Chinese Power (English) -

Do you think Chinese tanks and models are not interesting? Wait to see this book ... Until now is the most complete, detailed and exhaustive study about PLA for modelers ever done. This book is not only having historians in mind but also for modelers and readers that can be interested to know something more about the Chinese army power. After reading this book many modelers will have much more interest in building a Chinese vehicle as next model. Through its pages we will discover not only the power and main weapons of the Chinese PLA since its origins, but also the way to paint them, showing different techniques and camouflages for the Chinese vehicles. The kits which appear in this book, belong to the main Chinese brands, and makes this book the perfect guide not only for modelers and enthusiasts of Chinese tanks and its strange and exotic camouflages but also for any modelers that want to have a reference book. Modelers and historians like Adam Wilder, Kristof Pulinks, Lukasz Orczyyc-Musialek, Lester Plaskitt, Sven Frich, Zach Sex, Gordon Arthur, Lei Xu, Verlag Jochen, Chris Jerret, Oscar Ebrí, Brian Murdoch or David Bocquet give us an idea of the quality of this publication that until now is the most complete, detailed and exhaustive study about PLA for modelers ever done.

Storia dell'IRI. 5. Un Gruppo singolare. Settori, bilanci, presenza nell'economia italiana - Franco Russolillo 2015-01-01T00:00:00+01:00

L'Istituto per la Ricostruzione Industriale (IRI) nasce nel 1933, per volere di Mussolini e su progetto di Alberto Beneduce, con l'intento di evitare il fallimento delle principali banche e imprese italiane e con esso il crollo dell'economia, già provata dalla crisi mondiale esplosa nel 1929. Dal dopoguerra l'Istituto è protagonista prima della ricostruzione e poi del miracolo economico. Dopo le difficoltà emerse negli anni '70 e il programma di ristrutturazione e rilancio degli anni '80, l'IRI conclude la sua attività nel 2002 dopo le operazioni di privatizzazione che contribuiscono in misura significativa al raggiungimento degli obiettivi di finanza pubblica e all'adesione italiana all'euro. Questo volume prende in esame l'intero arco della vita dell'IRI, dalle vicende di alcuni suoi settori di attività ai risultati di bilancio, dalle pratiche di programmazione e controllo al suo impatto sull'economia e sullo sviluppo del paese. L'IRI è stato il prodotto della sua storia, un Gruppo singolare: holding di imprese e strumento della politica economica, con un largo spettro di attività nell'industria e nei servizi. Nella prima parte di questo volume si considerano le vicende di alcuni fra i suoi principali settori: la siderurgia, dai grandi successi nei decenni della crescita alle crisi

della seconda parte degli anni Settanta; le telecomunicazioni, dalla gestione di un monopolio tecnologico ai cambiamenti degli anni Ottanta e Novanta; i casi emblematici dell'Alfa Romeo, della navalmeccanica, della Finmare e dell'Alitalia. Nella seconda parte del volume si analizzano dati e risultati di bilancio dell'IRI e delle sue 'finanziarie'. Si ricostruisce l'evoluzione delle pratiche di controllo e programmazione dell'Istituto in relazione ai mutamenti nella politica economica nazionale. Nella terza parte si analizza il ruolo del Gruppo nell'economia italiana, quale risulta dalla matrice delle interdipendenze settoriali e come agente di diffusione di ricerca, conoscenza e sviluppo tecnologico. Chiude il volume un'ampia bibliografia sul Gruppo IRI.

Наш грузовик - Константин Закурдаев 2015-10-14

В книге собраны воспоминания людей, непосредственными усилиями которых на дороги страны вышли знаменитые автомобили, ставшие по-настоящему этапными для всего отечественного автопрома. Это очень яркие, живые, правдивые воспоминания, на которые наложен след личных переживаний, личного отношения, а главное, личной сопричастности к большому, интересному и очень непростому делу. В этой книге рассказывается о первом советском «магистральнике» МАЗ-6422, преемнике знаменитой «шишиги» ГАЗ-3301, так и не ставшей серийной ульяновской полупортке УАЗ-3727, опытных армейских КраЗух (тема «Открытие»), а также о жизненном пути выдающегося инженера и человека, главного конструктора Минского автозавода Михаила Высоцкого. Автомобиль, автомобильная промышленность, военные автомобили и гражданский коммерческий транспорт, вездеходы и внедорожники, всевозможные спецмашины, военная техника, технические инновации, редкие и известные транспортные средства, их конструирование и разработка, автомобильная наука и технология, автомобили таких знаменитых марок, как ГАЗ, ЗИЛ, КАМАЗ, КРАЗ, МАЗ, НАМИ, Урал, УАЗ – вот основные темы, которые затрагиваются в этой книге.

Fiat - Giorgio Garuzzo 2014-03-28

This book is an authentic historical document, supported by extensive analytical information, in which former Fiat top manager Giorgio Garuzzo passionately recounts his experience within Fiat between 1976 and 1996. It is a narrative from the inside that sheds new light on events that have remained cloaked in mystery: the arrival and departure of Carlo De Benedetti, the "march of the forty thousand", the sacking of Vittorio Ghidella, the clashes between Umberto Agnelli and Cesare Romiti, the Group's involvement in the "clean hands" scandal, the role of Gianni Agnelli and his relationships with his brother and Cesare Romiti and the intervention of Mediobanca. Garuzzo discusses the issues connected with the range of cars and marques, touching on major themes of national or international relevance that were unrelated to Fiat but nonetheless conditioned its activities: terrorism and the unmanageability of the factories, inflation, the devaluation of the lira, the role of the trade unions and the General Confederation of Italian Industry, Japanese competition and European integration.

Smart Energy in the Smart City - Rocco Papa 2016-05-05

This book examines the energy dimension of the smart city from the perspective of urban planning,

providing a complete overview that ranges from theoretical aspects to practical considerations and projects. In addition, it aims to illustrate how the concept of the smart city can enhance understanding of the urban system and foster new forms of management of the metropolis, including with respect to energy supply and use. Specifically, the book explores the different dimensions of the relationship between energy and the city, discusses methodological issues with a special focus on ontological approaches to sustainability, and describes practices, tools, and good examples of energy-related urban planning. The authors represent the main Italian research groups working in the field, Italy being an excellent example of a country exposed to energy problems due to, for example, vulnerability to climate change and lack of primary energy resources. This book will be valuable for students of urban planning, town planners, and researchers interested in understanding the changing nature of the city and the challenges posed by energy issues.

Advanced Direct Injection Combustion Engine Technologies and Development - H Zhao 2009-12-18

Volume 2 of the two-volume set *Advanced direct injection combustion engine technologies and development* investigates diesel DI combustion engines, which despite their commercial success are facing ever more stringent emission legislation worldwide. Direct injection diesel engines are generally more efficient and cleaner than indirect injection engines and as fuel prices continue to rise DI engines are expected to gain in popularity for automotive applications. Two exclusive sections examine light-duty and heavy-duty diesel engines. Fuel injection systems and after treatment systems for DI diesel engines are discussed. The final section addresses exhaust emission control strategies, including combustion diagnostics and modelling, drawing on reputable diesel combustion system research and development. Investigates how HSDI and DI engines can meet ever more stringent emission legislation Examines technologies for both light-duty and heavy-duty diesel engines Discusses exhaust emission control strategies, combustion diagnostics and modelling
