**Digital Business Analysis** - Fredrik Milani  
2019-01-25

This book frames business analysis in the context of digital technologies. It introduces modern business analysis techniques, including a selection of those in the Business Analysis Body of Knowledge (BABOK) by the International Institute of Business Analysis (IIBA), and exemplifies them by means of digital technologies applied to solve problems or exploit new business opportunities. It also includes in-

depth case studies in which business problems and opportunities, drawn from real-world scenarios, are mapped to digital solutions. The work is summarized in seven guiding principles that should be followed by every business analyst. This book is intended mainly for students in business informatics and related areas, and for professionals who want to acquire a solid background for their daily work. It is suitable both for courses and for self-study. Additional teaching materials such as lecture videos, slides, question bank, exams, and seminar materials are accessible on the companion web-page.

**Globalisation and Migration** - Ronaldo Munck  
2013-09-13

This book critically examines the new issues and new politics regarding migration in the era of globalisation from a majority world perspective. It examines the current shifts in the global political economy and the effects it has, for example, in relation to rural displacement. When and how does this lead to national and/or transnational migration? We need to examine the ways in which migration is cut across and impacts on the generation of racism and xenophobia in the west. The issue of remittances by migrants to the 'developing' nations needs careful study as does the controversial issue of 'brain drain' versus 'brain gain' through migration. The growing importance of trafficking for forced labour has now been taken up by various international bodies but is it the new normality or simply an unfortunate side effect of globalisation to be overcome through legislation? Migration is becoming increasingly

gendered in its composition and flows but also in the receiving countries where men and women do very different jobs. We can predict the increasing racialization and gendering of migration but how will the state and society respond to these shifts? This book was published as a special issue of Third World Quarterly.

**Oceanography and Marine Biology** - S. J. Hawkins 2020-11-15

Oceanography and Marine Biology: An Annual Review remains one of the most cited sources in marine science and oceanography. The ever-increasing interest in work in oceanography and marine biology and its relevance to global environmental issues, especially global climate change and its impacts, creates a demand for authoritative refereed reviews summarizing and synthesizing the results of recent research. For more than 50 years, OMBAR has been an essential reference for research workers and students in all fields of marine science. This volume considers such diverse topics as optimal design for ecosystem-level ocean observatories, the oceanography and ecology of Ningaloo, human pressures and the emergence of novel marine ecosystems and priority species to support the functional integrity of coral reefs. Six of the nine peer-reviewed contributions in Volume 58 are available to read Open Access via the links on the Routledge.com webpage. An international Editorial Board ensures global relevance and expert peer review, with editors from Australia, Canada, Hong Kong, Ireland, Singapore, South Africa and the United Kingdom. The series volumes find a place in the libraries of not only marine laboratories and oceanographic institutes, but also universities worldwide. Chapters 1, 2, 3, 4, 5, 7 and 8 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. **The SAGE Encyclopedia of Journalism** - Gregory A. Borchard 2022-01-28

Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines, up-to-

the-minute Internet news, grocery store tabloids, Time magazine in our mailbox, or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts, and journalists, under the direction of lead editor Gregory Borchard of University of Nevada, Las Vegas.

*Biomedical English* - Isabel Verdaguer 2013-06-15

The corpus-based studies in this volume explore biomedical research writing in English from a variety of perspectives. The articles in this collection delve into the lexicographic issues involved in building an electronic database of collocations and lexical bundles, offer insight on the teaching and learning of prototypical multiword units of meaning in biomedical discourse, and view written scientific English through the lens of such diverse fields as phraseology, metaphor, gender and discourse analysis. The research presented in this book forms the theoretical and methodological foundation of SciE-Lex, a lexical database of collocations and prefabricated expressions designed to help scientists write scientific papers in English accurately. The concluding chapter on FrameNet addresses frame semantics, whose application to the cross-linguistic study of scientific language will open

new and promising avenues of research in the study of specialized languages.

*East Asia and the Global Crisis* - Shaun Breslin  
2013-09-13

This book traces the impact of the global financial crisis on East Asia, and the way that key regional states responded to the crisis. It considers the extent to which the region is decoupling from the global economy (or the West), the impact of crises on the definition of "region", and the effectiveness and functioning of regional institutions and governance mechanisms (including environmental governance). A key focus of the book is the increasing legitimacy of statist alternatives to (neo)liberal development strategies and modes of governance - or perhaps more correctly, the extent to which the legitimacy of "western" norms and practices have been delegitimized by the crisis. This book was originally published as a special issue of *Contemporary Politics*  
[Food Security, Biological Diversity and Intellectual Property Rights](#) - Dr Muriel Lightbourne 2013-02-28

This volume advances the claim that the FAO International Treaty on Plant Genetic Resources for Food and Agriculture (ITPGRFA) adopted in 2001 is the only existing international agreement with the potential to promote food security, conservation of biodiversity and equity. However, for germplasm-rich countries, national interests come into conflict with the global interest. This work shows that the pursuit of national interests is counterproductive when it comes to maintaining genetic resources, food-security and rent-seeking and that optimally, the coverage of the FAO Treaty should be widened to apply to all crops.

**The Role of Language in the Climate Change Debate** - Kjersti Flottum 2017-03-03

This volume takes a distinctive look at the climate change debate, already widely studied across a number of disciplines, by exploring the myriad linguistic and discursive perspectives and approaches at play in the climate change debate as represented in a variety of genres. The book focuses on key linguistic themes, including linguistic polyphony, lexical choices, metaphors,

narration, and framing, and uses examples from diverse forms of media, including scientific documents, policy reports, op-eds, and blogs, to shed light on how information and knowledge on climate change can be represented, disseminated, and interpreted and in turn, how they can inform further discussion and debate. Featuring contributions from a global team of researchers and drawing on a broad array of linguistic approaches, this collection offers an extensive overview of the role of language in the climate change debate for graduate students, researchers, and scholars in applied linguistics, environmental communication, discourse analysis, political science, climatology, and media studies.

**Energy Security and Development** - B.

Sudhakara Reddy 2015-02-05

This volume provides a systematic framework for energy suppliers, policy makers, academics, students, and all others interested in energy security, and analyzes key issues concerning energy, security and sustainability with the help of a wealth of data. While sustainability is the broadest objective, energy security is an important part of it, at the global, national and societal levels. The development of a sustainable, long-term solution to meeting the world's energy needs is a defining issue of our time, since central global challenges that the world faces—poverty alleviation, climate change, and environmental degradation—are directly linked to energy security. The contributions cover key issues in sustainable energy and illustrate that the insecurity of a majority of countries owes to internal factors which have more to do with market forces, inefficient technologies, lack of institutions, environmental insecurity, pricing mechanisms, etc., and less to do with the international situation. The links between energy and development are both direct and indirect. Directly, energy provides several services and utilities to maintain human well-being, and also does so indirectly through stakeholders. This volume addresses both the direct and indirect links and provides sustainable alternatives, helping readers to better grasp the resilience of both socio-economic and resource sub-systems in the

process. The issues affecting energy supply and demand, including technology portfolios, environmental considerations and consumer attitudes are thoroughly discussed. One of the critical questions that arises is how to facilitate energy investment. The investment climate and the key issues involved are analyzed, including: the capital flows with reasonable and stable investment frameworks, timely decision-making by governments, and open markets. The broad objective of the volume is to foster a deeper understanding of the concept of energy security and to identify the methods of analysis, policy initiatives and future research needed to generate a balanced pattern of energy use and mitigate its impact on humanity and the environment.

### **Astronomy and Astrophysics Abstracts** - S. Böhme 2013-12-14

Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of the literature concerning all aspects of astronomy, astrophysics, and their border fields. It is devoted to the recording, summarizing, and indexing of the relevant publications throughout the world. Astronomy and Astrophysics Abstracts is prepared by a special department of the Astronomisches Rechen-Institut under the auspices of the International Astronomical Union. Volume 34 records literature published in 1983 and received before February 17, 1984. Some older documents which we received late and which are not surveyed in earlier volumes are included too. We acknowledge with thanks contributions of our colleagues all over the world. We also express our gratitude to all organizations, observatories, and publishers which provide us with complimentary copies of

their publications. Starting with Volume 33, all the recording, correction, and data processing work was done by means of computers. The recording was done by our technical staff members Ms. Helga Ballmann, Ms. Mona El-Choura and Ms. Monika Kohl. Mr. Martin Schlotelburg and Mr. Ulrich Oberall supported our task by careful proofreading. It is a pleasure to thank them all for their encouragement. Heidelberg, March 1984

### **Market-Led Agrarian Reform** - Saturnino M. Borras Jr. 2013-09-13

Three-fourths of the world's poor are rural poor. Most of the rural poor remain dependent on land-based livelihoods for their incomes and reproduction despite significant livelihood diversification in recent years. Land issue remains critical to any development discourse today. Market-led agrarian reform (MLAR) has gained prominence since the early 1990s as an alternative to state-led land reforms. This neoliberal policy is based on the inversion of what its proponents see as the features of earlier approaches, and calls for redistribution via

privatized, decentralized transactions between 'willing sellers' and 'willing buyers'. Its proponents, especially those associated with the World Bank, have claimed success where the policy has been implemented, but such claims have been contested by independent scholars as well as by peasant movements who are struggling to gain access to land. This book presents three thematic papers and six country studies. The thematic papers address issues of formalisation of property rights, gendered land rights, and neoliberal enclosure. These studies demonstrate the pervasive influence of neoliberal ideas on property rights and rural development debates, well beyond the 'core' question of land redistribution. The country cases bring together experiences from Brazil, Guatemala, El Salvador, Philippines, South Africa and Egypt. Common findings include the success of landowners in minimising the impact of reform, and a lack of post-transfer support, translating into marginal impact on poverty. The limitations of the market-led approach, and the implications of the studies presented here for the future of agrarian reform, are considered in the editors' introduction. This book was a special issue of *The Third World Quarterly*.

Metaphor in Communication, Science and Education - Francesca Ervas 2017-08-07

This collection of papers presents some recent trends in metaphor studies that propose new directions of research on the embodied cognition perspective. The overall volume, in particular, shows how the embodied cognition still remains a relevant approach in a multidisciplinary research on the communicative side of metaphors, by focusing on both comprehension processes in science as well as learning processes in education.

**Indian Diplomacy** - RAJENDRA M.

ABHYANKAR 2018-05-18

How has India's foreign policy evolved in the seventy years since Independence? For that matter, what is the country's foreign policy? And what are the aspects that determine and shape it? If you've had questions such as these, Rajendra Abhyankar's *Indian Diplomacy* is the foreign policy primer you've been looking for. Charting the country's interactions with other countries from the early days of independence to now, *Indian Diplomacy* reviews the changes in

stance. Lucidly written and well argued, the book covers these and other questions comprehensively, without fuss or bombast. A much-needed book in light of the sweeping changes on the global stage—and India's increasing role in them. General reader, politicians, historians, and journalists who specialize in foreign policy and contemporary politics as well as think tanks and policymakers  
*The Alexander Romance: History and Literature* - Richard Stoneman 2018-07-31

*The Alexander Romance* is a difficult text to define and to assess justly. From its earliest days it was an open text, which was adapted into a variety of cultures with meanings that themselves vary, and yet seem to carry a strong undercurrent of homogeneity: Alexander is the hero who cannot become a god, and who encapsulates the desires and strivings of the host cultures. The papers assembled in this volume, which were originally presented at a conference at the University of Wrocław, Poland, in October 2015, all face the challenge of defining the Alexander Romance. Some focus on quite specific topics while others address more overarching themes. They form a cohesive set of approaches to the delicate positioning of the text between history and literature. From its earliest elements in Hellenistic Egypt, to its latest reworkings in the Byzantine and Islamic Middle East, the Alexander Romance shows itself to be a work that steadily engages with such questions as kingship, the limits of human (and Greek) nature, and the purpose of history. The Romance began as a history, but only by becoming literature could it achieve such a deep penetration of east and west.

**Mediation Representation** - Harold I.

Abramson 2014-10-30

The original, highly accessible text in *Mediation Representation: Advocating as a Problem-Solver* highlights critical choices and explores every step of the process, from advising clients on the mediation option through preparing cases for the session to appearing in pre-mediation conferences, sessions, and post-sessions. Students learn how to effectively present opening statements and represent clients in joint sessions. Techniques for overcoming impasses, dealing with emotions, and resolving moneyed disputes are explored, and consideration is given

to generating forward movement in the process while uncovering creative solutions. Mediation Representation: Advocating as a Problem-Solver navigates mediation-related legal and ethical issues and considers alternative processes for resolving unsettled issues. A culturally neutral framework allows for representing diverse clients. Helpful appendixes are included that cover decision-trees, sample agreements, active listening, and effective questioning. **Monetary Theory and Policy, fourth edition -**  
Carl E. Walsh 2017-05-12

The new edition of a comprehensive treatment of monetary economics, including the first extensive coverage of the effective lower bound on nominal interest rates. This textbook presents a comprehensive treatment of the most important topics in monetary economics, focusing on the primary models monetary economists have employed to address topics in theory and policy. Striking a balance of insight, accessibility, and rigor, the book covers the basic theoretical approaches, shows how to do simulation work with the models, and discusses the full range of frictions that economists have studied to understand the impacts of monetary policy. For the fourth edition, every chapter has been revised to improve the exposition and to reflect recent research. The new edition offers an entirely new chapter on the effective lower bound on nominal interest rates, forward guidance policies, and quantitative and credit

easing policies. Material on the basic new Keynesian model has been reorganized into a single chapter to provide a comprehensive analysis of the model and its policy implications. In addition, the chapter on the open economy now reflects the dominance of the new Keynesian approach. Other new material includes discussions of price adjustment, labor market frictions and unemployment, and moral hazard frictions among financial intermediaries. References and end-of-chapter problems allow readers to extend their knowledge of the topics covered. Monetary Theory and Policy continues to be the most comprehensive and up-to-date treatment of monetary economics, not only the leading text in the field but also the standard reference for academics and central bank researchers.

**Handbook of Japanese Applied Linguistics -**  
Masahiko Minami 2016-01-15

Applied linguistics is the best single label to represent a wide range of contemporary research at the intersection of linguistics, anthropology, psychology, and sociology, to name a few. The Handbook of Japanese Applied Linguistics reflects crosscurrents in applied linguistics, an ever-developing branch/discipline of linguistics. The book is divided into seven sections, where each chapter discusses in depth the importance of particular topics, presenting not only new findings in Japanese, but also practical implications for other languages. Section 1 examines first language acquisition/development, whereas Section 2 covers issues related to second language acquisition/development and bilingualism/multilingualism. Section 3 presents problems associated with the teaching and learning of foreign languages. Section 4 undertakes questions in corpus/computational linguistics. Section 5 deals with clinical linguistics, and Section 6 takes up concerns in the area of translation/interpretation. Finally, Section 7 discusses Japanese sign language. Covering a wide range of current issues in an in-depth, comprehensive manner, the book will be useful for researchers as well as graduate students who are interested in Japanese linguistics in general, and applied linguistics in particular. Chapter titles Chapter 1. Cognitive Bases and Caregivers' Speech in Early Language

**Mycotoxins in Foodstuffs** - Martin Weidenbörner 2014-01-24

Mycotoxin contamination of food occurs as a result of crop invasion by field fungi such as *Fusarium* spp., *Alternaria* spp., *Aspergillus* spp., and *Penicillium* spp., which start their growth while in storage (storage fungi). In the worst case, these fungi produce secondary metabolites called mycotoxins. They can be very harmful to humans and animals when for example they are consumed through food. Mycotoxins have various negative effects on several organs in humans and animals. The present book gives a basic overview of the main mycotoxins in food. It lists the predisposition of a foodstuff for mycotoxin contamination, the degree of contamination, concentration, and country of detection/origin for each case of mycotoxin contamination of food. Major updates to this second edition include: - More than 750 new publications concerning mycotoxins in foodstuffs (1665 literatures at all). - A single chapter overview of mycotoxin(s) in the corresponding foodstuff. - The co-occurrence of mycotoxins in a foodstuff has been listed where possible. - Numerical and alphabetical literature. - Organic and conventional foods of a publication have been listed separately where possible. - Numerous entries described in much greater detail. - Each analyzed foodstuff has a separate entry per year where possible.

*The Trade Policy of Emerging Powers* - Laura Mahrenbach 2013-09-12

As emerging powers deepen their involvement in world trade and global governance, it is crucial to explore the what and the why of their strategic choices vis-a-vis the World Trade Organization. This book does just that, examining the trade policy decisions of two emerging power states, Brazil and India, since 2001. In this timely work, Laura Carsten Mahrenbach develops a broad-based analytical framework which addresses trade policy within EP states, in their regions and on the global level. The findings underline the importance of examining domestic factors when trying to

understand strategic decisions by emerging powers. They also have important implications for our understanding of the role of emerging power states in global (trade) governance.

*The Coherence of EU Free Movement Law* - Niamh Nic Shuibhne 2013-08-29

Presenting a critical analysis of the Court of Justice's jurisprudence on EU free movement rights, this book explains the drivers behind the fragmentation of internal market law. It argues that the Court has a responsibility to articulate coherent framework principles applicable in national law, but also requires greater support from Member States.

*The Mechanics' Magazine and Journal of Engineering, Agricultural Machinery, Manufactures and Shipbuilding* - 1861

Lateralization and cognitive systems - Sebastian Ocklenburg 2015-02-24

Left-right asymmetries of structure and function are a common organization principle in the brains of humans and non-human vertebrates alike. While there are inherently asymmetric

systems such as the human language system or the song system of songbirds, the impact of structural or functional asymmetries on perception, cognition and behavior is not necessarily limited to these systems. For example, performance in experimental paradigms that assess executive functions such as inhibition, planning or action monitoring is influenced by information processing in the bottom-up channel. Depending on the type of stimuli used, one hemisphere can be more efficient in processing than the other and these functional cerebral asymmetries have been shown to modulate the efficacy of executive functions via the bottom-up channel. We only begin to understand the complex neuronal mechanisms underlying this interaction between hemispheric asymmetries and cognitive systems. Therefore, it is the aim of this Research Topics to further elucidate how structural or functional hemispheric asymmetries modulate perception, cognition and behavior in the broadest sense.
