The Cambridge Companion to the Guitar - Victor Coelho 2003-07-10

From the first mention in courtly poetry of the thirteenth century to enormous global popularity in the twentieth, the guitar and its development comprises multiple histories, each characterised by distinct styles, playing techniques, repertoires and socio-cultural roles. These histories simultaneously span popular and classical styles, contemporary and historical practices, written and unwritten traditions and western and non-western cultures. This is the first book to encompass the breadth and depth of guitar performance, featuring thirteen essays covering different traditions, styles, and

instruments, written by some of the most influential players, teachers, and guitar historians in the world. The coverage of the book allows the player to understand both the analogies and differences between guitar traditions, and all styles, from baroque, classical, country, blues, and rock to flamenco, African, Celtic, and instrument making will share the same platform. As musical training is increasingly broadened this comprehensive book will become an indispensable resource.

Audiences and Publics - Sonia Livingstone 2005-08-01

In today's thoroughly mass-mediated world, audiences and publics are, of course, composed of the same people. Yet social science traditionally treats them quite differently. Indeed, it is commonplace to define audiences in opposition to the public: in both popular and elite discourses, audiences are denigrated as trivial, passive, individualised, while publics are valued as active, critically engaged and

politically significant.

Africa and the Blues - Gerhard Kubik 2008-04-10

In 1969 Gerhard Kubik chanced to encounter a Mozambican labor migrant, a miner in Transvaal, South Africa, tapping a "cipendani," a mouth-resonated musical bow. A comparable instrument was seen in the hands of a white Appalachian musician who claimed it as part of his own cultural heritage. Through connections like these Kubik realized that the link between these two far-flung musicians is African-American music, the sound that became the blues. Such discoveries reveal a narrative of music evolution for Kubik, a cultural anthropologist and ethnomusicologist. Traveling in Africa, Brazil, Venezuela, and the United States, he spent forty years in the field gathering the material for "Africa and the Blues." In this book, Kubik relentlessly traces the remote genealogies of African cultural music through eighteen African nations, especially in the Western and Central Sudanic Belt. Included is a comprehensive map of this cradle of the blues, along with 31 photographs gathered in his fieldwork. The author also adds clear musical notations and descriptions of both African and African American traditions and practices and calls into question the many assumptions about which elements of the blues were "European" in origin and about which came from Africa. Unique to this book is Kubik's insight into the ways present-day African musicians have adopted and enlivened the blues with their own traditions. With scholarly care but with an ease for the general reader, Kubik proposes an entirely new theory on blue notes and their origins. Tracing what musical traits came from Africa and what mutations and mergers occurred in the Americas, he shows that the African American tradition we call the blues is truly a musical phenomenon belonging to the African cultural world. Gerhard Kubik is a professor in the department of ethnology and African studies at the University of Mainz, Germany. Since 1983 he has been affiliated with the Center for Social Research of Malawi, Zomba. He is a permanent member of the Center for Black Music Research in Chicago and an Honorary Fellow of the Royal Anthropological Institute of Great Britain and Ireland, London.

Mande Music - Eric Charry 2000-10

With *Mande Music*, Eric Charry offers the most comprehensive source available on one of Africa's richest and most sophisticated music

cultures. Using resources as disparate as early Arabic travel accounts, oral histories, and archival research as well as his own extensive studies in Mali, Guinea, Senegal, and the Gambia, Charry traces this music culture from its origins in the thirteenth-century Mali empire to the recording studios of Paris and New York. He focuses on the four major spheres of Mande music—hunter's music, music of the jelis or griots, jembe and other drumming, and guitar-based modern music—exploring how each evolved, the types of instruments used, the major artists, and how each sphere relates to the others. With its maps, illustrations, and musical transcriptions as well as an exhaustive bibliography, discography, and videography, this book is essential reading for those seeking an in-depth look at one of the most exciting, innovative, and deep-rooted phenomena on the world music scene. A compact disc is available separately.

Fourths Tuning - Graham Tippet 2017-09-02

Tune your B and E strings up to C and F respectively and you're in all fourths tuning. The first time I did this it was truly a revelation to me

to have a symmetrical fretboard and get rid of that major third 'bump' from the G to B string in standard tuning. Everything suddenly became far more manageable and logical, and I began to experience a freedom on the fretboard that I'd never quite found in standard tuning. To be honest, there isn't much in the way of material for fourths tuning on guitar, so I decided to write a chords and inversions book for anyone wishing to expand their knowledge of chords in fourths tuning, or to help with the transition from standard to fourths tuning. There are over 30 types of chords and inversions in this book, including open chords, closed and spread voiced triads, plus virtually every other type of chord and inversion you'll need to play anything from rock to jazz. You'll find a logical progression of chord types as well as easy-to-read chord diagrams which present the most essential and usable chords in all fourths tuning on guitar.

Mombelli's Intergalactic Bass Programme Vol. 1
- Carlo Mombelli 2020-03-10

This book is based on the scale types that are necessary in order to master and understand the chord/scale relationships found in many styles of music. By keeping things simple and uncluttered, each page consists of only one scale type, drawn on a bass guitar neck with the correct fingering - a vital part of organising the hands. The more organised the hands, the easier it is to play. The arpeggio shape is also super-imposed over the corresponding scale in order to create an understanding of the chord/scale relationship. This is better explained with diagrams and not notation; however, because it is a good idea to associate finger positions with their notational equivalents, notation is also included. The simple but comprehensive jazz theory section will help the student gain a deeper understanding of harmony and further insight into how to apply the scales found in this book.

Africa Overland - Siân Pritchard-Jones 2009

Be vigilant when driving through Africa: camels are careless when crossing the road, and women carrying waterpots are little more watchful. So warn the authors of this fifth edition of Africa Overland. They also give updated information on each country's political and security situation (Angola, Sierra Leone and Liberia are on the up; since this guide's last edition, security in

Western Sudan and Eastern Chad has turned sour); provide an expanded Route Outlines section including information on border crossings; and offer revised recommendations on vehicles including practical coverage on buying a vehicle, maintenance and driving. 'This is the ultimate roadies' guide to traversing the wilderness of Africa. An indispensable guide to negotiating the uncharted perils of Africa's vast plains.' Daily Express (UK)

The Garland Handbook of African Music - Ruth M. Stone 2010-04-02

The Garland Handbook of African Music is comprised of essays from The Garland Encyclopedia of World Music: Volume 1, Africa, (1997). Revised and updated, the essays offer detailed, regional studies of the different musical cultures of Africa and examine the ways in which music helps to define the identity of this particular area. Part One provides an in-depth introduction to Africa. Part Two focuses on issues and processes, such as notation and oral tradition, dance in communal life, and intellectual property. Part Three focuses on the different regions, countries, and cultures of Africa with selected regional case studies. The second edition has been expanded to include exciting new scholarship that has been conducted since the first edition was published. Questions for Critical Thinking at the end of each major section guide and focus attention on what musical and cultural issues arise when one studies the music of Africa -- issues that might not occur in the study of other musics of the world. An accompanying audio compact disc offers musical examples of some of the music of Africa.

The New Guitarscape in Critical Theory, Cultural Practice and Musical Performance - Kevin Dawe 2017-07-05

In The New Guitarscape, Kevin Dawe argues for a re-assessment of guitar studies in the light of more recent musical, social, cultural and technological developments that have taken place around the instrument. The author considers that a detailed study of the guitar in both contemporary and cross-cultural perspectives is now absolutely essential and that such a study must also include discussion of a wide range of theoretical issues, literature, musical cultures and technologies as they come to bear upon the instrument. Dawe presents a synthesis of previous work on the guitar, but also expands the terms by which the guitar might be studied. Moreover, in order to understand the properties and potential of the guitar as an agent of music, culture and society, the author draws from studies in science and technology, design theory, material culture, cognition, sensual culture, gender and sexuality, power and agency, ethnography (real and virtual) and globalization. Dawe presents the guitar as an instrument of scientific investigation and part of the technology of globalization, created and disseminated through corporate culture and cottage industry, held close to the body but taken away from the body in cyberspace, and involved in an enormous variety of cultural interactions and political exchanges in many different contexts around the world. In an effort to understand the significance and meaning of the guitar in the lives of those who may be seen to be closest to it, as well as providing a critically-informed discussion of various approaches to guitar performance, technologies and techniques, the book includes discussion of the work of a wide range of guitarists, including Robert Fripp, Kamala Shankar, Newton Faulkner, Lionel Loueke,

Sharon Isbin, Steve Vai, Bob Brozman, Kaki King, Fred Frith, John 5, Jennifer Batten, Guthrie Govan, Dominic Frasca, I Wayan Balawan, Vicki Genfan and Hasan Cihat ter.

Trends in African Popular Music - Ikenna Emmanuel Onwuegbuna 2015-07-25

Popular music—an acculturative product of the African folk music—scrutinized along the lines of musical and social processes as inseparable pair in developing the various genres of the eclectic musical form. In Nigeria, it is the congruent collaboration of creativity and politico-socio-economic activities of the mid-1940s (the period following the World War II) that evolved the various genres of popular music of the land—a process that is still in being! The social

processes that span through the diverse fields of economics, politics, linguistics, sociology, philosophy, and religion made up a manifold agency of acculturation, commercialization, urbanization, and class stratifications. Similarly, the musical processes emanating from the folk musical practices of conception, composition, and classification of genres; recruitment of group members and administrative personnel; training, packaging, costuming, and aesthetics; and then the performance proper are carried over into a parallel development of a neo-folk form that became popular. The popularity of the new form is due to a socio-musical interchange that is both structural and functional. The peculiar nature of the product of this new musical expression—pop—therefore presents four possible angles for definition. The definitions could be stylistic, sociological, process- or theory-based. The genres developed include highlife, afrobeat, rock, calypso, disco, hip hop, rhythm 'n' blues, funk, and reggae. However, the star feature of this investigation is the Afro-reggae genre of Nigeria. The primary research process of survey was backed up by historical and descriptive methods to unearth the leaning on the rhythm of social life by popular music artistes to develop the African reggae genre, especially in Nigeria.
