**Crescendo of the Virtuoso** - Paul Metzner 2018-05-28

During the Age of Revolution, Paris came alive with wildly popular virtuoso performances. Whether the performers were musicians or chefs, chess players or detectives, these virtuosos transformed their technical skills into dramatic spectacles, presenting the marvelous and the outré

for spellbound audiences. Who these characters were, how they attained their fame, and why Paris became the focal point of their activities is the subject of Paul Metzner's absorbing study. Covering the years 1775 to 1850, Metzner describes the careers of a handful of virtuosos: chess masters who played several games at once; a chef who sculpted hundreds of four-foot-tall architectural fantasies in sugar; the first police detective, whose memoirs inspired the invention of the detective story; a violinist who played whole pieces on a single string. He examines these virtuosos as a group in the context of the society that was then the capital of Western civilization. **Noah and the Deluge: Chronological, Historical and Archaeological Evidence** - Gerard Gertoux 2015-10-19

Historians consider the biblical account of Noah and the Deluge as a myth. However, this famous event occurred at the earliest times of recorded history (Sumerian King List). Today scientists believe in the last ice age called Pleistocene ending in 10,000 BCE, but there is no witness of this planetary cataclysmic event and its existence is based solely on the controversial interpretation of its consequences and their dating. The existence of erratic blocks and the disappearance of mammoths are presented as evidence of the last glaciation. However, despite dating obtained by 14C (calibrated by dendrochronology) is considered absolute by most experts its confrontation with the Egyptian chronology, in which some dates are fixed by astronomy, reverses this widespread belief and shows that dates obtained by 14C increase exponentially before -2200. Thus the rate of 14C tends gradually to 0 around -3500, which implies an important consequence: before -3500, 14C dating is no longer possible. The Illustrated London News - 1961

**Metamorphoses** - Ovid 1960

Ovid's magnificent panorama of the Greek and Roman myths-presented by a noted poet, scholar, and critic. Prized through the ages for its splendor and its savage, sophisticated wit, The Metamorphoses is a masterpiece of Western culture-the first attempt to link all the Greek myths, before and after Homer, in a cohesive whole, to the Roman myths of Ovid's day. Horace Gregory, in this modern translation, turns his own poetic gifts toward a deft reconstruction of Ovid's ancient themes, using contemporary idiom to bring to today's reader all the ageless drama and psychological truths vividly intact.

**Spain, a Global History** - Luis Francisco Martinez Montes 2018-11-12

From the late fifteenth to the nineteenth centuries, the Hispanic Monarchy was one of the largest and most diverse political communities known in history. At its apogee, it stretched from the Castilian plateau to the high peaks of the Andes; from the cosmopolitan cities of Seville, Naples, or Mexico City to Santa Fe and San Francisco; from Brussels to Buenos Aires and from Milan to Manila. During those centuries, Spain left its imprint across vast continents and distant oceans contributing in no minor way to the emergence of our globalised era. This was true not only in an economic sense-the Hispano-American silver peso transported across the Atlantic and the Pacific by the Spanish fleets was arguably the first global currency, thus facilitating the creation of a world economic system-but intellectually and artistically as well. The most extraordinary cultural exchanges took place in practically every corner of the Hispanic world, no matter how distant from the metropolis. At various times a descendant of the Aztec nobility was translating a Baroque play into Nahuatl to the delight of an Amerindian and mixed audience in the market of Tlatelolco; an Andalusian Dominican priest was writing the

first Western grammar of the Chinese language in Fuzhou, a Chinese city that enjoyed a trade monopoly with the Spanish Philippines; a Franciscan friar was composing a piece of polyphonic music with lyrics in Quechua to be played in a church decorated with Moorish-style ceilings in a Peruvian valley; or a multi-ethnic team of Amerindian and Spanish naturalists was describing in Latin, Spanish and local vernacular languages thousands of medicinal plants, animals and minerals previously unknown to the West. And, most probably, at the same time that one of those exchanges were happening, the members of the School of Salamanca were laying the foundations of modern international law or formulating some of the first modern theories of price, value and money, Cervantes was writing *Don Quixote*, Velázquez was painting *Las Meninas*, or Goya was exposing both the dark and bright sides of the European Enlightenment. Actually, whenever we contemplate the galleries devoted to Velázquez, El Greco, Zurbarán, Murillo or Goya in the Prado Museum in Madrid; when we visit the National Palace in Mexico City, a mission in California, a Jesuit church in Rome or the Intramuros quarter in Manila; or when we hear Spanish being spoken in a myriad of accents in the streets of San Francisco, New Orleans or Manhattan we are experiencing some of the past and present fruits of an always vibrant and still expanding cultural community. As the reader can infer by now, this book is about how Spain and the larger Hispanic world have contributed to world history and in particular to the history of civilisation, not only at the zenith of the Hispanic Monarchy but throughout a much longer span of time.

**Astrology and Popular Religion in the Modern West** - Dr Nicholas Campion 2012-09-01

This book explores an area of contemporary religion, spirituality and popular culture which has not so far been investigated in depth, the phenomenon of astrology in the modern west. Locating modern astrology historically and sociologically in its religious, New Age and millenarian contexts, Nicholas Campion considers astrology's relation to modernity and draws on extensive fieldwork and interviews with leading modern astrologers to present an invaluable contribution to our understanding of the origins and nature of New Age ideology. This book challenges the notion that astrology is either 'marginal' or a feature of postmodernism. Concluding that astrology is more popular than the usual figures suggest, Campion argues that modern astrology is largely shaped by New Age thought, influenced by the European Millenarian tradition, that it can be seen as an heir to classical Gnosticism and is part of the vernacular religion of the modern west.

**Introduction to the Semiotics of the Text** - Gianfranco Marrone 2021-11-08

[Handbook of Medieval Sexuality](#) - Vern L. Bullough 2013-01-11

Like specialists in other fields in humanities and social sciences, medievalists have begun to investigate and write about sex and related topics such as courtship, concubinage, divorce, marriage, prostitution, and child rearing. The scholarship in this significant volume asserts that sexual conduct formed a crucial role in the lives, thoughts, hopes and fears both of individuals and of the institutions that they created in the middle ages. The absorbing subject of sexuality in the Middle Ages is examined in 19 original articles written specifically for this "Handbook" by the major authorities in their scholarly specialties. The study of medieval sexuality poses problems for the researcher: indices in standard sources rarely refer to sexual topics, and standard secondary sources often ignore the material or say little about it. Yet a vast amount of research is available, and the information is accessible to the student who knows where to look and what to look for. This volume is a valuable guide to the material and an indicator of what subjects are likely to yield fresh scholarly rewards.

**Biographical Encyclopedia of Astronomers** - Virginia Trimble 2007-09-18

The Biographical Encyclopedia of Astronomers is a unique and valuable resource for historians and astronomers alike. The two volumes include

approximately 1550 biographical sketches on astronomers from antiquity to modern times. It is the collective work of about 400 authors edited by an editorial board of 9 historians and astronomers, and provides additional details on the nature of an entry and some summary statistics on the content of entries. This new reference provides biographical information on astronomers and cosmologists by utilizing contemporary historical scholarship. Individual entries vary from 100 to 1500 words, including the likes of the superluminaries such as Newton and Einstein, as well as lesser-known astronomers like Galileo's acolyte, Mario Guiducci. A comprehensive contributor index helps researchers to identify the authors of important scientific topics and treatises.

**Ambiguity of the Sacred** - Jonna Bornemark 2012-10-31

The distinction between the secular and the sacred or holy seems at first to constitute a definitive line, the establishment of which also defines Western modernity. Yet this apparently strict demarcation is today not only questioned, but also increasingly difficult to maintain. In order to understand and conceptualize what is happening in the intersection between religion, politics, and aesthetics, we need to rethink the very meaning of the sacred in its full ambiguity, to explore again in thinking the vicissitudes and possibilities of this complex phenomenon, and to learn to move more freely through the category itself. The book contains contributions by researchers from many different fields, philosophers, theologians, political scientists, and literary historians, who also comment on each other. It establishes new connections and trajectories for mapping and understanding the nature and meaning of the sacred both as a social, an aesthetic, and a religious phenomenon. With contributions by: Bettina Bergo, Ward Blanton, Marcia Sa Cavalcante Schuback, Karolina Enquist Kallgren, Mattias Martinson, Paivi Mehtonen, Elena Namli, Jacob Rogozinski, Hans Ruin, Muniz Sodre, Fredrika Spindler and Jon Wittrock.

[Immoral Memories](#) - Sergei Eisenstein 2013-11-01

Republished for the first time since the 1980s, a legendary book on the cinema from one of the most important figures in the history of film. Vivid, eccentric, and free-ranging, this memoir is written in a style reminiscent of the brilliant visual effects of montage and dynamic progression of the legendary Russian director. Eisenstein wittily portrays his life in Russia from the time of the Revolution, his travels in the West, and his encounters with an amazing medley of people on both sides of the Iron Curtain, including Charlie Chaplin, Marlene Dietrich, and Man Ray. With 48 pages of illustrations from the author's own collection, including photos and personal sketches, this is the fullest picture possible of a man and his films, from one of the most iconic eras of the art form.

[Dictionary of Angels](#) - Gustav Davidson 1994-10

An investigation of the evidence in Talmudic, gnostic, apocalyptic, partristic, and legendary texts concerning immortal, winged beings.

**Stages of Evil** - Robert Lima 2005-01-01

"The evil that men do" has been chronicled for thousands of years on the European stage, and perhaps nowhere else is human fear of our own evil more detailed than in its personifications in theater. In *Stages of Evil*, Robert Lima explores the sociohistorical implications of Christian and pagan representations of evil and the theatrical creativity that occultism has engendered. By examining examples of alchemy, astronomy, demonology, exorcism, fairies, vampires, witchcraft, hauntings, and voodoo in prominent plays, *Stages of Evil* explores American and European perceptions of occultism from medieval times to the modern age.

[Utopias in Ancient Thought](#) - Pierre Destrée 2021-08-23

This collection deals with utopias in the Greek and Roman worlds. Plato is the first and foremost name that comes to mind and, accordingly, 3 chapters (J. Annas; D. El Murr; A. Hazistavrou) are devoted to his various approaches to utopia in the Republic, Timaeus and Laws. But this volume's central vocation and originality comes from our taking on that theme in many other philosophical authors and literary genres. The philosophers include Aristotle (Ch. Horn) but also Cynics (S. Husson), Stoics (G. Reydams-Schils) and Cicero (S. McConnell). Other literary genres include comedic works from Aristophanes up to Lucian (G. Sissa; S. Kidd; N.I. Kuin) and history from Herodotus up to Diodorus Siculus (T. Lockwood; C. Atack; I. Sulimani). A last comparative chapter is devoted

to utopias in Ancient China (D. Engels).

*Painted Wood* - Valerie Dorge 1998-08-27

The function of the painted wooden object ranges from the practical to the profound. These objects may perform utilitarian tasks, convey artistic whimsy, connote noble aspirations, and embody the highest spiritual expressions. This volume, illustrated in color throughout, presents the proceedings of a conference organized by the Wooden Artifacts Group of the American Institute for Conservation of Historic and Artistic Works (AIC) and held in November 1994 at the Colonial Williamsburg Foundation in Williamsburg, Virginia. The book includes 40 articles that explore the history and conservation of a wide range of painted wooden objects, from polychrome sculpture and altarpieces to carousel horses, tobacconist figures, Native American totems, Victorian garden furniture, French cabinets, architectural elements, and horse-drawn carriages. Contributors include Ian C. Bristow, an architect and historic-building consultant in London; Myriam Serck-Dewaide, head of the Sculpture Workshop, Institut Royal du Patrimoine Artistique, Brussels; and Frances Gruber Safford, associate curator of American decorative arts at the Metropolitan Museum of Art in New York. A broad range of professionals—including art historians, curators, scientists, and conservators—will be interested in this volume and in the multidisciplinary nature of its articles.

**The Magic of the Horseshoe** - Robert Means Lawrence 1898

*Women in Early British and Irish Astronomy* - Mary Brück 2009-07-25  
Careers in astronomy for women (as in other sciences) were a rarity in Britain and Ireland until well into the twentieth century. The book investigates the place of women in astronomy before that era, recounted in the form of biographies of about 25 women born between 1650 and 1900 who in varying capacities contributed to its progress during the eighteenth, nineteenth and early twentieth centuries. There are some famous names among them whose biographies have been written before now, there are others who have received less than their due recognition while many more occupied inconspicuous and sometimes thankless places as assistants to male family members. All deserve to be remembered as interesting individuals in an earlier opportunity-poor age. Placed in roughly chronological order, their lives constitute a sample thread in the story of female entry into the male world of science. The book is aimed at astronomers, amateur astronomers, historians of science, and promoters of women in science, but being written in non-technical language it is intended to be of interest also to educated readers generally.

*East Encounters West* - Fatma Muğge Göç, ek 1987

In 1720 an Ottoman ambassador arrived in France to observe Western civilization, and report on how it could be applied in the Ottoman Empire. Based on his accounts, this book studies the impact of the West on the Empire, and of this Ottoman embassy on the two societies. --

Publisher description.

*Resonances of the Raj* - Nalini Ghuman 2014

This text examines the ramifications of the intertwined and overlapping histories of Britain and India on English music in the last fifty years of the colonial encounter, and traces the effects of the British Raj on the English musical imagination. Through a series of case studies, author Nalini Ghuman integrates music directly into the cultural history of the British Raj, revealing unexpected minglings of peoples, musics, and ideas that raise questions about 'Englishness', about the nature of Empire, and about the fixedness of identity.

*Whence the Goddesses* - Miriam Robbins Dexter 1990

*Mathematics* - California. State Department of Education 1987

This document has been written to relate to the "Mathematics Framework for California Public Schools, Kindergarten through Grade Twelve" published in 1985. Part 1 of the document provides a brief summary of important characteristics of a strong elementary mathematics program. Part 2 of the document presents a portrait of a desired elementary mathematics program focused on the development of student understanding. Included in part 2 are discussions, lessons, and teaching suggestions related to certain basic, underlying mathematical ideas referred to in the "Mathematics Framework" as the "essential understandings." These are: (1) number; (2) measurement; (3) geometry; (4) patterns and functions; (5) statistics and probability; (6) logic; and (7) algebra. (RH)

**The Age of Eclecticism** - Christine Bolus-Reichert 2020-05-05

"The burden of the past" invoked by any discussion of eclecticism is a familiar aspect of modernity, particularly in the history of literature. *The Age of Eclecticism: Literature and Culture in Britain, 1815-1885* by Christine Bolus-Reichert aims to reframe that dynamic and to place it in a much broader context by examining the rise of a manifold eclecticism in the nineteenth century. Bolus-Reichert focuses on two broad understandings of eclecticism in the period—one understood as an unreflective embrace of either conflicting beliefs or divergent historical styles, the other a mode of critical engagement that ultimately could lead to a rethinking of the contrast between creation and criticism and of the very idea of the original. She also contributes to the emerging field of transnational Victorian studies and, in doing so, finds a way to talk about a broader, post-Romantic nineteenth-century culture. By reviving eclecticism as a critical term, Bolus-Reichert historicizes the theoretical language available to us for describing how Victorian culture functioned—in order to make the terrain of Victorian scholarship international and comparative and create a place for the Victorians in the genealogy of postmodernism. *The Age of Eclecticism* gives Victorianists—and other students of nineteenth-century literature and culture—a new perspective on familiar debates that intersect in crucial ways with issues still relevant to literature in an age of multiculturalism and postmodernism.
