Term-Structure Models - Damir Filipovic 2009-07-28

Changing interest rates constitute one of the major risk sources for banks, insurance companies, and other financial institutions. Modeling the term-structure movements of interest rates is a challenging task. This

volume gives an introduction to the mathematics of term-structure models in continuous time. It includes practical aspects for fixed-income markets such as day-count conventions, duration of coupon-paying bonds and yield curve construction; arbitrage theory; short-rate models; the Heath-Jarrow-Morton methodology; consistent term-structure parametrizations; affine diffusion processes and option pricing with Fourier transform; LIBOR market models; and credit risk. The focus is on a mathematically straightforward but rigorous development of the theory. Students, researchers and practitioners will find this volume very useful. Each chapter ends with a set of exercises, that provides source for homework and exam questions. Readers are expected to be familiar with elementary Itô calculus, basic probability theory, and real and complex analysis.

Understanding Molecular Simulation - Daan Frenkel 2001-10-19
Understanding Molecular Simulation: From Algorithms to Applications explains the physics behind the "recipes" of molecular simulation for materials science. Computer simulators are continuously confronted with questions concerning the choice of a particular technique for a given application. A wide variety of tools exist, so the choice of technique requires a good understanding of the basic principles. More importantly, such understanding may greatly improve the efficiency of a simulation

program. The implementation of simulation methods is illustrated in pseudocodes and their practical use in the case studies used in the text. Since the first edition only five years ago, the simulation world has changed significantly -- current techniques have matured and new ones have appeared. This new edition deals with these new developments; in particular, there are sections on: · Transition path sampling and diffusive barrier crossing to simulate rare events · Dissipative particle dynamics as a coarse-grained simulation technique · Novel schemes to compute the long-ranged forces · Hamiltonian and non-Hamiltonian dynamics in the context of constant-temperature and constant-pressure molecular dynamics simulations · Multiple-time step algorithms as an alternative for constraints · Defects in solids · The pruned-enriched Rosenbluth sampling, recoil-growth, and concerted rotations for complex molecules · Parallel tempering for glassy Hamiltonians Examples are included that highlight current applications and the codes of case studies are available on the World Wide Web. Several new examples have been added since the first edition to illustrate recent applications. Questions are included in this new edition. No prior knowledge of computer simulation is assumed.

Major Companies of Europe 1988 - R. M. Whiteside 1988-06-01
Graham & Trotman, a member of the Kluwer Academic Publishers Group, is one of Europe's leading publishers of MAJOR COMPANIES OF EUROPE 1987. Volume 1, BUSINESS information, and publishes company reference contains useful information on over 3000 of the top annuals on other parts of the world as follows: companies in the European Economic Community, MAJOR COMPANIES OF THE ARAB WORLD excluding the UK, nearly 1300 companies which are MAJOR COMPANIES OF NIGERIA covered in Volume 2. Volume 3 covers nearly 1400 of the MAJOR COMPANIES OF ARGENTINA, BRAZIL, top companies within Western Europe but outside the MEXICO AND VENEZUELA European Economic Community. Altogether the three MAJOR COMPANIES OF THE FAR EAST volumes of MAJOR COMPANIES OF EUROPE now MAJOR COMPANIES OF THE U. S. A. provide in authoritative detail, vital information on nearly 5700 of the

largest companies in Western Europe. Please send for a free complete catalogue of the company's books on business management techniques, MAJOR COMPANIES OF EUROPE 1987, Volumes 1 & 2 business law, finance, banking, export markets, oil contain many of the largest companies in the world. The technology, energy resources, pollution control and a area covered by these volumes, the European Economic Community number of other subject areas to: The Editor, Major Community, represents a rich consumer market of over Companies of Europe, Graham & Trotman Ltd, Sterling 270 million people. Advances in Architectural Geometry 2016 - Sigrid Adriaenssens
2016-09-09

The Advances in Architectural Geometry (AAG) symposia serve as a unique forum where developments in the design, analysis and fabrication of building geometry are presented. With participation of both academics and professionals, each symposium aims to gather and present practical work and theoretical research that responds to contemporary design challenges and expands the opportunities for architectural form. The fifth edition of the AAG symposia was hosted by the National Centre for Competence in Research Digital Fabrication at ETH Zurich, Switzerland, in September 2016. This book contains the proceedings from the AAG2016 conference and offers detailed insight into current and novel geometrical developments in architecture. The 22 diverse, peer-reviewed papers present cutting-edge innovations in the fields of mathematics, computer graphics, software design, structural engineering, and the design and construction of architecture.

Introduction to Carbon Capture and Sequestration - Berend Smit
2014-01-10

The aim of the book is to provide an understanding of the current science underpinning Carbon Capture and Sequestration (CCS) and to provide students and interested researchers with sufficient background on the basics of Chemical Engineering, Material Science, and Geology that they

can understand the current state of the art of the research in the field of CCS. In addition, the book provides a comprehensive discussion of the impact of CCS on the energy landscape, society, and climate as these topics govern the success of the science being done in this field. The book is aimed at undergraduate students, graduate students, scientists, and professionals who would like to gain a broad multidisciplinary view of the research that is being carried out to solve one of greatest challenges of our generation. Contents:Energy and ElectricityThe Atmosphere and Climate ModelingThe Carbon CycleIntroduction to Carbon CaptureAbsorptionAdsorptionMembranesIntroduction to Geological SequestrationFluids and RocksLarge-Scale Geological Carbon SequestrationLand Use and Geo-EngineeringList of SymbolsCredits Readership: Students taking courses on environmental sciences and research level individuals who are interested in environmental issues related to CCS. Key Features:The first comprehensive textbook on Carbon Capture and Sequestration (CCS)A comprehensive discussion on the science of CCS and its impact on society and climateA multidisciplinary approach to CCS by the leading US research centers on CCSKeywords:Carbon Capture;Carbon Storage;Carbon Sequestration;Gas Separations

Open Access - Peter Suber 2012-07-20

A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work "open access": digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and

readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

Uumajursiutik unaatuinnamut / Hunter with Harpoon / Chasseur au harpon - Markoosie Patsauq 2021-01-20

Fifty years ago, Markoosie Patsauq, then a bush pilot in his late twenties living in the tiny, isolated High Arctic community of Resolute, spent his spare time quietly writing a story that effectively emerged as the first Indigenous novel released in Canada. Published in English under the title Harpoon of the Hunter in 1970 by McGill-Queen's University Press, that version of the story was Patsauq's own adaptation. In the years that followed the widely acclaimed English edition was translated into many different languages, but what has remained obscured until the present day is the Inuktitut text originally produced by the author. In collaboration with Patsauq, Valerie Henitiuk and Marc-Antoine Mahieu have foregrounded the original Inuktitut text to inform their translations into both English and French. This critical edition, complete with the story in both Inuktitut syllabics and Latin script, utilizes the author's handwritten manuscript as well as interviews with Patsauq to produce a new, rigorous examination of this literary and cultural milestone. This work also includes the first comprehensive account of the critical response to his writing while underscoring the way the much-altered English adaptation from 1970 shaped that response. A momentous achievement that situates a new classic in the twenty-first century, Hunter with Harpoon brings readers back to the roots of Markoosie Patsauq's Inuit story to experience it as it was originally written.

Traction - Gabriel Weinberg 2015-10-06

Most startups don't fail because they can't build a product. Most startups fail because they can't get traction. Startup advice tends to be a lot of platitudes repackaged with new buzzwords, but Traction is something else entirely. As Gabriel Weinberg and Justin Mares learned from their

own experiences, building a successful company is hard. For every startup that grows to the point where it can go public or be profitably acquired, hundreds of others sputter and die. Smart entrepreneurs know that the key to success isn't the originality of your offering, the brilliance of your team, or how much money you raise. It's how consistently you can grow and acquire new customers (or, for a free service, users). That's called traction, and it makes everything else easier—fund-raising, hiring, press, partnerships, acquisitions. Talk is cheap, but traction is hard evidence that you're on the right path. Traction will teach you the nineteen channels you can use to build a customer base, and how to pick the right ones for your business. It draws on inter-views with more than forty successful founders, including Jimmy Wales (Wikipedia), Alexis Ohanian (reddit), Paul English (Kayak), and Dharmesh Shah (HubSpot). You'll learn, for example, how to:

- Find and use offline ads and other channels your competitors probably aren't using
- Get targeted media coverage that will help you reach more customers
- Boost the effectiveness of your email marketing campaigns by automating staggered sets of prompts and updates
- Improve your search engine rankings and advertising through online tools and research

Weinberg and Mares know that there's no one-size-fits-all solution; every startup faces unique challenges and will benefit from a blend of these nineteen traction channels. They offer a three-step framework (called Bullseye) to figure out which ones will work best for your business. But no matter how you apply them, the lessons and examples in Traction will help you create and sustain the growth your business desperately needs.

The Visible Hand - Alfred D. Chandler Jr. 2002

Examines the processes of production and distribution in the U.S. and the ways in which their management has become increasingly systematized

Building an Emergency Plan - 2000-02-03

Building an Emergency Plan provides a step-by-step guide that a cultural institution can follow to develop its own emergency preparedness and response strategy. This workbook is divided into three parts that address the three groups generally responsible for developing and implementing

emergency procedures—institution directors, emergency preparedness managers, and departmental team leaders—and discuss the role each should play in devising and maintaining an effective emergency plan. Several chapters detail the practical aspects of communication, training, and forming teams to handle the safety of staff and visitors, collections, buildings, and records. Emergencies covered include natural events such as earthquakes or floods, as well as human-caused emergencies, such as fires that occur during renovation. Examples from the Barbados Museum and Historical Society, the Museo de Arte Popular Americano in Chile, the Mystic Seaport Museum in Connecticut, and the Seattle Art Museum show how cultural institutions have prepared for emergencies relevant to their sites, collections, and regions.

The Search for Sasquatch (A Wild Thing Book) - Laura Krantz 2022-10-11
Inspired by her popular Wild Thing podcast, journalist Laura Krantz incorporates the scientific method and her journalistic skills to determine if Bigfoot is real. When journalist Laura Krantz discovered that her long-lost cousin, Grover Krantz, a distinguished anthropologist and professor at Washington State University, had devoted much of his career to the search for Bigfoot, she couldn't quite believe it. A natural skeptic and a strong believer in facts, Krantz decided to conduct her own quest for the most famous and elusive mythical creature. The Search for Sasquatch takes readers through the big guy's fun, fascinating, and complex world, posing the question: Could Bigfoot be out there? Exploring the gray area between myth and science, Krantz takes readers on a strange, surreal, and surprising hunt for the fabled Sasquatch—showing us how to challenge our gut assumptions and open our minds to new possibilities, to think critically, and to use the scientific method along the way. The

Search for Sasquatch asks readers to evaluate the evidence it presents and make up their own minds, all while considering why Bigfoot might be important—even if we don't find him.

Sharepoint 2010 - Barcharts, Inc. 2011-05-31

SharePoint 2010 is among the many cutting-edge applications to be found within Microsoft's Office Suite software--our newest 3-panel guide will help you get the most out of this handy tool. The fluff-free content includes important definitions, tips, and step-by-step instructions on how to perform each key function within SharePoint; full-color screen shots are also provided for ease of use.

Electronic Documents in Maritime Trade Law and Practice - Miriam Goldby 2019

This text provides a complete assessment of the use of electronic documents in the international sale of goods carried by sea, analysing practical and legal barriers to the law relative to paperless trade.

Geometry of the Phase Retrieval Problem - Alex Barnett 2022

"Recovering the phase of the Fourier transform is a ubiquitous problem in imaging applications from astronomy to nanoscale X-ray diffraction imaging. Despite the efforts of a multitude of scientists, from astronomers to mathematicians, there is, as yet, no satisfactory theoretical or algorithmic solution to this class of problems. Written for mathematicians, physicists and engineers working in image analysis and reconstruction, this book introduces a conceptual, geometric framework for the analysis of these problems, leading to a deeper understanding of the essential, algorithmically independent, difficulty of their solutions. Using this framework, the book studies standard algorithms and a range of theoretical issues in phase retrieval and provides several new algorithms and approaches to this problem with the potential to improve the reconstructed images. The book is lavishly illustrated with the results of numerous numerical experiments that motivate the theoretical development and place it in the context of practical applications"--

Writing Management - Barbara Czarniawska 1999

The author explores a number of related issues and reflects on the growth and claims of management studies. She writes about the

relationship between facts and metaphors, stories, and data and how these may be represented in genres.

Service innovation management - 2005

PGP & GPG - Michael Lucas 2006

No, you are not paranoid. They are out to read your email. In this engaging and oddly reassuring text, practitioner Lucas describes Pretty Good Privacy (PGP) and Open Source GPG for moderately skilled computer geeks who are unfamiliar with public-key cryptography but want a cheap solution to security woes. He covers cryptography, installing OPENPGP

Central Park - Guillaume Musso 2021-03-16

From the #1 international bestselling author: a woman wakes up on a Central Park bench with no memory of how she got there in this "unpredictable and moving psychological thriller that keeps you holding your breath" (Métro) Alice, a fierce and respected Parisian cop, wakes up on a Central Park bench with no memory of the night before, handcuffed to a complete stranger—a musician named Gabriel. Disoriented, dazed, and with someone else's blood on her shirt, Alice works furiously to reconnect the dots. She remembers clubbing with her friends the night before on the Champs-Élysées. Gabriel claims he was playing a gig in Dublin. Was she drugged? Kidnapped? Why is the gun in her jacket pocket missing a bullet? And whose blood is on her clothes? Over the next twenty-four hours, Alice and Gabriel race across New York in search of answers, stumbling upon a startling set of clues that point to a terrible adversary from the past. Alice must finally confront her memories of hunting the serial killer who took everything from her—a man she thought was dead, until now. From France's #1 bestselling author, *Central Park* is a taut and suspenseful thriller that will keep readers riveted until its final shocking twist.

Néo - 2004

Rafael Lozano-Hemmer - Rudolf Frieling 2020-03-19

This mid-career monograph offers a nuanced perspective on

contemporary artist Rafael Lozano-Hemmer's oeuvre. Rafael Lozano-Hemmer's installations engage the audience in unique and seductive ways--measuring their heart rate, surveilling their faces, even circulating their breath. Often characterized by particular interactions between the work and the viewer, Lozano-Hemmer's art explores themes such as forced cohabitations, power imbalances, and contemporary techniques of surveillance and control. This mid-career retrospective book focuses on works produced over the past two decades. It includes essays that explore the poetic and political dimensions of the artist's work, along with in-depth examinations of four major works--Zoom Pavilion, Vicious Circular Breathing, Voz Alta, and Pulse Room. It also features full-color illustrations of sixteen recent works, including a newly created immersive sound environment, Sphere Packing: Bach. An essential guide to a deeper understanding of the themes that connect these technically sophisticated and emotionally resonant works, this book draws on the idea of an "unstable presence" to communicate the humanity and the anxiety that lie at the center of Lozano-Hemmer's art. Published with the San Francisco Museum of Modern Art

The 4-Hour Work Week - Timothy Ferriss 2011-08-31

A new, updated and expanded edition of this New York Times bestseller on how to reconstruct your life so it's not all about work Forget the old concept of retirement and the rest of the deferred-life plan - there is no need to wait and every reason not to, especially in unpredictable economic times. Whether your dream is escaping the rat race, experiencing high-end world travel, earning a monthly five-figure income with zero management, or just living more and working less, this book is the blueprint. This step-by step guide to luxury lifestyle design teaches: * How Tim went from \$40,000 dollars per year and 80 hours per week to \$40,000 per MONTH and 4 hours per week * How to outsource your life to overseas virtual assistants for \$5 per hour and do whatever you want * How blue-chip escape artists travel the world without quitting their jobs * How to eliminate 50% of your work in 48 hours using the principles of a forgotten Italian economist * How to trade a long-haul career for short work bursts and frequent 'mini-retirements'. This new updated and

expanded edition includes: More than 50 practical tips and case studies from readers (including families) who have doubled their income, overcome common sticking points, and reinvented themselves using the original book as a starting point * Real-world templates you can copy for eliminating email, negotiating with bosses and clients, or getting a private chef for less than £5 a meal * How lifestyle design principles can be suited to unpredictable economic times * The latest tools and tricks, as well as high-tech shortcuts, for living like a diplomat or millionaire without being either.

Highlights of 1999 - United States. National Environmental Satellite, Data, and Information Service 1999

Swarm Intelligent Systems - Nadia Nedjah 2006-06-27

Systems designers have learned that many agents co-operating within the system can solve very complex problems with a minimal design effort. In general, multi-agent systems that use swarm intelligence are said to be swarm intelligent systems. Today, these are mostly used as search engines and optimization tools. This volume reviews innovative methodologies of swarm intelligence, outlines the foundations of engineering swarm intelligent systems and applications, and relates experiences using the particle swarm optimisation.

Montreal's Expo 67 - Bill Cotter 2020-02-03

In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all brought together under the theme "Man and his World." With performers and entertainers of all varieties, restaurants, cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations.

Strategic Human Resource Management - Noel Tichy, Charles Fombrun, Mary Ann Devanna 1981

A Quarter Century of UNIX - Peter H. Salus 1994

Based on interviews with the key software engineers who invented and built the powerful UNIX operating system, this book provides unique insight into the operating system that dominates the modern computing environment. Originating from a small project in a backroom at AT &T Bell Labs, UNIX has grown to be a dominant operating system in the commercial computing world -the operating system responsible for the development of the C programming language and the modern networked environment. Peter Salus is a longtime and well-recognized promoter and spokesman for UNIX and the UNIX community.

Amnesty International Report 2008 - Amnesty International 2008

This annual report documents human rights abuses by governments and armed opposition groups in 150 countries across the world. It provides

an invaluable reference guide to international human rights developments.

Point de repère - 2000

Strategic Knowledge Management Technology - Petter Gottschalk
2005-01-01

Strategic Knowledge Management Technology applies the knowledge-based view of the firm, which builds on the resource-based theory. The value shop is identified as the typical value configuration for knowledge firms. This book applies a stages of growth model for knowledge management technology, where firms develop from the person-to-tools strategy, via the person-to-person strategy and the person-to-documents strategy, to the person-to-systems strategy. The case of law firms is extensively explored. IS/IT strategy for knowledge management is developed within the framework of the Y model.
