international cooperation and the stability of democracy are under threat. An exploration of the changes in national historical culture, *The Politics of Memory in Poland and Ukraine* will appeal to scholars with interests in memory studies, national identity, and the implications of memory-making for contemporary relations between states.

*Civics and Citizenship* - Benilde García-Cabrero 2017-08-24

The book is organized around four sections. The first section is an introduction to the problem of defining the scope and foundations of the development of moral personality and social engagement, in particular, the development of civic and ethical attitudes and prosocial behavior. The second section presents a comparative analysis of education policies in Mexico, Chile and Colombia, in particular the way the curricula of civic and citizenship education is designed and implemented. The section also describes and analyzes the way this subject is taught in the classrooms of the primary, secondary and high school levels in the three countries. The third section includes the results of research projects in Civics and Citizenship Education conducted with different theoretical and methodological models of analysis. This last section includes some of the best practices of Civic

Education that have been developed in Mexico, Colombia, and Chile.

**The People Have Spoken (and They Are Wrong)** -

David Harsanyi 2014-03-10  
Democracy may be one of the most admired ideas ever concocted, but what if it's also

one of the most harebrained? After many years of writing about democracy for a living, David Harsanyi has concluded that it's the most overrated, overused, and misunderstood idea in political life. The less we have of it the better. "Democracy" is not synonymous with "freedom." It is not the opposite of tyranny. In fact, the Founding Fathers knew that democracy can lead to tyranny. That's why they built so many safeguards against it into the Constitution. Democracy, Harsanyi argues, has made our government irrational, irresponsible, and invasive. It has left the American people with only two options—domination by the majority or a government that can't possibly work. The modern age has imbued democracy with the mystique of infallibility. But Harsanyi reminds us that the vast majority of political philosophers, including the founders, have thought that responsible, limited government based on direct majority rule over a large, let

alone continental scale was a practical impossibility. In *The People Have Spoken*, you'll learn: Why the Framers of our Constitution were intent on establishing a republic, not a "democracy" How democracy undermines self-government How shockingly out of touch with reality most voters really are Why democracy is an economic wrecking ball—and an invitation to a politics of envy and corruption How the great political philosophers from Plato and Aristotle to Burke and Tocqueville predicted with uncanny accuracy that democracy could lead to tyranny Harsanyi warns that if we don't recover the Founders' republican vision, "democracy" might very well spell the end of American liberty and prosperity.

**Beyond Collective Memory** - Cullen Goldblatt 2020-09-15  
Beyond Collective Memory analyzes how two African places became icons of collective memory for certain publics, yet remain marginal to national and continental memory discourses. Thiaroye, a

Senegalese location of colonial-era massacre, and District Six, a South African neighborhood destroyed under apartheid, have epitomized a shared "memory" of racist violence and resistant community.

Analyzing diverse cultural texts surrounding both places, this book argues that the metaphor of collective memory has obscured the structural character of colonial and apartheid violence, and made it difficult to explore the complicit positions that structures of violence produce. In investigating the elisions of memory discourses, *Beyond Collective Memory* challenges the dominance of collective memory, and calls attention to the African pasts, metaphors, and imaginaries that exist beyond it.

*Education Flashpoints* - Alan J. Singer 2014-04-24

Drawing on his widely read Huffington Post columns—rated one of the top educational blogs in the United States—Alan Singer introduces readers to contemporary issues in education in the United States. The issues are presented with a point of view and an edge intended to promote widespread classroom debate and discussion. Each section opens with a new topical summary essay followed

by a series of brief essays updated and adapted from Huffington Post columns. The book includes guest contributions, guiding questions, and responses to essays by teacher education students and teachers to further classroom discussion. Education Flashpoints is written in a conversational style that draws readers into a series of debates by presenting issues in a clear and concise manner, but also with a touch of irony and a bit of rhetorical bite. The topics examined in these essays read like the latest newspaper headlines in the battle to define public education in the United States.

### **Teaching Big History -**

Richard B. Simon 2015

Big History is a new field on a grand scale: it tells the story of the universe over time through a diverse range of disciplines that spans cosmology, physics, chemistry, astronomy, geology, evolutionary biology, anthropology, and archaeology, thereby reconciling traditional human history with environmental geography and

natural history. Weaving the myriad threads of evidence-based human knowledge into a master narrative that stretches from the beginning of the universe to the present, the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them. Teaching Big History is a powerful analytic and pedagogical resource, and serves as a comprehensive guide for teaching Big History, as well for sharing ideas about the subject and planning a curriculum around it. Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History. The book includes teaching materials, examples, and detailed sample exercises. This book is also an engaging first-hand account of how a group of professors built an entire Big History general education curriculum for first-year students, demonstrating

how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike.

*Globalisation, Ideology and Politics of Education Reforms* - Joseph Zajda 2015-10-09

This 14th volume in the 24-volume book series sets out to explore the interrelationship between ideology, the state, and education reforms, placing it in a global context. It examines some of the major education reforms and policy issues in a global culture, particularly in the light of recent shifts in accountability, quality and standards-driven education, and policy research. By doing so, it provides a comprehensive picture of the intersecting and diverse discourses of globalisation and policy-driven reforms in education. The book draws upon recent studies in the areas of globalisation, equality, and the role of the state. It explores conceptual frameworks and

methodological approaches applicable in the research covering the state, globalisation, and education reforms. It critiques the neo-liberal ideological imperatives of current education and policy reforms, and illustrates the way that shifts in the relationship between the state and education policy affect current trends in education reforms and schooling globally. Individual chapters critically assess the dominant discourses and debates on education and policy reforms. Using diverse comparative education paradigms from critical theory to historical-comparative research, the chapters focus on globalisation, ideology and democracy and examine both the reasons and outcomes of education reforms and policy change. They provide an informed critique of models of accountability, quality and standards-driven education reforms that are informed by Western dominant ideologies and social values. The book also draws upon recent studies in the areas of equity, cultural

capital and dominant ideologies in education.

Glass Half Full - Benjamin H. Barton 2015-05-15

The hits keep coming for the American legal profession. Law schools are churning out too many graduates, depressing wages, and constricting the hiring market. Big Law firms are crumbling, as the relentless pursuit of profits corrodes their core business model. Modern technology can now handle routine legal tasks like drafting incorporation papers and wills, reducing the need to hire lawyers; tort reform and other regulations on litigation have had the same effect. As in all areas of today's economy, there are some big winners; the rest

struggle to find work, or decide to leave the field altogether, which leaves fewer options for consumers who cannot afford to pay for Big Law. It would be easy to look at these enormous challenges and see only a bleak future, but Ben Barton instead sees cause for optimism.

Taking the long view, from the legal Wild West of the mid-nineteenth century to the post-lawyer bubble society of the future, he offers a close analysis of the legal market to predict how lawyerly creativity and entrepreneurialism can save the profession. In every seemingly negative development, there is an upside. The trend towards depressed wages and computerized legal work is good for middle class consumers who have not been able to afford a lawyer for years. The surfeit of law school students will correct itself as the law becomes a less attractive and lucrative profession. As Big Law shrinks, so will the pernicious influence of billable hours, which incentivize lawyers to spend as

long as possible on every task, rather than seeking efficiency and economy. Lawyers will devote their time to work that is much more challenging and meaningful. None of this will happen without serious upheaval, but all of it will ultimately restore the health of the faltering profession. A unique contribution to our understanding of the legal crisis, the unconventional wisdom of Glass Half Full gives cause for hope in what appears to be a hopeless situation.

**Biological Invasions in South Africa** - Brian W. van Wilgen 2020-03-10

This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa, where research has been conducted over more than three decades, and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological, economic and social effects. It covers a broad range of themes, including history, policy development and implementation, the status

of invasions of animals and plants in terrestrial, marine and freshwater environments, the development of a robust ecological theory around biological invasions, the effectiveness of management interventions, and scenarios for the future. The South African situation stands out because of the remarkable diversity of the country, and the wide range of problems encountered in its varied ecosystems, which has resulted in a disproportionate investment into both research and management. The South African experience holds many lessons for other parts of the world, and this book should be of immense value to researchers, students, managers, and policy-makers who deal with biological invasions and ecosystem management and conservation in most other regions.

The Modern History of Iraq - Phebe Marr 2018-05-15

The Modern History of Iraq is a remarkably readable account of contemporary Iraq, placing in historical perspective the crises and upheavals that continue to afflict the country. This text weaves together several important themes, including the search for a national identity, the struggle to achieve social and economic development, the changes in political dynamics, and the impact of foreign interventions, to provide readers with a holistic understanding of

modern Iraq. Revised and updated throughout, the fourth edition features more discussion of cultural identity and media and society. In addition, this edition includes two new chapters on the events and shifts in the country of the early twenty-first century-the US intervention and withdrawal, the stabilization and subsequent unraveling of the Maliki government, the effects of the Arab uprisings, and the rise of ISIS-and their political, economic, and social consequences. Written by noted Iraq scholar Phebe Marr with new co-author Ibrahim al-Marashi, this text is essential reading for readers who seek to understand modern Iraq in the context of historical perspective.
