*NATO's Democratic  
Retrenchment* - Henrik B.L.  
Larsen 2019-07-02

Exploring NATO's post-Cold War determination to support democracy abroad, this book addresses the alliance's adaptation to the new illiberal backlashes in Eastern Europe, the Western Balkans and Afghanistan after the alleged 'return of history'. The book engages the question of what has driven NATO to pursue democratisation in face of the significant region-specific challenges and what can explain policy expansion or

retrenchment over time. Explaining NATO's adaptation from the perspective of power dynamics that push for international change and historical experience that informs grand strategy allows wider inferences not only about democratisation as a foreign policy strategy but also about the nature of the transatlantic alliance and its relations with a mostly illiberal environment. Larsen offers a theoretical conception of NATO as a patchwork of one hegemonic and several great power interests that converge or diverge in the formulation of common policy, as opposed to NATO as a community of universal values. This volume will appeal to researchers of transatlantic relations, NATO's functional and geographical expansion, hegemony and great power politics, democracy promotion, lessons of the past, (Neoclassical) Realism, alliance theory, and the crisis of the liberal world order.

SCION: A Secure Internet Architecture - Adrian Perrig

2017-10-13

This book describes the essential components of the SCION secure Internet architecture, the first architecture designed foremost for strong security and high availability. Among its core features, SCION also provides route control, explicit trust information, multipath communication, scalable quality-of-service guarantees, and efficient forwarding. The book includes functional specifications of the network elements, communication protocols among these elements, data structures, and configuration files. In particular, the book offers a specification of a working prototype. The authors provide a comprehensive description of the main design features for achieving a secure Internet architecture. They facilitate the reader throughout, structuring the book so that the technical detail gradually increases, and supporting the text with a glossary, an index, a list of abbreviations, answers to frequently asked questions,

and special highlighting for examples and for sections that explain important research, engineering, and deployment features. The book is suitable for researchers, practitioners, and graduate students who are interested in network security.

**Between Dreams and Realities** - Sartaj Aziz 2020

This book attempts to demonstrate that only a genuine democratic dispensation can ensure its survival as a viable federation.

Sartaj Aziz argues that the vitality of a nation comes primarily from the value system, cultural heritage, and social energy of its people.

**The Longest August** - Dilip Hiro 2015-02-24

The partitioning of British India into independent Pakistan and India in August 1947 occurred in the midst of communal holocaust, with Hindus and Sikhs on one side and Muslims on the other. More than 750,000 people were butchered, and 12 million fled their homes—primarily in caravans of bullock-carts—to seek refuge across the new border: it was the largest exodus in history. Sixty-seven years later, it is as if that August never ended. Renowned historian and journalist Dilip Hiro provides a riveting account of the relationship between India and Pakistan, tracing the landmark events that led to the division of the sub-continent and the evolution

of the contentious relationship between Hindus and Muslims. To this day, a reasonable resolution to their dispute has proved elusive, and the Line of Control in Kashmir remains the most heavily fortified frontier in the world, with 400,000 soldiers arrayed on either side. Since partition, there have been several acute crises between the neighbors, including the secession of East Pakistan to form an independent Bangladesh in 1971, and the acquisition of nuclear weapons by both sides resulting in a scarcely avoided confrontation in 1999 and again in 2002. Hiro amply demonstrates the geopolitical importance of the India-Pakistan conflict by chronicling their respective ties not only with America and the Soviet Union, but also with China, Israel, and Afghanistan. Hiro weaves these threads into a lucid narrative, enlivened with colorful biographies of leaders, vivid descriptions of wars, sensational assassinations, gross violations of human rights—and cultural signifiers

like cricket matches. The Longest August is incomparable in its scope and presents the first definitive history of one of the world's longest-running and most intractable conflicts.

**Families in an Era of Increasing Inequality** - Paul R. Amato  
2014-10-07

The widening gap between the rich and the poor is turning the American dream into an impossibility for many, particularly children and families. And as the children of low-income families grow to adulthood, they have less access to opportunities and resources than their higher-income peers--and increasing odds of repeating the experiences of their parents. Families in an Era of Increasing Inequality probes the complex relations between

social inequality and child development and examines possibilities for disrupting these ongoing patterns. Experts across the social sciences track trends in marriage, divorce, employment, and family structure across socioeconomic strata in the U.S. and other developed countries. These family data give readers a deeper understanding of how social class shapes children's paths to adulthood and how those paths continue to diverge over time and into future generations. In addition, contributors critique current policies and programs that have been created to reduce disparities and offer suggestions for more effective alternatives. Among the topics covered: Inequality begins at home: the role of parenting in the diverging destinies of rich and poor children. Inequality begins outside the home: putting parental educational investments into context. How class and family structure impact the transition to adulthood. Dealing with the

consequences of changes in family composition. Dynamic models of poverty-related adversity and child outcomes. The diverging destinies of children and what it means for children's lives. As new initiatives are sought to improve the lives of families and children in the short and long term, Families in an Era of Increasing Inequality is a key resource for researchers and practitioners in family studies, social work, health, education, sociology, demography, and psychology.

Our Energy Future - Carla S. Jones 2016-02-16

Our Energy Future is an introductory textbook for the study of energy production, alternative and renewable fuels, and ways to build a sustainable energy future. Jones and Mayfield explore the creation and history of fossil fuels, their impact on the environment, and how they have become critical to our society. The authors also outline how adopting sustainable biofuels will be key to the future of energy stability

and discuss a number of renewable energy options and biofuel feedstocks that are replacements for petroleum-based products. Our society is consuming energy at an alarming rate, and the authors warn that continuing fuel-usage patterns could permanently damage the environment. This book emphasizes the importance of continued scientific, agricultural, and engineering development while it outlines the political and environmental challenges that will accompany a complete shift from fossil fuels to renewable energy and biomass. Our Energy Future is an accessible resource for undergraduate students studying biofuels and bioenergy.

**Challenges to Democratic Governance in Developing Countries** - Gedeon

Mudacumura 2014-01-04

Despite the large amounts of human and financial resources invested to foster democratic governance in developing countries, statistics show that the majority of these countries have not yet achieved significant improvements in living standards. While some regions make strides towards improving the living conditions of their citizens, Sub-Saharan Africa, for instance, is still trapped in poverty with more than 40% of its 600 million people living below the internationally recognized absolute poverty line of one US dollar per day. Poor governance and corruption should be highlighted as the most important systemic factors contributing to poverty in developing countries. As a result the institutional foundations of these countries are weakened, public funds are misappropriated, and policies and programs aimed at reducing poverty and fostering sustainable economic growth are undermined. It is therefore not surprising that a 2008

Transparency International report found a direct link between corruption and the failure of the societal institutions designed to achieve the Millennium Development Goals in the majority of developing countries. This book investigates the problems of democratic governance, particularly as they relate to corruption, and also whether democracy should be based on universal principles or local context and historical factors. It also analyses the rule of law, in promoting democratic governance and curbing corruption and if governmental, non-governmental organizations, and civil societies are effective in promoting democratic governance and curbing corruption. This book will go beyond identifying the challenges and offer plausible solutions that could be adapted to various developing countries. It is premised on the importance of bridging theory and practice, which has been lacking in most local and international development

publications, making of interest to scholars and policy-makers alike concerned with public administration in developing countries.

**Handbook of Transnational Crime and Justice** - Philip Reichel 2013-04-29

Transnational crime and justice will characterize the 21st century in same way that traditional street crimes dominated the 20th century. In the Handbook of Transnational Crime and Justice, Philip Reichel and Jay Albanese bring together top scholars from around the world to offer perspectives on the laws, crimes, and criminal justice responses to transnational crime. This concise, reader-friendly handbook is organized logically around four major themes: the problem of transnational crime; analysis of specific transnational crimes; approaches to its control; and regional geographical analyses. Each comprehensive chapter is designed to be explored as a stand-alone topic, making this handbook an important textbook and reference tool for

students and practitioners alike.

Chinese Maritime Power in the 21st Century - Hu Bo 2019-08-23

This book analyses China's maritime strategy for the 21st century, integrating strategic planning, policy thinking and strategic prediction. This book explains the construction and application of China's military, political, economic and diplomatic means for building maritime power, and predicts the future of China's maritime power by 2049, as well as development trends in global maritime politics. It explores both the strengths and the limitations of President Xi's 'Maritime Dream' and provides a candid assessment of the likely future balance at sea between China and the United States. This volume explains and discusses China's claims and intentions in the East and South China Seas and makes some recommendations for China's future policy that will lessen the chance of conflict with the United States and its closer neighbors. This book will

be of much interest to students of maritime strategy, naval studies, Chinese politics and International Relations in general.

**Malaysian Indians and**

**Education** - Rajendran

Nagappan 2022-11-30

This edited volume provides a comprehensive overview and discussion of the issues surrounding the Malaysian Indian community's educational development.

Malaysian Indian citizens who make up seven per cent of the population have their own set of strengths and weaknesses, while facing deep-seated socio-economic challenges.

Education is seen as an enabler which could significantly facilitate social and economic upward mobility, as shown in policies and practices implemented under the New Economic Policy, many of which have unfortunately bypassed the Indian Community. This book explores and assesses the various aspects of the education endeavour of Malaysian Indians, including primary, secondary, post-secondary and tertiary education. Related challenges include urban poverty, school dropouts, dysfunctional families and other socio-economic issues. It reconsiders educational equity policies and practices in place while proposing new initiatives which could support and chart a way forward for the development of Malaysian Indians. Importantly, the publication addresses the roles

of the government, private sector and civil society to help elevate the educational achievements of the Indian Community. The book will appeal to students and academics in the faculties of social science and comparative education, development economics and sociology, with a focus on access and equity in education. Proposals for change would be of interest to policy-makers and managers of educational and non-governmental organisations in plural societies.

Trade and Environment Governance at the World Trade Organization Committee on

Trade and Environment - Manuel Teehankee 2020-06-11

In the opinion of many, the most crucial issue confronting the world today lies in achieving a sustainable nexus among global trade, economic development, and the environment. This book, written by a prominent diplomat with extensive direct experience in this field, presents a much-needed critical perspective on the

conflict of norms among the three policy regimes, focusing on the dilemma of reconciling approaches regarding harmonized global governance and a more diverse community-based approach. It is the first and only in-depth treatment to systematically study a series of deliberations in the World Trade Organization's Committee on Trade and Environment (CTE), highlighting perspectives taken by both developed and developing economies. The book demonstrates that the CTE's contributions to the evolving trade and environment policy framework have been, contrary to popular perception, both substantial and relevant. In his review of how the particular characteristics of twenty key work outputs of the CTE impact current practice in trade and environment policy discussions, the author discusses such key issues and topics as the following: a singular harmonized global governance framework versus the centrifugal force of

community-based, localized or regional solutions that emphasize diversity and multifaceted institution building; drawbacks and continuing relevance of the CTE Work Agenda; issues related to carbon, intellectual property rights, and services; market access for environmental goods; requirements for environmental purposes relating to products, including standards and technical regulations, packaging, labeling, and recycling; and ways forward for combining global regimes with local solutions in an environmental context. Given the urgent need for making economic policies more coherent with sustainability and environmental goals, and for overcoming the ongoing stalemate between developed and developing countries on this matter, this book is sure to be warmly welcomed by policy makers and negotiators in the areas of both trade and environment, as well as by academics, theorists, and

experts in the field of global governance interested in formulating practical approaches to trade and environment governance and minimizing potential policy conflicts.

*The Securitization of Climate Change: Australian and United States' Military Responses (2003 - 2013)* - Michael Durant Thomas 2017-07-25

This book examines how the armed forces of the United States and Australia have responded to the threat posed by climate change to national security. Drawing on established securitisation frameworks ('Copenhagen' and 'Paris' Schools), the author uses a combination of quantitative and qualitative techniques to systematically examine more than 3,500 speeches, policies and doctrinal articles since 2003. Importantly, the author undertakes an examination of the intersection between the political and the military spheres, probing the question of how ideology has influenced the military's uptake on the

issue. In this context, the author identifies the difficulty of an ostensibly apolitical institution responding to what has become both a hyper-political issue and an unprecedented security threat. A close examination of the key political actors – their intent, outlook and political mandate for broader climate action – is therefore crucial to understanding the policy freedom and constraints within which military leaders operate. The book consists of eight chapters divided into four parts, focusing on: perspectives and methodological insights; empirical case studies; case study comparison; and concluding observations. • Offers a rare and systematic examination of military climate policy by a military officer from Australia • Identifies a divergence of Australian military climate policy from that of the US military during the Obama Administration • Develops a unique method that quantifies climate security, enabling a graphical representation for quick and

ready reference ideally suited to policy-makers

*The European Union and  
Russia* - Tuomas Forsberg  
2016-07-29

This important text provides  
readers with a systematic and  
comprehensive overview of the  
historic and ever-evolving  
relationship between Russia  
and the European Union, and  
on that basis discusses what  
the future of relations could  
look like. The EU's policy  
towards Russia can be  
regarded as one of the  
toughest tests of the credibility  
of its external relations, and in  
examining the dynamics of the

relationship, this book poses essential questions about the EU's ability to sustain itself as a meaningful entity in world politics. Written by two experts in the field, it analyses the political and institutional development of EU-Russia relations from three perspectives: European studies, Russian studies and International Relations, including Foreign Policy Analysis. The relationship between the European Union and Russia is of considerable importance to both partners, but whilst there have been many moments of co-operation between the two, tensions have never been far from the surface and the conflict over Ukraine brought it to a historical nadir. Both have taken steps to strengthen their relationship, but diplomatic stagnation and the challenge of furthering common economic, political, social, and environmental objectives have proved increasingly testing to relations over time. This important text provides readers with a systematic and comprehensive

overview of the historic and ever-evolving relationship between Russia and the European Union, suitable for students at undergraduate and postgraduate levels in European Studies, Russian Studies and International Relations theory.

**CSS Detective Guide -** Denise R. Jacobs 2010-04-02

One of the toughest challenges novice CSS developers face is when seemingly perfect code doesn't translate into a perfectly rendered browser page—and with all the different browsers available today, this happens all too often. The CSS Detective Guide aims to help, by teaching real world troubleshooting skills. You'll learn how to track clues, analyze the evidence, and get

to the truth behind CSS mysteries. These aren't pat solutions, but rather strategies for thinking about CSS. Author Denise Jacobs begins by going over the basics of CSS with a special emphasis on common causes of problems. Then she shows you methods for giving your code the third degree. Then you'll take a look at the line-up of usual suspects, the common problems and persistent bugs that are often encountered in CSS. Finally, you'll have the chance to play detective and find the guilty culprit in:

Pakistan at the Crossroads - Christophe Jaffrelot 2016-04-12  
In Pakistan at the Crossroads, top international scholars assess Pakistan's politics and economics and the challenges faced by its civil and military leaders domestically and diplomatically. Contributors examine the state's handling of internal threats, tensions between civilians and the military, strategies of political parties, police and law enforcement reform, trends in judicial activism, the rise of

border conflicts, economic challenges, financial entanglements with foreign powers, and diplomatic relations with India, China, Iran, Saudi Arabia, Afghanistan, and the United States. In addition to ethnic strife in Baluchistan and Karachi, terrorist violence in Pakistan in response to the American-led military intervention in Afghanistan and in the Federally Administered Tribal Areas by means of drones, as well as to Pakistani army operations in the Pashtun area, has reached an unprecedented level. There is a growing consensus among state leaders that the nation's main security threats may come not from India but from its spiraling internal conflicts, though this realization may not sufficiently dissuade the Pakistani army from targeting the country's largest neighbor. This volume is therefore critical to grasping the sophisticated interplay of internal and external forces complicating the country's recent trajectory.

Republic of Congo -  
International Monetary Fund  
2012-08-14

The government of the Republic of Congo launched a program aimed at consolidating peace and promoting economic and social development. The objectives included improvement of governance and consolidation of peace and security, promotion of growth and macroeconomic stability, improvement of public access to basic social services, improvement of the social environment, integration of disadvantaged groups, and combating HIV/AIDS. The review shows that much remains to be accomplished, and building on the significant gains of recent years, the decision to expand and strengthen the strategic poverty reduction framework was made.

**The EU's Democracy Promotion and the Mediterranean Neighbours** -

Ann-Kristin Jonasson  
2013-07-04

This book provides a

systematic analysis of the EU's extensive, but so far largely failed, efforts to promote democracy in the Mediterranean region, thoroughly assessing its democracy promotion in relation to two Mediterranean countries - Jordan and Turkey. By pinpointing essential prerequisites for democracy promotion and analyzing how the EU's policies have related to these, the author offers a theoretically based analytical framework focused on the importance of the local orientation and ownership of the project of democratization, and the broader dialogue between the democracy promoter and the partner society. The author concludes that there are basic deficiencies in the EU's democracy promotion, leading to policy implications of vital importance as the EU now grapples with how to make its democracy promotion successful. The EU's Democracy Promotion and the Mediterranean Neighbours will be of interest to students and

scholars of Democratisation studies, EU studies, Middle East Studies and EU Neighbourhood studies.

**The Diplomatic System of the European Union -**

Michael Smith 2015-06-12

Over the past five years, the EU has established a new system of diplomacy centred on the European External Action Service (EEAS) and the High Representative for Foreign Affairs and Security Policy. This new system reflects a process of evolution in a changing context, and has been faced by major challenges since its inception. This book examines the diplomatic system of the EU, locating it within the broader study of diplomacy and the European integration project. The volume is structured around the interrelated themes of institutional change and the evolving practices of EU diplomacy. It tracks the development of the EU's system of diplomacy, with particular reference to the implementation of the Lisbon Treaty, the establishment of

the EEAS and the emerging practices of EU strategic and structural diplomacy. Bringing together contributions from leading experts in the field, this book provides an original approach to the development and operation of the EU's diplomatic system. This book will be of interest to students and scholars of European Union international relations, European Union politics and diplomacy.

**Blue Economy of the Indian Ocean -** Ranadhir

Mukhopadhyay 2020-11-04

The economic paradigms currently dominating the world are not sustainable. The threats from climate change, exploitation-based approaches to commerce, and the excess acquisition of resources loom large as well as the possibility of military flare-ups. Maintaining a balance between development and ecosystems, aspirations for growth, and the need for sustainability is a prescient challenge. The Indian Ocean Region (IOR) encompasses some of the poorest countries in the world

and those that will bear the brunt of the negative impacts from climate change. This book explores the immense potential of the IOR and how best to maintain sustainable and responsible economic and strategic activities. The combination of science, innovation, and entrepreneurship will create a new blue economy business model, which has the potential to transform society. Based on critical analysis of the model and its practical applications, including risks as well as opportunities, the topics discussed range from food security, energy, and resilience to climate change, trade and investments, and improved maritime connectivity to tourism, poverty alleviation, and socioeconomic growth, encompassing a wide range of interests and expertise. FEATURES Examines the geopolitics, geo-resources, and geo-hazards of the IOR and identifies opportunities and methods to achieve success Covers a detailed assessment of available resources

(fisheries, minerals, energy), threats such as pollution (plastic, acoustic, carbon, bio-invasion), geo-politics (maritime security, military invasion), and strategic vision (determining carrying capacity, ethical governance, and responsible ecosystem) of the Indian Ocean Analyzes the economics of the blue economy, the global scenario including the Pacific and Caribbean islands, and the aspect of the Chinese geopolitical invasion in the Indian Ocean Inspires entrepreneurs to adopt new ways of creating economic benefits, reducing energy use, and increasing revenue while simultaneously helping the communities involved Discusses the threat and security perspectives of the IOR and the collective responsibility for a sustainable use of resources Crossing a wide range of interests and expertise, this book explores topics and ideas that will be essential to researchers and professionals in marine sciences, economics, business, geography, and political

sciences. Graduate students in the same fields as well as any and all organizations that maintain a presence in the IOR will likewise find this book to be a valuable resource.

*The Battle for Pakistan* - Shuja Nawaz 2020-04-10

The Battle for Pakistan showcases a marriage of convenience between unequal partners. The relationship between Pakistan and the United States since the early 1950s has been nothing less than a whiplash-inducing rollercoaster ride. Today, surrounded by hostile neighbors, with Afghanistan increasingly under Indian influence, Pakistan does not wish to break ties with the United States. Nor does it want to become a vassal of China and get caught in the vice of a US-China rivalry, or in the Arab-Iran conflict. Internally, massive economic and demographic challenges as well as the existential threat of armed militancy pose huge obstacles to Pakistan's development and growth. Could its short-run political

miscalculations in the Obama years prove too costly? Can the erratic Trump administration help salvage this relationship? Based on detailed interviews with key US and South Asian leaders, access to secret documents and operations, and the author's personal relationships and deep knowledge of the region, this book untangles the complex web of the US-Pakistani relationship and identifies a clear path forward, showing how the United States can build better partnerships in troubled corners of the world.

**Social cohesion in Gauteng** -

Richard Ballard 2019-03-14

Increasing attacks on foreigners, including in April 2015, along with a succession of widely publicised incidents of racism, have triggered a new round of soul-searching in South Africa. Why, after the comprehensive defeat of apartheid and its ideology, does prejudice seem so intractable? What kinds of interventions could help reduce these troubling events? How can society be made more

'cohesive'? Suggestions about what to do in the face of these challenges are sometimes speculative and wishful. They consist of appeals to the better nature of ordinary people, or an assumption that the feel good moments of the democratic transition can be re-enacted to bind everyone together. Calls for social cohesion and tolerance seem often to dodge the complex vicious cycles that lead to the instances of intolerance that erupt in the media or in communities. This Research Report centres on better understanding the current dynamics of social cohesion in Gauteng. It tackles five guiding questions, each of which corresponds to a chapter: 1. How has social cohesion become a goal in post-apartheid South Africa, and what are the key limitations resulting from this understanding of social progress? 2. In a global context, how is social cohesion defined and what are the main contestations about this ideal of social change? 3. How do the

respondents in the GCRO's Quality of Life IV (2015/16) survey respond to questions on levels of trust, claims to belonging by different race groups, and the place of migrants and gays and lesbians in Gauteng? 4. How have past and present initiatives to improve social cohesion conceived of the problem they are attempting to address, and what is their scale of intervention? 5. What are the various methodologies that have been used in past and present initiatives to improve social cohesion? A key premise of this research was that our society has an enormous accumulation of experience in trying to tackle anti-social interactions and to address social injustices that are, in various ways, shaped by race, class, nationality, gender, sexuality and other identities. The last two chapters of this report are based on a review of more than 60 social cohesion initiatives. They analyse the wide variety of actors involved in such work, the different ways in which they conceive of

their objectives, and the different scales at which they operate. These actors pursue dozens of different methodologies including sports and dialogue, arts, psychology, urban design, and public campaigns. This dispersed capacity through society is important because it represents experience-based responses to the ways in which anti-social behaviour and social injustice are reproduced. In attempting to determine a programme of action, we argue that we should learn from and extend existing and past attempts to tackle these difficulties.

Each lesson builds on what's come before, showing you exactly how to use HTML, CSS, and JavaScript together to create great web sites.

### **Biochar for Environmental Management** - Johannes

Lehmann 2012-05-16

Biochar is the carbon-rich product when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its stability in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with major implications for

mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. This book is the first to synthesize the expanding research literature on this topic. The book's interdisciplinary approach, which covers engineering, environmental sciences, agricultural sciences, economics and policy, is a vital tool at this stage of biochar technology development. This comprehensive overview of current knowledge will be of interest to advanced students, researchers and professionals in a wide range of disciplines.

### **Central Asia** - Ajay Patnaik 2016-03-31

Throughout history, Central Asia has formed an important strategic link between the East and the West and been described as the 'great pivot' in the early-twentieth century. This book looks at the relations between the Central Asian states and major external powers. It shows how these nations have kept the fragile

geopolitics of the region free of the so-called 'New Great Game'. The volume evaluates the roles of major powers such as Russia, United States, China, Iran, and Turkey, as well as India and its 'Silk Road Strategy'. It also compares the regional geopolitics of Central Asia with its neighbour Caucasus. The study indicates how, despite limited inter-state cooperation, the region has prevented conflicts and wars, due to which these states have been able to enjoy greater strategic autonomy in their dealings with other countries. The book will benefit scholars and researchers of international relations, political and strategic studies, area studies, and Central Asian studies apart from the interested general reader.

Cyber Influence and Cognitive Threats - Vladlena Benson

2019-09-27

In the wake of fresh allegations that personal data of Facebook users have been illegally used to influence the outcome of the US general election and the Brexit vote, the debate over

manipulation of social Big Data continues to gain more momentum. Cyber Influence and Cognitive Threats addresses various emerging challenges in response to cybersecurity, examining cognitive applications in decision-making, behaviour and basic human interaction. The book examines the role of psychology in cybersecurity by addressing each factor involved in the process: hackers, targets, cybersecurity practitioners, and the wider social context in which these groups operate. Cyber Influence and Cognitive Threats covers a variety of topics including information systems, psychology, sociology, human resources, leadership, strategy, innovation, law, finance and others. Explains psychological factors inherent in machine learning and artificial intelligence Explores attitudes towards data and privacy through the phenomena of digital hoarding and protection motivation theory Discusses the role of social and communal factors in

cybersecurity behaviour and attitudes Investigates the factors that determine the spread and impact of

information and disinformation
