Chemistry - Nivaldo J. Tro 2017-01-04

NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value; this format costs significantly less than a new textbook. Before purchasing, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. In addition, you may need a Course ID, provided by your instructor, to register for and use MyLab and Mastering products. For courses in two-semester general chemistry. Tells the story of chemistry in a unified

and thematic way while building 21st century skills. Bestselling author Nivaldo Tro's premise is that matter is particulate - it is composed of molecules; the structure of those particles determines the properties of matter. " This core idea is the inspiration for his seminal text-Chemistry: Structure and Properties. Dr. Tro emphasizes the relationship between structure and properties, establishes a unique approach to teaching chemistry by presenting atomic and bonding theories early in the course, and stresses key concepts and themes in text, images, and interactive media. The book is organized to present chemistry as a logical, cohesive story from the microscopic to the macroscopic, so students can fully grasp the theories and framework behind the chemical facts. Each topic is carefully crafted to convey to students that the relationship between structure and properties is the thread that weaves all of chemistry together. The 2nd Edition works seamlessly with

Mastering(tm) Chemistry and new eText 2.0 to engage students in active learning and the world of chemistry. Dr. Tro helps readers build 21st century skills, engaging them through new end-of-chapter questions-Data Interpretation and Analysis questions present real data in real life situations and ask students to analyze that data, and Questions for Group Work foster collaborative learning and encourage students to work together as a team to solve problems. Dr. Tro also engages students through the power of video, animations, and real-time assessment with new and expanded interactive media. New Key Concept Videos, newly interactive Conceptual Connections and Self-Assessment Quizzes, and Interactive Worked Examples are embedded in the new eText 2.0 version of the book, enabling students to make connections that they cannot make by simply reading a static page. Also available with Mastering Chemistry Mastering (tm) Chemistry is

the leading online homework, tutorial, and assessment system, designed to improve results by engaging students with powerful content. The enhanced eText 2.0 and Mastering Chemistry work with the book to provide seamless and tightly integrated videos and other rich media and assessment throughout the course. Instructors can assign interactive media before class to engage students and ensure they arrive ready to learn. Students further master concepts through book-specific Mastering Chemistry assignments, which provide hints and answer-specific feedback that build problem-solving skills. With Learning Catalytics(tm) instructors can expand on key concepts and encourage student engagement during lecture through questions answered individually or in pairs and groups. Mastering Chemistry now provides students with the new General Chemistry Primer for remediation of chemistry math skills needed in the general chemistry course. If

Program Evaluation - Jody L Fitzpatrick 2015-10-08

For students studying program evaluation, project planning, or tests and measurements. For professionals new to the field. A highly esteemed and comprehensive overview of program evaluation that covers common approaches, models, and methods. As schools and

other organizations increase their demand for information on program effectiveness and outcomes, it has become even more important for students to understand the prevalent approaches and models for evaluation, including approaches based on objectives and logic models, participative, and decision-making approaches. The new tenth edition of *Program Evaluation* not only covers these vital approaches but also teaches readers how to best mix and match elements of different approaches to conduct optimal evaluation studies for individual programs. Helping both students as well as professionals who are new to the field, this text provides practical guidelines for conducting evaluations, from identifying the questions that the evaluation should address, to determining how to collect and analyze evaluative information, to ascertaining how to provide evaluative information to others. Making extensive use of checklists, examples, and other study

College Physics - Hugh D. Young 2019-01-11
For courses in College Physics. Help students see the connections between problem types and understand how to solve them For more than five decades, Sears and Zemansky's *College Physics* has provided the most reliable foundation of physics education for students around the world. With the 11th Edition, author Phil Adams incorporates data from thousands of surveyed students detailing their use and reliance on worked examples, video

tutorials, and need for just-in-time remediation when working homework problems and preparing for exams. Driven by how students actually use the text and media today to prepare for their exams, the new edition adds worked examples and new Example Variation Problems in each chapter to help students see patterns and make connections between problem types. They learn to recognize when to use similar steps in solving the same problem type and develop an understanding for problem solving approaches, rather than simply plugging in an equation. The expanded problem types and scaffolded in-problem support help students develop greater confidence in solving problems, deepen conceptual understanding, and strengthen quantitative-reasoning skills for better exam performance. All new problems sets are available in Mastering Physics with wrong answer specific feedback along with a wealth of new wrong answer feedback, hints, and eTexts links with

20% of end of chapter problems. Also available with Mastering Physics By combining trusted author content with digital tools and a flexible platform, Mastering personalizes the learning experience and improves results for each student. Now providing a fully integrated experience, the eText is linked to many problems within Mastering for seamless integration between homework problems, practice problems, textbook, worked examples, and more.
