Emergency Medicine MCQs - Waruna De Alwis 2012-10-09
An invaluable self-assessment tool for emergency medicine trainees in Australasia. Emergency Medicine MCQs is an essential

resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian

Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in Emergency Medicine MCQs cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice - from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app - a separate product containing 180 randomised

multiple-choice questions on all the topics within the book.

Clinical Anatomy MCQs - Roger Dalton
2012-11-15

Based on the College of Emergency Medicine anatomy curriculum for the MCEM examination, the book contains 275 multiple choice questions. All anatomical regions are covered including head and neck, thorax, abdomen, upper limb and lower limb. The book contains comprehensive explanatory notes and is an invaluable resource for exam revision. This book will also be useful to medical students and doctors training in surgery, anaesthesia and medicine. Roger Dalton is a Consultant in Emergency Medicine at the Northern General Hospital in Sheffield (UK) and a sports physician. He is the founder and course director of the Sheffield Emergency Medicine MCEM OSCE course, co-founder of MCEM International and director of the Central FCEM course. Roger is the team doctor for Chesterfield FC, a football league (soccer) club,

as well as a one of 4 doctors at Hull Kingston Rovers, a Rugby Superleague club.

MCQs in Clinical Radiology - Prabhakar Rajiah 2005-10-01

Multiple Choice Questions are the most common method of assessing knowledge in radiology.

This book has more than 1000 questions, covering all the essential topics in Gastrointestinal Radiology. The questions have been divided into separate topics, which will enable revising the subjects on a topic basis, with due emphasis on anatomy, techniques and pathology. The questions have been designed on the format used by the Royal College of Radiologists UK, Ireland, Hong Kong, Australia and New Zealand. There is a single question with five stems, which require a true or false response. The answers and detailed explanations are provided at the end of each chapter. This book will be a valuable resource for review and practice prior to the Fellowship exams.

Bibliographies have been provided for further

reading.

Multiple Choice Questions in Pain Management - Rajesh Gupta 2017-08-17

This book presents current clinical knowledge relating to key topics in acute and chronic pain in a multiple choice question (MCQ) format. Individual chapters are devoted to subjects such as the anatomy of pain pathways, pain processing, evaluation of pain, different pain syndromes and pain involving different regions of the body, pharmacologic and physical pain management, neural blockade, and special procedures. Each of the MCQs has four or five answer options in true/false format, and the answers are discussed in detail with provision of suitable references whenever appropriate. *Multiple Choice Questions in Pain Management* will be especially valuable for those who are sitting anesthesia board exams anywhere in the world. It will, for example, meet the needs of candidates for the FRCA examination (in which 20-25% of MCQs relate to pain management) or

the FFPMRCA examination (Fellowship of the Faculty of Pain Medicine of the Royal College of Anaesthetists). In addition, the book will be useful for pain fellows and for all clinicians who are seeking to improve their knowledge of pain management.

Instant Anatomy - Robert H. Whitaker

2016-02-22

Instant Anatomy presents anatomy and anatomical relationships in a simple, unique, schematic manner to aid the speedy understanding and retrieval of anatomical facts.

It shows structures such as nerves and blood vessels in their entirety, unlike the partial, regional presentations given in most textbooks. Covering the major aspects of anatomy, each section presents the relevant structures in double page spreads, with clear, full-colour diagrams on the left and concise text for each structure on the right. This new fifth edition includes more surface anatomy such as new myotome maps, bones of the hands and feet, principles of movement at shoulder and hip and images to clarify the understanding of the inguinal region and the lesser sac of the stomach. Ideal for use alongside a core anatomy textbook, Instant Anatomy is the perfect quick reference guide for medical students, surgeons, radiologists and those in many other specialties. The companion website at www.instantanatomy.net with its podcasts and wide ranging multiple choice questions provide invaluable exam preparation.

Anatomy - M J T Fitzgerald 2013-10-22
Anatomy: 1800 Multiple Choice Questions contains 1,800 multiple choice questions related to anatomy. The questions are supported by illustrations and arranged into nine sections: Upper Limb, Lower Limb, Thorax, Abdomen, Pelvis and Perineum, Head and Neck, Nervous System, Histology, and Embryology. In the Histology section, the questions in each of the six standard formats are arranged in the same

sequence, as follows: the Cell; the Tissues (commencing with the Epithelia and ending with Nervous Tissue); and the Systems (commencing with the Cardiovascular and ending with the Reproductive). Readers will encounter questions dealing with the spine of the scapula, the vein that pierces the clavipectoral fascia, branch of the axillary artery, and the quadriceps femoris muscle. Other topics include muscle pair inserted into iliotibial tract, bony prominences on which you kneel, muscle that flexes hip and knee, and the chromosomal formula of the oocyte at ovulation. This text also discusses the rate of regeneration of peripheral nerves following injury; structures that occupy the carotid sheath; and the location of sphincter urethrae. This book will be extremely valuable to students and teachers of anatomy.

Anatomy & Physiology - 2016

Anatomy for Dental Students - Martin E. Atkinson 2013-03-14

Anatomy for Dental Students, Fourth Edition, demonstrates and explains all the anatomy needed for a modern dentistry undergraduate course. This text covers developmental anatomy, the thorax, the central nervous system, and the head and neck with an emphasis on the practical application of anatomical knowledge. This new edition has been extensively revised and updated in line with contemporary teaching and dental practice. Over 300 new full colour diagrams map all the anatomical regions that dental students need to know, while the lively and accessible text guides the reader's learning. Throughout Clinical Application Boxes demonstrate how the

form and function of anatomy have consequences for clinical practice. Side-lines boxes contain additional descriptions for key anatomical structures. This text is supported by an Online Resource Centre with multiple choice questions, drag and drop figure exercises, and links to key resources to help readers to consolidate and extend their knowledge of anatomy. Anatomy for Dental Students brings together anatomical structure, function, and their relationship to clinical practice, making ideal for today's dental students.

Multiple Choice Questions in Regional Anaesthesia - Rajesh Gupta 2019-07-17

This revised and expanded second edition is a learning and self-assessment tool for the study of regional anesthesia. The first part deals with the basic principles of regional anesthesia and the equipment used. This is followed by sections on peripheral nerve blocks, central neuraxial blocks and pain. Pediatric regional anesthesia is discussed along with the adult blocks. There are

additional MCQs in each section, and new chapters on the anatomy, physiology, assessment and monitoring of acute pain. This book is aimed at those studying for the European Society of Regional Anesthesia Diploma Examinations, regional anesthesia component of FRCA examinations, and exit examinations for regional anesthesia fellowships. It is also relevant to the regional anesthesia component of US Board examinations and the Canadian fellowships in regional anesthesia.

Multiple Choice Questions in Paediatric Surgery

- Dr. Muhammad Khalid Syed 2018-07-16

There is a great shortage of MCQs book in Paediatric surgery. To fulfil that need, Dr Muhammad Khalid Syed has prepared this MCQs book. This book provides in depth knowledge of paediatric surgery. For each question readers are asked to select the one best answer. In majority of questions, it is asked to select the false option out of five possible choices. The purpose of this is to provide an

abundance of correct information directly rather than writing much details in answer. The topics covered in this book include the Abdomen with inguinal area and genitalia, urology, thoracic surgery, head & neck and soft tissue lesions, orthopaedic, trauma, oncology and vascular and lymphatics. In the end there are MCQs related to anatomy required in paediatric surgery. This book will increase your score, for all paediatric surgical examination, General surgical examination (to cover portion of paediatric surgery) and paediatric medicine examination (to covers the differential diagnosis of surgical conditions).

Anatomy Quizbook - Kerry G. Baker 2019-05-09
The Anatomy Quizbook is a series of carefully selected questions addressing core learning in clinically relevant anatomy. It provides the opportunity for both pre-med and medical students to improve their knowledge of anatomy, as well as their performance in tests and examinations. The form of self-testing presented

in the Anatomy Quizbook has many benefits: it is proven to aid retention (Lieberman 2012), it is a very useful method to apply at regular intervals to ensure robust knowledge, and it is extremely beneficial in determining what is known before rather than after a test or exam. Bearing in mind that it is neither necessary nor advisable to learn everything there is to know about anatomy, it is intended that the Anatomy Quizbook be used in conjunction with a comprehensive anatomy textbook such as Clinically Oriented Anatomy (Moore et al, 2014) or Gray's Anatomy for Students (Drake et al, 2015). And whilst the Anatomy Quizbook is intended primarily for students, tutors may also find this a very useful teaching resource.

Core Anatomy - Christopher Dean (Ph. D.) 1996
A thorough but concise explanation of aspects of anatomy essential to students. Logically structured and easy to navigate, these books will be invaluable help to those finding the core concepts of anatomy difficult to grasp, or as a

revision aid (they complement a standard text). Highly illustrated and supplemented with MCQs, the style is friendly. Clinical relevance is highlighted by common fractures etc. of each area.

Multiple Choice Questions in Ophthalmic and Neuroanatomy - O.J. Lehmann 2013-10-22

Multiple Choice Questions in Ophthalmic and Neuroanatomy was written from notes that made by the author while preparing for the College of Ophthalmologists' primary examination. At the time it was difficult to gauge the standard expected as there were no questions available. This book aims to help many candidates who need to learn this sort of anatomy and hopes that its appeal extends beyond budding ophthalmologists and general surgeons to include optometrists and orthoptists. The questions deal with the following topics: osteology; anatomy of the head and neck; vascular anatomy; neuroanatomy; orbital and autonomic anatomy; ocular adnexae

and extraocular muscles; cranial nerves and visual pathway; ocular anatomy; and embryology.

Multiple Choice Questions in Anatomy and Neurobiology for Undergraduates - Michael J. Blunt 2013-10-22

Multiple Choice Questions in Anatomy and Neurobiology for Undergraduates is a collection of multiple choice questions in anatomy and neurobiology for undergraduate students.

Questions are grouped for each visceral system and the nervous system. In the case of the body framework (including peripheral nerves and blood vessels), however, a regional grouping is used. Each question has the corresponding correct answer. This book is comprised of eight chapters covering the upper limb, head and neck, musculoskeletal trunk, lower limb, cardiovascular and respiratory systems, gastrointestinal and genito-urinary systems, and neurobiology. Each chapter contains three types of questions designed to test knowledge in different ways. Type A items involve choosing a single correct answer from five available choices. Type L items are used to elicit information on the cause-effect relationship between sets of data. Type E items call for the perception of one or more correct responses among four alternatives, and the responses may be grouped in five different ways. Most questions are also accompanied by an indication of the percentage of students who obtained the

correct answer on occasions of previous settings and by a biserial correlation coefficient (r biserial), indicative of the capacity of the question to distinguish between more able and less able students. This monograph is primarily intended for medical undergraduates and will also be useful to academic anatomists building up their own question banks.
