Revisiting Suicide - Kanchan Bharati 2020-11-20

This book provides a socio-psychological enquiry of the phenomenon of suicide in the Indian context. It addresses the rising trend of suicides across the world and through case studies explores its primary reasons, the after-effects on survivors and families, and measures to prevent them. The volume focuses on deciphering the social and psychological meanings associated with suicide. Through an examination of psycho-social autopsies of numerous cases, it highlights the patterns and trends which emerge around mental well-being, suicide, and bereavement. It

examines the primary roadblocks for robust suicide prevention measures and provides great insights into behavioural and personality categories and their relationship with suicide. Offering theoretical and empirical perspectives on the issue of suicide and self-harm, this book will be of interest to students, researchers, and faculty of behavioural sciences, psychology, social anthropology, demography, criminology, social work and sociology. It will also be an essential read for psychologists, counsellors, policy makers, NGOs, CSOs, legal experts and media personnel working in the area of suicide prevention and research.

Jack McAfghan - Kate McGahan 2015-04-02

An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend. Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of

canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

Perspectives on Grammaticalization - William Pagliuca 1994-08-25

This is the second of two volumes deriving from papers presented at the Nineteenth Annual UWM linguistics Symposium held in Milwaukee in 1990. It focuses on the evolution of grammatical form and meaning from lexical material, which has reinvigorated historical analysis and theory and led to advances in the understanding of the relation between diachrony and universals. The richness and potential of some of the leading approaches to grammaticalization are here illustrated in thirteen selected papers.

Global Soil Security - Damien J. Field 2016-11-01

This book introduces the concept of soil security and its five dimensions: Capability, Capital, Condition, Connectivity and Codification. These five

dimensions make it possible to understand soil's role in delivering ecosystem services and to quantify soil resource by measuring, mapping, modeling and managing it. Each dimension refers to a specific aspect: contribution to global challenges (Capability), value of the soil (Capital), current state of the soil (Condition), how people are connected to the soil (Connectivity) and development of good policy (Codification). This book considers soil security as an integral part of meeting the ongoing challenge to maintain human health and secure our planet's sustainability. The concept of soil security helps to achieve the need to maintain and improve the world's soil for the purpose of producing food, fiber and freshwater, and contributing to energy and climate sustainability. At the same time it helps to maintain biodiversity and protects ecosystem goods and services.

Narrow Gauge Adventure - Peter Kazer 2012

Market-Driven Management - Jean-Jacques Lambin 2012-07-19

Market-Driven Management adopts a broad approach to marketing, integrating the strategic and operational elements of the discipline. Lambin's unique approach reflects how marketing operates empirically, as both a business philosophy and an action-oriented process. Motivated by the increased complexity of markets, globalisation, deregulation, and the development of e-commerce, the author challenges the traditional concept of the 4Ps and the functional roles of marketing departments, focusing instead on the concept of market orientation. The book considers all of the key market stakeholders, arguing that developing market relations and enhancing customer value is the responsibility of every member of the organization, and that the development of this customer value is the only way for a firm to achieve profit and growth.

New to this edition: - Greater coverage of ethical issues and corporate social responsibility; cultural diversity; value and branding and the economic downturn - Broad international perspective - Thoroughly revised to reflect the latest academic thinking and research With its unique approach, international cases and complementary online resources, this book is ideal for postgraduate and upper level undergraduate students of marketing, and for MBAs and Executive MBAs.

Agent-Based Strategizing - Duncan A. Robertson 2019-07-31

Strategic management is a system of continual disequilibrium, with firms in a continual struggle for competitive advantage and relative fitness. Models that are dynamic in nature are required if we are to really understand the complex notion of sustainable competitive advantage. New tools are required to tackle challenges of how firms should compete in environments characterized by both exogeneous shocks and intense endogenous competition. Agent-based modelling of firms' strategies offers an alternative analytical approach, where individual firm or component parts of a firm are modelled, each with their own strategy. Where traditional models can assume homogeneity of actors, agent-based models simulate each firm individually. This allows experimentation of strategic moves, which is particularly important where reactions to strategic moves are non-trivial. This Element introduces agent-based models and their use within management, reviews the influential NK suite of models, and offers an agenda for the development of agent-based models in strategic management.

Fallocaust - Quil Carter 2014-07-09

Over two hundred and thirty years ago the Fallocaust happened, killing almost everything that lived and creating what is now known as the greywastes. A dead wasteland where cannibalism is a necessity, death your reality, and life before the radiation nothing but pictures in dog-eared magazines. Reaver is a greywaster, living in a small block controlled by a distant ruler said to have started the Fallocaust. He is a product of the savage world he was raised in and prides himself on being cold and cruel. Then someone new to his town catches his eye, someone

different than everyone else. Without knowing why he starts to silently stalk him, unaware of where it will lead him.

Social Class in Europe - Etienne Penissat 2020-05-12

Mapping the class divisions that run throughout Europe Over the last ten years - especially with the 'no' votes in the French and Dutch referendums in 2010, and the victory for Brexit in 2016 - the issue of Europe has been placed at the centre of major political conflicts. Each of these crises has revealed profound splits in society, which are represented in terms of an opposition between those countries on the losing and those on the winning sides of globalisation. Inequalities beyond those between nations are critically absent from the debate. Based on major European statistical surveys, the new research in this work presents a map of social classes inspired by Pierre Bourdieu's sociology. It reveals the common features of the working class, the intermediate class and the privileged class in Europe. National features combine with social inequalities, through an account of the social

distance between specific groups in nations in the North and in the countries of the South and East of Europe. The book ends with a reflection on the conditions that would be required for the emergence of a Europe-wide social movement.

The Resistance Versus Vichy - Peter Novick 1968

The France of the Little-Middles - Marie Cartier 2016-08-01

The Poplars housing development in suburban Paris is home to what one resident called the "Little-Middles" - a social group on the tenuous border between the working- and middle- classes. In the 1960s The Poplars was a site of upward social mobility, which fostered an egalitarian sense of community among residents. This feeling of collective flourishing was challenged when some residents moved away, selling their homes to a new generation of upwardly mobile neighbors from predominantly immigrant backgrounds. This volume explores the strained reception of these migrants, arguing that this is less a product of racism and xenophobia than of anxiety about social class and the loss of a sense of community that reigned before.
