The Sociology of Art (Routledge Revivals) - Arnold Hauser 2012-11-12
First published in 1982, The Sociology of Art considers all forms of the arts, whether visual arts, literature, film, theatre or music from Bach to the Beatles. The last book to be completed by Arnold Hauser before his death in 1978, it is a

total analysis of the spiritual forces of social expression, based upon comprehensive historical experience and documentation. Hauser explores art through the earliest times to the modern era, with fascinating analyses of the mass media and current manifestations of human creativity. An extension and completion of his earlier work, *The Social History of Art*, this volume represents a summing up of his thought and forms a fitting climax to his life's work. Translated by Kenneth J. Northcote.

Improving Intercultural Interactions - Kenneth Cushner 1997-04-21

Taking an educational model for counselling, this volume presents training modules relevant for a variety of circumstances from the world of business to that of education. Included throughout are practical exercises and self-

assessment questions which promote cultural awareness. The volume is a companion to *Improving Intercultural Interactions* - the third volume in the *Multicultural Aspects of Counseling* series. It builds upon Volume Three to address a new cluster of topics specific to various types of intercultural experience. These include: ethics; ethnocultural identification; conflict and mediation across cultures; empathy; and cross-cultural communication.

Sociocultural Research on Mathematics Education - Bill Atweh 2013-03-07

This volume--the first to bring together research on sociocultural aspects of mathematics education--presents contemporary and international perspectives on social justice and equity issues that impact mathematics education. In particular, it highlights the importance of three interacting and powerful factors--gender, social, and cultural dimensions.

Sociocultural Research on Mathematics Education: An

International Perspective is distinguished in several ways: * It is research based. Chapters report on significant research projects; present a comprehensive and critical summary of the research findings; and offer a critical discussion of research methods and theoretical perspectives undertaken in the area. * It is future oriented, presenting recommendations for practice and policy and identifying areas for further research. * It deals with all aspects of formal and informal mathematics education and applications and all levels of formal schooling. As the context of mathematics education rapidly changes--with an increased demand for mathematically literate citizenship; an increased awareness of issues of equity, inclusivity, and accountability; and increased efforts for globalization of curriculum development and research--questions are being raised more than ever before about the problems of teaching and learning mathematics from a non-cognitive science

perspective. This book contributes significantly to addressing such issues and answering such questions. It is especially relevant for researchers, graduate students, and policymakers in the field of mathematics education.

Timing for Animation, 40th Anniversary Edition - Harold Whitaker 2021-01-27

Timing for Animation has been one of the pillars of animation since it was first published in 1981. Now this 40th anniversary edition captures the focus of the original and enhances this new edition with fresh images, techniques, and advice from world-renowned animators. Not only does the text explore timing in traditional animation, but also timing in digital works. Vibrant illustrations and clear directions line the pages to help depict the various methods and procedures to bring your animation to life. Examples include timing for digital production, digital storyboarding in 2D, digital storyboarding in 3D, and the

use of After Effects, as well as interactive games, television, animals, and more. Learn how animated scenes should be arranged in relation to each other, how much space should be used, and how long each drawing should be shown for maximum dramatic effect. All you need to breathe life into your animation is at your fingertips with Timing for Animation. Key Features: Fully revised and updated with modern examples and techniques Explores the fundamentals of timing, physics, and animation Perfect for the animation novice and the expert Get straight to the good stuff with simple, no-nonsense instruction on the key techniques like stretch and squash, animated cycles, overlapping, and anticipation. Trying to time weight, mood, and power can make or break an animation—get it right the first time with these tried and tested techniques. Authors Harold Whitaker was a BAFTA-nominated professional animator and educator for 40 years; many of his students

number among today's most outstanding animation artists. John Halas, known as "The father of British animation" and formerly of Halas & Batchelor Animation Studio, produced more than 2,000 animation films, including the legendary Animal Farm (1954) and the award-winning Dilemma (1981). He was also the founder and president of the International Animated Film Association (ASIFA) and former Chairman of the British Federation of Film Societies. Tom Sito is Professor of Animation at the University of Southern California and has written numerous books and articles on animation. Tom's screen credits include Shrek (2001) and the Disney classics Who Framed Roger Rabbit (1988), The Little Mermaid (1989), Beauty and the Beast (1991), Aladdin (1992), and The Lion King (1994). In 1998, Tom was named by Animation Magazine as one of the 100 Most Important People in Animation.

Teaching Morality and Religion - Alan Harris

2018-12-07

First published in 1976. It can be argued that both moral and religious education are undervalued in schools. The author, Alan Harris, believes that too many people think of them as indoctrinatory subjects with moral educators' telling people what they ought to do and religious educators telling them what they ought to believe. By a combination of practical examples of both good and bad teaching from the classroom and clear, analytical examination of what is meant by moral and religious education, the author shows that the object of both subjects should be to help pupils form their own judgements.

from accelerated learning to speed training time, improve results, and reduce costs. Accelerated learning is the use of music, color, emotion, play, and creativity to involve the whole student and enliven the learning experience. The Accelerated Learning Handbook is the first definitive book to explain state-of-the-art accelerated learning techniques to trainers and teachers, and features 40 techniques designed to save money while producing far better results. Leading expert Dave Meier provides an overview of the background and underlying principles of accelerated learning, and reviews the latest supporting research results. Training professionals will look to The Accelerated Learning Handbook to: Improve the long-term value of training Cut course development time by half Discover tips for music- and computer-based learning Perspectives in Sociology - E.C. Cuff 2005-08-31 Perspectives in Sociology provides students with a lively

and critical introduction to sociology and to the ways in which sociologists are trained to think and work. The subject is presented as a sequence of different perspectives on the social world, all of them interrelated, sometimes in conflict with one another, and all contributing important and necessary insights. The discussion is backed up by extensive reference to empirical studies. This edition has been completely revised. A chapter on critical theory has been added in order to reflect the extensive work and thinking that Marx's basic work continues to stimulate. The chapter on research strategies now takes account of new developments in the philosophy of science that are relevant for sociological approaches. Throughout, the authors have rewritten extensively in their continuing desire to produce clarity, and to respond to the comments of students and teachers.

Prophetic Character Building: Tema Pokok Pendidikan Akhlak Menurut al-Ghazali - Akhmad Sidiq 2018-01-01

Tulisan ini mencoba merekonstruksi pemikiran al-Ghazali tentang upaya pembentukan karakter dalam perspektif kenabian (profetik) melalui penyucian dan pemberdayaan rohani, dari rohani buruk menjadi rohani mulia, rohani yang rabbâni hingga menjangkau derajat sufi (waliyullah). Sebuah upaya pemberdayaan segenap potensi manusia dengan substansi hakikinya yang agung guna diantar kembali ke hadrah ilâhiyah. Tulisan ini adalah follow up dari jawaban al-Ghazali, saat kami saling berdekapan erat dalam bilik cahaya dalam ru'yah shâdiqah, tentang cara yang ditempuh

hingga ia dapat “menemui” al-Haqq. Saat itu ia menjawab: “Takhalluq bi akhlâqillâh.”

Strategic Education Research Partnership - National Research Council 2003-07-25

Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly coupled with practice. Much of the research is carried out in school settings. Research influences educational practice, and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership (SERP) is designed to make this vision a reality. It proposes a large-scale, coherent program of research and development that would put the problems of educational practice at its center, and focus on all stages necessary to influence practice. These include theory testing, the development and evaluation of instructional programs, the study of practice

in context, and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of linking research and practice. It is a call to mobilize the nation's resources and political will, the power of scientific research, and the expertise of our educators, to create a more effective research and development program for improving student learning.

Mathematics: A Concise History and Philosophy - W.S. Anglin 2012-12-06

This is a concise introductory textbook for a one-semester (40-class) course in the history and philosophy of mathematics. It is written for mathematics majors, philosophy students, history of science students, and (future) secondary school mathematics teachers. The only prerequisite is a solid command of precalculus mathematics. On the one hand, this book is designed to help mathematics majors acquire a philosophical and cultural understanding of their subject

by means of doing actual mathematical problems from different eras. On the other hand, it is designed to help philosophy, history, and education students come to a deeper understanding of the mathematical side of culture by means of writing short essays. The way I myself teach the material, students are given a choice between mathematical assignments, and more historical or philosophical assignments. (Some sample assignments and tests are found in an appendix to this book.) This book differs from standard textbooks in several ways. First, it is shorter, and thus more accessible to students who have trouble coping with vast amounts of reading. Second, there are many detailed explanations of the important mathematical procedures actually used by famous mathematicians, giving more mathematically talented students a greater opportunity to learn the history and philosophy by way of problem solving.

Teaching the Spoken Language

- Gillian Brown 1983-11-24
Teaching the Spoken Language is about teaching the spoken language. It presents in a highly accessible form the results of the author's important research on teaching and assessing effective spoken communication. The authors examine the nature of spoken language and how it differs from written language both in form and purpose. A large part of it is concerned with principles and techniques for teaching spoken production and listening comprehension. An important chapter deals with how to assess spoken language. The principles and techniques described apply to the teaching of English as a foreign and second language, and are also highly relevant to the teaching of the mother tongue.

Parental Involvement in Childhood Education - Garry

Hornby 2011-04-07

Parental participation has long been recognized as a positive factor in children's education. Research consistently shows that parents' contributions to their children's education lead to improvements in their academic and behavioral outcomes, from elementary through middle and secondary school. Recognizing the critical role of school psychologists in this equation, *Parental Involvement in Childhood Education* clearly sets out an evidence-based rationale and blueprint for building parental involvement and faculty awareness. The author's starting point is the gap between the ideals found in the literature and the reality of parental involvement in schools. An ecological analysis identifies professional, institutional, and societal factors that keep schools and parents distant. Methods for evaluating parental involvement are detailed, as is a model for developing and maintaining strong parental relationships at the instructor,

school, and education system level, with an emphasis on flexible communication and greater understanding of parents' needs. This empirically sound coverage offers readers: A detailed understanding of obstacles to parental involvement. An evidence-based model for parental participation. A three-nation study of parental involvement practices in schools. Guidelines for implementing parental involvement activities and initiatives. A review of effective communication strategies with parents. Analysis of key interpersonal skills for effective work with parents. *Parental Involvement in Childhood Education* is essential reading for practitioners and researchers in school psychology and counseling, social work, and educational psychology, whether they work directly with schools or in providing training for teachers and other professionals who work with children and their parents.

Introduction to the Sociology of Language - Fernando Peñalosa 1981

Strategies for Cultural Change

- Paul Bate 2013-10-22

Strategies for Cultural Change develops a conceptual framework for thinking about cultural change. Starting with a discussion of the vocabulary (the concepts) of cultural change, the book moves on to the grammar (the thinking structures), and finally the "oral" practice (the applications) of cultural change in the organizational setting. Four main questions are addressed: Why change culture? Is planned cultural change possible? What kind of cultural change is envisaged? How does cultural change occur? The book contains 14 chapters organized into two parts. Part One examines the different types of cultural change strategy in some depth. "Developmental" and

""transformational"" strategies are then brought together into a single conceptual framework for cultural change. Part Two shifts from strategy to implementation; from thinking frameworks to frameworks for action. It begins by surveying current practice and examines the various, often strikingly different, ways in which people seek to effect cultural change in their organizations.

Accounts are presented based both on the author's own first-hand experiences of working with private and public sector companies on cultural change programs, and on an extensive review of the available literature.

Beginnings & Beyond: Foundations in Early Childhood Education - Ann Gordon 2016-01-01

The primary strength of BEGINNINGS AND BEYOND: FOUNDATIONS IN EARLY CHILDHOOD EDUCATION, 10th Edition, is its blend of simplicity and depth. In a clear and easy-to-understand style, the book lays out basic questions any student of early childhood education would want answered -- and presents key concepts, the latest research, and practical examples so that questions are thoroughly answered.

Coverage of the current Developmentally Appropriate Practices (DAP) is woven throughout the text, as is material on diversity and development, which enables readers to understand that issues of age, gender, race/ethnicity, ability, and family are part of every aspect of teaching and learning. Every chapter has a feature focused

on how brain-based research is connected to development, and another that highlights intentional teaching. Through its tone, visuals, and pedagogy, the book is accessible to and respectful of readers with a range of abilities and learning styles. Parenting - Susan Golombok 2014-02-25

Parenting: What Really Counts? examines the scientific evidence on what really matters for children's healthy psychological development. The first section considers whether it is necessary to have two parents, a father present,

parents who have a genetic link with their child, or parents who are heterosexual. Section two explores the psychological processes that underlie optimal development for children, particularly the quality of the child's relationship with parents, other family members and the wider social world. Contrary to common assumptions, Susan Golombok concludes that family structure

makes little difference to children's day-to-day experiences of life. As well as for students, researchers and teachers, *Parenting: What really counts?* will be of great interest to parents and those thinking of embarking on a non-traditional route to parenthood. It will also be welcomed by professionals working with families and those involved in the development of family policy.
