Terra Incognita - Ian Goldin 2020-08-27

'Amazing. It would be my desert island choice' Martin Rees 'Fascinating, beautiful, alarming and revelatory use of mapping and infographics' Stephen Fry on EarthTime maps 'An indispensable read' Arianna Huffington From the global impact of the Coronavirus to exploring the vast spread of the Australian bushfires, join authors Ian Goldin and Robert Muggah as they trace the ways in which our world has changed and the ways in which it will continue to change over the next hundred years. Map-making is an ancient impulse. From the moment homo sapiens learnt to communicate we have used them to make sense of our surroundings. But as Albert Einstein once said, 'you can't use old maps to explore a new world.' And now, when the world is changing faster than ever before, our old maps are no longer fit for purpose. Welcome to Terra Incognita. Based on decades of research, and combining mesmerising, state-of-the-art satellite maps with enlightening and passionately argued analysis, Ian and Robert chart humanity's impact on the planet, and the ways in which we can make a real impact to save it, and to thrive as a species. Learn about: fires in the arctic; the impact of sea level rise on cities around the world; the truth about immigration - and why fears in the West are a myth; the counter-intuitive future of population rise; the miracles of health and education that are waiting around the corner, and the reality about inequality, and how we end it. The book traces the paths of peoples, cities, wars, climates and technologies, all on a global scale. Full of facts that will confound you, inform you, and ultimately empower you, Terra Incognita guides readers to a new place of understanding, rather than to a physical location.

The City on the Thames - Simon Jenkins 2020-09-01

By the former editor of the London Times, a vivid, evocative, and deeply knowledgeable history of this unique world capital. London: a settlement founded by the Romans, occupied by the Saxons, conquered by the Danes, and ruled by the Normans. This transformative place became a medieval maze of alleys and courtyards, later to be checkered with grand estates of Georgian splendor. It swelled with industry and became the center of the largest empire in history. And having risen from the rubble of the Blitz, it is now one of the greatest cities in the world. From the prehistoric occupants of the Thames Valley to the preoccupied commuters of today, Simon Jenkins brings together the key events, individuals and trends in London's history to create a matchless portrait of the capital. He masterfully explains the battles that determined how London was conceived and built—and especially the perennial conflict between money and power. Based in part on his experiences of and involvement in the events that shaped the post-war city, and with his trademark color and authority, Simon Jenkins shows above all how London has taken shape over more than two thousand years. Fascinating for locals and visitors alike, this is narrative history at its finest, from the most ardent protector of British heritage.

Walking London, Updated Edition - Andrew Duncan 2016-04-14

Walking London is the essential companion for any urban explorer—visitor or native—committed to discovering the true heart of one of the world's greatest capital cities. In 30 original walks, distinguished historian Andrew Duncan reveals miles of London's endlessly surprising landscape. From wild heathland to formal gardens, cobbled mews to elegant squares and arcades, bustling markets to tranquil villages—Duncan reveals the pick of the famous sights, but also steers walkers off the tourist track and into

the city's hidden corners. Handsomely illustrated with specially commissioned color photographs and complete route maps, the book provides full details of addresses, opening times and the best bars and restaurants to visit en route.

The Ghost Map - Steven Johnson 2006

A historical chronicle of Victorian London's worst cholera outbreak traces the day-by-day efforts of Dr. John Snow, who put his own life on the line in his efforts to prove his previously dismissed contagion theory about how the epidemic was spreading. 80,000 first printing.

Notes from a Public Typewriter - Michael Gustafson 2018-03-27

A collection of confessional, hilarious, heartbreaking notes written anonymously on a public typewriter for fans of PostSecret and Other People's Love Letters. When Michael Gustafson and his wife Hilary opened Literati Bookstore in Ann Arbor, Michigan, they put out a typewriter for anyone to use. They had no idea what to expect. Would people ask metaphysical questions? Write mean things? Pour their souls onto the page? Yes, no, and did they ever. Every day, people of all ages sit down at the public typewriter. Children perch atop grandparents' knees, both sets of hands hovering above the metal keys: I LOVE YOU. Others walk in alone on Friday nights and confess their hopes: I will find someone someday. And some leave funny asides for the next person who sits down: I dislike people, misanthropes, irony, and ellipses ... and lists too. In NOTES FROM A PUBLIC TYPEWRITER Michael and designer Oliver Uberti have combined their favorite notes with essays and photos to create an ode to community and the written word that will surprise, delight, and inspire.

The Curious Map Book - Ashley Baynton-Williams 2015-10-20

Since that ancient day when the first human drew a line connecting Point A to Point B, maps have been understood as one of the most essential tools of communication. Despite differences in language, appearance, or culture, maps are universal touchstones in human civilization. Over the centuries, maps have served many varied purposes; far from mere guides for reaching a destination, they are unique artistic forms, aides in planning commercial routes, literary devices for illuminating a story. Accuracy—or inaccuracy—of maps has been the make-or-break factor in countless military battles throughout history. They have graced the walls of homes, bringing prestige and elegance to their owners. They track the mountains, oceans, and stars of our existence. Maps help us make sense of our worlds both real and imaginary—they bring order to the seeming chaos of our surroundings. With *The Curious Map Book*, Ashley Baynton-Williams gathers an amazing, chronologically ordered variety of cartographic gems, mainly from the vast collection of the British Library. He has unearthed a wide array of the whimsical and fantastic, from maps of board games to political ones, maps of the Holy Land to maps of the human soul. In his illuminating introduction, Baynton-Williams also identifies and expounds upon key themes of map production, peculiar styles, and the commerce and collection of unique maps. This incredible volume offers a wealth of gorgeous illustrations for anyone who is cartographically curious.

Shanghai Homes - Jie Li 2014-11-18

In the dazzling global metropolis of Shanghai, what has it meant to call this city home? In this account—part microhistory, part memoir—Jie Li salvages intimate recollections by successive generations

of inhabitants of two vibrant, culturally mixed Shanghai alleyways from the Republican, Maoist, and post-Mao eras. Exploring three dimensions of private life—territories, artifacts, and gossip—Li re-creates the sounds, smells, look, and feel of home over a tumultuous century. First built by British and Japanese companies in 1915 and 1927, the two homes at the center of this narrative were located in an industrial part of the former "International Settlement." Before their recent demolition, they were nestled in Shanghai's labyrinthine alleyways, which housed more than half of the city's population from the Sino-Japanese War to the Cultural Revolution. Through interviews with her own family members as well as their neighbors, classmates, and co-workers, Li weaves a complex social tapestry reflecting the lived experiences of ordinary people struggling to absorb and adapt to major historical change. These voices include workers, intellectuals, Communists, Nationalists, foreigners, compradors, wives, concubines, and children who all fought for a foothold and haven in this city, witnessing spectacles so full of farce and pathos they could only be whispered as secret histories.

The Address Book - Deirdre Mask 2020-04-14

Finalist for the 2020 Kirkus Prize for Nonfiction | One of Time Magazine's 100 Must-Read Books of 2020 | Longlisted for the 2020 Porchlight Business Book Awards "An entertaining quest to trace the origins and implications of the names of the roads on which we reside." —Sarah Vowell, The New York Times Book Review When most people think about street addresses, if they think of them at all, it is in their capacity to ensure that the postman can deliver mail or a traveler won't get lost. But street addresses were not invented to help you find your way; they were created to find you. In many parts of the world, your address can reveal your race and class. In this wide-ranging and remarkable book, Deirdre Mask looks at the fate of streets named after Martin Luther King Jr., the wayfinding means of ancient Romans, and how Nazis haunt the streets of modern Germany. The flipside of having an address is not having one, and we also see what that means for millions of people today, including those who live in the slums of Kolkata and on the streets of London. Filled with fascinating people and histories, The Address Book illuminates the complex and sometimes hidden stories behind street names and their power to name, to hide, to decide who counts, who doesn't—and why.

Connectography - Parag Khanna 2016-04-19

From the visionary bestselling author of *The Second World* and *How to Run the World* comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains, a world in which the most connected powers—and people—will win. Connectivity is the most revolutionary force of the twenty-first century. Mankind is reengineering the planet, investing up to ten trillion dollars per year in transportation, energy, and communications infrastructure linking the world's burgeoning megacities together. This has profound consequences for geopolitics, economics, demographics, the environment, and social identity. Connectivity, not geography, is our destiny. In *Connectography*, visionary strategist Parag Khanna travels from Ukraine to Iran, Mongolia to North Korea, Pakistan to Nigeria, and across the Arctic Circle and the South China Sea to explain the rapid and unprecedented changes affecting every part of the planet. He shows how militaries are deployed to protect supply chains as much as borders, and how nations are less at war over territory than engaged in tugs-of-war over pipelines, railways, shipping lanes, and Internet cables. The new arms race is to connect to the most markets—a race China is now winning, having launched a wave of infrastructure investments to unite Eurasia around its new Silk Roads. The United States can only regain ground by fusing with its neighbors into a super-continental North American Union of shared resources and prosperity. *Connectography* offers a unique and hopeful vision for the future. Khanna argues that new energy discoveries and technologies have eliminated the need for resource wars; ambitious transport corridors and power grids are unscrambling Africa's fraught colonial borders; even the Arab world is evolving a more peaceful map as it builds resource and trade routes across its war-torn landscape. At the same time, thriving hubs such as Singapore and Dubai are injecting dynamism into young and heavily populated regions, cyber-communities empower commerce across vast distances, and the world's ballooning financial assets are being wisely invested into building an inclusive global society. Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together. Praise for *Connectography* "Incredible . . . With the world rapidly changing and urbanizing, [Khanna's] proposals might be the best way to confront a radically different future."—The Washington Post

"Clear and coherent . . . a well-researched account of how companies are weaving ever more complicated supply chains that pull the world together even as they squeeze out inefficiencies. . . . [He] has succeeded in demonstrating that the forces of globalization are winning."—Adrian Woolridge, *The Wall Street Journal* "Bold . . . With an eye for vivid details, Khanna has . . . produced an engaging geopolitical travelogue."—*Foreign Affairs* "For those who fear that the world is becoming too inward-looking, *Connectography* is a refreshing, optimistic vision."—*The Economist* "Connectivity has become a basic human right, and gives everyone on the planet the opportunity to provide for their family and contribute to our shared future. *Connectography* charts the future of this connected world."—Marc Andreessen, general partner, Andreessen Horowitz "Khanna's scholarship and foresight are world-class. A must-read for the next president."—Chuck Hagel, former U.S. secretary of defense This title has complex layouts that may take longer to download.

A Short History of London - Simon Jenkins 2019-10-10

'Fascinating and timely. Required reading for every developer, planner or councillor who holds London in trust today' Griff Rhys Jones 'Accessible, clear and readable' Rowan Moore, *The Observer*

LONDON: a settlement founded by the Romans, occupied by the Saxons, conquered by the Danes and ruled by the Normans. This unremarkable place - not even included in the Domesday Book - became a medieval maze of alleys and courtyards, later to be chequered with grand estates of Georgian splendour. It swelled with industry and became the centre of the largest empire in history. And rising from the rubble of the Blitz, it is now one of the greatest cities in the world. From the prehistoric occupants of the Thames valley to the preoccupied commuters of today, Simon Jenkins brings together the key events, individuals and trends in London's history to create a matchless portrait of the capital.

'A vivid and deeply well-informed account of London's history' Charles Saumarez Smith, Professor of Cultural History, Queen Mary University of London 'Extremely informative and witty' Roy Porter, author of *London: A Social History* on Landlords to London 'A short, invigorating gallop over two and a half thousand years' Scotsman on *A Short History of Europe*

Mr Beck's Underground Map - Ken Garland 1994

London: A Travel Guide Through Time - Matthew Green 2015-06-18

Step back in time and discover the sights, sounds and smells of London through the ages in this enthralling journey into the capital's rich, teeming and occasionally hazardous past. 'London: A Travel Guide Through Time is easily the most engaging social history of the capital since the books of Liza Picard a decade ago.' - *Londonist* Let time traveller Dr Matthew Green be your guide to six extraordinary periods in London's history - the ages of Shakespeare, medieval city life, plague, coffee houses, the reign of Victoria and the Blitz. We'll turn back the clock to the time of Shakespeare and visit a savage bull and bear baiting arena on the Bankside. In medieval London, we'll circle the walls as the city lies barricaded under curfew, while spinning further forward in time we'll inhale the 'holy herb' in an early tobacco house, before peering into an open plague pit. In the 18th century, we'll navigate the streets in style with a ride on a sedan chair, and when we land in Victorian London, we'll take a tour of freak-show booths and meet the Elephant Man. You'll meet pornographers and traitors, actors and apothecaries, the mad, bad and dangerous to know, all desperate to show you the thrilling and vibrant history of the world's liveliest city.

Drawdown - Paul Hawken 2017-04-18

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the *Drawdown* book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too

interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Atlas of Imagined Places - Matt Brown 2021-09-28

WINNER, Edward Stanford Travel Writing Awards 2022: Illustrated Travel Book of the Year. From Stephen King’s Salem’s Lot to the superhero land of Wakanda, from Lilliput of Gulliver’s Travels to Springfield in The Simpsons, this is a wondrous atlas of imagined places around the world. Locations from film, tv, literature, myths, comics and video games are plotted in a series of beautiful vintage-looking maps. The maps feature fictional buildings, towns, cities and countries plus mountains and rivers, oceans and seas. Ever wondered where the Bates Motel was based? Or Bedford Falls in It’s a Wonderful Life? The authors have taken years to research the likely geography of thousands of popular culture locations that have become almost real to us. Sometimes these are easy to work out, but other times a bit of detective work is needed and the authors have been those detectives. By looking at the maps, you’ll find that the revolution at Animal Farm happened next to Winnie the Pooh’s home. Each location has an extended index entry plus coordinates so you can find it on the maps. Illuminating essays accompanying the maps give a great insight into the stories behind the imaginary places, from Harry Potter’s wizardry to Stone Age Bedrock in the Flintstones. A stunning map collection of invented geography and topography drawn from the world’s imagination. Fascinating and beautiful, this is an essential book for any popular culture fan and map enthusiast.

Vegan London - Serena Lee 2019-01-01

From bangers ‘n’ mash to banh mi, London has one of the most eclectic vegan food scenes in the world, and it’s growing by the day. London A-Z - Geographers' A-Z Map Company 2002

Flash MX developers who need instant on-the-job reminders about the ActionScript language should find O’Reilly’s new ActionScript for Flash MX Pocket Reference useful. This concise reference is the portable companion to the Flash coder’s essential resource, ActionScript for Flash MX: The Definitive Guide by Colin Moock.

Chronicles of Old London - Kevin Jackson 2012-06-01

Discover one of the world’s most fascinating and historic cities through 30 dramatic true stories spanning the rich history of London. Author Kevin Jackson takes readers through more than 2,000 years of British history with exciting essays on topics such as London’s origins, Richard the Lion-Hearted, Geoffrey Chaucer, Henry V, Shakespeare, Queen Victoria, Jack the Ripper, Charles Dickens, Oscar Wilde, the Beatles, and more. In addition, guided walking tours of London’s historic neighborhoods, illustrated with color photographs and period maps, take readers to the places where history really happened.

Charles Booth’s London Poverty Maps - Mary S. Morgan 2019-10-24

This insightful, evocative, and sumptuous volume brings Charles Booth’s landmark survey of late nineteenth-century London to a new audience.

Maps of London and Beyond - Adam Dant 2018-10-26

A spectacular, large-format collection of Adam Dant’s fine art maps giving a unique view of our history and life today. Artist and cartographer Adam Dant surveys London’s past, present and future from his studio in the East End. Beautiful, witty and subversive, his astonishing maps offer a compelling view of history, lore, language and life in the capital and beyond. Traversed by a plethora of colourful characters including William Shakespeare, Charles Dickens, Mary Wollstonecraft and Barbara Windsor, Adam Dant’s maps extend from the shipwrecks on the bed of the Thames to the stars in the sky over Soho. Along the way, he captures all the rich traditions in the capital, from brawls and buried treasure to gin and gentlemen’s clubs. Accompanying text by the artist gives the background to each of the handsome cartographic artworks, revealing his inspirations and artistic process and outlining his cultural allusions. Reproduced in large format, the maps invite the reader to study all the astonishing and often hilarious details within, offering hours of fascination for the curious. Published in conjunction with the Spitalfields Life blog, Maps of London & Beyond includes an extensive interview with Adam Dant by the blog’s founder The Gentle Author.

Mapping Information Landscapes - Andrew Whitworth 2020-06-26

Mapping Information Landscapes presents the first in-depth study of the educational implications of the idea of information literacy as ‘the capacity to map and navigate an information landscape’. Written by a leading researcher in the field, it investigates how teachers and learners can use mapping in developing their ability to make informed judgements about information, in specific places and times. Central to the argument is the notion that the geographical and information landscapes are indivisible, and the techniques we use to navigate each are essentially the same. The book presents a history of mapping as a means of representing the world, ranging from the work of medieval mapmakers to the 21st century. Concept and mind mapping are explored, and finally, the notion of discursive mapping: the dialogic process, regardless of whether a graphical map is an outcome. The theoretical framework of the book weaves together the work of authors including Annemaree Lloyd, Christine Bruce, practice theorists such as Theodore Schatzki and the critical geography of David Harvey, an author whose work has not previously been applied to the study of information literacy. The book concludes that keeping information landscapes sustainable and navigable requires attention to how equipment is used to map and organise those landscapes. How we collectively think about and solve problems in the present time inscribes maps and positions them as resources in whatever landscapes we will draw on in the future. Information literacy educators, whether in libraries, other HE courses, high schools or the workplace, will benefit by learning about how mapping - implicitly and explicitly - can be used as a method of teaching IL. The book will also be useful reading for academics and researchers of information literacy and students of library and information science.

London on Sea - Sarah Guy 2018-04-26

Oh! I do like to be beside the seaside. An inspirational illustrated guide to 50 coastal days out, all within easy reach of London. Swap your oyster card for fresh oysters at Whistable, and trade in city parks for the wide open spaces of Camber Sands. Written by ex-Time Out editor Sarah Guy, London on Sea offers 50 fun days out on the coast with whimsical tone of voice that captures the magic of a day out on the beach.

Timeless entries will feature the best walking routes, where to see breath-taking views, interesting architectural quirks and those local institutions that make each town unique. Destinations include: Southwold, Walberswick, Thorpeness, Aldeburgh, Walton-on-the-Naze, Frinton-on-Sea, Clacton-on-Sea, Southend, Leigh-on-Sea, Whitstable, Herne Bay, Margate, Broadstairs, Ramsgate, Sandwich, Deal, Dover, Folkestone, Hythe, Camber, Hastings, St Leonards, Bexhill, Eastbourne, Seaford, Rottingdean, Brighton,

Worthing, Littlehampton, Bognor Regis, East & West Wittering, Bournemouth.

The London of Sherlock Holmes - Thomas Bruce Wheeler 2011-09-27

All serious Sherlock Holmes enthusiasts want to visit London to see the places mentioned in the Great Detective's adventures. The e-book version of See the London of Sherlock Holmes allows enthusiasts to - visit- London from their home computers, or internet connected TVs. This is achieved by hyperlinking the latitude & longitude addresses in the book to the -Street View- feature in Google Maps. The map coordinates are also GPS addresses for those who visit London with hand-held GPS devices. The book groups the 400+ Sherlock Holmes sites by the nearest underground or railway station. Entering GPS addresses after arriving at the station will generate turn-by-turn directions from one Sherlock Holmes site to another. Six walking tour maps are also included. These are not the usual rambling tours, but walks in Holmes and Watson's footsteps. Finally, for those with a statistical bent, the book lists 454 characters named in the book, and statistically analyzes their titles and occupations.

Consumer Data Research - Paul Longley 2018-04-30

Big Data collected by customer-facing organisations - such as smartphone logs, store loyalty card transactions, smart travel tickets, social media posts, or smart energy meter readings - account for most of the data collected about citizens today. As a result, they are transforming the practice of social science. Consumer Big Data are distinct from conventional social science data not only in their volume, variety and velocity, but also in terms of their provenance and fitness for ever more research purposes. The contributors to this book, all from the Consumer Data Research Centre, provide a first consolidated statement of the enormous potential of consumer data research in the academic, commercial and government sectors - and a timely appraisal of the ways in which consumer data challenge scientific orthodoxies. Praise for Consumer Data Research 'An insightful, state-of-the-art guide into the social and commercial value of applying geographical thinking to the study of consumer data.' Professor Richard Harris, University of Bristol 'An excellent guide to leveraging the value of academic research on valid data. Partnerships based around consumer data should be encouraged and supported by all and their outputs used to better the way we manage the world we live in.' Bill Grimsey, retailer and author of The Vanishing Highstreet 'The use of data from everyday consumer transactions is a potential game-changer for understanding economic and social patterns and trends. This is an excellent overview of the field.' Dr. Tom Smith, Managing Director, Office for National Statistics Data Science Campus

National Geographic Family Reference Atlas 5th Edition - National Geographic 2020-10-06

Show your kids the world with fascinating facts and more than 650 photographs, maps, and graphics covering every country--plus the poles, the oceans, and outer space--in this completely revised edition of National Geographic's beloved family-oriented atlas. This exquisitely updated edition of National Geographic's popular and reader-friendly Family Reference Atlas features authoritative maps, detailed artwork, and explanatory graphics--an indispensable source of information for inquiring minds, young and old. In these richly illustrated pages, every country in the world is represented by a detailed map within its geographical context and also its flag, key statistics, and secondary maps with environmental and population information. Special sections feature maps and facts about the ocean, the solar system, and the universe beyond. Newsworthy topics from climate change and human migration to languages and digital connectivity are explained in maps, graphics, and photos. Fully indexed, and written to engage all ages, this indispensable atlas belongs in every family library.

The A-Z History of London - A-Z Maps 2019-10-03

For the last century A-Z maps have been the trusted and reliable source of mapping for Londoners. As the face of London has changed so have the maps. History of Britain in Maps author, Philip Parker, will outline these changes and reveal how the city has changed over the last one hundred years in this beautiful coffee table book.

London - James Cheshire 2016-10-27

The British Cartographic Society WINNER The BCS Award 2015 WINNER The Stanfords Award for Printed Mapping 2015 WINNER John C Bartholomew Award for Thematic Mapping 2015 In London: The Information Capital, geographer James Cheshire and designer Oliver Uberti join forces to bring you a series of new maps and graphics charting life in London like never before When do police helicopters catch

criminals? Which borough of London is the happiest? Is 'czesc' becoming a more common greeting than 'salaam'? James Cheshire and Oliver Uberti could tell you, but they'd rather show you. By combining millions of data points with stunning design, they investigate how flights stack over Heathrow, who lives longest, and where Londoners love to tweet. The result? One hundred portraits of an old city in a very new way. Dr James Cheshire is a geographer with a passion for London and its data. His award-winning maps draw from his research as a lecturer at University College London and have appeared in the Guardian and the Financial Times, as well as on his popular blog, mappinglondon.co.uk. He is a Fellow of the Royal Geographical Society. Oliver Uberti is a visual journalist, designer, and the recipient of many awards for his information graphics and art direction. From 2003 to 2012, he worked in the design department of National Geographic, most recently as Senior Design Editor. He has a design studio in Ann Arbor, Michigan.

Bloody London - David Fathers 2020-04-02

An entertaining, revealing and beautifully illustrated walking guide to London's horrific history, Bloody London features walks that take in everything from Jack the Ripper's haunts, to the 'Route of the Damned' from Newgate Prison to Tyburn, to Gangland London, to the plague outbreak hotspots and burial pits, to the key places involved in the Great Fire of London, plus many many more iconic and delightfully gruesome moments in London's history. Each walk is beautifully illustrated with a map and gorgeous illustrations, and the book is perfectly pocket-sized so you can easily take it around with you as you go. David Fathers is the king of London walking guides, and Bloody London will delight both those who live in London and those visiting who are looking for a walking guide that's a little bit different.

Introduction to Information Retrieval - Christopher D. Manning 2008-07-07

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

The Capital and the Colonies - Nuala Zahedieh 2010-06-17

This book describes how the mercantile system was made to work as London established itself as the capital of the Atlantic empire.

Londonist Drinks - AA Publishing 2019-10-03

The Londonist writers are excited to be sharing their expert knowledge of some of London's alcoholic and non-alcoholic drinking establishments. Following years of exhaustive research, with the help of some excellent illustrators, this is their guide, from the legendary Londonist 12 Days of Christmas Pub Crawl or an Oliver Reed Bar Crawl to a look at London's most haunted pubs. There is also a history of tea and drinking chocolate and even cocktail recipes. This is a lighthearted miscellany to inspire any drinker in London. The best of London's drinking scene--both present and historic--as brought to you by Londonist, accompanied by a selection of hand-drawn maps and illustrations by some of our favorite artists.

Londonist Mapped - AA Publishing 2018-03

The best of London as brought to you by Londonist, now featuring hand-drawn maps from some of our favorite British illustrators. Londonist is about London and everything that happens in it - and now it's mapped. The city at your fingertips, brought to life by an eclectic group of illustrators. Whether you're looking for something new to do around Brick Lane, or wondering about London's bridges and how they got their names, Londonist's team of contributors know the city and its history inside out. Appealing to map addicts, trivia junkies and Londoners-about town alike, this new compendium showcases hand-drawn maps inspired by some of the best of their writing.

Atlas of the Invisible - James Cheshire 2021-09-02

An unprecedented portrait of the hidden patterns in human society - visualised through the world of data

Humans create data with nearly everything we do. This world of information is invisible, but it shapes society in profound ways. In *Atlas of the Invisible*, award-winning geographer-designer team James Cheshire and Oliver Uberti redefine what an atlas can be. Transforming enormous data sets into rich maps and cutting-edge visualisations, they uncover truths about our past, reflect who we are today, and highlight what we face in the years ahead. With their joyfully inquisitive approach, Cheshire and Uberti explore happiness and anxiety levels around the globe; they trace the undersea cables and cell towers that connect us; they examine hidden scars of geopolitics; and illustrate how a warming planet affects everything from hurricanes to the hajj. Years in the making, *Atlas of the Invisible* invites readers to marvel at the promise and peril of data, and to revel in the secrets and contours of a newly visible world.

[The Image of the City](#) - Kevin Lynch 1964-06-15

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

[London](#) - Jeremy Black 2009

Everyone thinks they know London. Its landmarks have been used in a hundred films, its skyline and riverscape instantly recognizable. For London has been at the centre of the nation's and even the world's attention, on and off, for two thousand years. Yet familiarity does not necessarily bring enlightenment. The very size and bedeviling complexity of the city have the power to obscure and to mesmerize; the unparalleled tangle of experience over such a long period of time can seem impossible to unravel. What, then, was London? It was a capital city, a major port, an economic powerhouse, a magnet for talent and ambition. It was wealthy, populous, central to the nation, cosmopolitan yet self-absorbed and inward-looking. People have always migrated to London, from elsewhere in Britain as well as overseas, either to work or to seek a better life. London was the first modern city, with the world's highest wages and the best standard of living for those in work. Yet London could just as easily be portrayed as a sink of depravity, a seething snakepit of avarice, prostitution and vice, with high death rates and pockets of great poverty and despair. In fact, of course, we cannot really talk of one London at all. Properly speaking, the City - the ancient walled city rather than the financiers' Square Mile of today - is the true London, with its City wards, aldermen, sheriffs and lord mayor, city walls and Tower. But when we think of London now, we casually and understandably include much else besides, including the separate City of Westminster and the no less ancient Borough of Southwark. This new narrative history of London pulls together all of these varied themes - and many others - with great skill, perspective and clarity. Fully illustrated, it gives the most complete and accessible insight into London's 2,000 years of history currently available. **REVIEWS** London: *A History* by Jeremy Black is a beautifully illustrated compendium history that starts at the beginning of London as a settlement and follows through until now. The photographs, maps and paintings make this one history that will keep you turning the pages. A professor of history at Exeter College and the University of Durham, Black is well qualified to write this excellent work, as a graduate of Cambridge and Oxford. His writing style is very interesting, not the boring histories of yore but one which will keep you wanting to read and absorb all you can about this wonderful city. I highly recommend it for any history buff and for anyone who enjoyed the Olympics 2012 in London. Very timely and beautifully done! Bonnie Neely, *Real Travel Adventures*, 2012/09

[The Amateur Historian's Guide to Medieval and Tudor London, 1066-1600](#) - Sarah Valente Kettler 2001

Whether you're an armchair enthusiast for all things "ancient," a dyed-in-the-wool Anglophile, or are simply looking for a new way to experience London, this light-hearted book will delight you.

[Where the Animals Go](#) - James;Uberti Cheshire 2018-07-15

For thousands of years, tracking animals meant following footprints. Now satellites, drones, camera traps, cellphone networks, apps and accelerometers allow us to see the natural world like never before.

Geographer James Cheshire and designer Oliver Uberti take you to the forefront of this animal-tracking

revolution. Meet the scientists gathering wild data - from seals mapping the sea to baboons making decisions, from birds dodging tornadoes to jaguars taking selfies. Join the journeys of sharks, elephants, bumblebees, snowy owls, and a wolf looking for love. Find an armchair, cancel your plans and go where the animals go.

[DK Eyewitness London](#) - DK Eyewitness 2021-05-11

For more than two decades, DK Eyewitness guides have helped travelers experience the world through the history, art, architecture, and culture of their destinations. Expert travel writers and researchers provide independent advice, recommendations, and reviews. Discover guidebooks to hundreds of places around the globe!

A History of the Twentieth Century in 100 Maps - Tim Bryars 2014-12-10

The twentieth century was a golden age of mapmaking, an era of cartographic boom. Maps proliferated and permeated almost every aspect of daily life, not only chronicling geography and history but also charting and conveying myriad political and social agendas. Here Tim Bryars and Tom Harper select one hundred maps from the millions printed, drawn, or otherwise constructed during the twentieth century and recount through them a narrative of the century's key events and developments. As Bryars and Harper reveal, maps make ideal narrators, and the maps in this book tell the story of the 1900s—which saw two world wars, the Great Depression, the Swinging Sixties, the Cold War, feminism, leisure, and the Internet. Several of the maps have already gained recognition for their historical significance—for example, Harry Beck's iconic London Underground map—but the majority of maps on these pages have rarely, if ever, been seen in print since they first appeared. There are maps that were printed on handkerchiefs and on the endpapers of books; maps that were used in advertising or propaganda; maps that were strictly official and those that were entirely commercial; maps that were printed by the thousand, and highly specialist maps issued in editions of just a few dozen; maps that were envisaged as permanent keepsakes of major events, and maps that were relevant for a matter of hours or days. As much a pleasure to view as it is to read, *A History of the Twentieth Century in 100 Maps* celebrates the visual variety of twentieth century maps and the hilarious, shocking, or poignant narratives of the individuals and institutions caught up in their production and use.

City Walks: Paris - Christina Henry de Tessian 2009-07-28

Explore the boulevards and bistros of the City of Light with fifty walking tours highlighting both major landmarks and lesser-known gems. Paris is a perfect city to explore à pied, and this ebook is designed for just that. On each page you'll find an illustrated map and, along with it, insider info on where to eat, drink, stop, and shop. With these fifty self-guided walking adventures you can explore historic sites, from the Arc de Triomphe to the Musée du Louvre, as well as uncover lesser-known gems, from open-air markets and intimate cafes to small museums with world-class art. Choose any page, and Paris is yours for the taking.
