Understanding DB2 - Raul F. Chong 2007-12-29
The Easy, Visual Way to Master IBM® DB2 for Linux®, UNIX®, and Windows®—Fully Updated for Version 9.5 IBM DB2 9 and DB2 9.5 provide breakthrough capabilities for providing Information on Demand, implementing Web services and Service Oriented Architecture, and streamlining

information management. Understanding DB2: Learning Visually with Examples, Second Edition, is the easiest way to master the latest versions of DB2 and apply their full power to your business challenges. Written by four IBM DB2 experts, this book introduces key concepts with dozens of examples drawn from the authors' experience working with DB2 in enterprise environments. Thoroughly updated for DB2 9.5, it covers

new innovations ranging from manageability to performance and XML support to API integration. Each concept is presented with easy-to-understand screenshots, diagrams, charts, and tables. This book is for everyone who works with DB2: database administrators, system administrators, developers, and consultants. With hundreds of well-designed review questions and answers, it will also help professionals prepare for the IBM DB2 Certification Exams 730, 731, or 736. Coverage includes Choosing the right version of DB2 for your needs Installing and configuring DB2 Understanding the DB2 environment, instances, and databases Establishing client and server connectivity Working with database objects Utilizing breakthrough pureXML™ technology, which provides for nativeXML support Mastering administration, maintenance, performance optimization, troubleshooting, and recovery Understanding improvements in the DB2 process, memory,

and storage models

Implementing effective database security Leveraging the power of SQL and XQuery
The Modern VAT - Mr.Liam P. Ebrill 2001-11-05

Value-added tax, or VAT, first introduced less than 50 years ago, is now a pivotal component of tax systems around the world. The rapid and seemingly irresistible rise of the VAT is probably the most important tax development of the latter twentieth century, and certainly the most breathtaking. Written by a team of experts from the IMF, this book examines the remarkable spread and current reach of the innovative tax and draws lessons about the design and implementation of the VAT, as experienced by different countries around the world. How efficient is it as a tax, is it fair, and is it suitable for all countries? These are among the questions raised. This highly informative and well-researched book also looks at the likely future of the tax.

Methods and Interdisciplinarity
- Roger Waldeck 2020-01-02

Interdisciplinarity research results from a growing need for multi-perspective methods, and knowledge on complex and multifaceted objects of study. It is not simply scientific research that involves several disciplines, but ultimately, the aim is confronting this knowledge and - if possible - articulating it coherently. Using specific examples, *Methods and Interdisciplinarity* categorizes the different modes of interdisciplinarity and discusses the mechanisms of hybridization between them. On the one hand, the book shows how the same issue can be treated according to various points of view from several disciplines, which can give rise to complementary or even contradictory knowledge. On the other hand, it illustrates how methods from some disciplines make it possible to articulate the qualitative or quantitative approaches of others.

Concise Metals Engineering Data Book - Joseph R. Davis
1997

Research Methods for the Social Sciences - Jerry Wellington 2007-10-18

The aim of this book is to provide an introductory but not simplistic guide to research in the social and behavioural sciences. The book sets out to tackle difficult issues and concepts in a scholarly but accessible manner, providing ample guidance and signposts to further reading. We explore a wide range of questions about research and research methods, including: * What counts as 'good research'? * Research approaches, paradigms, methods and methodology: what are they and what is the difference? * What is the so-called 'qualitative/ quantitative'? * When and where is quantitative research indispensable? * If one suggests that research should be 'scientific' what does that mean? * What methods and methodologies are used in social research? * What is the role of statistics in social and behavioural research? How should statistical evidence be interpreted? * What are the

ways in which research can, and should, be disseminated and presented? This book is aimed as much at the reflective, researching professional as for the professional researcher.

Board Directors and Corporate Social Responsibility - S.

Boubaker 2012-11-14

This volume introduces readers to recent developments in the fields of board of directors and corporate social responsibility. It also provides new insights and perspectives on corporate governance practices in different countries.

The Unschooled Mind -

Howard Gardner 2011-03-29

"I like to invoke the image of figure and ground. In any scene, certain elements stand out as figures, as dominant foci, against a less prominent background, which (ideally) supports the central figure. At present, test scores and rankings have become figures, so dominant that they virtually occlude everything else. In my preferred portrait of education, a well-schooled mind becomes the central figure--a mind that

truly understands disciplinary ways of thinking and one that also encourages respectful and ethical behavior. All the rest--including the instruments of accountability should be in the background, providing support for that central, powerful image. Why the current ideal of school focuses so much on a certain view of knowledge, transmitted in a certain way, and documented in a certain way, is a question for historians and policy makers: That it has taken this turn is a source of regret to those of us who harbor a different view of knowledge and education." -- From the introduction by the author (p. xxviii).

We Can Draw Cars - Corina Jeffries 2022-07-30

"From the first automobiles to the fastest race cars in history, cars are some of the coolest machines around. Readers will learn fun facts about eight amazing cars in history, including Henry Ford's Model T and the McLaren F1 race car. Then, readers will work through step-by-step instructions for drawing each

vehicle. Readers will learn how to follow instructions as they work on each car. This book provides a unique blend of history and STEM for students who want to learn how to draw"--

Public Relations - Joe Marconi 2004

[This book] shows all the most effective planning techniques; how to execute the entire range of programming possibilities, from investor relations and employee relations to cause marketing programs; and all of the important skills, including speech writing, image management and crisis management. [It] gives you ... examples of how the masters have done it profitably for themselves and for their clients. [It also] gives you fingertip access to additional information sources.-Dust jacket.

Inflation in a Growing Economy
- Henry J. Bruton 1961

Barefoot - Zaharia Stancu 1971

Help! My Child Is Hooked on Video Games - Bill Maier 2006

The HELP! series provides highly practical, to-the-point advice for parenting and marriage problems identified as high felt needs from the Focus on the Family audience. The intent of the HELP! series is to offer quick, accessible, practical advice, an overview of the important elements of the topic, and realistic take aways for readers to immediately apply. Also includes additional resource referrals for where to get more help.

Sleepless Souls - Michael MacDonald 1993

Sleepless Souls is a social and cultural history of suicide in early modern England. It traces the rise and fall of the crime of self-murder and explores the reasons why suicide came to be harshly punished in the sixteenth century, and why it was gradually decriminalized in the century and a half following the English Revolution. Michael MacDonald and Terence R. Murphy employ a wide range of records from the

period between 1500 and 1800 in order to place suicide in its contemporary context, and relate its history to political events, religious changes, philosophical fashions, tensions between central government and local communities, class interests, and the communication media. The authors treat the crisis of death by suicide as a lens in which the forces that reshaped the mental outlook of different classes and social groups are reflected.

Portfolio Investment in Developing Countries - Stijn Claessens (red.) 1993

Human rights and criminal procedure - Jeremy McBride 2018-06-18

A practical tool for legal professionals who wish to strengthen their skills in applying the European Convention on Human Rights and the case law of the European Court of Human Rights in their daily work This is the second and expanded edition of a handbook intended to assist judges, lawyers and

prosecutors in taking account of the requirements of the European Convention on Human Rights and its Protocols ("the European Convention") - and more particularly of the case law of the European Court of Human Rights - when interpreting and applying codes of criminal procedure and comparable or related legislation. It does so by providing extracts from key rulings of the European Court and the former European Commission of Human Rights that have determined applications complaining about one or more violations of the European Convention in the course of the investigation, prosecution and trial of alleged offences, as well as in the course of appellate and various other proceedings linked to the criminal process.

Background Reading Material on Intellectual Property - 1988

Creativity and Intelligence - Jacob W. Getzels 2011-03-10
Creativity is one of the most highly valued of human

qualities. It is also one of the most elusive to systematic inquiry. Questions without end have been asked and re-asked. What is the nature of the creative process? Can creative potential be identified before creative achievement? What is the effect of family environment on creative development? What is the relationship between creativity and personality? Between creativity and intelligence? We ourselves begin with the last question, hoping that in the course of seeking an answer we shall throw light on the other issues. The concept of intelligence and the consequent intelligence measure have been used to define individual differences in cognition as if the concept and the measure encompassed the totality of the human mind and imagination. In school, and more recently in other areas requiring intellectual accomplishment, the IQ (or some cognate of it) has become the critical metric on which individuals are evaluated and sorted, given preferment or

denied it. Individual differences in potential for productive thinking have been made synonymous with individual differences in performance on one or another of the numerous intelligence tests. We began our studies with few preconceptions and few presuppositions. We did not begin (as is our more usual preference) with an explicitly stated theoretical framework and a set of formal hypotheses. Instead, we permitted the behavior of the children and our own interests, whatever their conceptual foundation, to lead us from problem to problem and from question to question. That this procedure enabled us sometimes to come upon fascinating new vistas in the behavior of children seemed worth the cost of being often lost in phenomena without relevant explicit concepts to guide our observations.

New Public Administration - H. George Frederickson
1980-09-15

This book is generally about public administration and

particularly about new public administration, a product of the turbulent late 1960s and the 1970s.

Academic & Scientific Poster Presentation - Nicholas Rowe
2017-09-04

This book offers the first comprehensive guide to poster presentation at academic, scientific and professional conferences. Each chapter explores different factors that impact upon how posters function, and how they fit within today's conference practices, as well as provides guidance on how to address compilation and presentation issues with the poster medium. Drawing from fields of education, psychology, advertising and other areas, the book offers examples of how theories may be applied to practice in terms of both traditional paper and electronic poster formats. Importantly, the book offers a critical examination of how academic and scientific posters are able to achieve their potential for knowledge dissemination, networking and knowledge

transfer. The many new and challenging findings provide an evidence-based approach to help both novice and experienced presenters compile effective poster presentations, and to see how poster presentations can best be used to share knowledge, facilitate networking, and promote dialogue. Additionally, educators, employers, and conference organizers may use this book to re-evaluate how conferences meet the needs of today's globally connected peer groups, and the benefit they provide at individual and group levels.

On Leadership - John Gardner
1993-03-12

A searching examination of leadership as it is practiced, or malpracticed, in America today. Includes the elements of motivation, shared values, social cohesion, and institutional renewal.

Needs Analysis and Programme Planning in Adult Education - Prof. PhD Simona Sava
2012-10-30
How to identify, analyse, and assess the various types of

adult learning needs? How to develop programmes tailored to these needs? This study guide is written for postgraduate students preparing to become professional adult educators, as well as for those intending to plan educational programmes for adults. The book covers the various types of adult (learning) needs and provides hints on how to identify, analyse, and assess these needs. It presents typical challenges involved in performing such an analysis as well as theoretical considerations of the concept and types of needs, of diagnosing educational needs and their theoretical understanding. The author draws conclusions on how to develop programmes tailored to the needs identified. With a focus on practical concerns, she illustrates the necessary steps as well as the factors to be considered when designing an educational programme for adults, both in the planning stage and in the stages of implementation and evaluation.

From the Contents: The Importance of Needs Analysis and Programme Planning in Adult Education Needs: Theoretical Considerations Fields of Needs Analysis in an Educational Context Methods of Needs Analysis in Adult Education Needs Analysis for Planning Educational Programmes Steps in Programme Planning in Adult Education

Better Business Regulation in a Risk Society - Alberto Alemanno 2012-09-14

The premise of this volume is that business regulations are expected to grow in the near future as a consequence of the emergence of a “(world) risk society.” Risks related to terrorism, climate change, and financial crises, for example, will penetrate all conditions of life. Increasingly, the decisions and actions of some bring about risks for many in this era of globalization. Controlling these risks implies managing the world through high-quality regulation, with a particular emphasis on businesses and financial institutions. Central to

this approach is the argument that a major, if not the primary, aim of regulation is to internalize externalities, or in a broader context, to repair market failure. Such repair can only be accomplished when the costs are smaller than the welfare gains. Featuring contributions from researchers and policy analysts from the fields of economics, management, law, sociology, political science, and environmental policy, this book focuses on three major topics:

- Social risks and business regulation
- Preconditions for better business regulation
- Theoretical issues related to better business regulation

Collectively, the authors demonstrate that the easier it is for regulated businesses to comply at the lowest costs possible—without jeopardizing the related public goals—the greater the degree of compliance. When successful, the net result is a balance of individual and collective net benefits, and by further implication, sustainable business practice and

economic growth.

Decision Support Systems -

C. W. Holsapple 1996

Tourism Economic Report -

World Tourism Organization
1998

This report represents a major new initiative by the World Tourism Organization. It is the first analysis of the economic contribution of tourism conducted on a country-by-country basis worldwide. The study is complimented by seven essays on specialist economic issues relevant to tourism, contributed by acknowledged authorities in their respective fields.

Racism and the Press -

Teun A. van Dijk 2015-07-24

Originally published in 1991.

This book presents the results of an interdisciplinary study of the press coverage of ethnic affairs. Examples are drawn mainly from British and Dutch newspapers, but data from other countries are also reviewed. Besides providing the reader with a thorough content analysis of the material, the book is the first to

introduce a detailed discourse analytical approach to the study of the ways in which ethnic minorities are portrayed in the press. The approach focuses on the topics, overall news report schemata, local meanings, style and rhetoric of news reports. Highly original, accomplished and penetrating, the book is the fruit of a decade of research into the question of racism and the press, important for ethnic studies, mass communication and media studies, sociology and linguistics.

Certified Professional Medical Auditor CPMA Exam FOCUS Essential Study References 2013 - Exam REVIEW
2013-05-26

According to the AAPC, a Certified Professional Medical Auditor has a good understanding of the knowledge of medical documentation, fraud, abuse, and penalties for documentation and coding violations based on governmental guidelines, and is well trained on medical record auditing skills. Of the

various topics covered in the exam, Auditing, Documentation, Regulatory Standards and Statistical sampling are among those that are most difficult. This book focuses on these exam topics: Auditing, Documentation, Standards and Statistical sampling.

The Management of a Student Research Project - John A Sharp 2017-03-02

The third edition of this popular book has been extensively revised to reflect the changes that have affected student research in higher education in recent years. The ability to carry out research successfully has come to be seen as a 'key transferable skill' required of all higher education students - and The Management of a Student Research Project addresses directly the skill element of this. Furthermore the research process, at all levels, is far more systematized than in the past. The single largest change since the second edition came out in 1996 has been the impact of the World Wide Web

on student research. The third edition has been thoroughly rewritten and developed in response to this. In particular, Chapter 4, 'Literature Searching', has been structured around a sample online search. Throughout, the comments and thoughts of readers of previous editions have been taken into account in framing this third edition. Its aims remain the same - to provide a clear, comprehensive and useful guide to students undertaking research projects in order to improve their chances of a successful outcome.

Building Integrity and Reducing Corruption in Defence - Todor Tagarev 2010

Information Analysis - Robert Galliers 1987

Economic Vitality and Viability - Daniel Daianu 1996

It is a trick of history that Eastern Europe's quest to build viable market economies and democratic policies takes place in a period of diminished economic vitality of Western

Europe. This stark reality affects national policies and real economic and pol

Philosophy of Blockchain Technology - Ontologies -

Nicolae Sfetcu 2019-07-12

About the necessity and usefulness of developing a philosophy specific to the blockchain technology, emphasizing on the ontological aspects. After an Introduction that highlights the main philosophical directions for this emerging technology, in Blockchain Technology I explain the way the blockchain works, discussing ontological development directions of this technology in Designing and Modeling. The next section is dedicated to the main application of blockchain technology, Bitcoin, with the social implications of this cryptocurrency. There follows a section of Philosophy in which I identify the blockchain technology with the concept of heterotopia developed by Michel Foucault and I interpret it in the light of the notational technology developed by Nelson Goodman as a

notational system. In the Ontology section, I present two developmental paths that I consider important: Narrative Ontology, based on the idea of order and structure of history transmitted through Paul Ricoeur's narrative history *Power User's Guide to Sas Graph Templates* - Philip R. Holland 2013-02

Visualising data is a vital part of data analysis and reporting. This book introduces Graph Templates, which have been included in the SAS System since version 9.1.3. In particular, the automatic creation of Graph Templates is described, so anyone can create standardised, reusable and platform-independent graphs. Code samples are provided throughout this book, so you can learn about Graph Templates by following these examples.

The Adventures of Jonathan Gullible - Ken Schoolland 2011-01-01

Translated into more than 40 languages and 44 published editions, "The Adventures of Jonathan Gullible" has won

numerous awards and has been endorsed by Steve Forbes, Walter Williams, John Stossel, Mark Skousen, and Austrian-School economists and educators throughout the world.

The Forgotten Link Between "green" and Economic Success - Stefan Schaltegger 2001

We are Big Data - Sander Klous 2016-06-21

This book demonstrates the inevitability of a continuously growing role of data in our society and it stresses that this role does not need to be threatening: to the contrary, collection and analysis of data can help us prevent traffic jams, suppress epidemics, or produce tailor made medicine. The authors sketch the contours of a new information society, in which everything will be measured from our heartbeat during our morning run to the music we listen to and our walking patterns through department stores and they discuss the resistances within the society that have to

be overcome. Sander Klous holds a PhD in High Energy Physics and contributed to the discovery of the Higgs boson at CERN (Nobel prize 2013).

Klous works at KPMG and is professor in Big Data at the University of Amsterdam. Nart Wielaard is a self-employed consultant and business writer. He develops compelling and clear stories on complex topics for a broad range of clients.

Wielaard specializes in the domain where technology, society and business meet.

Lobbyists, Governments and Public Trust, Volume 2 Promoting Integrity through Self-regulation - OECD

2012-09-20

This second volume of OECD's study on lobbying examines regulation and self-regulation of lobbying.

Borland C++ Builder - Herbert Schildt 2001-01-01

C++ Builder 5 is an integrated development environment for building standalone,

client/server, distributed and Internet-enabled Windows applications. This resource provides an introduction to the operation of the Intergrated Development Enviroment (IDE), the various tools, the debugger, the C++ language and libraries. It also gives coverage of the standard template library (STL) and Windows programming.

The World Book encyclopedia of science [v. 7]. - 1990

Tackling Multiple Discrimination - European Commission. Directorate-General for Employment, Social Affairs and Equal Opportunities. Unit G.4 2007 Methodological approach to the study -- Literature review -- Exploring multiple discrimination from a legal perspective -- Exploring multiple discrimination -- Good practice -- Recommendations and suggestions.
