[How to Read and Critique a Scientific Research Article](#) - Foong May Yeong 2014

Given the explosion of information and knowledge in the field of Life Sciences, adapting primary literature as materials in course work as part of active learning seems to be more

effective in improving scientific literacy among science undergraduates than the pure transmission of content knowledge using traditional textbooks. In addition, students also read research articles as part of undertaking laboratory research projects useful for preparing

them for graduate school. As such, a good grasp of reading and analytical skills is needed for students to understand how their research project contributes to the field that they are working in. Such skills are being taught at UK and USA universities. In Asia, this approach in teaching has not yet been as widespread, although similar ideas are beginning to be used in education. Written as a quick guide for undergraduate students and faculty members dealing with scientific research articles as part of a module or research project, this book will be useful, especially in Asia, for students and faculty members as the universities look to incorporating the use of scientific research articles in their undergraduate teaching. For Life Science students, the first time they encounter a primary literature can be rather daunting, though with proper guidance, they can overcome the initial difficulties and become confident in dealing with scientific articles. This guidebook provides a structured approach to

reading a research article, guiding the reader step-by-step through each section, with tips on how to look out for key points and how to evaluate each section. Overall, by helping undergraduate students to overcome their anxieties in reading scientific literature, the book will enable the students to appreciate better the process of scientific investigations and how knowledge is derived in science.

Doing Your Literature Review - Jill Jesson

2011-02-11

Electronic Inspection Copy available for instructors here The literature review is a compulsory part of research and, increasingly, may form the whole of a student research project. This highly accessible book guides students through the production of either a traditional or a systematic literature review, clearly explaining the difference between the two types of review, the advantages and disadvantages of both, and the skills needed. It gives practical advice on reading and organising relevant literature and critically assessing the reviewed field. Contents include: using libraries and the internet note making presentation

critical analysis referencing, plagiarism and copyright. This book will be relevant to students from any discipline. It includes contributions from two lecturers who have many years experience of teaching research methods and the supervision of postgraduate research dissertations and a librarian, each offering expert advice on either the creation and assessment of literature reviews or the process of searching for information. The book also highlights the increasing importance for many disciplines of the systematic review methodology and discusses some of the specific challenges which it brings. Jill K. Jesson has worked with multi-disciplinary research teams within the Aston School of Pharmacy, Aston Business School and with M-E-L Research, an independent public services research consultancy. She has now left Aston University and is working as a Consultant. Lydia Matheson is an Information Specialist working for Library & Information Services at Aston University.

Fiona M. Lacey is an academic pharmacist, a member of the pharmacy practice teaching group in the School of Pharmacy, and Associate Dean in the School of Life and Health Sciences at Aston.

How to Practice Academic Medicine and Publish from Developing Countries? -

Samiran Nundy 2021-10-23

This is an open access book. The book provides an overview of the state of research in developing countries - Africa, Latin America, and Asia (especially India) and why research and publications are important in these regions. It addresses budding but struggling academics in low and middle-income countries. It is written mainly by senior colleagues who have experienced and recognized the challenges with design, documentation, and publication of health research in the developing world. The book includes short chapters providing insight into planning research at the undergraduate or postgraduate level, issues related to research

ethics, and conduct of clinical trials. It also serves as a guide towards establishing a research question and research methodology. It covers important concepts such as writing a paper, the submission process, dealing with rejection and revisions, and covers additional topics such as planning lectures and presentations. The book will be useful for graduates, postgraduates, teachers as well as physicians and practitioners all over the developing world who are interested in academic medicine and wish to do medical research.

Evaluating Research in Academic Journals - Fred Pyczak 2016-10-04

- A supplementary guide for students who are learning how to evaluate reports of empirical research published in academic journals.
- Your students will learn the practical aspects of

evaluating research, not just how to apply a laundry list of technical terms from their textbooks. • Each chapter is organized around evaluation questions. For each question, there is a concise explanation of how to apply it in the evaluation of research reports. • Numerous examples from journals in the social and behavioral sciences illustrate the application of the evaluation questions. Students see actual examples of strong and weak features of published reports. • Commonsense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class. • The structure of this book enables students to work with confidence while evaluating articles for homework. • Avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even though it has serious methodological flaws. Students learn when and why certain types of flaws may be tolerated. They learn why

evaluation should not be performed mechanically. • This book received very high student evaluations when field-tested with students just beginning their study of research methods. • Contains more than 60 new examples from recently published research. In addition, minor changes have been made throughout for consistency with the latest edition of the Publication Manual of the American Psychological Association.

How to Write a Good Scientific Paper - CHRIS A. MACK 2018

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of

writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

Destination Dissertation - Sonja K. Foss 2015-10-23

Your dissertation is not a hurdle to jump or a battle to fight; as this handbook makes clear, your dissertation is the first of many destinations on the path of your professional career.

Destination Dissertation guides you to the successful completion of your dissertation by framing the process as a stimulating and exciting trip—one that can be completed in fewer than nine months and by following twenty-nine specific steps. Sonja Foss and William Waters—your guides on this trip—explain concrete and efficient processes for completing the parts of the dissertation that tend to cause the most delays: conceptualizing a topic, developing a pre-proposal, writing a literature review, writing a proposal, collecting and analyzing data, and writing the last chapter. This guidebook is crafted for use by students in all disciplines and for both quantitative and qualitative dissertations, and incorporates a wealth of real-life examples from every step of the journey.

Writing the Literature Review - Sara Efrat Efron 2018-09-25

This accessible text provides a roadmap for producing a high-quality literature review--an

integral part of a successful thesis, dissertation, term paper, or grant proposal. Each step of searching for, evaluating, analyzing, and synthesizing prior studies is clearly explained and accompanied by user-friendly suggestions, organizational tips, vignettes, and examples of student work. Also featured are excerpts from peer-reviewed quantitative, qualitative, and mixed methods articles. This is the first book to focus on crafting different types of reviews (systematic, traditional-narrative, or hermeneutic-phenomenological) that reflect the writer's research question, methodological choices, and approaches to knowledge. It describes what all reviews have in common and highlights distinct characteristics of each type. The book includes dos and don'ts for evaluating studies and constructing an argument, and software suggestions for locating, organizing, and arranging sources. Pedagogical Features

- *Checklists and "To Do" activities that break down key steps to take.
- *Boxed examples,

graphics that organize and visually illustrate key concepts, and summary tables. *Group activities that invite students to further explore and apply the methods discussed in each chapter.

*Detailed directions for using four different organizing strategies: synthesis matrix, summary table, mapping, and topic outline.

*End-of-chapter summaries and "What's Next" sections. *Assessment matrices for reviewing and refining the completed literature review.

Telling a Research Story - Christine B. Feak
2009

Telling a Research Story: Writing a Literature Review is concerned with the writing of a literature review and is not designed to address any of the preliminary processes leading up to the actual writing of the literature review. This volume represents a revision and expansion of the material on writing literature reviews that appeared in English in Today's Research World. This volume progresses from general to specific issues in the writing of literature reviews. It opens with some orientations that raise awareness of the issues that surround the telling of a research story. Issues of structure and

matters of language, style, and rhetoric are then discussed. Sections on metadiscourse, citation, and paraphrasing and summarizing are included.

Lord of the Flies - William Golding 2003-12-16

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age.

This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Darius the Great Deserves Better - Adib Khorram 2021-08-24

In this companion to the award-winning *Darius the Great Is Not Okay*, Darius suddenly has it all: a boyfriend, an internship, a spot on the soccer team. It's everything he's ever wanted--but what if he deserves better? Darius Kellner is having a

bit of a year. Since his trip to Iran, a lot has changed. He's getting along with his dad, and his best friend Sohrab is only a Skype call away. Between his first boyfriend, Landon, varsity soccer practices, and an internship at his favorite tea shop, things are falling into place. Then, of course, everything changes. Darius's grandmothers are in town for a long visit, and Darius can't tell whether they even like him. The internship is not going according to plan, Sohrab isn't answering Darius's calls, and Dad is far away on business. And Darius is sure he really likes Landon . . . but he's also been hanging out with Chip Cusumano, former bully and current soccer teammate--and well, maybe he's not so sure about anything after all. Darius was just starting to feel okay, like he finally knew what it meant to be Darius Kellner. But maybe okay isn't good enough. Maybe Darius deserves better.

The Imp of the Perverse - Edgar Allan Poe

2021-07-26

Ever wondered how to combat the deep-seated urge to do wrong? Maybe Edgar Allen Poe can help. In "The Imp of the Perverse" (1845) Poe sets out to explain the Imp - the archetype responsible for persuading us to do what we know in our minds we shouldn't. Poe, supposedly distraught with his own self-destructive

impulses, lets the story take place primarily in the narrator's mind as he frets the day he will have to come clean. At the heart of this short story is the question of how far we can justify our wrongdoings. It explores our self-destructive impulses and urges, the abandonment of reason and our inherent wickedness. Join Poe as he takes the reader from the sunny valleys of reason to the darkest regions of the human soul. A descent into madness. Edgar Allan Poe (1809-1849) was an American poet, author, and literary critic. Most famous for his poetry, short stories, and tales of the supernatural, mysterious, and macabre, he is also regarded as the inventor of the detective genre and a contributor to the emergence of science fiction, dark romanticism, and weird fiction. His most famous works include "The Raven" (1845), "The Black Cat" (1843), and "The Gold-Bug" (1843).

Critical Theory Today - Lois Tyson 2012-09-10
Critical Theory Today is the essential introduction to contemporary critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. The chapters provide an extended explanation of each theory, using examples from

everyday life, popular culture, and literary texts; a list of specific questions critics who use that theory ask about literary texts; an interpretation of F. Scott Fitzgerald's *The Great Gatsby* through the lens of each theory; a list of questions for further practice to guide readers in applying each theory to different literary works; and a bibliography of primary and secondary works for further reading.
