*Ion Exchange and Solvent Extraction* - Bruce A. Moyer 2009-08-19

The growth in the world's nuclear industry, motivated by peaking world oil supplies, concerns about the greenhouse effect, and domestic needs for energy independence, has resulted in a heightened focus on the need for next-generation nuclear fuel-cycle technologies. *Ion Exchange and Solvent Extraction: A Series of Advances, Volume 19* provides a comprehensive look at the state of the science underlying solvent extraction in its role as the most powerful separation technique for the reprocessing of commercial spent nuclear fuel. Capturing the current technology and scientific progress as it exists today and looking ahead to potential developments, the book examines the overall state of solvent extraction in reprocessing, new molecules for increased selectivity and performance, methods for predicting extractant properties, and actinide-lanthanide group separation. The contributors also explore the simultaneous extraction of radionuclides by mixing extractants, the cause and nature of third-phase formation, the effects of radiation on the solvent and its performance, analytical techniques for measuring process concentrations, new centrifugal contactors for more efficient processing, and new chemistry using novel media. The long-term vision of many professionals in the field entails a proliferation-free nuclear energy economy in which little or no waste is stored or released into the environment and all potential energy values in spent nuclear fuel are recycled. This text opens

a window on that possibility, offering insight from world leaders on the cutting edge of nuclear research.

Lithology, Trace Fossils, and Correlation of Precambrian-Cambrian Boundary Beds, Cassiar Mountains, North-Central British Columbia - William Harold Fritz 1985

Trace fossils from the upper part of the Stelkuz formation (609m +) and from the overlying Boya Formation (400.5 m) permit tentative definition of the Precambrian-Cambrian boundary in the Cassiar Mountains. The strata investigated are below the top of the Lower Cambrian Fallotaspis Zone, a level located 1.5 m above the upper contact of the Boya Formation. The Precambrian-Cambrian boundary is tentatively placed 592 m below this level at a disconformity within the Stelkuz Formation. Correlations with other boundary strata in the Canadian Cordillera suggest the optimum area for further testing ichnofossil ranges is in the Mackenzie Mountains. Intercontinental correlations are also attempted.

*Introduction to Mathematics for Economics with R* - Massimiliano Porto

This book provides a practical introduction to mathematics for economics using R software. Using R as a basis, this book guides the reader through foundational topics in linear algebra, calculus, and optimization. The book is organized in order of increasing difficulty, beginning with a rudimentary introduction to R and progressing through exercises that require the reader to code their own functions in R. All

chapters include applications for topics in economics and econometrics. As fully reproducible book, this volume gives readers the opportunity to learn by doing and develop research skills as they go. As such, it is appropriate for students in economics and econometrics.

**Industrial Organization** - Don E. Waldman 2016-07-01

Written solely for the undergraduate audience, *Industrial Organization: Theory and Practice*, which features early coverage of Antitrust, punctuates its modern introduction to industrial organization with relevant empirical data and case studies to show students how to apply theoretical tools.

Lloyd's Register of British and Foreign Shipping - 1846

Gazetteer of Turkey - Charles L. Burgett 1984

*Lloyd's Register of Shipping 1846* - Lloyd's Register Foundation 1846-01-01

The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.
