Ethics and the Beast - Tzachi Zamir 2009-02-09

Many people think that animal liberation would require a fundamental transformation of basic beliefs. We would have to give up "speciesism" and start viewing animals as our equals, with rights and moral status. And we would have to apply these beliefs in an all-or-nothing way. But in *Ethics and the Beast*, Tzachi Zamir makes the radical argument that animal liberation doesn't require such radical arguments--and that liberation could be accomplished in a flexible and pragmatic way. By making a case for liberation that is based primarily on common moral intuitions and beliefs, and that therefore could attract wide understanding and support, Zamir attempts to change the terms of the liberation debate. Without defending it, *Ethics and the Beast* claims that speciesism is fully compatible with liberation. Even if we believe that we should favor humans when there is a pressing human need at stake, Zamir argues, that does not mean that we should allow marginal human interests to trump the life-or-death interests of animals. As minimalist as it sounds, this position generates a robust liberation program, including commitments not to eat animals, subject them to factory farming, or use them in medical research. Zamir also applies his arguments to some questions that tend to be overlooked in the liberation debate, such as whether using animals can be distinguished from exploiting them, whether liberationists should be moral vegetarians or vegans, and whether using animals for therapeutic purposes is morally blameless.

Who Is A Jew? - Leonard J. Greenspoon 2015-04-15

Jewish identity is a perennial concern, as Jews seek to define the major features and status of those who "belong," while at the same time draw distinctions between individuals and groups on the "inside" and those on the "outside." From a variety of perspectives, scholarly as well as confessional, there is intense interest among non-Jewish and Jewish commentators alike in the basic question, "Who is a Jew?" This collection of articles draws diverse historical, cultural, and religious insights from scholars who represent a wide range of academic and theological disciplines. Some of the authors directly address the issue of Jewish identity as it is being played out today in Israel and Diaspora communities. Others look to earlier time periods or societies as invaluable resources for enhanced and deepened analysis of contemporary matters. All authors in this collection make a concerted effort to present their evidence and their conclusions in a way that is accessible to the general public and valid for other scholars. The result is a richly textured approach to a topic that seems always relevant. If, as is the case, no single answer appeals to all of the authors, this is as it should be. We all gain from the application of a number of approaches and perspectives, which enrich our appreciation of the people whose

lives are affected, for better or worse, by real-life discussions of this issue and the resultant actions toward exclusivity or inclusivity.

Communication Scenarios for the MRCPCH and DCH Clinical Exams - Rebecca Casans 2011

Revised and expanded aid for clinical MRCPCH and DCH examination candidates, and for paediatric trainees in their day-to-day clinical encounters.

Short Cases for the MRCPCH - Angela Thomson 2005

This book presents 100 of the most common short cases in the format that the candidate would be expected to use in the exam setting. It will also include examples of questions which examiners frequently ask and sample answers, as well as a one-page aide memoire to clinical examination of each body system.

Re-imagining Diffusion and Adoption of Information Technology and Systems: A Continuing Conversation - Sujeet K. Sharma 2021-12-17

This two-volume set of IFIP AICT 617 and 618 constitutes the refereed proceedings of the IFIP WG 8.6 International Working Conference "Re-imagining Diffusion and Adoption of Information Technology and Systems: A Continuing Conversation" on Transfer and Diffusion of IT, TDIT 2020, held in Tiruchirappalli, India, in December 2020. The 86 revised full papers and 36 short papers presented were carefully reviewed and selected from 224 submissions. The papers focus on the re-imagination of diffusion and adoption of emerging technologies. They are organized in the following parts: Part I: artificial intelligence and autonomous systems; big data and analytics; blockchain; diffusion and adoption technology; emerging technologies in e-Governance; emerging technologies in consumer decision making and choice; fin-tech applications; healthcare information technology; and Internet of Things Part II: information technology and disaster management; adoption of mobile and platform-based applications; smart cities and digital government; social media; and diffusion of information technology and systems

MRCPCH Mastercourse - Malcolm Levene 2007-04-30

2008 BMA Medical Book Competition Awards: First Prize Paediatrics Prepared in conjunction with the Royal College of Paediatrics and Child Health (RCPCH), MRCPCH MasterCourse has been constructed as a comprehensive package for trainees facing professional examinations in paediatrics and child health. Career paediatricians sitting the full MRCPCH examination will require the boxed set. This comprises volumes 1 and 2, a DVD containing video clips of clinical scenarios, and PIN access to a website with self-assessment and further learning materials. This provides all the learning materials required for successful completion of the MRCPCH parts 1 and 2 and MRCPCH Clinical. For candidates sitting the Diploma in Child Health (DCH) exams and doctors with a primary-care interest in child health, Volume 1 will be sufficient. A complete multi-media course for the new MRCPCH examination. The written component are produced as attractive, full-colour books written in a problem-orientated style, with full-colour line drawings and colour photographs. Books contain references to video and audio clips on accompanying DVD that comes with the books to help with preparation for the MRCPCH Clinical. The related website offers self-testing questions (in exam style) and answers, links to important paediatric websites (guidelines, etc.), selected content from relevant journals, such as Current Paediatrics, periodic clinical updates etc. An essential purchase for all paediatric trainees in the UK and in other countries where the MRCPCH examination is held, as well as for GPs taking the DCH examination. (Volume 1 only). Planned and written with the latest syllabus of the MRCPCH in mind.

Let Me Say it Now - Rakesh Maria 2020

Clinical Cases and OSCEs in Surgery E-Book - Manoj Ramachandran
2011-11-18

This book of over 140 cases is designed for candidates preparing for all surgical examinations, whether at undergraduate, postgraduate or exit examination level. It will demystify and simplify the clinical assessment of surgical cases and provides invaluable advice on how to achieve success. The text includes top tips, acronyms and up-to-date summaries of current practice based on the authors' personal experience of surgical examinations. Cases are graded in terms of likely appearance in the examinations. Top tips emphasize specific subjects which cause confusion. The text provides advice on the most appropriate time to finish an examination. Examples of the common procedures and props that come up in the skill-based examination format are included. This fully revised Second Edition is now in colour and includes photographs of key manoeuvres performed during specific surgical examination routines. Includes a new section on communication skills. A new co-author in academic surgery joins the project.

Music in the Holocaust - Assistant Professor of History Shirli Gilbert
2005-03-17

Publisher Description

American Book Publishing Record - 2003

And You Shall Surely Heal - Jonathan Wiesen 2009

MRCPCH - R. M. Beattie 2000

In this second edition, new questions have been added and existing material has been updated. The book's hybrid format bridges the gap between standard MCQ books and textbooks. It contains 280 exam-based paediatric MCQs written by a team of subject specialists. Each question is accompanied by the correct answer, plus a page-long subject summary focusing on the specific topics likely to occur in the examination, including lists, mnemonics and bullet points. This new format is a response to requests from exam candidates for longer teaching notes to counteract the need to refer to unnecessarily detailed textbooks.

Diffusion and Adoption of Information Technology - Karlheinz Kautz
2013-06-05

It is well known that the introduction of a new technology in one organization not always produces the intended benefits (Levine, 1994). In many cases, either the receivers do not reach the intended level of use or simply the technology is rejected because it does not match with the expectations (true or false) and the accepted psychological effort to use it. The case of formal methods is a paradigmatic example of continual failures. The published cases with problems or failures only constitute the visible part of a large iceberg of adoption cases. It is difficult to get companies to openly express the problems they had; however, from the experience of the author, failure cases are very common and they include any type of company. Many reasons to explain the failures (and in some cases the successes) could be postulated; however, the experiences are not structured enough and it is difficult to extract from them useful guidelines for avoiding future problems. Generally speaking, there is a trend to find the root of the problems in the technology itself and in its adequacy with the preexistent technological context. Technocratic technology transfer models describe the problems in terms of these aspects. Although it is true that those factors limit the probability of success, there is another source of explanations linked to the individuals and working teams and how they perceive the technology.

Concise Paediatrics, Second Edition - Rachel Sidwell 2020-03-24

Concise Paediatrics, Second Edition is essential reading for all postgraduates training in paediatrics, particularly when preparing for the MRCPCH exam, and for general practice trainees preparing for the DCH exam. As a comprehensive but concise reference to any condition they are likely to encounter on the wards or in the accident and emergency department.

Croatia: Past, Present and Future Perspectives - Matko Marusić
2020-09-24

"Croatia is today popularly known as a beautiful country, with an excellent soccer team, but the rest of its long history is still not well known outside scholarly circles. It is less known for example that Croatia started as an ancient kingdom established in the 7th century. It lost its independence in the 11th century and had a troubled history until the first democratic elections in 1990 and independence in 1991. Since the Great Schism in the 11th century, Croatia has been the easternmost country of the Catholic West facing the Orthodox East. Attacked by the Ottoman Turks in the 15th century, it has been called ever since Antemurale Christianitatis (The Bulwark of Christianity). Croatia went through difficult times during the two World Wars and in the inter-war

and the post-war periods until it won its independence and later gained membership to the European Union in 2013. This book reveals important information about its history, the struggles it endured to gain independence, the key problems of post-communist social and economic transition, and prospects for the future, summarized at the end as an analysis of its strengths and weaknesses, as well as its external threats and opportunities. The book is divided into two parts, "Croatian History Timeline" and "Past in Present and Future", because the Croatian past informs its present and future in a profound way. There are few sources in English that present so many until-now unknown aspects of this European country as does this book. It may be said that it is the first reliable and objective guide to give essential understanding of the Republic of Croatia published so far in the English language"--

Anthropologies of Global Maternal and Reproductive Health - Lauren J. Wallace 2022-01-11

This open access edited book brings together new research on the mechanisms by which maternal and reproductive health policies are formed and implemented in diverse locales around the world, from global policy spaces to sites of practice. The authors – both internationally respected anthropologists and new voices – demonstrate the value of ethnography and the utility of reproduction as a lens through which to generate rich insights into professionals' and lay people's intimate encounters with policy. Authors look closely at core policy debates in the history of global maternal health across six different continents, including: Women's use of misoprostol for abortion in Burkina Faso The place of traditional birth attendants in global maternal health Donor-driven maternal health programs in Tanzania Efforts to integrate qualitative evidence in WHO maternal and child health policy-making *Anthropologies of Global Maternal and Reproductive Health* will engage readers interested in critical conversations about global health policy today. The broad range of foci makes it a valuable resource for teaching in medical anthropology, anthropology of reproduction, and interdisciplinary global health programs. The book will also find readership amongst critical public health scholars, health policy and systems researchers, and global public health practitioners.

Paediatric Exams - Paul Gaon 2005

Pediatric Consultant, Israel. Exam review provides information for those preparing to take pediatric examinations, in particular the MRCPCH Parts 1 and 2. Covers basic physiology and clinical problems that are likely to be encountered. Updated edition includes data on pediatric development. Previous edition: c2000. Softcover.

Education in Human Values - Sathya Sai Baba 1988

The Science of Paediatrics: MRCPCH Mastercourse - Tom Lissauer
2016-03-21

This book is "innovative and original in assisting the reader to apply the principles of science to paediatric practice. Professor Neena Modi, President, Royal College of Paediatrics and Child Health. The Science of Paediatrics, MRCPCH Mastercourse, provides essential background preparation for the MRCPCH Theory and Science examination. It contains an up-to-date review of the application of science to everyday paediatric clinical practice, whether it is interpreting clinical signs or investigations, prescribing drugs or identifying best management. Although this understanding is essential in order to make informed clinical decisions, it is difficult to obtain as it is not usually covered in clinical textbooks. Key features • MRCPCH exam-format questions embedded in each chapter to test understanding • Emphasis on embryology to explain many congenital abnormalities • An overview of the relevant anatomy and physiology • Focus on the application and interpretation of investigations • Examples of recent advances in science and clinical research that have benefited the children's care • All clinical specialties covered by paediatric specialists. • Chapters covering evidence-based paediatrics, statistics, ethics and quality improvement.

Chemical Warfare Agents - Brian J. Lukey 2019-04-11

The first edition of this book, *Chemical Warfare Agents: Toxicity at Low Levels*, was published just prior to the terrorist attacks of September 11, 2001. The second edition titled, *Chemical Warfare Agents: Pharmacology, Toxicology, and Therapeutics*, included new epidemiological and clinical studies of exposed or potentially exposed populations; new treatment concepts and products; improved organization of the national response apparatus addressing the potential for CWA terrorism; and improved diagnostic tests that enable rapid diagnosis and treatment. Since the second edition, the chemical warfare

agent community has worked hard to advance research for protection and treatment and develop/improve response approaches for individuals and definitive care. Consequently, in addition to updating previous chapters, *Chemical Warfare Agents: Biomedical and Psychological Effects, Medical Countermeasures, and Emergency Response*, Third Edition features several new chapters that address the Syrian War, chemical destruction, the Organisation for the Prohibition of Chemical Weapons, biomarkers for chemical warfare agent exposure, field sensors, aircraft decontamination, lung/human on a chip, chemical warfare response decision making, and other research advancements. Features: Describes the newest medical interventions, and the latest technologies deployed in the field, as well as developments in the international response to CW usage highlighting recent events in the Middle East Discusses the latest in organizational/interagency partitioning in terms of responsibilities for emergency response, not just in the United States but at the international level—whether prevention, mitigation, medical care, reclamation, or medico-legal aspects of such response Contains the most current research from bench-level experts The third edition contains the most up-to-date and comprehensive coverage of the question of chemical warfare agent employment on the battlefield or in terrorism. Edited by workers that have been in the field for 35+ years, it remains faithful to the scientific "constants," while evaluating and crediting the advances by the industry that have made us safer.

The Trauma Manual - Andrew B. Peitzman 2008

The thoroughly updated Third Edition of this popular and widely used pocket reference guides the trauma team through every aspect of patient care after injury and before, during, and after acute care surgery—from prehospital care, to resuscitation, treatment of specific organ injuries, priorities in intensive care, and management of special situations. Designed for rapid, on-the-spot information retrieval, this manual will be a staple reference in emergency departments and trauma centers. Flow charts, algorithms, sequential lists, and tables throughout facilitate quick clinical decision-making. More than 200 illustrations demonstrate specific injuries and procedures. Appendices include organ injury scales, tetanus prophylaxis recommendations, and frequently used forms.

Training in Paediatrics - Mark Gardiner 2009-09-10

The complete guide to specialty training in paediatrics. Designed in conjunction with the syllabus and structure of the MRCPCH exams *Paediatric Radiology for MRCPCH and FRCR, Second Edition* - Christopher Schelvan 2020-10-29

Radiology plays a fundamental role in the diagnosis and management of childhood diseases. This is reflected in both paediatric and radiology post graduate exams, where candidates are expected to have a working knowledge of paediatric pathology, clinical manifestations and appropriate radiological investigations. Building on the great success of the first edition, *Paediatric Radiology for MRCPCH and FRCR* retains the popular preexisting structure of the book, but presents an improved variety of clinical cases as well as updated text in-keeping with advances in medical practice and technology. There is more emphasis on cross-sectional imaging, as candidates are increasingly encountering these sophisticated imaging tests in postgraduate exams. Images have been updated, and all the clinical information has been reviewed and revised accordingly. Contains over 100 clinical cases, presented in exam format, with answers overleaf Includes a wide range of common and rare paediatric conditions with supplementary images to illustrate additional points Uses classic examination images, with salient radiological and clinical summaries of each condition - the "hot lists" Carries specific information for paediatricians and radiologists for each case An introductory chapter on the basic concepts of imaging aims to provide the reader with an approach to radiological imaging and an awareness of the different modalities available, with new sections on non-accidental injury and radiation protection.

Endocrine Surgery in Children - Daniel J. Ledbetter 2017-07-31

This book provides in-depth practical advice on how to manage children with endocrine conditions that may benefit from surgery. It is more detailed than general pediatric surgery texts and more surgically oriented than endocrinology texts. The first section is devoted to the thyroid and parathyroid, with detailed discussion of thyroid nodules, thyroid cancer, hyperthyroidism, hyperparathyroidism, and multiple endocrine neoplasia. The second section on the pancreas focuses on nesidioblastosis, islet cell transplantation, the surgical treatment of diabetes, and surgical complications of diabetes. Adrenal disorders are then discussed, followed by a section on the evaluation and management of ovarian and testicular torsion and tumors. The closing section addresses miscellaneous topics such as gynecomastia in boys and growth

restriction surgery. This book will serve as an invaluable reference for all practitioners and trainees who care for children with endocrine problems for which surgery is considered.

Essential Revision Notes in Paediatrics for the MRCPCH - Mark Beattie 2006

Suitable for candidates preparing for the MRCPCH exam, this title includes 24 specialty-based chapters that provide concise information in an accessible format.

MRCPCH 1 - Mark Beattie 2009

Battling Malaria - Institute of Medicine 2006-07-26

Malaria is an infectious disease common to several parts of the world, including Africa, northern South America, and Asia. During their service in the military, U.S. active members may be sent to any part of the world, including parts of the world where Malaria is an issue. In Liberia in 2003, for example, there was a 28 percent attack rate in Marines who spent a short time ashore, and half of the 80 Marines affected needed to be evacuated to Germany. This was not only costly to the U.S. military but dangerous as well. To fight against this disease, there exists a Malaria Vaccine program in the U.S. military. However, there exists a variety of potential vaccine targets for the most severe and important form of malaria; malaria from the species *Plasmodium falciparum*. Issues also arise with the fact that there are three possible stages to create vaccines against-preerythrocytic, blood, or transmission. The Department of Defense (DoD), through the commanding general of the U.S. Army Medical Research and Materiel Command (USAMRMC), requested that the Institute of Medicine (IOM) conduct a programmatic review of the military *Plasmodium falciparum* malaria vaccine research and development program. There was to be a focus on vaccine against the preerythrocytic and blood stages. The IOM formed a committee of 11 experts with collective expertise in malaria vaccine research, parasite immunology, malarial biology, clinical trials and regulatory affairs, industrial and public-sector vaccine development, biologic products research and development (vaccinology), military research and development programs, tropical medicine, and public health. The committee focused different tasks including determining whether the DoD malaria vaccine research and development program is scientifically sound and able to achieve the vaccine program objectives within specified timelines, recommending how to overcome significant, identified barriers, and identifying major strategic goals and timelines based on the material received and presentations made by the DoD's program representatives. *Battling Malaria: Strengthening the U.S. Military Malaria Vaccine Program* presents the committee's findings, current malaria vaccines, and recommendations for the development of the U.S. Military vaccine research.

Bowser the Hound - Thornton Waldo Burgess 1920

When Bowser the Hound gets lost in the Green Forest, Blacky the Crow and other animals decide to help him.

Mishpachah - Leonard J. Greenspoon 2016-10-15

Dictionary definitions of the term mishpachah are seemingly straightforward: "A Jewish family or social unit including close and distant relatives-sometimes also close friends." As accurate as such definitions are, they fail to capture the diversity and vitality of real, flesh-and-blood Jewish families. Families have been part of Jewish life for as long as there have been Jews. It is useful to recall that the family is the basic narrative building block of the stories in the biblical book of Genesis, which can be interpreted in the light of ancient literary traditions, archaeological discoveries, and rabbinic exegesis. Rabbinic literature also is filled with discussions about interactions, rancorous as well as amicable, between parents and among siblings. Sometimes harmony characterizes relations between the parent and the child; as often, alas, there is conflict. The rabbis, always aware of the realities of life, chide and advise as best they can. For the modern period, the changing roles of males and females in society at large have contributed to differing expectations as to their roles within the family. The relative increase in the number of adopted children, from both Jewish and non-Jewish backgrounds, and more recently, the shifting reality of assisted reproductive technologies and the possibility of cloning human embryos, all raise significant moral and theological questions that require serious consideration. Through the studies brought together in this volume, more than a dozen scholars look at the Jewish family in wide variety of social, historical, religious, and geographical contexts. In the process, they explore both diverse and common features in the past and present, and they chart possible courses for Jewish families in the future.

Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Oxford Handbook of Clinical Specialties - Andrew Baldwin 2016-11-24
Covering the core clinical specialties, the Oxford Handbook of Clinical Specialties contains a comprehensive chapter on each of the clinical areas you will encounter through your medical school and Foundation Programme rotations. Now updated with the latest guidelines, and developed by a new and trusted author team who have contemporary experience of life on the wards, this unique resource presents the content in a concise and logical way, giving clear advice on clinical management and offering insight into holistic care. Packed full of high-quality illustrations, boxes, tables, and classifications, this handbook is ideal for use at direct point of care, whether on the ward or in the community, and for study and revision. Each chapter is easy to read and filled with digestible information, with features including ribbons to mark your most-used pages and mnemonics to help you memorize and retain key facts, while quotes from patients help the reader understand each problem better, enhancing the doctor/patient relationship. With reassuring and friendly advice throughout, this is the ultimate guide for every medical student and junior doctor for each clinical placement, and as a revision tool. This tenth edition of the Oxford Handbook of Clinical Specialties remains the perfect companion to the Oxford Handbook of Clinical Medicine, together encompassing the entire spectrum of clinical medicine and helping you to become the doctor you want to be.

Clinical Paediatrics for Postgraduate Examinations - Terence Stephenson 1995

"This book provides an essential guide to the examination of children in the context of the postgraduate clinical examination - MRCP Part II or DCH. The system-by-system approach and notation style are designed to aid revision, and throughout there is advice on how best to impress the examiners as well as make progress with the uncooperative child."--

The British National Bibliography - Arthur James Wells 2002

Approach to Practical Pediatrics - Manish Narang 2011-03-14

Approach to Practical Pediatrics loved to read as an undergraduate and postgraduate student in pediatrics. This book reflects a simplified approach to clinical cases in pediatrics. New chapters packed with information and practical tips have been added on Anthropometry, Health Indicators, High-risk Newborns, and Leukemia. Detailed and updated information have been added about asthma devices in chapter on Instruments while vaccine controversies and newer vaccines have been discussed in chapter on Immunization. This book also covers new ground about differential diagnosis of hepatosplenomegaly, management of thalassemia and simplified approach to paraplegia. Chapter on Protein Energy Malnutrition (PEM) includes recent IAP/WHO guidelines on management of severely malnourished child while chapter on Cardiovascular System includes simplified approach for diagnosis of congenital heart diseases (CHD), recent guidelines on management of CHD and rheumatic heart disease in children. This book helps readers to achieve my goal of learning maximum without wasting time in searching answers from different sources.

IAP Textbook of Pediatric ICU Protocols - Praveen Khilnani 2019-05-31

Liver Disease in Children - Frederick J. Suchy 2021-03-18

Liver disease in children is increasing in prevalence, placing a huge burden on healthcare systems and often requiring long-term management. Offering an integrative approach to the science and clinical practice of pediatric hepatology, this is the definitive reference text for improved diagnosis and treatment strategies. In the new edition of this authoritative text, chapters have been thoroughly revised in line with major advances in the field, such as recognizing the increased frequency of fatty liver disease, and how genetic testing has the potential to establish earlier diagnoses for a variety of diseases. Disorders covered include cholestasis, metabolic disorders and hepatitis, with their presentation across the spectrum of infancy, childhood and adolescence discussed. The indications and surgical aspects of liver transplant are explained and post-transplant care is described in detail. This is a valuable resource for pediatricians, hepatologists, gastroenterologists and all clinicians involved in the care of children with liver diseases.
