Automotive FDI in Emerging Europe - A. J. Jacobs 2017-06-19

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Korea, Are You at Peace? - J. A. V. Simson 2013-08-12

Is there hope for peace on the Korean peninsula? These deeply personal stories of two Western women reveal the almost unimaginable transformation of Korea from a culturally and politically united peninsula at the end of the nineteenth century into today's dangerously divided land. These two women's experiences bracket the twentieth century, a dark time in Korean history, when the peninsula was occupied by Japan, divided into North and South, and wracked by internal war—becoming an unwilling pawn of Cold-War superpowers. Despite everything, South Korea has emerged as an international economic success story, whereas North Korea has become a totalitarian ideological nightmare in which leaders spew the rhetoric of aggression and develop nuclear weapons. What would it take to heal this political schizophrenia that endangers our entire world?

The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. Automotive Aerodynamics - Joseph Katz 2016-05-02

The automobile is an icon of modern technology because it includes most aspects of modern engineering, and it offers an exciting approach to engineering education. Of course there are many existing books on introductory fluid/aero dynamics but the majority of these are too long, focussed on aerospace and don't adequately cover the basics. Therefore, there is room and a need for a concise, introductory textbook in this area. Automotive Aerodynamics fulfils this need and is an introductory textbook intended as a first course in the complex field of aero/fluid mechanics for engineering students. It introduces basic concepts and

fluid properties, and covers fluid dynamic equations. Examples of automotive aerodynamics are included and the principles of computational fluid dynamics are introduced. This text also includes topics such as aeroacoustics and heat transfer which are important to engineering students and are closely related to the main topic of aero/fluid mechanics. This textbook contains complex mathematics, which not only serve as the foundation for future studies but also provide a road map for the present text. As the chapters evolve, focus is placed on more applicable examples, which can be solved in class using elementary algebra. The approach taken is designed to make the mathematics more approachable and easier to understand. Key features: Concise textbook which provides an introduction to fluid mechanics and aerodynamics, with automotive applications Written by a leading author in the field who has experience working with motor sports teams in industry Explains basic concepts and equations before progressing to cover more advanced topics Covers internal and external flows for automotive applications Covers emerging areas of aeroacoustics and heat transfer Automotive Aerodynamics is a must-have textbook for undergraduate and graduate students in automotive and mechanical engineering, and is also a concise reference for engineers in industry.

The Korean Automotive Industry, Volume 1 - A. J. Jacobs 2022

In 1962, South Korea assembled just 1,100 new automobiles. By 1996, this total had soared to 2,812,714. What explains this remarkable growth? The answer is complex, and involves a combination of a supportive State, timely technology alliances, a skilled but historically low-paid workforce, aggressive pricing, savvy entrepreneurs, and fortuitous circumstances. Despite this amazing ascent, comparatively little has been written about the Korean auto industry in English. In the first of a two-volume set, this 11-chapter book seeks to help fill this void by providing in-depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time (without knowledge of the Asian Fiscal Crisis), the book should prove informative to practitioners, scholars, and students interested in automotive history, international political economy, Asian studies, and more. A.J. Jacobs is Professor of Sociology at East Carolina University, USA.

Born to be Riled - Jeremy Clarkson 2007-01-25

Born to be Riled is a collection of hilarious vintage journalism from Jeremy Clarkson. Jeremy Clarkson, it has to be said, sometimes finds the world a maddening place. And nowhere more so than from behind the wheel of a car, where you can see any number of people acting like lunatics while in control (or not) of a ton of metal. In this collection of classic columns, first published in 1999, Jeremy takes a look at the world through his windscreen, shakes his head at what he sees - and then puts the boot in. Among other things, he explains: • Why Surrey is worse than Wales • How crossing your legs in America can lead to arrest • The reason cable TV salesmen must be punched • That divorce can be blamed on the birth of Jesus Raving politicians, pointless celebrities, ridiculous 'personalities' and the Germans all get it in the neck, together with the stupid, the daft and the ludicrous, in a tour de force of comic writing guaranteed to have Jeremy's postman wheezing under sackfuls of letters from the easily offended. Praise for Jeremy Clarkson: 'Brilliant . . . laugh-out-loud' Daily Telegraph 'Outrageously funny . . . will have you in stitches' Time Out Number-one bestseller Jeremy Clarkson writes on cars, current affairs and anything else that annoys him in his sharp and funny collections. International Industrial Networks and Industrial Restructuring in Central and Eastern Europe - S. Radosevic 2007-05-08

International Industrial Networks and Industrial Restructuring in Central and Eastern Europe analyses the role of international industrial networks in industrial restructuring and corporate growth in central Europe, Russia and Ukraine. It shows that two distinct patterns of international industrial integration - domestic vs. foreign led modernisations - have developed in these two regions which have significant effects on patterns of growth and integration of these economies. International Industrial Networks and Industrial Restructuring in Central and Eastern Europe is based on a number of industry and firm case studies which are analysed and interpreted within the current international business and political economy literature. The publication provides valuable insights to managers and policy-makers who are interested in understanding different strategic options for business activity in Central and East European countries. For the academic reader, it offers a new perspective on international, industrial networks in which theories on strategic management and on industry restructuring and corporate growth are merged into a new view of growth and transformation process.
